Advanced Thermostat Management

Complete Energy Solutions – Automated Demand Response

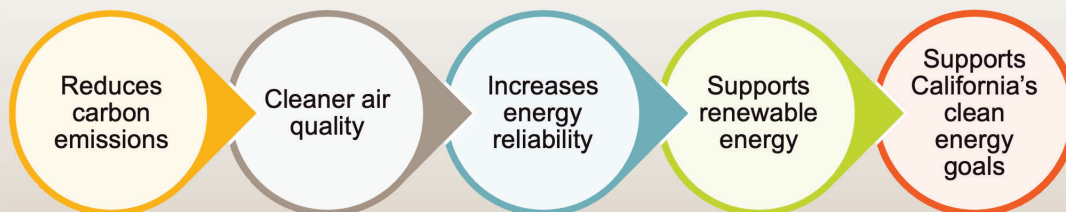

The electricity we deliver is now cleaner than ever and by 2030, 100% of our power will come from carbon-free sources. As your community-owned, not-for-profit electric service, we're proud to lead the way in delivering carbon-free energy solutions for your business, including our Advanced Thermostat Management offer.

What is Advanced Thermostat Management?

In the summer months, energy demand is at its greatest and we need the help of our community to maintain a reliable power grid. This is where our Advanced Thermostat Management partners come in. In the event of a power emergency, we call on the support of our Advanced Thermostat

Management participants to reduce energy consumption. By integrating automated response capabilities into your HVAC system, your energy use will automatically scale back when demand for electricity is at its peak.

Benefits of Advanced Thermostat Management

Powering forward. Together.

Advanced Thermostat Management

Complete Energy Solutions – Automated Demand Response

Features of Advanced Thermostat Management

- Free technical assistance, including assessment, set-up, and training.
- Technologies incentives to help get you set up: \$125/thermostat, up to 30 thermostats.
- You get paid for saving electricity and supporting our goal to be a carbon-free Clean PowerCitySM by 2030.
- Set it and forget it – once the new thermostat has been installed and set you no longer have to think about it. Participation will happen automatically with communication given in advance of events.
- Manages your systems automatically to reduce electricity consumption in times of high demand.
- Run your business more efficiently and improve system performance and productivity.

Here's how it works

- Event season: June 1 – September 30
- Thermostat goes up 4 degrees during an event
- You can opt out from an event twice per season
- Receive a \$20 incentive per thermostat post season
