

In the opinion of Orrick, Herrington & Sutcliffe LLP, Bond Counsel to SMUD, based upon an analysis of existing laws, regulations, rulings and court decisions and, assuming, among other matters, the accuracy of certain representations and compliance with certain covenants, interest on the 2024 Series M Bonds is excluded from gross income for federal income tax purposes under Section 103 of the Internal Revenue Code of 1986 and is exempt from State of California personal income taxes. In the further opinion of Bond Counsel, interest on the 2024 Series M Bonds is not a specific preference item for purposes of the federal individual alternative minimum tax. Bond Counsel observes that interest on the 2024 Series M Bonds included in adjusted financial statement income of certain corporations is not excluded from the federal corporate alternative minimum tax. Bond Counsel expresses no opinion regarding any other tax consequences related to the ownership or disposition of, or the amount, accrual or receipt of interest on, the 2024 Series M Bonds. See "TAX MATTERS."

\$250,000,000

**ELECTRIC REVENUE BONDS, 2024 SERIES M
(GREEN BONDS)**

Dated: Date of Delivery

Due: November 15, as shown on the inside cover

The Electric Revenue Bonds, 2024 Series M (the "2024 Series M Bonds") will be issued pursuant to the provisions of Resolution No. 6649 of the Sacramento Municipal Utility District ("SMUD"), as amended and supplemented, and will be payable from the Net Revenues of the Electric System of SMUD, as described herein. The 2024 Series M Bonds are being issued to (i) finance and refinance certain improvements and additions to SMUD's Electric System, including by paying the outstanding principal amount of SMUD's commercial paper notes at maturity, and (ii) pay certain costs associated with the issuance of the 2024 Series M Bonds. See "PLAN OF FINANCE."

The 2024 Series M Bonds will mature in the years and amounts as shown on the inside cover. Interest on the 2024 Series M Bonds will accrue at the rates set forth on the inside cover and be payable on November 15, 2024, and semiannually thereafter on each May 15 and November 15.

The 2024 Series M Bonds are subject to redemption prior to maturity as described herein. See "THE 2024 SERIES M BONDS – Redemption Provisions."

The 2024 Series M Bonds have been designated as "Green Bonds." Kestrel has provided an independent external review and opinion that the 2024 Series M Bonds conform with the four core components of the International Capital Market Association of Green Bond Principles, and therefore qualify for Green Bonds designation. See "DESIGNATION OF 2024 SERIES M BONDS AS GREEN BONDS" herein and APPENDIX G – "SECOND PARTY OPINION" hereto for more information.

The 2024 Series M Bonds will be issued in fully registered form and, when issued, will be registered in the name of Cede & Co., as nominee of The Depository Trust Company, New York, New York ("DTC"). DTC will act as securities depository (the "Securities Depository") for the 2024 Series M Bonds. Individual purchases of interests in the 2024 Series M Bonds may be made in book-entry form only, in the principal amount of \$5,000 or any integral multiple thereof. Purchasers of such interests will not receive certificates representing their interests in the 2024 Series M Bonds. Principal and interest are payable directly to the Securities Depository by U.S. Bank Trust Company, National Association, Trustee and Paying Agent. Upon receipt of payments of principal and interest, the Securities Depository will in turn remit such principal and interest to the Securities Depository's Direct Participants (as such term is herein defined) for subsequent disbursement to the purchasers of interests in the 2024 Series M Bonds, as described herein. See APPENDIX C – "BOOK-ENTRY SYSTEM."

The principal of and interest on the 2024 Series M Bonds, together with the debt service on other Parity Bonds (as defined herein), are payable exclusively from and secured by a pledge of the Net Revenues of the Electric System of SMUD. Neither the credit nor the taxing power of SMUD or the State of California is pledged to the payment of the 2024 Series M Bonds.

The information presented on this cover page is for general reference only and is qualified in its entirety by reference to the entire Official Statement and the documents summarized and described herein.

The 2024 Series M Bonds are offered when, as and if issued and received by the Underwriters, subject to the approval of the validity of the 2024 Series M Bonds and certain other legal matters by Orrick, Herrington & Sutcliffe LLP, Bond Counsel to SMUD. Certain legal matters will be passed on for the Underwriters by their counsel, Nixon Peabody LLP, San Francisco, California. It is expected that the 2024 Series M Bonds will be available for delivery through the facilities of DTC on or about April 11, 2024.

No dealer, broker, salesperson or other person has been authorized by SMUD or the Underwriters to give any information or to make any representations with respect to the 2024 Series M Bonds other than those contained in this Official Statement and, if given or made, such information or representations must not be relied upon as having been authorized by any of the foregoing. This Official Statement does not constitute an offer to sell nor the solicitation of an offer to buy, nor shall there be any sale of the 2024 Series M Bonds by any person in any jurisdiction in which it is unlawful for such person to make such offer, solicitation or sale. The information set forth herein has been obtained from SMUD and other sources which are believed to be reliable, but it is not guaranteed as to accuracy or completeness by, and is not to be construed as a representation of, the Underwriters. The information and expressions of opinion stated herein are subject to change without notice. The delivery of this Official Statement shall not, under any circumstances, create any implication that there has been no change in the affairs of SMUD since the date hereof. The Underwriters have provided the following sentence for inclusion in this Official Statement: The Underwriters have reviewed the information in this Official Statement in accordance with and as part of their responsibilities to investors under the federal securities laws as applied to the facts and circumstances of this transaction, but the Underwriters do not guarantee the accuracy or completeness of such information.

The 2024 Series M Bonds have not been registered under the Securities Act of 1933, as amended, in reliance upon an exemption from the registration requirements contained in such Act. The 2024 Series M Bonds have not been registered or qualified under the securities laws of any state.

CAUTIONARY STATEMENTS REGARDING FORWARD-LOOKING STATEMENTS IN THIS OFFICIAL STATEMENT

Certain statements included or incorporated by reference in this Official Statement constitute “forward-looking statements.” Such statements generally are identifiable by the terminology used, such as “plan,” “expect,” “estimate,” “budget” or other similar words.

The achievement of certain results or other expectations contained in such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements described to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. SMUD does not plan to issue any updates or revisions to those forward-looking statements if or when its expectations or events, conditions or circumstances on which such statements are based occur.

This Official Statement, including any supplement or amendment hereto, is intended to be deposited with the Municipal Securities Rulemaking Board through the Electronic Municipal Market Access website. SMUD maintains a website and social media accounts. However, the information presented therein is not part of this Official Statement and should not be relied upon in making investment decisions with respect to the 2024 Series M Bonds. The references to internet websites in this Official Statement are shown for reference and convenience only; unless explicitly stated to the contrary, the information contained within the websites is not incorporated herein by reference and does not constitute part of this Official Statement.

OFFICIAL STATEMENT
Relating to
SACRAMENTO MUNICIPAL UTILITY DISTRICT
\$250,000,000
ELECTRIC REVENUE BONDS, 2024 SERIES M
INTRODUCTION

This Official Statement, including the cover page and Appendices attached hereto, describes the Sacramento Municipal Utility District (“SMUD”), a political subdivision of the State of California (the “State”), and its \$250,000,000 Electric Revenue Bonds, 2024 Series M (the “2024 Series M Bonds”), in connection with the sale by SMUD of the 2024 Series M Bonds. The 2024 Series M Bonds are being issued to (i) finance and refinance certain improvements and additions to SMUD’s Electric System, including by paying the outstanding principal amount of SMUD’s commercial paper notes at maturity, and (ii) pay certain costs associated with the issuance of the 2024 Series M Bonds. See “PLAN OF FINANCE.”

The 2024 Series M Bonds are part of an Electric Revenue Bond authorization of SMUD and are issued pursuant to Resolution No. 6649 (the “Master Resolution”) adopted in 1971, as amended and supplemented, and applicable California law, including Article 6a of Chapter 6 of the Municipal Utility District Act (Public Utilities Code Sections 12850 to 12860) (the “Act”), the Revenue Bond Law of 1941 (Government Code Section 54300 *et seq.*) and Article 11 of Chapter 3 of Part 1 of Division 2 of Title 5 of the California Government Code (Government Code Section 53580 *et seq.*). The issuance of the 2024 Series M Bonds was authorized on March 21, 2024, by the Board of Directors of SMUD by a Sixty-Seventh Supplemental Resolution (the “Sixty-Seventh Supplemental Resolution”) supplemental to the Master Resolution. The Master Resolution and all supplemental resolutions, including the Sixty-Seventh Supplemental Resolution, are collectively referred to herein as the “Resolution.” See APPENDIX D — “SUMMARY OF CERTAIN PROVISIONS OF THE RESOLUTION.”

The purchasers of the 2024 Series M Bonds, by virtue of their purchase of the 2024 Series M Bonds, will consent to certain amendments to the Resolution. See “SECURITY FOR THE BONDS – Consent to Amendments to the Resolution.”

The 2024 Series M Bonds and other bonds issued on a parity therewith pursuant to the Resolution are collectively referred to herein as the “Bonds.” The Bonds, together with other Parity Bonds (as defined herein), are payable solely from the Net Revenues of the Electric System. See “SECURITY FOR THE BONDS.” As of December 31, 2023, Bonds in the aggregate principal amount of \$1,783,965,000 were outstanding under the Resolution.

The issuance of the 2024 Series M Bonds is a component of a plan of finance (the “Plan of Finance”) that includes the issuance of SMUD’s Electric Revenue Refunding Bonds, 2024 Series N (the “2024 Series N Bonds”) to refund certain of SMUD’s outstanding Bonds (the “Refunded Bonds”). The issuance of the 2024 Series M Bonds is not contingent upon the implementation of the other components of the Plan of Finance, and SMUD is not obligated to implement any of the components of the Plan of Finance. If the Plan of Finance is implemented in whole, then upon completion of the Plan of Finance, Bonds in the aggregate principal amount of \$1,983,575,000 are expected to be outstanding under the Resolution. See “PLAN OF FINANCE.”

Although the Resolution establishes an “Electric Revenue Bond Reserve Fund” (the “Reserve Fund”), the Reserve Fund does *not* secure and will *not* be available to pay debt service on the 2024 Series M Bonds. The Reserve Fund secures all Bonds issued prior to January 1, 2004 that are currently outstanding (and not otherwise deemed to be paid and discharged under the Resolution) and may secure additional Bonds issued in the future.

U.S. Bank Trust Company, National Association serves as trustee and paying agent under the Resolution (in such capacities, the “Trustee” and the “Paying Agent” respectively).

From time to time, SMUD issues Subordinated Electric Revenue Bonds (the “Subordinated Bonds”) pursuant to Resolution No. 85-11-1 of SMUD, adopted on November 7, 1985, as amended and supplemented (the “Subordinate Resolution”). As of December 31, 2023, Subordinated Bonds in the aggregate principal amount of \$332,020,000 were outstanding. The Subordinated Bonds are payable solely from the Net Subordinated Revenues of the Electric System and are subordinate in right of payment to the prior payment of principal of and interest on the Bonds (including the 2024 Series M Bonds).

SMUD also issues commercial paper notes (the “Notes”) from time to time. As of December 31, 2023, Notes in the principal amount of \$150,000,000 were outstanding. Currently, Notes in the aggregate principal amount of \$400,000,000 may be outstanding at any one time, but SMUD reserves the right to increase or decrease the aggregate principal amount of the Notes that may be outstanding at any one time in the future. The Notes are secured by letters of credit issued by commercial banks. The Notes (and SMUD’s obligations to repay drawings under the letters of credit) are payable solely from available revenues of SMUD’s Electric System and are subordinate in right of payment to the prior payment of principal of, premium if any, and interest on the Bonds (including the 2024 Series M Bonds) and the Subordinated Bonds. Drawings under the letters of credit, to the extent not repaid immediately from the proceeds of commercial paper or other available SMUD funds, are repayable with interest over a period of five years. The letters of credit currently expire in August of 2025 and March of 2027. SMUD expects to pay all \$150,000,000 of the outstanding principal amount of the Notes with a portion of the proceeds of the 2024 Series M Bonds. See “PLAN OF FINANCE.”

SMUD has also previously issued its taxable and tax-exempt revolving notes pursuant to a revolving credit agreement with a commercial bank (collectively, the “Revolving Credit Facility”). As of December 31, 2023, no principal amount was outstanding under the Revolving Credit Facility. Currently, the aggregate principal amount that can be outstanding under the Revolving Credit Facility at any one time is limited to \$100,000,000. However, SMUD reserves the right to increase or decrease the aggregate principal amount that can be outstanding at any one time under the Revolving Credit Facility in the future. SMUD’s payment obligations under the Revolving Credit Facility are payable solely from available revenues of SMUD’s Electric System and are subordinate in right of payment to the prior payment of principal of, premium if any, and interest on the Bonds (including the 2024 Series M Bonds) and the Subordinated Bonds. The current term of the Revolving Credit Facility expires in February 2026.

SMUD is responsible for the acquisition, generation, transmission and distribution of electric power to its service area, which includes most of Sacramento County and small portions of Placer and Yolo counties. For the year ended December 31, 2023, SMUD served a population of approximately 1.5 million with a total annual retail load of approximately 10,104 million kilowatt hours (“kWh”). SMUD owns and operates an electric system which, as of December 31, 2023, included generating facilities owned and operated by SMUD with an aggregate generating capacity of approximately 775 megawatts (“MW”), local gas-fired plants owned and operated by a joint powers authority and managed by SMUD with an aggregate generating capacity of approximately 1,087 MW, over which SMUD has exclusive control of dispatch, and purchased power with an aggregate generating capacity of approximately 1,590

MW and transmission and distribution facilities. SMUD’s power requirements exceed its generating capacity and thus SMUD has agreements with others (including the Local Gas-Fired Plants as defined in APPENDIX A) for the purchase of a portion of its power requirements. See APPENDIX A – “INFORMATION REGARDING SACRAMENTO MUNICIPAL UTILITY DISTRICT – POWER SUPPLY AND TRANSMISSION – Power Supply Resources.” Continuing development of SMUD’s business strategy in response to changing environmental and regulatory requirements has had, and is expected to continue to have, a major effect on SMUD’s power supply planning. See APPENDIX A – “INFORMATION REGARDING SACRAMENTO MUNICIPAL UTILITY DISTRICT – BUSINESS STRATEGY.”

Pursuant to a Continuing Disclosure Agreement, dated the date of issuance of the 2024 Series M Bonds (the “Continuing Disclosure Agreement”) between SMUD and the Trustee, SMUD will covenant for the benefit for the holders of the 2024 Series M Bonds and owners of beneficial interest in the 2024 Series M Bonds to provide certain financial information and operating data and to provide certain notices. See “CONTINUING DISCLOSURE UNDERTAKING” and APPENDIX F – “FORM OF CONTINUING DISCLOSURE AGREEMENT.”

The information presented in this Introduction is qualified in its entirety by reference to this entire Official Statement and the documents summarized or described herein. This Official Statement, including the Appendices, summarizes the terms of the 2024 Series M Bonds, the Resolution and certain agreements, contracts and other arrangements, some of which currently exist and others of which may exist in the future. The summaries of and references to all documents, statutes, regulations and other instruments referred to herein do not purport to be complete, comprehensive or definitive, and each such summary and reference is qualified in its entirety by reference to each such document, statute, regulation or instrument.

Capitalized terms not otherwise defined in this Official Statement shall have the meanings ascribed thereto in APPENDIX D – “SUMMARY OF CERTAIN PROVISIONS OF THE RESOLUTION – Certain Definitions” or in the Resolution.

PLAN OF FINANCE

Issuance of 2024 Series M Bonds

The proceeds of the 2024 Series M Bonds will be used to (i) finance and refinance certain improvements and additions to SMUD’s Electric System, including by paying the outstanding principal amount of SMUD’s commercial paper notes at maturity, and (ii) pay certain costs associated with the issuance of the 2024 Series M Bonds. The issuance of the 2024 Series M Bonds is a component of the Plan of Finance, as further described below. The issuance of the 2024 Series M Bonds is not contingent upon the implementation of the other components of the Plan of Finance, and SMUD is not obligated to implement any of the components of the Plan of Finance.

Issuance of 2024 Series N Bonds and Refunding of Refunded Bonds

Concurrently with the issuance of the 2024 Series M Bonds, SMUD expects to issue approximately \$399,610,000 aggregate principal amount of the 2024 Series N Bonds to (i) refund the \$200,000,000 outstanding principal amount of the Sacramento Municipal Utility District Electric Revenue Bonds, 2009 Series V (the “2009 Series V Bonds”), (ii) refund the \$250,000,000 outstanding principal amount of the Sacramento Municipal Utility District Electric Revenue Bonds, 2010 Series W (the “2010 Series W Bonds” and, together with the 2009 Series V Bonds, the “Refunded Bonds”) and (iii) pay certain costs associated with the issuance of the 2024 Series N Bonds.

The Refunded Bonds were issued as bonds designated as “Build America Bonds” under the provisions of the American Recovery and Reinvestment Act of 2009 (the “Recovery Act”). At the time the Refunded Bonds were issued, SMUD expected to receive cash subsidy payments from the United States Treasury equal to 35% of the interest payable on the Refunded Bonds as required by sections 54AA and 6431 of the Internal Revenue Code of 1986, as amended (the “Code”) (as such sections were added to the Code by the Recovery Act). However, as a result of the enactment of the Budget Control Act of 2011 (the “Budget Control Act”) and the American Taxpayer Relief Act of 2012 (the “Taxpayer Relief Act”) the subsidy payments for the Refunded Bonds became subject to sequestration and have been reduced to an amount less than 35% of the interest payable on the Refunded Bonds as originally required by sections 54AA and 6431 of the Code. See also APPENDIX A – “INFORMATION REGARDING SACRAMENTO MUNICIPAL UTILITY DISTRICT – CAPITAL REQUIREMENTS AND OUTSTANDING INDEBTEDNESS – Outstanding Indebtedness – *Build America Bonds Subsidy Payments.*”

The 2009 Series V Bonds are subject to extraordinary optional redemption upon the occurrence of an “Extraordinary Event.” Pursuant to the extraordinary optional redemption provisions for the 2009 Series V Bonds, an “Extraordinary Event” will have occurred if SMUD determines that a material adverse change has occurred to Section 54AA or 6431 of the Code (as such Sections were added by Section 1531 of the Recovery Act, pertaining to Build America Bonds) or there is any guidance published by the Internal Revenue Service or the United States Treasury with respect to such Sections or any other determination by the Internal Revenue Service or the United States Treasury, which determination is not the result of an act or omission by SMUD to satisfy the requirements to receive the 35% cash subsidy payment from the United States Treasury, pursuant to which SMUD’s 35% cash subsidy payment from the United States Treasury is reduced or eliminated.

The 2010 Series W Bonds are subject to extraordinary optional redemption upon the occurrence of a “Tax Law Change.” Pursuant to the extraordinary optional redemption provisions for the 2010 Bonds, “Tax Law Change” means legislation has been enacted by the Congress of the United States or passed by either House of the Congress, or a decision has been rendered by a court of the United States, or an order, ruling, regulation (final, temporary or proposed) or official statement has been made by or on behalf of the Treasury Department of the United States, the Internal Revenue Service or other governmental agency of appropriate jurisdiction, the effect of which, as reasonably determined by SMUD, would be to suspend, reduce or terminate the payment from the United States Treasury to SMUD with respect to the 2010 Series W Bonds, or to state or local government issuers generally with respect to obligations of the general character of the 2010 Series W Bonds, pursuant to Sections 54AA or 6431 of the Code of an amount equal to 35% of the interest due thereon on each interest payment date (the “Subsidy Payments”); provided, that such suspension, reduction or termination of the Subsidy Payments is not due to a failure by the District to comply with the requirements under the Code to receive such Subsidy Payments.

The extraordinary optional redemption provisions for each series of the Refunded Bonds are described in the related Official Statement for such series of Refunded Bonds. The Official Statements for the Refunded Bonds can be found at the following links:

2009 Series V Bonds: <https://emma.msrb.org/EP520561-EP406639-EP803941.pdf>

2010 Series W Bonds: <https://emma.msrb.org/EA393164-EA308929-EA704612.pdf>

The foregoing links are provided for reference and convenience only. The Official Statements for the Refunded Bonds are not incorporated herein by reference and do not constitute part of this Official Statement.

Based on publicly available news reports, SMUD is aware that certain other issuers who have exercised or notified investors that they intend to exercise extraordinary redemption provisions to redeem “Build America Bonds” have received written communication from certain holders of the bonds being redeemed which disputed whether the conditions allowing the extraordinary redemption provisions to be exercised had occurred, and therefore disputing those issuers’ right to redeem the bonds under those extraordinary redemption provisions. However, for various reasons, including but not limited to, the enactment of the Budget Control Act and the Taxpayer Relief Act and the resulting reduction of the cash subsidy payments required to be paid by the United States Treasury to SMUD with respect to the Refunded Bonds pursuant to section 6431 of the Code, SMUD has determined that an “Extraordinary Event” has occurred with respect to the 2009 Series V Bonds and that a “Tax Law Change” has occurred with respect to the 2010 Series W Bonds. Therefore, SMUD expects to redeem the Refunded Bonds pursuant to the extraordinary optional redemption provisions applicable to each series of the Refunded Bonds.

If the 2024 Series N Bonds are issued, SMUD expects to use the proceeds of the 2024 Series N Bonds as follows:

A portion of the proceeds of the 2024 Series N Bonds, together with other available funds, will be used to pay the interest on the 2009 Series V Bonds due on the date of issuance of the 2024 Series N Bonds (the “2009 Series V Redemption Date”) and to redeem the 2009 Series V Bonds on the 2009 Series V Redemption Date at the redemption price calculated as described in the Official Statement for the 2009 Series V Bonds.

A portion of the proceeds of the 2024 Series N Bonds will be deposited in an escrow fund (the “Escrow Fund”) established under an escrow agreement between SMUD and the Trustee. The moneys so deposited will be invested in permitted escrow securities (the “Escrow Securities”), the interest on and principal of which, together with other available funds, are expected to be in an amount sufficient to redeem the 2010 Series W Bonds on May 15, 2024 (the “2010 Series W Redemption Date”), at the redemption price calculated as described in the Official Statement for the 2010 Series W Bonds. On the 2010 Series W Redemption Date, other available funds of SMUD will be used to pay the interest due on the 2010 Series W Bonds on the 2010 Series W Redemption Date. Notwithstanding the deposit to the Escrow Fund, the 2010 Series W Bonds will remain outstanding, and SMUD will remain liable for the payment of the principal and redemption price of and interest on the 2010 Series W Bonds, until the 2010 Series W Bonds are actually redeemed in full on the 2010 Series W Redemption Date. The Escrow Securities and moneys in the Escrow Fund will not secure the 2024 Series M Bonds and will not be available to pay the principal of or interest on the 2024 Series M Bonds.

DESIGNATION OF 2024 SERIES M BONDS AS GREEN BONDS

General

The 2024 Series M Bonds have been designated as “Green Bonds.” The information set forth below concerning (1) Kestrel in its role as a verifier and (2) the determination that the 2024 Series M Bonds are in conformance with the four core components of the ICMA Green Bond Principles has been extracted from materials provided by Kestrel and neither SMUD nor the Underwriters undertake any responsibility for the accuracy or completeness of any such information. Neither SMUD nor the Underwriters make any representation regarding the applicability or suitability of the determination that the 2024 Series M Bonds are in conformance with the four core components of the ICMA Green Bond Principles. The term “Green Bonds” is neither defined in nor related to the Master Indenture or the Sixty-Seventh Supplemental Resolution. The use of such term in this Official Statement is solely for identification purposes and is not intended to provide or imply that the owners of the 2024 Series M

Bonds are entitled to any security other than as provided in the Master Resolution and the Sixty-Seventh Supplemental Resolution, as described under the heading “SECURITY FOR THE BONDS.”

No party, including SMUD, has assumed any obligation to ensure that the projects financed or refinanced with the proceeds of the 2024 Series M Bonds comply with any legal or other standards or principles that may relate to “Green Projects” or that the 2024 Series M Bonds comply with any legal or other standards or principles that may be related to “Green Bonds.” No assurance can be given that a clear definition of green will develop over time, or that, if developed, it will include the projects to be financed or refinanced with the proceeds of the 2024 Series M Bonds. Accordingly, no assurance is or can be given to investors that any uses of the 2024 Series M Bonds will meet investor expectations regarding green or other equivalently labeled performance objectives with respect to the projects to be financed or refinanced with proceeds of the 2024 Series M Bonds.

Green Bonds Designation

Per the International Capital Market Association (“ICMA”), Green Bonds are any type of bond instrument where the proceeds will be exclusively applied to finance or refinance, in part or in full, new and/or existing eligible Green Projects and which are aligned with the four core components of the Green Bond Principles. The four core components are: 1. Use of Proceeds; 2. Process for Project Evaluation and Selection; 3. Management of Proceeds; and 4. Reporting.

Kestrel has determined that the 2024 Series M Bonds are in conformance with the four core components of the ICMA Green Bond Principles, as described in Kestrel’s “Second Party Opinion,” which is attached hereto as APPENDIX G.

Independent Second Party Opinion on Green Bonds Designation and Disclaimer

For over 20 years, Kestrel has been consulting in sustainable finance. Kestrel is an Approved Verifier accredited by the Climate Bonds Initiative and an Observer for the ICMA Green Bond Principles and Social Bond Principles. Kestrel reviews transactions in all asset classes worldwide for alignment with ICMA Green Bond Principles, Social Bond Principles, Sustainability Bond Guidelines and the Climate Bonds Initiative Standards and Criteria.

The Second Party Opinion issued by Kestrel does not and is not intended to make any representation or give any assurance with respect to any other matter relating to the 2024 Series M Bonds. Second Party Opinions provided by Kestrel are not a recommendation to any person to purchase, hold, or sell the 2024 Series M Bonds and designations do not address the market price or suitability of the 2024 Series M Bonds for a particular investor and do not and are not in any way intended to address the likelihood of timely payment of interest or principal when due.

In issuing the Second Party Opinion, Kestrel has assumed and relied upon the accuracy and completeness of the information made publicly available by SMUD or that was otherwise made available to Kestrel.

ESTIMATED SOURCES AND USES OF FUNDS

The estimated sources and uses of funds with respect to the 2024 Series M Bonds are as follows:

Sources of Funds:

Principal Amount	\$250,000,000.00
Original Issue Premium	28,735,514.10
SMUD Contribution	239,201.74
Total Sources of Funds	<u>\$278,974,715.84</u>

Uses of Funds:

Payment of Notes	\$150,000,000.00
Reimbursable Capital	128,218,393.06
Costs of Issuance (including Underwriters' Discount)	756,322.78
Total Uses of Funds	<u>\$278,974,715.84</u>

THE 2024 SERIES M BONDS

The 2024 Series M Bonds will mature in the years and amounts and bear interest at the rates set forth on the inside cover page hereof. Interest on the 2024 Series M Bonds will accrue from the date of delivery of the 2024 Series M Bonds, and will be payable on November 15, 2024, and semiannually thereafter on each May 15 and November 15 (each, an "Interest Payment Date") to the owners thereof as of the first day of the month (whether or not such day is a Business Day) in which an Interest Payment Date occurs (each, a "Record Date").

The 2024 Series M Bonds will be issued in fully registered form and, when issued, will be registered in the name of Cede & Co., as nominee of The Depository Trust Company, New York, New York ("DTC"). DTC will act as securities depository (the "Securities Depository") for the 2024 Series M Bonds. Individual purchases of interests in the 2024 Series M Bonds will be made in book-entry form only, in the principal amount of \$5,000 or any integral multiple thereof. Purchasers of such interests will not receive certificates representing their interests in the 2024 Series M Bonds. Principal and interest are payable directly to the Securities Depository by the Trustee. Upon receipt of payments of principal and interest, the Securities Depository will in turn remit such principal and interest to the Securities Depository's Direct Participants (as such term is hereinafter defined) for subsequent disbursement to the purchasers of interests in the 2024 Series M Bonds. See APPENDIX C – "BOOK-ENTRY SYSTEM."

Redemption Provisions

Optional Redemption. On any date on or after May 15, 2034, the 2024 Series M Bonds are subject to redemption prior to their stated maturities at the option of SMUD, from any source of available funds, as a whole or in part, by lot, at the principal amount thereof, without premium, together with accrued interest to the date fixed for redemption.

Mandatory Redemption. The 2024 Series M Bonds maturing on November 15, 2049, are subject to mandatory redemption prior to maturity, in part, by lot, from sinking fund payments required for the 2024 Series M Bonds by the Sixty-Seventh Supplemental Resolution at the principal amount thereof together with the accrued interest thereon to the date fixed for redemption, without premium, as shown below:

Sinking Fund Payment Dates (November 15)	Principal Amount
2046	\$13,785,000
2047	14,475,000
2048	15,200,000
2049 [†]	15,960,000

[†] Maturity.

The 2024 Series M Bonds maturing on November 15, 2054, are subject to mandatory redemption prior to maturity, in part, by lot, from sinking fund payments required for the 2024 Series M Bonds by the Sixty-Seventh Supplemental Resolution at the principal amount thereof together with the accrued interest thereon to the date fixed for redemption, without premium, as shown below:

Sinking Fund Payment Dates (November 15)	Principal Amount
2050	\$16,755,000
2051	17,595,000
2052	18,475,000
2053	19,400,000
2054 [†]	20,370,000

[†] Maturity.

Selection of Bonds for Redemption. If less than all of a maturity of the 2024 Series M Bonds is to be redeemed, the Trustee shall select the 2024 Series M Bonds of such maturity to be redeemed, from the Outstanding 2024 Series M Bonds of such maturity not previously called for redemption, by lot in any manner the Trustee deems fair. For so long as the book-entry only system is in effect with respect to the 2024 Series M Bonds, DTC shall select the 2024 Series M Bonds to be redeemed in accordance with the procedures of DTC.

Notice of Redemption. Notice of redemption for the 2024 Series M Bonds will be given by publication at least once in financial newspapers or journals, selected by the Trustee, of general circulation in San Francisco, California, Chicago, Illinois, and New York, New York, each such publication to be not less than 20 nor more than 60 days before the date fixed for redemption, if at any time the 2024 Series M Bonds are not in book entry form. Notice also will be mailed to the registered owners of any 2024 Series M Bonds designated for redemption, but failure to mail such notice or any defect therein with respect to any particular 2024 Series M Bond will not affect the validity of the proceedings for the redemption of any other 2024 Series M Bonds. For so long as the book-entry-only system is in effect with respect to the 2024 Series M Bonds, the Trustee will mail notice of redemption solely to DTC or its nominee or its successor. Any failure of DTC or its successor, or of a direct or indirect DTC participant, to notify a beneficial owner of a 2024 Series M Bond of any redemption will not affect the sufficiency or validity of the redemption of any 2024 Series M Bond. See APPENDIX C – “BOOK-ENTRY SYSTEM.” SMUD may instruct the Trustee to give conditional notice of optional redemption, which may be conditioned upon the receipt of moneys or any other event.

DEBT SERVICE SCHEDULE

The following table sets forth the debt service requirements with respect to the 2024 Series M Bonds. See also APPENDIX A – “INFORMATION REGARDING SACRAMENTO MUNICIPAL UTILITY DISTRICT – CAPITAL REQUIREMENTS AND OUTSTANDING INDEBTEDNESS – Outstanding Indebtedness – *Debt Service Requirements.*”

2024 Series M Bonds*

<u>Calendar Year</u>	<u>Principal</u>	<u>Interest</u>	<u>Total</u>
2024	--	\$ 7,430,556	\$ 7,430,556

	<u>\$250,000,000</u>	<u>\$292,391,306</u>	<u>\$542,391,306</u>

* Totals may not foot due to rounding.

SECURITY FOR THE BONDS

General

The principal of and premium, if any, and interest on the Bonds, together with other Parity Bonds, are payable exclusively from, and are secured by a pledge (effected in the manner and to the extent provided in the Resolution) of, the Net Revenues of the Electric System of SMUD.

Neither the credit nor the taxing power of SMUD is pledged to the payment of the Bonds and the general fund of SMUD is not liable for the payment thereof. The owners of the Bonds cannot compel the exercise of any taxing power of SMUD or the forfeiture of any of its property. The Bonds are not a legal or equitable pledge, charge, lien or encumbrance upon any of SMUD's property (including the Electric System) or upon any of its income, receipts or revenues except the Net Revenues of the Electric System to the extent of the pledge thereof contained in the Resolution.

Consent to Amendments to the Resolution

The purchasers of the 2024 Series M Bonds, by virtue of their purchase of the 2024 Series M Bonds, will consent to certain amendments to the Resolution (the "Proposed Amendments"). Such amendments are described in ***bold italic*** font herein under "SECURITY FOR THE BONDS – Rates and Charges" and "– Limitations on Additional Obligations Payable from Revenues" and in APPENDIX D – "SUMMARY OF CERTAIN PROVISIONS OF THE RESOLUTION – Certain Definitions" and "– Reserve Fund for Certain Bonds." The written consents to the Proposed Amendments of the holders and registered owners of at least 60% of the Bonds outstanding have been filed with SMUD or the Trustee, as required by the Resolution. However, while certain Bonds remain outstanding, SMUD must also obtain the written consents of certain bond insurers to implement the Proposed Amendments. SMUD expects to implement the Proposed Amendments when the written consents of such bond insurers are obtained or when the Bonds insured by such bond insurers are no longer outstanding. The final maturity date of the insured Bonds is July 1, 2024.

Allocation of Revenues

After making an allocation of Revenues to Maintenance and Operation Costs and to Energy Payments not included in Maintenance and Operation Costs, the Treasurer of SMUD is required (subject to the last paragraph of this section) to set aside, on an equal priority with sums set aside for all other Parity Bonds, Net Revenues as follows:

First: To the Electric Revenue Bond Interest Fund, in approximately equal monthly installments on or before the first day of each month, an amount equal to at least one-fifth (1/5) of the aggregate amount of interest becoming due on the Bonds on the next succeeding semiannual interest payment date, until an amount sufficient to meet said interest payment is accumulated.

Second: To the Electric Revenue Bond Redemption Fund, to be set aside in the Principal Account and Sinking Fund, respectively, in approximately equal monthly installments on or before the first day of each month, an amount equal to at least one-tenth (1/10) of the aggregate amount of principal becoming due on serial Bonds and the aggregate minimum sinking fund payments required to be made with respect to term Bonds during the next ensuing 12 months, until an amount

sufficient to meet the principal and sinking fund requirements on all Bonds outstanding is accumulated in said accounts, respectively.

Third: To the Electric Revenue Bond Reserve Fund, such amounts as any supplemental resolution authorizing the issuance of a series of Bonds may require to build up and maintain said fund.

If interest on Bonds of a series or maturity is payable more frequently than semiannually, the Treasurer of SMUD shall set aside out of Net Revenues in the Interest Fund such amounts as may be required to pay interest on the Bonds of such series or maturity on each interest payment date at least one month prior to such interest payment date. Allocation to the Electric Revenue Bond Redemption Fund and Electric Revenue Bond Reserve Fund shall be made as set forth above.

All remaining Revenues, after making the foregoing allocations, will be available to SMUD for all lawful SMUD purposes.

From time to time, SMUD may deposit in the Rate Stabilization Fund from such remaining Revenues such amounts as SMUD shall determine, provided that deposits in the Rate Stabilization Fund from remaining Revenues in any fiscal year may be made until (but not after) the date 120 days after the end of such fiscal year. SMUD may withdraw amounts from the Rate Stabilization Fund only for inclusion in Revenues for any fiscal year, such withdrawals to be made until (but not after) 120 days after the end of such fiscal year. All interest or other earnings upon deposits in the Rate Stabilization Fund shall be withdrawn therefrom and accounted for as Revenues. No deposit of Revenues to the Rate Stabilization Fund may be made to the extent such Revenues were included in any certificate submitted in connection with the issuance of additional bonds and withdrawal of the Revenues from the Revenues employed in rendering said certificate would have caused noncompliance with the additional bond provisions or to the extent withdrawals of the Revenues for any fiscal year would have reduced the debt service ratio for such fiscal year to or below 1.40:1.00. See APPENDIX A – “RATES AND CUSTOMER BASE – Rates and Charges” for a description of the balance in the Rate Stabilization Fund.

With respect to Bonds of a series issued on or after October 1, 2003 (including the 2024 Series M Bonds), notwithstanding the foregoing, so long as the Bonds of such series or maturity are outstanding, the supplemental resolution authorizing the issuance of such series shall require the Treasurer, out of Net Revenues received by SMUD, to set aside in the Interest Fund and the Principal Account, respectively, such amounts as may be required so that an amount equal to the amount of principal and/or interest becoming due and payable on the Bonds of such series or maturity on each interest payment date and principal payment date is on deposit in the Interest Fund and the Principal Account, respectively, at such time on or prior to such interest payment date or principal payment date as shall be specified in the supplemental resolution authorizing such Bonds.

Rates and Charges

SMUD has covenanted in the Resolution to establish and at all times maintain and collect rates and charges for the sale or use of electric energy generated, transmitted, distributed or furnished by SMUD which, together with certain items of other income permitted under the Resolution, will yield Revenues at least sufficient, with respect to the ensuing 12 months, to pay and provide for all sums required for Maintenance and Operation Costs and Energy Payments not included in Maintenance and Operation Costs and, in addition, to provide an aggregate sum equal to at least 1.20 times the total amount required for the payment of principal and interest, together with any sinking fund or reserve fund payments, on the Bonds and all Parity Bonds, in each case during such 12 months.

For purposes of the calculations of payments to be made pursuant to the Resolution, the interest rates on Parity Bonds which bear a variable rate of interest or a rate subject to periodic adjustment or to being fixed at some date after issuance shall be, if such Parity Bonds bear a rate or rates of interest for a known period or periods of time, such rate or rates of interest for such period or periods and thereafter, for the portion of the calculation period not covered by such known period or periods, the Assumed Interest Rate.

For purposes of the above calculations of principal of and interest on Parity Bonds, if a Financial Products Agreement has been entered into by SMUD with respect to any Parity Bonds, interest on such Parity Bonds shall be included in the calculation of such principal and interest by including for each fiscal year or period an amount equal to the amount of interest payable on such Parity Bonds in such fiscal year or period at the rate or rates stated in such Parity Bonds plus any Financial Product Payments payable in such fiscal year or period minus any Financial Product Receipts receivable in such fiscal year or period; provided that in no event shall any calculation made pursuant to this clause result in a number less than zero being included in the calculation of such principal and interest.

For purposes of the above calculations of principal of and interest on Parity Bonds, Excluded Principal Payments shall be disregarded (but interest on the Parity Bonds to which such Excluded Principal Payments relate shall be included until but not after the stated due date when principal payments on such Parity Bonds are scheduled by their terms to commence) and Assumed Principal Payments and Assumed Interest Payments shall be included; and for purposes of the above calculations of interest on Parity Bonds, the interest rates on Parity Bonds which bear a variable rate of interest or a rate subject to periodic adjustment or to being fixed at some date after issuance shall be, if such Parity Bonds bear a rate or rates of interest for a known period or periods of time, such rate or rates of interest for such period or periods and thereafter, for the portion of the calculation period not covered by such known period or periods, the Assumed Interest Rate.

SMUD has full power to establish rates and charges for all SMUD services, and the levels of such rates are not subject to review or regulation by any other governmental agency, either federal or state.

For purposes of the calculations specified in this section: (1) any calculation of principal of and interest on Parity Bonds for any period of time shall be reduced by the amount of any Subsidy that SMUD receives or expects to receive during such period of time relating to or in connection with such Parity Bonds; and (2) to the extent the calculation of principal of and interest on Parity Bonds is reduced by the Subsidy as provided in clause (1) of this paragraph, any calculation of Revenues for any period of time shall be reduced by the amount of any Subsidy received or expected to be received by SMUD with respect to or in connection with such Parity Bonds during such period of time.

See APPENDIX A – “INFORMATION REGARDING SACRAMENTO MUNICIPAL UTILITY DISTRICT – CAPITAL REQUIREMENTS AND OUTSTANDING INDEBTEDNESS – Outstanding Indebtedness – *Build America Bonds Subsidy Payments*” for a description of the current Subsidy that SMUD receives with respect to the Refunded Bonds.

See APPENDIX D hereto for the definitions of certain capitalized terms used in this section.

Limitations on Additional Obligations Payable from Revenues

The Resolution provides that SMUD will not, so long as any Bonds are outstanding, issue any obligations payable in whole or in part from Revenues except the following:

1. Refunding bonds issued solely to refund all or part of the Bonds or Parity Bonds;
2. General obligation bonds or other securities secured by the full faith and credit of SMUD;
3. Additional revenue bonds (including additional Bonds under the Resolution and additional Parity Bonds), payable on a parity with the Bonds, with an equal lien and charge upon the Revenues, but only subject to the following conditions:
 - (a) Such additional revenue bonds shall have been authorized for and the proceeds therefrom required to be applied to additions, betterments, extensions or improvements to the Electric System (and necessary costs of issuance, interest during construction and reserve funds);
 - (b) The proceedings for the issuance of such additional revenue bonds shall require SMUD to fix and collect rates and charges in an amount not less, with respect to such bonds, than the amounts required with respect to Bonds issued under the Resolution;
 - (c) SMUD shall not then be in default under the Resolution or other resolutions authorizing the issuance of Parity Bonds; and
 - (d) The Trustee shall receive a certificate of SMUD to the effect (i) that Net Revenues, after completion of the improvements proposed to be financed by such additional revenue bonds, will be sufficient to pay the principal of and interest (and bond reserve fund requirements) on all Bonds and Parity Bonds then outstanding and on such additional revenue bonds; and (ii) that for a period of 12 consecutive months during the 24 months immediately preceding the issuance of the additional revenue bonds the Net Revenues have been at least equal to 1.25 times maximum annual debt service on all Bonds and Parity Bonds then outstanding and on such additional revenue bonds (after adjusting Net Revenues to include 75 percent of the estimated additional Net Revenues to be derived from an increase in rates and charges or from the acquisition of an existing revenue producing electric system); and
4. Revenue bonds junior and subordinate to the Bonds and Parity Bonds.

For purposes of the above calculations, Excluded Principal Payments shall be disregarded (but interest on the Parity Bonds to which such Excluded Principal Payments relate shall be included until but not after the stated due date when principal payments on such Parity Bonds are scheduled by their terms to commence) and Assumed Principal Payments and Assumed Interest Payments shall be included; and for purposes of the above calculations of interest on Parity Bonds, the interest rates on Parity Bonds which bear a variable rate of interest or a rate subject to periodic adjustment or to being fixed at some date after issuance shall be, if such Parity Bonds bear a rate or rates of interest for a known period or periods of time, such rate or rates of interest for such period or periods and thereafter, for the portion of the calculation period not covered by such known period or periods, the Assumed Interest Rate.

For purposes of the above calculations of principal of and interest on Parity Bonds, if a Financial Products Agreement has been entered into by SMUD with respect to any Parity Bonds, interest on such Parity Bonds shall be included in the calculation of such principal and interest by including for each fiscal year or period an amount equal to the amount of interest payable on such Parity Bonds in such fiscal year or period at the rate or rates stated in such Parity Bonds plus any Financial Product Payments payable in

such fiscal year or period minus any Financial Product Receipts receivable in such fiscal year or period; provided that in no event shall any calculation made pursuant to this clause result in a number less than zero being included in the calculation of such principal and interest.

For purposes of the calculations specified in this section: (1) any calculation of principal of and interest on Parity Bonds for any period of time shall be reduced by the amount of any Subsidy that SMUD receives or expects to receive during such period of time relating to or in connection with such Parity Bonds; and (2) to the extent the calculation of principal of and interest on Parity Bonds is reduced by the Subsidy as provided in clause (1) of this paragraph, any calculation of Net Revenues for any period of time shall be reduced by the amount of any Subsidy received or expected to be received by SMUD with respect to or in connection with such Parity Bonds during such period of time.

See APPENDIX A – “INFORMATION REGARDING SACRAMENTO MUNICIPAL UTILITY DISTRICT – CAPITAL REQUIREMENTS AND OUTSTANDING INDEBTEDNESS – Estimated Capital Requirements” for a description of SMUD’s projected capital requirements. Such capital requirements may be satisfied through the issuance of additional Bonds or Parity Bonds.

See APPENDIX A – “INFORMATION REGARDING SACRAMENTO MUNICIPAL UTILITY DISTRICT – CAPITAL REQUIREMENTS AND OUTSTANDING INDEBTEDNESS – Outstanding Indebtedness – *Build America Bonds Subsidy Payments*” for a description of the current Subsidy that SMUD receives with respect to the Refunded Bonds.

See APPENDIX D hereto for the definitions of certain capitalized terms used in this section.

SACRAMENTO MUNICIPAL UTILITY DISTRICT

SMUD owns and operates an electric system that has provided retail electric service since 1946. SMUD’s current service area is approximately 900 square miles, and includes the principal parts of Sacramento County and small portions of Placer and Yolo counties. For a full description of SMUD, its history, organization, operations, and financial performance, certain developments in the energy markets, certain factors affecting the electric utility industry, including impacts from the COVID-19 pandemic, and certain regulatory and other matters, see APPENDIX A – “INFORMATION REGARDING SACRAMENTO MUNICIPAL UTILITY DISTRICT.”

ABSENCE OF LITIGATION REGARDING THE 2024 SERIES M BONDS

SMUD is not aware of any action, suit or proceeding, threatened or pending, to restrain or enjoin the issuance, sale or delivery of the 2024 Series M Bonds, or in any way contesting or affecting the validity of the 2024 Series M Bonds or any of the proceedings of SMUD taken with respect to the 2024 Series M Bonds. SMUD is not aware of any action, suit or proceeding, threatened or pending, questioning the corporate existence of SMUD, or the title of the officers of SMUD to their respective offices, or the power and authority of SMUD to execute and deliver the 2024 Series M Bonds. For a description of certain litigation in which SMUD is involved, see APPENDIX A – “INFORMATION REGARDING SACRAMENTO MUNICIPAL UTILITY DISTRICT – LEGAL PROCEEDINGS.”

UNDERWRITING

J.P. Morgan Securities LLC (“JPMS”), as representative of itself, BofA Securities, Inc. (“BofA”), Barclays Capital Inc., Goldman Sachs & Co. LLC, Morgan Stanley & Co. LLC and Wells Fargo Bank, National Association (each, an “Underwriter” and, collectively, the “Underwriters”) have jointly and severally agreed, subject to certain customary conditions to closing, to purchase the 2024 Series M Bonds

from SMUD at an aggregate purchase price of \$278,218,393.06 (being the aggregate principal amount of the 2024 Series M Bonds, plus original issue premium of \$28,735,514.10 and less Underwriters' discount of \$517,121.04). The Underwriters will be obligated to purchase all 2024 Series M Bonds if any 2024 Series M Bonds are purchased. The Underwriters have agreed to make a public offering of the 2024 Series M Bonds at the initial offering prices set forth on the inside cover page hereof. The 2024 Series M Bonds may be offered and sold to certain dealers (including underwriters and other dealers depositing such bonds into investment trusts) at prices lower than such public offering prices, and such public offering prices may be changed, from time to time, by the Underwriters.

BofA, an Underwriter, has entered into a distribution agreement with its affiliate Merrill Lynch, Pierce, Fenner & Smith Incorporated ("MLPF&S"). As part of this arrangement, BofA may distribute securities to MLPF&S, which may in turn distribute such securities to investors through the financial advisor network of MLPF&S. As part of this arrangement, BofA may compensate MLPF&S as a dealer for its selling efforts with respect to the 2024 Series M Bonds.

JPMS, one of the Underwriters of the 2024 Series M Bonds, has entered into negotiated dealer agreements (each, a "Dealer Agreement") with each of Charles Schwab & Co., Inc. ("CS&Co.") and LPL Financial LLC ("LPL") for the retail distribution of certain securities offerings at the original issue prices. Pursuant to each Dealer Agreement, each of CS&Co. and LPL may purchase 2024 Series M Bonds from JPMS at the original issue price less a negotiated portion of the selling concession applicable to any 2024 Series M Bonds that such firm sells.

Morgan Stanley & Co. LLC, an Underwriter of the 2024 Series M Bonds, has entered into a retail distribution arrangement with its affiliate Morgan Stanley Smith Barney LLC. As part of the distribution arrangement, Morgan Stanley & Co. LLC may distribute municipal securities to retail investors through the financial advisor network of Morgan Stanley Smith Barney LLC. As part of this arrangement, Morgan Stanley & Co. LLC may compensate Morgan Stanley Smith Barney LLC for its selling efforts with respect to the 2024 Series M Bonds.

Wells Fargo Corporate & Investment Banking is the trade name for certain securities-related capital markets and investment banking services of Wells Fargo & Company and its subsidiaries, including Wells Fargo Bank, National Association, which conducts its municipal securities sales, trading and underwriting operations through the Wells Fargo Bank, NA Municipal Finance Group, a separately identifiable department of Wells Fargo Bank, National Association, registered with the Securities and Exchange Commission as a municipal securities dealer pursuant to Section 15B(a) of the Securities Exchange Act of 1934.

Wells Fargo Bank, National Association, acting through its Municipal Finance Group ("WFBNA"), one of the Underwriters of the 2024 Series M Bonds, has entered into an agreement (the "WFA Distribution Agreement") with its affiliate, Wells Fargo Clearing Services, LLC (which uses the trade name "Wells Fargo Advisors") ("WFA"), for the distribution of certain municipal securities offerings, including the 2024 Series M Bonds. Pursuant to the WFA Distribution Agreement, WFBNA will share a portion of its underwriting or remarketing agent compensation, as applicable, with respect to the 2024 Series M Bonds with WFA. WFBNA has also entered into an agreement (the "WFSLLC Distribution Agreement") with its affiliate Wells Fargo Securities, LLC ("WFSLLC"), for the distribution of municipal securities offerings, including the 2024 Series M Bonds. Pursuant to the WFSLLC Distribution Agreement, WFBNA pays a portion of WFSLLC's expenses based on its municipal securities transactions. WFBNA, WFSLLC, and WFA are each wholly-owned subsidiaries of Wells Fargo & Company.

The Underwriters and their respective affiliates are full service financial institutions engaged in various activities, which may include securities trading, commercial and investment banking, financial advisory, investment management, principal investment, hedging, financing and brokerage activities. Certain of the Underwriters and their respective affiliates have, from time to time, performed, and may in the future perform, various investment banking services for SMUD for which they received or will receive customary fees and expenses.

In the ordinary course of their various business activities, the Underwriters and their respective affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (which may include bank loans and/or credit default swaps) for their own account and for the accounts of their customers and may at any time hold long and short positions in such securities and instruments. Such investment and securities activities may involve securities and instruments of, or issued for the benefit of, SMUD.

BofA Securities, Inc. is an affiliate of Bank of America, N.A. which has extended credit in other transactions to SMUD.

MUNICIPAL ADVISOR

SMUD has retained PFM Financial Advisors LLC, as Municipal Advisor in connection with various matters relating to the delivery of the 2024 Series M Bonds. The Municipal Advisor assumes no responsibility for the accuracy, completeness or fairness of the information contained in this Official Statement. The Municipal Advisor is an independent advisory firm and is not engaged in underwriting or distribution of securities. The Municipal Advisor will receive compensation that is contingent upon the sale, issuance and delivery of the 2024 Series M Bonds.

APPROVAL OF LEGAL PROCEEDINGS

The validity of the 2024 Series M Bonds and certain other legal matters are subject to the approval of Orrick, Herrington & Sutcliffe LLP, Bond Counsel to SMUD. The approving opinion of Bond Counsel will be delivered with the 2024 Series M Bonds in substantially the form appearing in APPENDIX E. Bond Counsel undertakes no responsibility for the accuracy, completeness or fairness of this Official Statement. Certain legal matters will be passed on for the Underwriters by Nixon Peabody LLP, San Francisco, California, counsel to the Underwriters. Counsel to the Underwriters will receive compensation that is contingent upon the sale, issuance and delivery of the 2024 Series M Bonds.

FINANCIAL STATEMENTS

SMUD's audited, consolidated financial statements for the years ended December 31, 2023 and December 31, 2022 are included in APPENDIX B attached to this Official Statement. These financial statements have been audited by Baker Tilly US, LLP, Madison, Wisconsin (the "Auditor"), for the periods indicated and to the extent set forth in their report thereon and should be read in their entirety. SMUD has not requested nor did it obtain permission from the Auditor to include the audited, consolidated financial statements as an appendix to this Official Statement. Accordingly, the Auditor has not performed any procedures to review the financial condition or operations of SMUD subsequent to the date of its report included therein, nor has it reviewed any information contained in this Official Statement.

TAX MATTERS

In the opinion of Orrick, Herrington & Sutcliffe LLP, Bond Counsel to SMUD (“Bond Counsel”), based upon an analysis of existing laws, regulations, rulings and court decisions, and assuming, among other matters, the accuracy of certain representations and compliance with certain covenants, interest on the 2024 Series M Bonds is excluded from gross income for federal income tax purposes under Section 103 of the Internal Revenue Code of 1986 (the “Code”) and is exempt from State of California personal income taxes. Bond Counsel is of the further opinion that interest on the 2024 Series M Bonds is not a specific preference item for purposes of the federal individual alternative minimum tax. Bond Counsel observes that interest on the 2024 Series M Bonds included in adjusted financial statement income of certain corporations is not excluded from the federal corporate alternative minimum tax. Bond Counsel expresses no opinion regarding any other tax consequences related to the ownership or disposition of, or the amount, accrual or receipt of interest on, the 2024 Series M Bonds. A complete copy of the proposed form of opinion of Bond Counsel is set forth in APPENDIX E hereto.

To the extent the issue price of any maturity of the 2024 Series M Bonds is less than the amount to be paid at maturity of such 2024 Series M Bonds (excluding amounts stated to be interest and payable at least annually over the term of such 2024 Series M Bonds), the difference constitutes “original issue discount,” the accrual of which, to the extent properly allocable to each Beneficial Owner thereof, is treated as interest on the 2024 Series M Bonds which is excluded from gross income for federal income tax purposes and exempt from State of California personal income taxes. For this purpose, the issue price of a particular maturity of the 2024 Series M Bonds is the first price at which a substantial amount of such maturity of the 2024 Series M Bonds is sold to the public (excluding bond houses, brokers, or similar persons or organizations acting in the capacity of underwriters, placement agents or wholesalers). The original issue discount with respect to any maturity of the 2024 Series M Bonds accrues daily over the term to maturity of such 2024 Series M Bonds on the basis of a constant interest rate compounded semiannually (with straight-line interpolations between compounding dates). The accruing original issue discount is added to the adjusted basis of such 2024 Series M Bonds to determine taxable gain or loss upon trade or business disposition (including sale, redemption, or payment on maturity) of such 2024 Series M Bonds. Beneficial Owners of the 2024 Series M Bonds should consult their own tax advisors with respect to the tax consequences of ownership of 2024 Series M Bonds with original issue discount, including the treatment of Beneficial Owners who do not purchase such 2024 Series M Bonds in the original offering to the public at the first price at which a substantial amount of such 2024 Series M Bonds is sold to the public.

2024 Series M Bonds purchased, whether at original issuance or otherwise, for an amount higher than their principal amount payable at maturity (or, in some cases, at their earlier call date) (“Premium Bonds”) will be treated as having amortizable bond premium. No deduction is allowable for the amortizable bond premium in the case of bonds, like the Premium Bonds, the interest on which is excluded from gross income for federal income tax purposes. However, the amount of tax-exempt interest received, and a Beneficial Owner’s basis in a Premium Bond, will be reduced by the amount of amortizable bond premium properly allocable to such Beneficial Owner. Beneficial Owners of Premium Bonds should consult their own tax advisors with respect to the proper treatment of amortizable bond premium in their particular circumstances.

The Code imposes various restrictions, conditions and requirements relating to the exclusion from gross income for federal income tax purposes of interest on obligations such as the 2024 Series M Bonds. SMUD has made certain representations and covenanted to comply with certain restrictions, conditions and requirements designed to ensure that interest on the 2024 Series M Bonds will not be included in federal gross income. Inaccuracy of these representations or failure to comply with these covenants may result in interest on the 2024 Series M Bonds being included in gross income for federal income tax

purposes, possibly from the date of original issuance of the 2024 Series M Bonds. The opinion of Bond Counsel assumes the accuracy of these representations and compliance with these covenants. Bond Counsel has not undertaken to determine (or to inform any person) whether any actions taken (or not taken), or events occurring (or not occurring), or any other matters coming to Bond Counsel's attention after the date of issuance of the 2024 Series M Bonds may adversely affect the value of, or the tax status of interest on, the 2024 Series M Bonds. Accordingly, the opinion of Bond Counsel is not intended to, and may not, be relied upon in connection with any such actions, events or matters.

Although Bond Counsel is of the opinion that interest on the 2024 Series M Bonds is excluded from gross income for federal income tax purposes and is exempt from State of California personal income taxes, the ownership or disposition of, or the accrual or receipt of amounts treated as interest on, the 2024 Series M Bonds may otherwise affect a Beneficial Owner's federal, state or local tax liability. The nature and extent of these other tax consequences depends upon the particular tax status of the Beneficial Owner or the Beneficial Owner's other items of income or deduction. Bond Counsel expresses no opinion regarding any such other tax consequences.

Current and future legislative proposals, if enacted into law, clarification of the Code or court decisions may cause interest on the 2024 Series M Bonds to be subject, directly or indirectly, in whole or in part, to federal income taxation or to be subject to or exempted from state income taxation, or otherwise prevent Beneficial Owners from realizing the full current benefit of the tax status of such interest. The introduction or enactment of any such legislative proposals or clarification of the Code or court decisions may also affect, perhaps significantly, the market price for, or marketability of, the 2024 Series M Bonds. Prospective purchasers of the 2024 Series M Bonds should consult their own tax advisors regarding the potential impact of any pending or proposed federal or state tax legislation, regulations or litigation, as to which Bond Counsel expresses no opinion.

The opinion of Bond Counsel is based on current legal authority, covers certain matters not directly addressed by such authorities, and represents Bond Counsel's judgment as to the proper treatment of the 2024 Series M Bonds for federal income tax purposes. It is not binding on the Internal Revenue Service ("IRS") or the courts. Furthermore, Bond Counsel cannot give and has not given any opinion or assurance about the future activities of SMUD, or about the effect of future changes in the Code, the applicable regulations, the interpretation thereof or the enforcement thereof by the IRS. SMUD has covenanted, however, to comply with the requirements of the Code.

Bond Counsel's engagement with respect to the 2024 Series M Bonds ends with the issuance of the 2024 Series M Bonds, and, unless separately engaged, Bond Counsel is not obligated to defend SMUD or the Beneficial Owners regarding the tax-exempt status of the 2024 Series M Bonds in the event of an audit examination by the IRS. Under current procedures, Beneficial Owners would have little, if any, right to participate in the audit examination process. Moreover, because achieving judicial review in connection with an audit examination of tax-exempt bonds is difficult, obtaining an independent review of IRS positions with which SMUD legitimately disagrees may not be practicable. Any action of the IRS, including but not limited to selection of the 2024 Series M Bonds for audit, or the course or result of such audit, or an audit of bonds presenting similar tax issues may affect the market price for, or the marketability of, the 2024 Series M Bonds, and may cause SMUD or the Beneficial Owners to incur significant expense.

Payments on the 2024 Series M Bonds generally will be subject to U.S. information reporting and possibly to "backup withholding." Under Section 3406 of the Code and applicable U.S. Treasury Regulations issued thereunder, a non-corporate Beneficial Owner of 2024 Series M Bonds may be subject to backup withholding with respect to "reportable payments," which include interest paid on the 2024 Series M Bonds and the gross proceeds of a sale, exchange, redemption, retirement or other disposition of

the 2024 Series M Bonds. The payor will be required to deduct and withhold the prescribed amounts if (i) the payee fails to furnish a U.S. taxpayer identification number (“TIN”) to the payor in the manner required, (ii) the IRS notifies the payor that the TIN furnished by the payee is incorrect, (iii) there has been a “notified payee underreporting” described in Section 3406(c) of the Code or (iv) the payee fails to certify under penalty of perjury that the payee is not subject to withholding under Section 3406(a)(1)(C) of the Code. Amounts withheld under the backup withholding rules may be refunded or credited against a Beneficial Owner’s federal income tax liability, if any, provided that the required information is timely furnished to the IRS. Certain Beneficial Owners (including among others, corporations and certain tax-exempt organizations) are not subject to backup withholding. The failure to comply with the backup withholding rules may result in the imposition of penalties by the IRS.

CONTINUING DISCLOSURE UNDERTAKING

Pursuant to the Continuing Disclosure Agreement, SMUD will covenant for the benefit of the holders and the “Beneficial Owners” (as defined in the Continuing Disclosure Agreement) of the 2024 Series M Bonds to provide certain financial information and operating data relating to SMUD by not later than 180 days after the end of each of SMUD’s fiscal years (presently, each December 31), commencing with the report for the year ending December 31, 2024 (the “Annual Report”), and to provide notices of the occurrence of certain listed events with respect to the 2024 Series M Bonds. The Annual Report will be filed by or on behalf of SMUD with the Municipal Securities Rulemaking Board (the “MSRB”) through its Electronic Municipal Market Access system (“EMMA”) and any notices of such listed events will be filed by or on behalf of SMUD with the MSRB through EMMA. The specific nature of the information to be contained in the Annual Report and the notices of listed events are set forth in the form of the Continuing Disclosure Agreement which is included in its entirety in APPENDIX F hereto. SMUD’s covenant will be made in order to assist the Underwriters in complying with Securities and Exchange Commission Rule 15c2-12.

In a limited number of circumstances, certain of the annual reports, audited financial statements or listed event filings required to be made by SMUD during the last five years under its continuing disclosure undertakings were not connected to all of the CUSIP numbers of the bonds subject to the continuing disclosure undertakings. In addition, SMUD entered into two subordinated forward starting interest rate swaps in December 2019 and filed a notice of the interest rate swaps with the MSRB through EMMA in April 2020. In a limited number of circumstances during the last five years, SMUD has filed notices of ratings upgrades with respect to certain bonds later than the time required for such filings under its continuing disclosure undertakings for such bonds.

RATINGS

Fitch Ratings, Inc. (“Fitch”) and Moody’s Investors Service, Inc. (“Moody’s”) have assigned ratings of “AA (stable outlook)” and “Aa2 (stable outlook),” respectively, to the 2024 Series M Bonds. Such ratings reflect only the views of such organizations and are not a recommendation to buy, sell or hold the 2024 Series M Bonds. Explanations of the significance of such ratings may be obtained only from the respective rating agencies. SMUD has furnished to Fitch and Moody’s certain information and materials concerning the 2024 Series M Bonds and itself. Generally, a rating agency bases its rating on the information and materials furnished to it and on investigations, studies and assumptions of its own. There is no assurance that such ratings will continue for any given period or that they will not be revised downward, suspended or withdrawn entirely by the respective rating agencies, if in the judgment of such rating agency, circumstances so warrant. SMUD has not, other than as described under “CONTINUING DISCLOSURE UNDERTAKING” above, and the Underwriters have not undertaken any responsibility either to bring to the attention of the holders or beneficial owners of the 2024 Series M Bonds any proposed revision, suspension or withdrawal of any rating on the 2024 Series M Bonds or to oppose any

such proposed revision, suspension or withdrawal. Any such downward revision, suspension or withdrawal of such ratings may have an adverse effect on the market price or marketability of the 2024 Series M Bonds.

MISCELLANEOUS

This Official Statement includes descriptions of the terms of the 2024 Series M Bonds, power purchase agreements with certain other parties, pooling and other agreements, the Resolution and certain provisions of the Act. Such descriptions do not purport to be complete, and all such descriptions and references thereto are qualified in their entirety by reference to each such document.

Copies of the Resolution, which forms a contract with the Holders of the 2024 Series M Bonds, will be made available upon request.

INTRODUCTION

General

The Sacramento Municipal Utility District (“SMUD”) owns and operates an electric system that has provided retail electric service since 1946. SMUD’s current service area is approximately 900 square miles, and includes the principal parts of Sacramento County and small portions of Placer and Yolo counties. See “THE SERVICE AREA AND ELECTRIC SYSTEM – The Service Area.”

Independent Governance

SMUD is an independently run community-owned organization. SMUD is not required by law to transfer any portion of its collections from customers to any local government.

SMUD is governed by a Board of Directors (the “Board”), which consists of seven directors elected by ward for staggered four-year terms. The Board determines policy and appoints the Chief Executive Officer and General Manager, who is responsible for SMUD’s overall management and day-to-day operations. The Chief Executive Officer and General Manager is responsible for the hiring and removal of all employees, other than the Chief Legal and Government Affairs Officer and General Counsel, the Internal Auditor and the Special Assistant to the Board, who are hired and may be removed only by the Board. The employment status of nearly all SMUD employees is governed by a civil service system administered by the Chief Executive Officer and General Manager.

The Board elects its President and Vice President annually to take office in January. The current members of the Board are as follows:

Name	Occupation	Ward	Term Expires
Brandon Rose.....	Air Pollution Specialist, California Environmental Protection Agency	Ward 1	December 31, 2024
Nancy Bui-Thompson.....	Chief Information Officer, Wellspace Health	Ward 2	December 31, 2024
Gregg Fishman, Vice-President....	Sr. Community Relations Officer at Sacramento Regional Transit District	Ward 3	December 31, 2026

Rob Kerth	Business Owner	Ward 5	December 31, 2024
Dave Tamayo.....	Retired Environmental Specialist	Ward 6	December 31, 2026
Heidi Sanborn	Executive Director, National Stewardship Action Council	Ward 7	December 31, 2026

SMUD’s senior management consists of the following executives:

Chief Executive Officer & General Manager. Paul Lau was named Chief Executive Officer and General Manager (“CEO & GM”) of SMUD in October 2020. He reports to the SMUD Board of Directors. As CEO & GM, he leads the sixth largest community-owned electric utility in the nation, serving a population of approximately 1.5 million residents and managing a \$2.1 billion budget. Mr. Lau previously served as SMUD’s Chief Grid Strategy & Operations Officer and has held several other executive leadership positions during his 42-year career at SMUD. He serves on several national and local boards, including the Large Public Power Council, California Municipal Utilities Association, American Public Power Association, and Smart Electric Power Alliance, and as a Commissioner of the Balancing Authority

of Northern California (“BANC”). A registered professional electrical engineer in the State of California (the “State”), Mr. Lau received his bachelor’s degree in electrical power engineering from California State University, Sacramento.

Chief Customer Officer. Brandy Bolden reports to the CEO & GM and oversees SMUD’s Customer and Community Services business unit. She is responsible for customer experience delivery across SMUD’s residential and commercial customer segments. She provides leadership and oversight of customer operations including customer care and revenue management, business intelligence, strategic account management, customer experience and segmentation strategy, channel management, customer program and service delivery, and special assistance. She is also responsible for commercial development and business attraction and oversees Community Energy Services, which provides services and support for community choice aggregators. Since joining SMUD in 2003, Brandy has demonstrated strong leadership and held a variety of senior leadership roles, including leading the Customer & Community Services project management office and the dual role of director of Customer Care and Revenue Operations. Ms. Bolden led the team responsible for implementing time-of-day rates, streamlining the meter-to-cash processes, delivering key billing and payment experience enhancements and recognizing operational efficiencies that resulted in sustained annual savings for SMUD. Ms. Bolden holds a Bachelor of Arts in Sociology from University of California, Davis.

Chief Information Officer. Suresh Kotha reports to the CEO & GM and is responsible for SMUD’s information technology strategy, operations, infrastructure, IT Project Management Office, enterprise innovation process, and cybersecurity. More recently, Mr. Kotha has been leading many technology efforts that are integral to developing a grid of the future that will help SMUD achieve its zero-carbon goal, including its Advanced Distribution Management System, the software platform that supports the full suite of distribution management and optimization, and next-generation network upgrades. Mr. Kotha joined SMUD in 2002 as a principal technical developer, with responsibility for designing and leading implementation and upgrades of multiple technology systems, including the SAP software platform and SMUD’s meter-to-cash systems. He holds a Master of Technology in Computer Science from Jawaharlal Nehru Technology University and a Bachelor of Engineering in Electronics & Communications Engineering from Gulbarga University.

Chief Diversity Officer. Jose Bodipo-Memba reports to the CEO & GM and is responsible for human resources, workforce diversity and inclusion, workforce business planning, SMUD’s Sustainable Communities program, facilities, security and emergency operations. Mr. Bodipo-Memba joined SMUD in 2010 as an environmental specialist and became manager of Environmental Services in 2016. He most recently served as SMUD’s first director of Sustainable Communities. Mr. Bodipo-Memba holds a Bachelor of Arts degree in history from University of California, Berkley and Masters of Business Administration from Drexel University.

Chief Legal & Government Affairs Officer and General Counsel. Laura Lewis was named general counsel for SMUD in April 2014. In this position she serves as chief lawyer and manages SMUD’s legal office and its staff of eight attorneys. She also serves as the secretary to SMUD’s elected board of directors. She reports to the Board and to the CEO & GM and has responsibility for all legal matters in which SMUD is a party to, or has an interest in. Ms. Lewis also oversees SMUD’s government affairs and reliability compliance department. In this capacity, she is responsible for management and coordination of all legislative matters and regulatory requirements affecting SMUD at the state and federal level, including the FERC-NERC electric reliability standards. Ms. Lewis is also responsible for Procurement, Warehouse & Fleet and Energy Trading & Contracts. Ms. Lewis joined SMUD in 1997 as a staff attorney, serving in that capacity through 1999, after which she moved to the San Francisco law firm Davis Wright Tremaine. In 2002, she returned to SMUD as a senior attorney. In 2010, she became assistant general counsel and in 2013 was appointed chief assistant general counsel. She holds a juris doctorate from McGeorge School of

Law, where she won membership in the Order of the Coif honor society. She holds a bachelor's degree in political science from the University of California, San Diego and is a member of the American Bar Association, the Energy Bar Association, and the State Bar of California.

Chief Operating Officer. Frankie McDermott reports to the CEO & GM and is responsible for providing strategic leadership and tactical oversight related to the safe and reliable transmission and delivery of energy to customers, ensuring efficient planning, construction, operation and maintenance of transmission, and distribution facilities. This position has primary responsibility for the processes and functions related to system reliability and operations across SMUD. The Chief Operating Officer is also the safety leader for the enterprise, leader of operational efficiency and responsible for all non-IT capital investments. Prior to this role, Mr. McDermott served as Chief Energy Delivery Officer and Chief Customer Officer, responsible for SMUD's overall retail strategy. From 2010 to 2014, he served as customer services director, which included managing relationships with customer segments as SMUD moved forward with smart-grid technologies. Prior to that, he served as manager of enterprise performance and held positions in supply chain and in general services. Before joining SMUD in 2003, Mr. McDermott served in management roles in the semiconductor industry at NEC Electronics in Roseville, California and in Ireland. After engineering school in Ireland, he earned an MBA from Golden Gate University and completed the Advanced Management Program at the Haas School of Business at the University of California Berkeley.

Chief Zero Carbon Officer. Lora Anguay reports to the CEO & GM and is responsible for leadership oversight of SMUD's Energy Supply which includes SMUD's Power Generation Assets, Resource Planning and Customer and Grid Strategy. This role is also responsible for the delivery of SMUD's plan to provide 100% carbon free energy resources by 2030. This includes obtaining new grants and partnerships, overseeing research and development, designing distributed energy resource programs, enabling processes to settle distributed energy transactions with SMUD's customers and transitioning SMUD's power generation assets and energy contracts to zero carbon resources. Prior to assuming this role, Ms. Anguay was the director of Distribution Operations & Maintenance and was responsible for the day-to-day operations of SMUD's electric distribution grid. Before that she was an engineering designer, process control supervisor, project manager for smart meter deployment, a senior project manager for smart grid distribution automation and supervisor in Grid Assets. Before SMUD, she worked for Oracle Corporation as a finance manager and is a veteran who served in the United States Coast Guard. Ms. Anguay joined SMUD in 2004 and holds a Bachelor of Science degree in business administration from California State University, Sacramento.

Chief Financial Officer. Scott Martin reports to the CEO & GM and is responsible for corporate accounting, treasury operations, risk management, and planning and budgets functions. He is also responsible for strategies across the company and driving prioritization including zero carbon, rates and pricing, enterprise strategic planning and enterprise prioritization. Mr. Martin is a seasoned executive with more than 30 years of experience. Prior to assuming this role, Mr. Martin was SMUD's Chief Strategy Officer. Mr. Martin's previous experience also includes serving as SMUD's customer strategy planning supervisor. Mr. Martin joined SMUD in 1999 and holds a Bachelor of Arts degree in economics from the University of California, Berkeley and a Master of Arts degree in economics from the University of Nevada, Las Vegas.

Chief Marketing & Communications Officer. Farres Everly reports to the CEO & GM and is responsible for all aspects of SMUD's marketing, market research, corporate communications, website, graphic design, video services, data analytics, social media, community engagement, crisis communications, and public affairs activities. Mr. Everly led the creative development and execution of SMUD's numerous award-winning marketing and outreach campaigns and developed the community engagement and communications strategies that resulted in SMUD being ranked number one in California in J.D. Power's annual customer satisfaction surveys and in SMUD becoming the first utility to receive J.D.

Power's Certified Sustainability Leader designation. Prior to joining SMUD, Mr. Everly held marketing and communications management roles at VSP and the Money Store. He holds a bachelor's degree in journalism from California State University, Chico.

Treasurer. Russell Mills reports to the CFO. He oversees all treasury operations, including debt and cash management, banking, financial planning and forecasting, commodity risk management, property and casualty insurance, and is responsible for developing and implementing capital borrowing strategies. Mr. Mills also serves as treasurer for the Transmission Agency of Northern California ("TANC"), the Sacramento Municipal Utility District Financing Authority ("SFA"), the Northern California Gas Authority No. 1 ("NCGA"), the Northern California Energy Authority ("NCEA") and BANC. Before joining SMUD in 2018 as Treasurer, Mr. Mills served as Chief Financial Officer of Southern California Public Power Authority. He also served as the Chief Financial Officer of the Power Supply Program at the California Department of Water Resources ("DWR"). He holds an MBA from Loyola Marymount University, and a bachelor's degree in economics from Towson University in Baltimore, Maryland. Mr. Mills also holds the Energy Risk Professional (ERP) designation and is a CFA level II candidate.

Controller. Lisa Limcaco reports to the CFO and is responsible for accounting and financial reporting at SMUD. Prior to her appointment as controller in 2020, Ms. Limcaco served as an assistant controller, manager of customer value, performance and projects, senior energy commodity specialist and as principal accountant for SMUD's joint powers authorities. Ms. Limcaco also serves as controller for TANC, SFA, NCGA, NCEA and BANC. Before joining SMUD in 2010 as a senior accountant, Ms. Limcaco had 12-years' experience as the Director of Accounting and controller for a food service provider in Sacramento and over 13-years' experience in public accounting including audit manager at Price Waterhouse LLP. Ms. Limcaco holds a bachelor's degree in accounting from the University of Hawaii, a Master of Business Administration from Sacramento State University and is a Certified Public Accountant in the State.

THE SERVICE AREA AND ELECTRIC SYSTEM

The Service Area

SMUD is the primary distributor of electric power within an area of approximately 900 square miles in central California. The service area includes the State Capital, Sacramento, the populous areas principally to the northeast and south of the City of Sacramento (the "City" or "Sacramento") and the agricultural areas to the north and south. The City is located 85 miles northeast of San Francisco.

SMUD's electric system supplies power to a population of approximately 1.5 million with a total annual retail load of approximately 10,104 million kilowatt-hours ("kWh") for the year ended December 31, 2023. As the capital of the nation's most populous state, Sacramento benefits from the historically stabilizing influence of a large government sector. Sacramento is home to the State government headquarters, the Sacramento County seat, the City government and various special districts that combine to make government the largest single employment sector in the Sacramento area. Information technology, transportation, education and health services, leisure and hospitality, and construction round out the other major sectors of employment and industry in the area.

SMUD's annual peak load has averaged 3,045 Megawatts ("MW") over the last three years, with SMUD's record peak load of 3,299 MW occurring on July 24, 2006. In 2022, SMUD recorded its second highest peak load of 3,263 MW. SMUD reviews its load forecast, at a minimum, on an annual basis.

The Electric System

SMUD owns and operates an integrated electric system that includes generation, transmission and distribution facilities.

SMUD supplies power to its bulk power substations through a 230 kilovolt (“kV”) and 115 kV transmission system. This system transmits power from SMUD’s generation plants and interconnects with Pacific Gas & Electric (“PG&E”) and the Western Area Power Administration (“WAPA”). Power is distributed throughout Sacramento County via a 69 kV sub-transmission system with the exception of the City’s downtown area, which is served from the 115 kV transmission system. The downtown area is served from 115/12 kV and 115/21 kV substations. The distribution system serving the remainder of SMUD’s service territory is comprised of 69/12 kV substations with overhead and underground 12 kV distribution circuits.

BUSINESS STRATEGY

General

SMUD’s Board of Directors has established the following purpose and vision statements: “SMUD’s purpose is to enhance the quality of life for our customers and community by providing reliable and affordable electricity, and leading the transition to a clean energy future. SMUD’s vision is to be a trusted and powerful partner in achieving an inclusive, zero carbon economy. SMUD will leverage its relationships to accelerate innovation, ensure energy affordability and reliability, protect the environment, eliminate greenhouse gas emissions, catalyze economic and workforce development, promote environmental justice, and enhance community vitality for all.” The Board has adopted a set of Strategic Directions with related metrics, which it considers essential for the success of SMUD and for serving SMUD’s customers. These include competitive rates, access to credit markets, reliability, customer relations, environmental leadership, resource planning, enterprise risk management and safety. Some of the general elements in SMUD’s business strategy are:

- developing and maintaining a sustainable and reliable power supply to meet demand growth consistent with State mandates and the Board’s directions for renewable energy and the reduction of carbon emissions to zero by 2030. See “BUSINESS STRATEGY – Sustainable Power Supply and Transmission – 2030 Zero Carbon Plan”;
- working closely with customers to provide the information, tools and incentives to assist them to more efficiently manage energy use, which will contribute to meeting greenhouse gas (“GHG”) emission targets and managing needle peak demand requirements (those 40 or so hours of the year with extreme temperatures when customer demand surges by up to 400 additional MW);
- managing price, volumetric and credit risks associated with energy and natural gas procurement;
- attracting, developing and retaining a diverse, skilled and engaged workforce that reflects SMUD’s values and is committed to achieving SMUD’s mission;
- retaining local decision making authority and operational independence; and
- collaborating regionally to attract new businesses and grow existing business to diversify and strengthen the Sacramento economy.

SMUD’s long-range business strategy focuses in part on ensuring financial stability by establishing rates that provide an acceptable fixed charge coverage ratio on a consolidated basis, taking into consideration the impact of capital expenditures and other factors on cash flow. SMUD’s Board policy sets

a minimum fixed charge coverage ratio of 1.50 times for annual budgets, though it generally plans to meet a minimum fixed charge coverage ratio of 1.70 times. Over the past ten years, the actual fixed charge coverage ratio has averaged 2.10 times on a consolidated basis. SMUD also manages its liquidity position by planning for a minimum of 150 days cash on hand and planning to maintain at least \$150 million of available capacity under its commercial paper and line of credit program. SMUD's commercial paper and line of credit program is currently authorized for \$500 million aggregate principal amount outstanding at any one time. As of March 21, 2024, SMUD had \$150 million aggregate principal amount of its commercial paper notes outstanding and \$350 million of the authorized aggregate principal amount of its commercial paper and line of credit program available for use. SMUD uses cash on hand and commercial paper and a line of credit to fund capital expenditures, then issues debt to reimburse itself for cash expended for qualified capital expenditures and/or to pay down the outstanding principal amount of its commercial paper program and line of credit. Over the past ten years, the days cash on hand has averaged 216. The resolutions securing SMUD's Senior Bonds and Subordinated Bonds (each as defined under the caption "CAPITAL REQUIREMENTS AND OUTSTANDING INDEBTEDNESS" below) do not require SMUD to maintain a minimum fixed charge coverage ratio, minimum days cash on hand or minimum available capacity under its commercial paper program and line of credit.

In addition, SMUD's business strategy focuses on servicing its customers in a progressive, forward-looking manner, addressing current regulatory and legislative issues and potential competitive forces.

Serving SMUD's Customers

SMUD continually looks for ways to better serve and partner with its customers to further strengthen customer loyalty, while providing competitive and fair pricing for SMUD's electric services. SMUD also has a focused effort to assist and incentivize customers to manage energy use more efficiently, which will contribute to meeting GHG emission targets and managing peak demand requirements as noted below.

Digital Enhancements. Customers are increasingly turning to digital channels including SMUD's mobile application, SMUD.org, e-mail and social media to interact and do business with SMUD. SMUD has delivered many digital enhancements, including bill pay functionality; online payment arrangements; start/stop/transfer move service; view of energy usage, chat, an enhanced outage map including meter test functionality; and the SMUD Energy Store, which is an online marketplace for energy-related products. SMUD plans to continue efforts to provide more personalized digital customer experiences.

Advanced Metering, Infrastructure and Rate Design. As a community-owned organization, SMUD is dedicated to providing the tools and transparency in customer energy usage to enable customers to easily and positively affect energy usage, energy cost, and climate change. In 2012 SMUD installed smart technology, including 617,000 digital communicating smart meters, distribution automation systems and equipment to facilitate load management. The advanced technology has allowed SMUD to deliver tools such as text and e-mail bill alerts and online energy usage comparison charts to help customers manage energy use. SMUD has leveraged smart grid investments to improve reliability, reduce losses, reduce power quality issues and improve customer service through better, more timely information.

Time-of-Day Rates. On June 15, 2017, the Board approved time-of-day ("TOD") rates as the standard rate for residential customers. The residential rate transition began in the fourth quarter of 2018 and was completed in the fourth quarter of 2019.

All of SMUD's business customers are also on time-based rates. On June 24, 2019, the Board approved an update to the commercial TOD rates to improve consistency and better align commercial rates

with current energy market prices. The transition was completed in the first quarter of 2022. See “RATES AND CUSTOMER BASE – Rates and Charges.”

Renewable Options. SMUD’s customers have been increasingly interested in distributed energy resources, mainly through the installation of solar systems. As of December 2023, approximately 51,374 of SMUD’s residential and commercial customers, approximately 8% of retail customers, had installed solar systems, representing approximately 360 MW of solar installations.

As the cost of energy storage continues to decline, SMUD anticipates an increase in behind-the-meter energy storage, mainly through the installation of battery storage systems. As of December 2023, approximately 1,532 of SMUD’s residential and commercial customers, approximately 0.2% of retail customers, had installed storage systems, representing approximately 10 MW of storage.

As another option for solar, SMUD’s SolarShares® pilot program (the “SolarShares Pilot”) was established as a cost-effective and convenient way for commercial customers to meet their energy needs from solar power. The SolarShares Pilot offered SMUD commercial customers the opportunity to receive solar power without upfront costs or equipment installation through 5-, 10- or 20-year purchase contracts. Customers that entered into purchase contracts under the SolarShares Pilot receive up to half of their power from a utility-scale solar system. SMUD supplies solar power for the SolarShares Pilot either by building and maintaining utility-scale solar systems or by procuring solar power from third parties through power purchase agreements. The SolarShares Pilot generation was approximately 3.2% of retail sales in 2023. As of April 30, 2021, SMUD had completed the SolarShares Pilot and is not entering into new purchase contracts under the SolarShares Pilot.

Since January 2020, the California Building Code has required all newly constructed residential buildings under three stories to be powered by photovoltaic solar systems. A new home satisfies this requirement if it installs on-site solar or participates in an approved community solar or energy storage program. In February 2020, SMUD obtained approval from the California Energy Commission (“CEC”) to administer its own community solar program, called Neighborhood SolarShares® (“Neighborhood SolarShares”). SMUD’s Neighborhood SolarShares program can be used by developers of new low-rise residential buildings to satisfy the mandatory solar requirement. See also “DEVELOPMENTS IN THE ENERGY MARKETS – State Legislation and Regulatory Proceedings – *Rooftop Solar Mandate.*” Starting in 2023, the California Building Code’s mandatory solar requirement extends beyond low-rise residential properties, and other changes to the California Building Code’s community solar regulations took effect. SMUD revised its program to align with the new regulations and, in May 2023, obtained approval from the CEC to continue offering its Neighborhood SolarShares compliance option to newly constructed low rise residential homes in its service territory.

In addition to the SolarShares Pilot and Neighborhood SolarShares, SMUD maintains a voluntary green energy pricing program called Greenergy® (“Greenergy”). The Greenergy program allows customers the opportunity to pay an additional amount per month to ensure that either all or part of their electricity comes from green or carbon free energy sources. In 2023, the program allocated Renewable Energy Credits (“RECs”) equivalent to approximately 4.2% of retail sales to its participating customers.

Energy Efficiency. To further assist customers in managing energy usage and reducing regional carbon emissions and air pollution, SMUD offers an extensive array of energy efficiency and building electrification programs and services including financial incentives, loans, energy audits and education. In addition, SMUD has partnered with local developers to incorporate energy efficiency and all-electric construction measures into new residential and commercial construction, which helps developers plan and design efficient, cost-effective and low or zero-emission buildings. As part of SMUD’s 2019 Integrated Resource Plan (“IRP”), SMUD set a goal for regional carbon emissions through transport and building

electrification that aims to reduce carbon emissions in buildings and transport by 64% over the next 20 years. SMUD’s focus on electrification is continued in the Zero Carbon Plan (defined and discussed below). SMUD was the first electric utility in the country to set its efficiency goals based on carbon reductions, allowing building electrification and energy efficiency to both count toward meeting SMUD’s efficiency goals. This is a significant opportunity, as converting a typical home today to all-electric saves more than three times the carbon emissions compared to doing a major energy efficiency upgrade alone to the same building. See “POWER SUPPLY AND TRANSMISSION – Projected Resources.”

Sustainable Power Supply and Transmission

Maintaining a sustainable power supply entails focusing efforts on researching, promoting and implementing new renewable energy technologies and sources to meet SMUD’s long-term commitment to reducing carbon emissions and providing a reliable energy supply. SMUD defines a sustainable power supply as one that reduces SMUD’s GHG emissions to serve retail customer load to zero by 2030. See “– 2030 Zero Carbon Plan” below. SMUD is planning to achieve zero GHG emissions to serve retail customer load through investments in energy efficiency, clean distributed energy resources, renewables portfolio standard (“RPS”) eligible renewables, energy storage, large hydroelectric generation, clean and emissions free fuels, carbon capture and sequestration, and new technologies and business models. Additionally, SMUD plans to continue pursuing GHG emissions reductions through vehicle, building and equipment electrification. At the same time, SMUD’s plans for maintaining a sustainable power supply include assuring the reliability of SMUD’s electric system, minimizing environmental impacts on land, habitat, water and air quality, and maintaining competitive rates relative to other electricity providers in the State.

A number of bills affecting the electric utility industry have been enacted by the State Legislature. In general, these bills regulate GHG emissions and encourage greater investment in energy efficiency and sustainable generation alternatives, principally through more stringent RPS. See “DEVELOPMENTS IN THE ENERGY MARKETS – State Legislation and Regulatory Proceedings” herein.

2030 Zero Carbon Plan. In July 2020, the Board declared a climate emergency and adopted a resolution calling for SMUD to take significant and consequential actions to reduce its carbon footprint by 2030. On April 28, 2021, the Board approved SMUD’s 2030 Zero Carbon Plan (the “Zero Carbon Plan”). The Zero Carbon Plan is intended to be a flexible roadmap for SMUD to eliminate carbon emissions from its electricity production by 2030 while maintaining reliable and affordable service. To achieve these goals the Zero Carbon Plan is focused on four main areas: natural gas generation repurposing, proven clean technologies, new technologies and business models and financial impacts and options. SMUD plans to revisit the Zero Carbon Plan annually.

The natural gas generation repurposing focus of the Zero Carbon Plan calls for exploring the replacement of two of SMUD’s five Local Gas-Fired Plants (as defined herein) and the retooling of the other three Local Gas-Fired Plants. See “POWER SUPPLY AND TRANSMISSION – Power Generation Facilities – *Local Gas-Fired Plants.*” Based on SMUD’s studies to date, SMUD estimates that McClellan (as defined herein) and the Campbell Soup Project (as defined herein) can be replaced in the next several years depending on SMUD’s success with replacement resources. Final decisions about the replacement of these two Local Gas-Fired Plants will be based on additional reliability studies and engagement with the community. As part of the Zero Carbon Plan, SMUD is also exploring converting the Carson Project (as defined herein) and the Procter & Gamble Project (as defined herein) to reliability use operations only and investigating the use of alternative fuels like Renewable Natural Gas-biomethane (RNG-biomethane), hydrogen and other biofuels for the Carson Project, the Procter & Gamble Project, and the Consumnes Power Plant (as defined herein). In addition, SMUD is investigating new technologies such as long duration energy storage, carbon capture and sequestration, hydrogen and other clean fuel alternatives to help support

the reduction of GHG emissions in SMUD’s energy supply. All final generator configurations are subject to reliability assessments.

The proven clean technologies focus of the Zero Carbon Plan calls for SMUD to procure approximately 1,100 to 1,500 MW of utility-scale solar photovoltaic (“PV”) generating capacity, 700 to 1,100 MW of local utility-scale battery storage, 300 to 500 MW of wind generating capacity, and 100 to 220 MW of geothermal generating capacity. The Zero Carbon Plan also estimates that customer installation of approximately 500 to 750 MW of behind-the-meter solar PV generating capacity and approximately 50 to 250 MW of behind-the-meter battery storage will assist SMUD with achieving the Zero Carbon Plan goals.

With respect to new technologies and business models, the Zero Carbon Plan focuses on evaluating, prioritizing and scaling the emerging technologies that SMUD expects will have the largest impact on reducing carbon in SMUD’s 2030 resource mix. SMUD is currently focused on various areas of technology and customer-focused programs, including electrification, education, demand flexibility, virtual power plants, vehicle-to-grid technology, and new grid-scale technologies. The Zero Carbon Plan forecasts that customer-owned devices and SMUD customer-focused programs will contribute between 360 and 1,300 MW of capacity to SMUD’s grid by 2030.

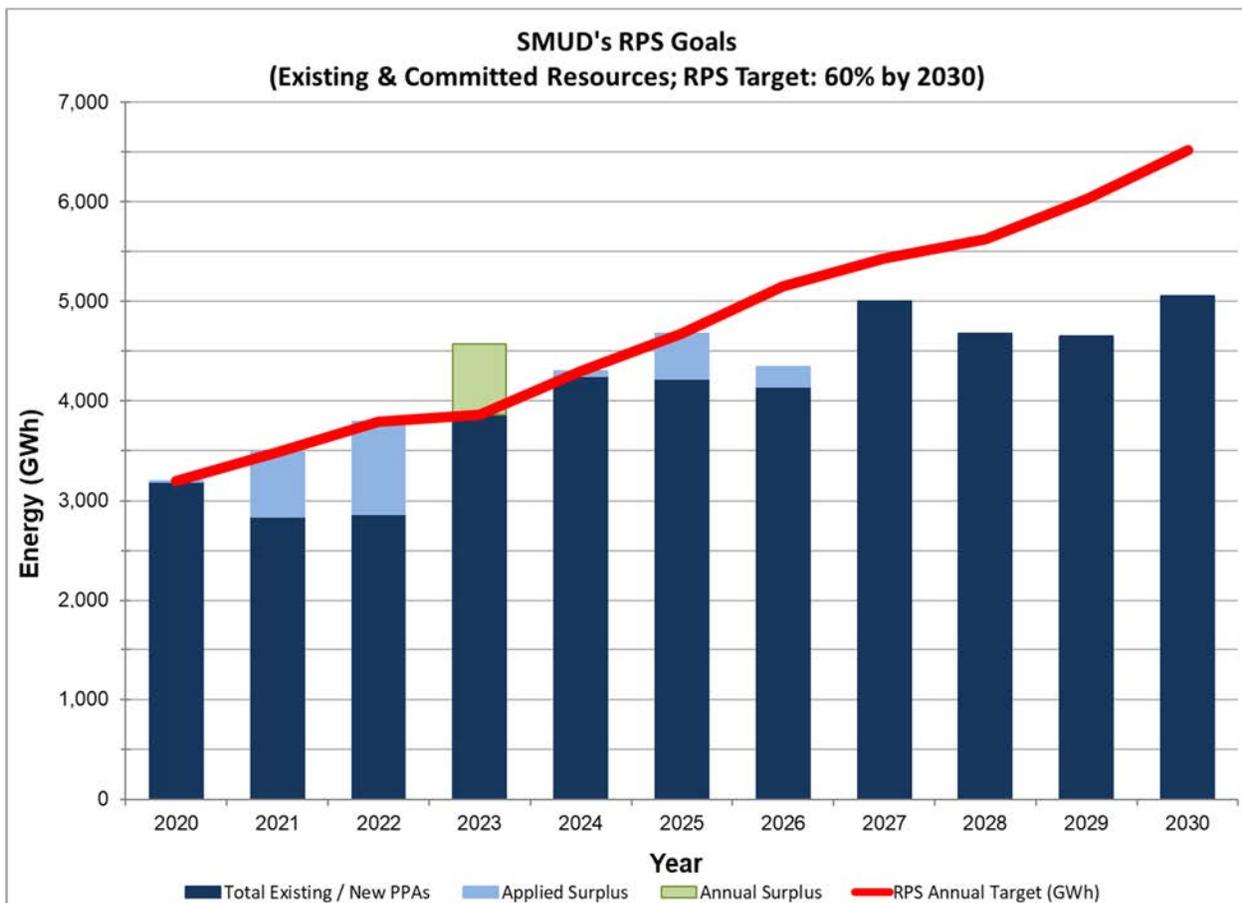

The financial impacts and options focus of the Zero Carbon Plan aims to keep SMUD rate increases at or below the rate of inflation while achieving SMUD’s goal of eliminating carbon emissions from its power supply by 2030. To pay for the expected costs of the Zero Carbon Plan and keep rate increases at or below the rate of inflation, the Zero Carbon Plan estimates the need for SMUD to realize between \$50 million and \$150 million of sustained annual savings. SMUD currently plans to achieve these sustained annual savings by exploring the implementation of operational savings strategies and pursuing partnership and grant opportunities.

While the ultimate impacts of the Zero Carbon Plan on SMUD’s financial results and operations are difficult to predict and are dependent on a variety of factors, such as the relative cost of procuring energy from clean technologies, the availability and relative cost of new technologies, and the adoption and implementation of energy efficiency and other measures by SMUD’s customers, such impacts could be material.

Renewable Energy and Climate Change. The California Renewable Energy Resources Act, established by Senate Bill X1-2 (“SBX1-2”) and the Clean Energy and Pollution Reduction Act of 2015, enacted by Senate Bill 350 (“SB 350”) require that SMUD meet 33% of its retail sales from RPS-eligible renewable resources by 2020 and 50% of its retail sales from RPS-eligible renewable resources by 2030. Senate Bill 100 (“SB 100”), passed by the legislature and approved by then-Governor Brown on September 10, 2018, accelerates the RPS targets and establishes a new 60% target by 2030. The bill also created a planning goal to meet all of the State’s retail electricity supply with a mix of RPS-eligible and zero-carbon resources by December 31, 2045. See “DEVELOPMENTS IN THE ENERGY MARKETS – State Legislation and Regulatory Proceedings – *Renewables Portfolio Standards*” for a discussion of the State RPS requirements.

SMUD’s compliance with State RPS requirements is evaluated over 3- or 4-year compliance periods. SMUD met the State RPS requirements for the first compliance period (2011-2013) and second compliance period (2014-2016). The third compliance period (2017-2020) required SMUD to source one-third of its energy from renewable resources, and SMUD had sufficient RECs to meet the third compliance period requirements. SMUD filed its 2020 and third compliance period RPS compliance report with the CEC in the second quarter of 2021 and the CEC adopted SMUD’s third compliance period verification report in December 2023. SMUD expects the confirmation letter from the CEC indicating that SMUD was

in full compliance with its third compliance period RPS obligations in the first quarter of 2024. As of the end of the third compliance period (2020), SMUD had approximately one million surplus RECs available to help meet future RPS targets. SMUD expects to file its 2023 RPS compliance report by July 1, 2024, showing that SMUD will have provided approximately 50% of its retail sales from RPS-eligible renewable resources in 2023, which is greater than the interim 2023 RPS target of 41.25%. RPS compliance is determined by compliance period and not by individual years and SMUD anticipates having sufficient surplus procured and/or under contract resources in the fourth compliance period (2021-2024) to be in compliance with the RPS requirements. In addition to meeting RPS standards, SMUD serves an additional 7.4% of its customer load with renewable energy through its voluntary SolarShares and Greenergy pricing programs described above. SMUD estimates that it has sufficient renewable energy deliveries, new power supply contract commitments, new power supply commitments under active discussion, and RPS-eligible surplus carryover to meet its RPS requirements through 2025. Additional resources have been identified that are expected to provide sufficient RPS-eligible resources to cover most of SMUD’s RPS requirements through 2030. Future solicitations may be needed to fill any remaining gaps. The following chart illustrates SMUD’s current RPS requirements through 2030 and its existing and committed resources utilized to meet those requirements.

In addition to procuring new sources, meeting the RPS requirements will require replacement of certain existing renewable contracts which expire in future years. While SMUD anticipates it will meet much of its renewable resource requirements through purchase contracts with third parties, it continues to explore additional options, including wind, solar, biomass, and geothermal developments, partnering with other utilities on future projects, and local development options. SMUD’s resource forecast (see “POWER SUPPLY AND TRANSMISSION – Projected Resources”) accounts for future renewable resources as a component of “Uncommitted Purchases.” To meet SMUD’s Zero Carbon Plan goals, SMUD anticipates meeting loads in 2030 with approximately 70-80% renewable resources, in addition to hydro and other new zero carbon technologies. See “– 2030 Zero Carbon Plan” above.

Given the intermittent nature of power from renewable resources such as wind and solar, SMUD is exploring and investing in options that provide the flexibility to manage the intermittency of such renewable resources. Potential options include energy storage resources, which SMUD has committed to as part of the Zero Carbon Plan, and expanding load management resources. Additionally, on April 3, 2019, SMUD, through its membership in BANC, a joint exercise of powers agency formed in 2009, and currently comprised of SMUD, the Modesto Irrigation District (“MID”), the City of Roseville (“Roseville”), the City of Redding (“Redding”), the City of Shasta Lake and the Trinity Public Utilities District, commenced participation in the California Independent System Operator Corporation (“CAISO”) western energy imbalance market (“WEIM”). Participation in the WEIM benefits SMUD by providing it with broader access to balancing resources within the region to help manage its expanding renewable portfolio. In addition, other entities within the BANC Balancing Authority Area began participation in the WEIM on March 25, 2021. See “BUSINESS STRATEGY – Serving SMUD’s Customers – *Operational Independence and Local Control*” and “POWER SUPPLY AND TRANSMISSION – Balancing Authority Area Agreements.”

In 2022, SMUD’s Board formally adopted the 2030 Zero Carbon Plan as SMUD’s updated IRP. SMUD filed the approved IRP update with the CEC on September 14, 2022, pursuant to the CEC’s IRP guidelines, which called for updating SMUD’s IRP filing within five years of SMUD’s previous filing of April 29, 2019. SMUD’s Zero Carbon Plan built upon the April 2019 IRP and set a goal of zero carbon emissions by 2030. SMUD’s next formal IRP process is expected to be completed and filed with the CEC in 2027. See “BUSINESS STRATEGY – Sustainable Power Supply and Transmission – *2030 Zero Carbon Plan*.”

The State’s carbon cap-and-trade market established pursuant to Assembly Bill 32 (“AB 32”) began in 2013. See “DEVELOPMENTS IN THE ENERGY MARKETS – State Legislation and Regulatory Proceedings – *Greenhouse Gas Emissions*” for a discussion of AB 32 and the State’s cap-and-trade program. SMUD anticipates that allowances allocated to SMUD will nearly equal SMUD’s compliance obligations under normal water year conditions. Under low water year conditions, SMUD may need to purchase additional allowances to cover its compliance obligations, including carbon obligations related to wholesale energy sales from SMUD’s natural gas power plants. As SMUD implements its clean power goals, SMUD expects its need for these allowances to decline.

There is scientific consensus that increasing concentrations of GHG have caused and will continue to cause a rise in temperatures in the State and around the world. The change in the earth’s average atmospheric temperature, generally referred to as “climate change,” is, among other things, expected to result in a wide range of changes in climate patterns, including increases in the frequency and severity of extreme weather events, including droughts and heat waves, more frequent incidences of wildfires, changes in wind patterns, sea level rise and flooding, any of which alone or in combination could materially adversely affect SMUD’s financial results or operations. See also “FACTORS AFFECTING THE REGION” and “OTHER FACTORS AFFECTING THE ELECTRIC UTILITY INDUSTRY – Other Factors.” As described above, SMUD is actively working to meet its sustainable power supply goals,

reduce its own GHG emissions, and assist the local governments in the territory it serves with their desired GHG reductions. In 2016, SMUD introduced the Pilot Natural Refrigerant Incentive Program, its first customer program providing incentives for GHG reduction in addition to kWh savings. SMUD is a founding member and active participant in the Capital Region Climate Readiness Collaborative, a public private partnership formed to better understand and plan for climate impacts expected in the region. SMUD is also an active member of the United States Department of Energy (the “DOE”) Partnership for Energy Sector Climate Resilience. SMUD regularly reviews scientific findings related to climate change and in 2016 published its Climate Readiness Assessment and Action Plan. In 2024, SMUD is planning to update the Climate Readiness Assessment and Action Plan along with other climate resiliency actions.

Energy Storage Systems. Assembly Bill 2514 (“AB 2514”) requires the Board to re-evaluate energy storage goals every three years. In compliance with AB 2514, the Board established a target of 9 MW of energy storage procurement by December 31, 2020, which SMUD has procured. See “DEVELOPMENTS IN THE ENERGY MARKETS – State Legislation and Regulatory Proceedings – *Energy Storage Systems*” for further discussion of AB 2514. In September 2020, the Board directed that energy storage forecasts be implemented through SMUD’s IRP process going forward. See “BUSINESS STRATEGY – Sustainable Power Supply and Transmission – *Renewable Energy and Climate Change*” above for a discussion of SMUD’s IRP. SMUD is also evaluating how to couple utility-scale solar with utility-scale storage to support future system reliability needs and renewable energy goals.

Meeting Peak Load. A significant consideration for SMUD will be how it addresses its system peak load. SMUD has implemented programs and tools, such as advanced metering, energy efficiency options, and TOD rates for residential customers, to help customers manage their costs while helping SMUD reduce its peak load. Analysis of 2022 data showed a reduction of approximately 108 MW, weather adjusted, for residential customers during the TOD peak period (5-8 p.m. local time). SMUD staff will continue to monitor the progress and results of the implementation of TOD rates and will use this information to inform future rate actions and load forecasts. See “BUSINESS STRATEGY – Serving SMUD’s Customers – *Time-of-Day Rates.*”

On September 16, 2021, the Board approved an optional residential Critical Peak Pricing rate (the “Peak Pricing Rate”), which went into effect June 1, 2022. The Peak Pricing Rate is designed to reduce load by increasing the price of energy when the grid is most impacted, up to 50 hours per summer. In exchange, customers on the rate will receive a per kWh discount on summer Off-Peak and Mid-Peak rates. SMUD is also exploring the use of more distributed energy resources and demand response programs that could further reduce SMUD’s system peak.

Operational Independence and Local Control. A key component of SMUD’s business strategy is focused on maintaining its independence in operating and maintaining its resources. As such, SMUD has taken a number of actions to mitigate the potential impacts of various federal and state regulatory actions. For example, in 2002 SMUD established itself as an independent control area (now termed “Balancing Authority”) within the Western Electricity Coordinating Council (“WECC”) region. By removing itself from CAISO’s Balancing Authority area, SMUD became responsible for balancing electric supply and demand within its own service territory. This move substantially reduced fees paid to CAISO, preserved operational flexibility and helped to insulate SMUD from the uncertain regulatory environment and tariff structure of CAISO. In addition to decreased financial risks, this independence also reduced SMUD’s exposure to the impacts of capacity and energy shortages in the CAISO Balancing Authority area. Further, as an independent Balancing Authority, SMUD continued to support the statewide electric grid in events of electrical emergencies requiring rotating outages, such as loss of major transmission lines or equipment, as provided in the statewide emergency plan. By 2006, the SMUD Balancing Authority footprint expanded north to the California-Oregon border and south to Modesto, to include the service areas of the WAPA, MID, Redding and Roseville, and TANC-owned 340-mile 500-kV California-Oregon Transmission Project

(“COTP”). In October 2009, SMUD, with the coordination and cooperation of WAPA, joined the Western Power Pool Reserve Sharing Group, which supports reliability and reduces operating costs. In May 2011, BANC assumed the role of the Balancing Authority, though SMUD continues to oversee operation of the grid on behalf of BANC. BANC members share cost responsibility for balancing authority-related compliance obligations, liabilities, and operations. BANC also serves as an important venue for SMUD and other BANC members to collaborate with respect to operational and market improvements inside the BANC footprint and to preserve their operational independence. See “POWER SUPPLY AND TRANSMISSION – Balancing Authority Area Agreements.” On April 3, 2019, SMUD, through its participation in BANC, began operating in the CAISO WEIM, which helps SMUD better manage the integration of renewable energy resources. The CAISO WEIM is a voluntary market, which allows SMUD to maintain its operational independence from the CAISO, while providing SMUD greater access to balancing resources throughout the western region. See “POWER SUPPLY AND TRANSMISSION – Balancing Authority Area Agreements.”

Electricity, Natural Gas, and Related Hedging

SMUD continues to utilize a comprehensive and integrated power and fuel supply strategy to acquire a reliable and diversified portfolio of resources to meet existing and future needs. This strategy includes a combination of both physical supply and financial hedging transactions to reduce price risk exposure over a five-year horizon. SMUD’s physical supply arrangements include ownership of power generating resources, as well as a diversified portfolio of power and fuel supply purchase contracts that range in duration, with a mixture of fixed and variable pricing terms.

With regard to the power purchase contracts, SMUD has entered into a series of contracts for the purchase of electricity to supply the portion of its resource needs not already provided by owned resources. SMUD also actively manages its exposure on variable rate electricity purchases, and at times may enter into financial contracts to fix prices by using options to reduce price risk, in each case when warranted by economic conditions. See “POWER SUPPLY AND TRANSMISSION – Power Purchase Agreements.”

With regard to fuel supply contracts, SMUD utilizes a similar strategy of employing financial contracts of various durations to hedge its variable rate fuel supply contracts. As of February 29, 2024, these contracts are forecasted to have hedged the price exposure on approximately 100%, 82% and 81% of SMUD’s anticipated natural gas requirements for 2024, 2025 and 2026, respectively. While the financial effects resulting from the unhedged portions of SMUD’s natural gas requirements are difficult to predict, SMUD’s financial results could be materially impacted. See “POWER SUPPLY AND TRANSMISSION – Fuel Supply – *Supply*.”

As provided in SMUD’s natural gas contracts, SMUD may be required to post collateral to various counterparties. As of February 29, 2024, SMUD did not have any collateral posting obligations. A decrease in natural gas prices could result in a collateral posting by SMUD. While the posting of collateral is not an expense for SMUD, it does temporarily encumber unrestricted cash balances.

To hedge against hydroelectric production volatility of SMUD-owned hydroelectric facilities, SMUD implemented a pass-through rate component called the Hydro Generation Adjustment (the “HGA”), and established a Hydro Rate Stabilization Fund (the “HRSF”). Similarly, to hedge against hydroelectric production volatility of non-SMUD-owned hydroelectric facilities, SMUD implemented a HGA and established a WAPA Rate Stabilization Fund (“WRSF”). These rate stabilization funds and rate pass through mechanisms help to offset increased power supply or fuel supply costs in years where precipitation levels at SMUD-owned and non-SMUD-owned hydroelectric facilities are low. See “RATES AND CUSTOMER BASE – Rate Stabilization Funds.”

Managing Risks

SMUD maintains an Enterprise Risk Management (“ERM”) program, a strategic approach to managing enterprise-wide risks as a portfolio, to help reduce the chance of loss, create greater financial stability and protect SMUD resources. It is designed to maintain an early warning system to monitor changes in, and the emergence of, risks that affect the organization’s business objectives. Under the purview of the Enterprise Risk Oversight Committee, composed of executive members and chaired by the Chief Financial Officer, ERM conducts ongoing risk identification, assessments, monitoring, mitigation, risk-based budgeting and reporting. To ensure accountability and oversight, each identified risk is assigned to an executive-level risk owner. Risk status and mitigation efforts are reported monthly to the Board.

Competitive Challenges

In the coming decade, utilities like SMUD may face competition from companies in other industries looking to diversify into the energy sector. Examples of developing competitive areas include retail sale of electricity, distributed electric storage resources, renewable distributed generation (mostly solar in Sacramento), customer installation of fuel cells, third-party electric vehicle charging, home or business automation that enables greater customer participation in energy markets, and third-party provision of energy management software and solutions.

SMUD has a wide range of initiatives to monitor and adapt to changing market conditions and new industry participants. Key areas of focus include:

- Enhancing customer experience. Recognizing the importance of meeting customer expectations, SMUD introduced the Customer Experience Strategy in 2016 to provide customers “value for what they pay” and further strengthen customer loyalty. The initiative is focused on ensuring SMUD has the people, systems, technology, programs and services to consistently meet or exceed customers’ changing expectations. The customer experience is measured via surveys with the goal of achieving 80% of customers agreeing that SMUD provides them with value for what they pay by 2030.
- Restructuring electric rates. In 2017, the Board approved TOD rates as the standard rate for residential customers. The residential rate transition began in the fourth quarter of 2018, and the full transition was completed in the fourth quarter of 2019. All of SMUD’s business customers are also on time-based rates. In 2019, the Board approved a restructuring of commercial rates to collect a greater portion of fixed costs through fixed charges and to better align time periods and prices with energy markets. The transition was completed in the first quarter of 2022. See “RATES AND CUSTOMER BASE – Rates and Charges” and “FACTORS AFFECTING THE REGION – Impacts from COVID-19 Pandemic.”
- Ongoing integrated resource planning. SMUD monitors and updates its integrated resource planning to ensure future sources of energy balance cost, reliability and environmental requirements with the flexibility to meet challenges of changing market and regulatory conditions, customer energy resources, and emerging technologies.

Leveraging Core Competencies

In addition to these initiatives, SMUD is leveraging core competencies to improve industry safety and help communities serve their customers’ energy needs.

Sacramento Power Academy. The Sacramento Power Academy is SMUD’s operational training center providing training support for all of SMUD’s skilled trades professionals. Operating on a 10-acre training facility the academy oversees SMUD’s 14 skilled trades apprenticeships. The academy’s experienced training professionals serve as liaisons and mentors to apprentices progressing through on-the-job training, program testing, night schooling, and extensive training components. The academy also ensures SMUD’s skilled trades professionals are safe and compliant by coordinating and delivering annual regulatory and safety training. The academy is also a workforce development hub utilized by SMUD to increase awareness of and interest in skilled trades careers at SMUD, in SMUD’s community, and in the utility industry.

Community Energy Services. In 2002, Assembly Bill 117 was passed to establish Community Choice Aggregation in the State by authorizing Community Choice Aggregators (“CCAs”) to aggregate customer electric load and purchase electricity for customers. SMUD’s Community Energy Services department was established in 2017 to support organizations with values closely aligned with SMUD’s values, while also generating additional revenue for SMUD. CCA programs are proliferating in the State thanks to support for expanding renewable energy use and desire for local control particularly for electricity procurement. There are numerous CCAs operating in the State, and more are anticipated to launch in the future. CCAs are responsible for procuring wholesale power, setting the generation rate, and staffing a call center to handle opt-outs and questions about the power portfolio. The local investor-owned utility (“IOU”) continues to deliver electricity from the electric grid, maintain its electric infrastructure, bill customers and collect payments.

In October 2017, SMUD was selected by the governing board of Valley Clean Energy (“VCE”) to provide technical, energy and support services, including data management and call center services, wholesale energy services, and business operations support, to VCE for a five-year term expiring May 31, 2023. SMUD and VCE recently executed a new contract for data management, contact center, consulting and debt collection services that expires on December 31, 2028. VCE is a joint powers agency formed in 2016 by the City of Woodland, the City of Davis and Yolo County to implement a local CCA program. The service territory expanded to include the City of Winters in 2021. The mission of VCE is to deliver cost-competitive clean electricity, product choice, price stability, energy efficiency, and greenhouse gas emissions reductions to its customers in Yolo County. VCE began electric services to its customers in the summer of 2018, giving Yolo County residents a choice between two electricity providers, VCE and PG&E.

In November 2017, SMUD was selected by the governing board of East Bay Community Energy (“EBCE”) to provide call center and data management services for a three-year term beginning in January 2018. SMUD signed a new contract with EBCE in January 2022 for call center and data management services for an additional three-year term. EBCE recently changed its name to Ava Community Energy (“Ava”). Ava is a joint powers agency formed in 2016 by the cities of Albany, Berkeley, Dublin, Emeryville, Fremont, Hayward, Livermore, Oakland, Piedmont, San Leandro and Union City in Alameda County to implement a local CCA program. Ava expanded its territory to the cities of Pleasanton, Newark, and Tracy in April 2021.

In June 2019, SMUD was selected by the governing board of Silicon Valley Clean Energy (“SVCE”) to provide program services to help local SVCE communities reduce carbon pollution while delivering engaging customer experiences. SVCE programs are focused on grid integration, as well as electrifying transportation, buildings and homes. This contract was extended through September of 2024. In June 2023, SMUD was selected through a competitive process as SVCE’s concierge service vendor for three years. In December 2023, SMUD was again selected through a competitive process as SVCE’s programs administrator for five years. SVCE is a joint powers agency formed in 2016 by the cities of Campbell, Cupertino, Gilroy, Lost Altos, Los Altos Hills, Los Gatos, Milpitas, Monte Sereno, Morgan Hill,

Mountain View, Saratoga, Sunnyvale and Unincorporated Santa Clara County to implement a local CCA program.

In July 2022, SMUD was selected by the governing board of Marin Clean Energy (“MCE”) to provide data management, billing, data analytic and system assessment services to MCE. MCE is a joint powers agency formed in 2010 and represents 37 member communities across four Bay Area counties: Contra Costa, Marin, Napa and Solano.

In September 2022, SMUD was selected through a competitive process by the governing board of Sonoma Clean Power (“SCP”) to provide market research services to SCP. In January of 2023, SMUD was selected to provide strategic consulting services, providing recommendations related to programs and marketing. SCP is a joint powers agency that serves Sonoma and Mendocino counties.

While CCAs have had success in the State, they are susceptible to business, regulatory and other risks that could lead to a financial loss and/or result in a cessation of operations for the CCA. These risks could extend to a CCA’s counterparties, including SMUD. SMUD has made an effort to identify and mitigate potential counterparty risks to the extent possible in service agreements with the CCAs described above. SMUD may pursue opportunities to provide similar services to additional CCAs in the future. SMUD management does not expect its current arrangements to have a material adverse impact on SMUD’s financial position, liquidity or results of operations.

FACTORS AFFECTING THE REGION

Precipitation Variability

SMUD uses a precipitation measuring station located at Fresh Pond, California to approximate available water supply to SMUD’s Upper American River Project (the “UARP”) hydropower reservoirs. As of January 31, 2024, precipitation at Fresh Pond, California totaled 21 inches for the October-September hydropower water supply period. This is 75% of the 50-year rolling median of 28 inches. Total reservoir storage in the UARP hydropower reservoirs was 238 thousand acre-feet as of January 31, 2024, which was about 63% of capacity and approximately 6% above the historical average. SMUD manages its reservoirs to maximize water storage going into the summer season, which preserves generating capacity during SMUD’s high load months and ensures that SMUD meets its UARP FERC license requirements, including requirements for recreational and environmental flows.

There can be wide swings in precipitation from year to year. In years with below average rainfall, SMUD may have to generate or purchase replacement energy at additional cost. To hedge against variations in the volume of energy received from SMUD-owned UARP hydroelectric resources, SMUD uses the HRSF to help offset increased power supply or fuel supply costs. See “RATES AND CUSTOMER BASE – Rate Stabilization Funds.”

SMUD is also exposed to precipitation variability through its contract with the WAPA. In an average water year this contract provides roughly 661 gigawatt hours (“GWh”) of power. WAPA’s actual deliveries are based on hydroelectric generation (minus energy use for pumping) at Central Valley Project reservoirs in Northern California, which varies based on annual precipitation patterns, water deliveries for agriculture, and flow requirements in the Sacramento-San Joaquin River Delta. Unlike the UARP, SMUD does not monitor precipitation stations to approximate power deliveries under the WAPA contract, and instead relies on a forecast of power deliveries from WAPA. As of January 31, 2024, WAPA has forecasted power deliveries of 703 GWh for 2024, approximately 6% more than an average water year. See “POWER SUPPLY AND TRANSMISSION – Power Purchase Agreements – *Western Area Power Administration.*”

Wildfires

General. Wildfires in the State have become increasingly common and destructive. Frequent drought conditions and unseasonably warm temperatures have increased, and could further increase, the possibility of wildfires occurring in areas where SMUD maintains generation, transmission and distribution facilities. The number of diseased and dead trees has increased, and could further increase, this possibility. As a result, SMUD faces an increased risk that it may be required to pay for wildfire related property damage or personal injuries, fines and penalties, some of which may not be covered by insurance (including costs in excess of applicable policy limits), or may be disputed by insurers, and could be material. In addition, a significant fire or fires in SMUD’s generation, transmission or service area could result in damage or destruction to SMUD’s facilities, result in a temporary or permanent loss of customers or otherwise materially increase SMUD’s costs or materially adversely affect SMUD’s ability to operate its Electric System or generate revenues.

SMUD’s service territory is located within Sacramento County, which is located outside the California Public Utilities Commission (the “CPUC”) high fire threat areas established in 2018. However, as described below, SMUD’s UARP facilities and certain of SMUD’s and TANC’s transmission facilities are within CPUC high fire threat areas. In addition, as described below, certain portions of SMUD’s service territory are located within the California Department of Forestry and Fire Protection (“Cal Fire”) Fire Protection and Resource Assessment Program (“FRAP”) Moderate, High and Very High Fire Hazard Severity Zones. SMUD’s exposure to liability for damages related to its UARP facilities, which are located within high fire threat areas in El Dorado County, is reduced due to risk mitigation measures adopted by SMUD and the low number of inhabitants and structures near the UARP facilities (See “Wildfire Mitigation” below).

SMUD continues to take responsible action to minimize its exposure to liability from wildfires; however, under current State law, utilities can be held liable for damages caused by wildfires sparked by their equipment or other facilities regardless of whether the utility was negligent or otherwise at fault. PG&E and other major IOUs in the State have experienced credit rating downgrades as a result of potential wildfire liability exposure, which may have implications for the electric market generally. At this time the full extent of SMUD’s potential exposure to wildfire risk is unknown.

Distribution (SMUD Service Territory). State law requires Cal Fire to classify areas in the State based on the severity of the fire hazard that is expected to prevail there. These areas or “Fire Hazard Severity Zones” are based on factors such as fuel (material that can burn), slope and the expected chance of burning. There are three Fire Hazard Severity Zones (Moderate, High and Very High) based on increasing fire hazard. Portions of SMUD’s service territory are located within these Fire Hazard Severity Zones. SMUD has assessed its service territory based on Cal Fire’s FRAP map, adopted in 2007; the following table illustrates SMUD’s assessment of the approximate extent of its service territory and retail customer base located within the three Fire Hazard Severity Zones as of March 2019.

Fire Hazard Severity Zone	Moderate	High	Very High
Acres of SMUD Service Area	231,816	2,337	1,061
% of Total SMUD Service Area	40.6%	0.4%	0.2%
Number of Retail Customers	53,621	4,285	148
% of Total Retail Customers	7.7%	0.6%	0.0%

Transmission (Outside of SMUD Service Territory). In 2018, the CPUC approved a new statewide fire map that identifies areas of elevated and extreme wildfire risk from utility-associated assets located throughout the State. SMUD directly participated in the development of the CPUC’s statewide fire map. In connection with the development of the CPUC’s statewide fire map, a peer review and a team of independent nationwide experts led by Cal Fire affirmed that SMUD’s electric service area is properly located outside of these elevated (“Tier 2”) and extreme (“Tier 3”) high fire threat areas; however, SMUD’s UARP facilities are located within both Tier 2 and Tier 3 areas. According to the CPUC, Tier 2 fire-threat areas are areas where there is an elevated wildfire risk from utility assets and Tier 3 fire-threat areas are areas where there is an extreme risk from utility assets. As of June 8, 2021, approximately 37 right-of-way miles of SMUD’s transmission lines are in Tier 2 fire-threat areas and approximately 19 right-of-way miles of SMUD’s transmission lines are in Tier 3 fire-threat areas. SMUD is also a member of TANC. As of July 2022, approximately 116.3 right-of-way miles of TANC’s transmission lines are in Tier 2 fire-threat areas and approximately 4.5 right-of-way miles of TANC’s transmission lines are in Tier 3 fire-threat areas. In accordance with its FERC license, SMUD adheres to a FERC-approved Fire Prevention and Response Plan for its UARP facilities. On May 17, 2018, in accordance with State law, SMUD’s Board of Directors determined that the UARP area may have a “significant risk of catastrophic wildfire” resulting from overhead electric facilities and that SMUD’s FERC-approved UARP Fire Prevention and Response Plan meets requirements for presenting wildfire mitigation measures to the Board for its approval.

Wildfire Mitigation. In response to potential wildfire risk, SMUD has implemented and is continuing to implement a series of measures intended to prevent wildfires from occurring, minimize the spread of any fire that does occur and improve the resiliency of its system. These measures include an increase in the degree of sophistication of fuel reduction inside and adjacent to rights-of-ways; installation of Cal Fire-approved exempt material to reduce the risk of sparking; enhanced inspection and maintenance programs; increased use of ignition-resistant construction, including covered conductors and undergrounding of conductors; increased monitoring of and identified responses to fire conditions, including operational procedures for the de-energization of lines during high fire conditions; and elimination of automatic reclosers on SMUD’s transmission lines and on SMUD’s distribution lines in certain areas during fire season.

SMUD’s proactive approach to vegetation management has been expanded to include the use of advanced technologies such as Light Detection and Ranging (“LiDAR”), ortho and oblique imagery that is used to pinpoint tree health and/or condition that may not yet be visible to the naked eye. In addition, SMUD has installed additional weather stations in transmission corridors and substations for increased situational awareness and has continued coordination and collaboration with local agencies and first responders as well as vulnerable populations.

State legislation enacted in 2018 and 2019 (SB 901 and AB 1054, respectively) requires publicly owned utilities (“POUs”) to prepare and present Wildfire Mitigation Plans to their governing boards by January 1, 2020, and annually thereafter. SB 901 requires POUs, including SMUD, before January 1, 2020, and annually thereafter, to prepare a wildfire mitigation plan and present it in a public meeting to their governing board. SB 901 requires POU’s to accept comments on the wildfire mitigation plan from the public, other local and State agencies, and interested parties, and to verify that the plan complies with all applicable rules, regulations, and standards, as appropriate. The bill requires a qualified independent evaluator to review and assess the comprehensiveness of its wildfire mitigation plan and present its report to the board in a public meeting. AB 1054 created a new Wildfire Safety Division within the CPUC to prioritize wildfire safety throughout the State, and established an appointed Wildfire Safety Advisory Board (“WSAB”) to advise and make recommendations relating to wildfire safety to this new Division. For POUs, the bill requires submittal of annual wildfire mitigation plans to the WSAB for review and advisory opinions relating to the content and sufficiency of the plans.

SMUD assembled an enterprise-wide team of subject-matter experts to prepare its plan in compliance with this legislation. SMUD's initial Wildfire Mitigation Plan ("WMP") was adopted by the Board in the fourth quarter of 2019, after circulation for public comment and review of the comprehensiveness of the plan by a qualified independent evaluator. The WMP and evaluator's report were submitted to the WSAB in 2020.

SMUD reviews its WMP each year, presenting the updated plan to the Board for adoption at duly noticed public meetings. The updated plans and evaluator reports are submitted to the WSAB for advisory opinion and recommendations. SMUD responds to the WSAB's comments regarding SMUD's WMP as part of its WMP process. SMUD will continue to annually review and update its WMP, conducting a comprehensive review at least every third year.

SMUD recently completed a comprehensive review and update of its WMP after soliciting public input and independent evaluation. The 2023-2025 WMP was adopted by the Board on June 15, 2023, and duly submitted to the WSAB.

Wildfire Insurance. Wildfires both in California and nationally have not only increased potential liability for utilities, but have also adversely impacted the insurance markets, leading to higher costs for coverage; coverages becoming prohibitively expensive; limited or restricted coverage to certain types of risks; or coverage at insufficient levels. SMUD most recently renewed its general and wildfire liability insurance coverage on June 15, 2023, increasing the coverage limit by \$25 million to \$275 million. SMUD increased the commercially insured portion of its wildfire coverage program from \$176 million to \$212.5 million and maintained the self-insured layers and quota share portions of the coverage at \$62.5 million.

In addition, it is expected that SMUD will have a portion of the \$500 million aggregate principal amount of its commercial paper and line of credit program to provide operational flexibility in the event of the occurrence of a wildfire or other operational event. However, SMUD has not covenanted to maintain the availability of the commercial paper program and line of credit program for these purposes and no assurances can be given that the commercial paper and line of credit program will be available at the time of, or during, such an event.

August 2020 Heat Wave

The State experienced a period of prolonged above average temperatures from August 14, 2020 through August 18, 2020. The CAISO was forced to institute rotating electricity outages in the State during this extreme heat wave. SMUD, as a member of BANC, and being outside of the CAISO did not have to implement any planned power disruptions. Additionally, SMUD was able to support the CAISO during some hours of the heat wave with both requested emergency assistance and wholesale market sales. SMUD's peak demand between August 14, 2020 and August 18, 2020, varied between 2,874 MW and 3,057 MW, well below SMUD's record peak of 3,299 MW.

September 2022 Heat Wave

The State experienced a period of prolonged above average temperatures from September 5, 2022 through September 8, 2022. On September 6, 2022, SMUD experienced its second highest peak demand of 3,263 MW. SMUD did not have to implement any planned power disruptions.

Storm Damage

In January 2023, SMUD experienced a series of winter storms that brought heavy rains and high winds causing damage to SMUD's grid and widespread outages for SMUD's customers. By the time the

storm response was complete, SMUD had experienced the largest mobilization of personnel and restoration crews in its history. SMUD incurred costs related to removing downed trees, restoring power from downed poles and broken lines, replenishing inventory, communicating with and providing assistance to customers, maintaining IT systems, and coordinating with local emergency agencies. SMUD is pursuing claims with Federal and State agencies to attempt to recover certain of SMUD's costs related to the storms. The material financial impacts have been reflected in SMUD's audited financial statements for the years ended December 31, 2023 and December 31, 2022, which are included in APPENDIX B.

Cosumnes Power Plant Outage

On June 5, 2022, the Cosumnes Power Plant (as defined herein) was shut down due to a ground fault in the Steam Turbine Generator ("STG") stator. The ground fault was caused by delamination of the insulation on one of the through bolts. Damage from the ground fault resulted in a full rewind and restack of the stator core, replacement of all stator through bolts, and a full rewind of turbine rotor. The Cosumnes Power Plant repairs were completed in February 2023 and the plant returned to service on March 5, 2023. During the extended outage, SMUD shifted generation to the other local gas-fired plants and the Sutter Energy Center and procured additional energy and resource adequacy capacity. SMUD also requested and received approval from the California Air Quality Board and California Energy Commission to operate one or both of the gas turbines without the STG. During the September 2022 heatwave, both of the gas turbines at the Cosumnes Power Plant were operated without the STG, providing 270 MW at peak.

To mitigate the financial impact of unplanned outages from its thermal assets, SMUD carries commercial property insurance with a business interruption endorsement. At the time of the loss, the coverage provided up to \$30.8 million of business interruption recovery per month at the Cosumnes Power Plant, with a sub-limit of \$310 million over any 18-month period. During the policy period, claims were subject to a \$5 million equipment damage deductible and a 60-day business interruption claims waiting period.

SMUD has settled the equipment damage portion of the loss for \$18.6 million, resulting in a \$13.6 million recovery. The business interruption portion of the claim remains in process, with SMUD receiving a \$50 million advance in December of 2022. As of January 2024, the carriers have confirmed an additional \$51 million in undisputed recovery, which is anticipated to be received in the first quarter of 2024. Thus far, SMUD has recovered \$114.6 million of the loss and will continue to work toward full settlement of the disputed portion of the claim, which is approximately \$68 million.

Impacts from COVID-19 Pandemic

While the impact of the COVID-19 pandemic on SMUD has lessened since the height of the pandemic in 2020, SMUD is still experiencing impacts from the pandemic. However, compared to weather adjusted load levels, SMUD's overall load is near or above pre-pandemic levels.

Part of the governmental response to the economic consequences of the pandemic required utility providers (including SMUD) to provide additional grace periods and flexible payment plans for the payment of utility bills or to refrain from pursuing collection remedies for unpaid bills for a period of time. SMUD also implemented a no-shutoff policy through January 2022 under which SMUD did not disconnect power to a customer for non-payment of their electric bill. Beginning in February 2022, SMUD resumed its normal payment, late fee, and disconnection process and began disconnections of unpaid accounts in late April 2022. As a result, SMUD has experienced an increase in delinquencies for customer electric accounts versus pre-pandemic levels. In December 2021, SMUD received \$41 million from the California Arrearage Payment Program ("CAPP") initial funding, and an additional \$9.9 million in 2022. All funds were applied to delinquent balances. As of December 31, 2023, the total delinquencies for customer electric

accounts were \$38.2 million, after the CAPP credit, which is an increase from the February 2020 balance of total delinquencies for customer electric accounts of \$16.9 million. The financial impacts stemming from delinquent accounts have been accounted for in SMUD's audited financial statements for the preceding years. Any successful recovery of delinquent accounts will contribute to an increase in net income.

SMUD also paused the recertification process for existing customers in SMUD's low-income discount program during the pandemic. The number of customers participating in the low-income assistance program increased by 16,407, or approximately 22% from February 2020 to December 2023. SMUD has resumed the recertification process for existing customers in the low-income discount program in 2023.

While the impacts of the COVID-19 pandemic on SMUD have lessened, if the pandemic and its consequences again become more severe or another similar event occurs, the impacts on SMUD's financial results and operations could be material.

RATES AND CUSTOMER BASE

Rates and Charges

SMUD's Board of Directors has autonomous authority to establish the rates charged for all SMUD services. Unlike IOUs and some other municipal utility systems, retail rate and revenue levels are not subject to review or regulation by any other federal, State or local governmental agencies. Changes to SMUD rates only require formal action by the Board of Directors after two public workshops and a public hearing. SMUD is not required by law to transfer any portion of its collections from customers to any local government. SMUD typically reviews and sets rates on a two-year cycle.

2019 Rate Action.

On June 24, 2019, the Board approved a 3.75% rate increase effective January 1, 2020, a 3.00% rate increase effective October 1, 2020, a 2.50% rate increase effective January 1, 2021, and a 2.00% rate increase effective October 1, 2021, for all customer classes. Additionally, the Board approved a restructuring of the commercial rates, including new time periods and an overall increase in the fixed bill components, such as the System Infrastructure Fixed Charge and demand charges, and a corresponding decrease in energy charges, making the restructuring revenue neutral by rate category. To minimize bill impacts, rate categories will be restructured over an eight-year period.

2021 Rate Action.

On September 16, 2021, the Board approved a 1.5% rate increase effective March 1, 2022 and a 2.0% rate increase effective January 1, 2023 for all customer classes. Additionally, the Board approved the Solar and Storage Rate, the optional residential Peak Pricing Rate, and updates to certain schedules of SMUD's Open Access Transmission Tariff ("OATT"). The Board also approved a new timeline for the commercial rate restructure transition, and all impacted commercial customers were transitioned to the new rates by the end of the first quarter of 2022.

SMUD also implemented a solar interconnection fee based on the size of solar interconnection and supporting programs such as battery incentives, incentives to enroll in SMUD's Peak Pricing Rate, battery incentives for Virtual Power Plants, and a program to bring the benefits of solar to under-resourced multi-family communities. These programs and fees are not subject to Board approval.

2023 Rate Action.

On September 21, 2023, the Board approved a 2.75% rate increase effective January 1, 2024, a 2.75% rate increase effective May 1, 2024, a 2.75% rate increase effective January 1, 2025, and a 2.75% rate increase effective May 1, 2025 for all customer classes. The Board also approved establishing the Energy Assistance Program Rate (“EAPR”) Rate Stabilization Fund, which will provide an additional discount to those low-income customers with the greatest need. The discount will be funded with discretionary, non-retail rate revenue, as to not have an impact on any future required rate changes. There is currently pending litigation concerning the adoption of the 2023 rates. See “LEGAL PROCEEDINGS – Proposition 26 Lawsuit.”

Rate Stabilization Funds

The Rate Stabilization Fund (“RSF”) is maintained by SMUD to reduce the need for future rate increases when costs exceed existing rates. At the direction of the Board, amounts may be either transferred into the RSF (which reduces revenues) or transferred out of the RSF (which increases revenues). The Board authorizes RSF transfers on an event driven basis. The RSF includes funds to hedge variations in the volume of energy received from WAPA hydroelectric generation, variation in AB 32 revenue and variations in Low Carbon Fuel Credit (“LCFS”) revenue. As of December 31, 2023, the balance in the RSF was \$115.8 million, which is approximately 7.2% of annual retail revenue.

Effective July 2008, SMUD implemented the HGA, which is a pass-through rate component to deal with variations in hydroelectric generation from the UARP (see “POWER SUPPLY AND TRANSMISSION – Power Generation Facilities – *Hydroelectric*”). The HGA is designed to increase revenues in dry years when SMUD must buy power to replace hydroelectric generation and return money to the HRSF in wet years when SMUD has more hydroelectric generation than expected. Each year SMUD determines the impact of precipitation variances on projected hydroelectric generation from the UARP. When the precipitation variance results in a deficiency of hydroelectric generation from the UARP, transfers from the HRSF, which was created as a component of the RSF, to SMUD’s available cash, will be made in an amount approximating the cost to SMUD of replacement power (up to 4% of revenues) until the balance in the HRSF is zero. When the precipitation variance results in a projected surplus of hydroelectric generation from the UARP, deposits will be made into the HRSF in an amount approximating the positive impact to SMUD from the surplus hydroelectric generation (up to 4% of revenues) until the balance in the HRSF is equal to 6% of budgeted retail revenue. If the balance in the HRSF is not sufficient to cover transfers that would otherwise be made in the event of a projected deficiency in UARP hydroelectric generation, a 12-month HGA surcharge will automatically be included on customers’ electric bills at a level that generates up to 4% of retail revenue. If the balance in the HRSF is equal to 6% of budgeted retail revenue on any precipitation variance calculation date and the precipitation variance results in a projected UARP hydroelectric generation surplus, the positive impact of the surplus may be used for other purposes at staff’s recommendation, with the approval of the Board, including returned to customers through an electric bill discount up to 4% of retail revenue. SMUD calculates HRSF transfers based on an April-March (water year) precipitation period at Fresh Pond, California. This precipitation station is used to approximate available water supply to SMUD’s UARP hydropower reservoirs. As of January 31, 2024, and based on the current HRSF water year precipitation forecast, SMUD anticipates transferring \$20.8 million out of the HRSF in April 2024.

In September 2023, SMUD added a pass-through rate component to deal with variations in hydroelectric generation from WAPA. Each year SMUD determines the WAPA Energy Delivery Variance (“EDV”) based on forecasted energy delivery minus the actual energy delivery. When the EDV variance is positive, transfers from the WRSF, which was created as a component of the RSF, to SMUD’s available cash, will be made in an amount approximating the cost to SMUD of replacement power (up to 2% of

revenues) until the balance in the WRSF is zero. If the balance in the WRSF is not sufficient to cover transfers that would otherwise be made in the event of a projected deficiency in WAPA hydroelectric generation, a 12-month HGA surcharge will automatically be included on customers' electric bills at a level that generates up to 2% of retail revenue. When the EDV variance is negative, deposits will be made into the WRSF in an amount approximating the positive impact to SMUD from the surplus hydroelectric generation (up to 2% of revenues) until the balance in the WRSF reaches a maximum of 4% of budgeted retail revenue. Any deposit amount that exceeds the WRSF maximum of 4% of budgeted retail revenue, may be used for other purposes with the approval of the Board, including returned to customers through an electric bill discount up to 2% of retail revenue. SMUD calculates WRSF transfers based on a forecasted delivery as provided by WAPA. As of January 31, 2024, and based on the current WRSF water year precipitation forecast, SMUD anticipates transferring \$5.7 million into the WRSF in April 2024.

As of December 31, 2023, the balance in the RSF, not including the HRSF, was \$115.8 million, which is approximately 7.2% of annual retail revenue. SMUD transferred approximately \$65.4 million into the HRSF from SMUD's available cash in April 2023 due to above average precipitation, which increased the balance in the HRSF from \$31 million to approximately \$96.4 million. Although the HRSF and the subaccount of the RSF that hedge variations in the volume of energy received from non-SMUD hydroelectric generation currently have positive balances, below average precipitation could deplete the HRSF and RSF balances to zero.

Low Income Discount

As of December 2023, approximately 91,407 customers received the low-income discount offered by SMUD, which represents approximately 16% of all residential customers. As a result of the COVID-19 pandemic, SMUD suspended recertification during the pandemic. In 2023 SMUD restarted the customer recertification. In 2023, the total discount was approximately \$32.7 million. As a result of the effects of the COVID-19 pandemic and related economic downturn, SMUD experienced an increase in low-income discount applicants. See "FACTORS AFFECTING THE REGION – Impacts from COVID-19 Pandemic."

While the low-income discount has provided substantial benefits to low-income customer bills for years, multiple economic variables, such as inflation and rate increases, have had disproportionately negative impacts on low-income customers, particularly those in the 0-50% Federal Poverty Level ("FPL"). In 2023, SMUD established an EAPR Rate Stabilization Fund ("ERSF") to provide an additional discount to the electricity usage charge up to an established maximum discount ("ERSF Additional Discount") for customers in the 0-50% FPL. The ERSF is funded by discretionary non-retail rate revenue, reviewed on an annual basis, and the specific monthly ERSF Additional Discount is set before the year the value is in effect. SMUD expanded its programs and services starting in 2016 to help customers with energy assistance, home improvement packages and education. SMUD is creating tailored solutions to best meet the needs of low-income customers. These solutions include free solar panels and inspecting homes to identify energy saving and fuel switching opportunities. As of December 2023, SMUD has performed 30,000 energy retrofits and, in partnership with Grid Alternatives (a non-profit organization that focuses on implementing solar power and energy efficiency for low-income families), 230 customers have benefited from free solar installations. Forty-eight additional homes received solar and energy efficiency through a partnership with Habitat for Humanity of Greater Sacramento. As part of SMUD's Zero Carbon Plan and the focus on building electrification, SMUD has also been ramping up electrification investments for low-income customers. Since 2019, SMUD has assisted more than 2,600 households with electrification upgrades. Additionally, SMUD has installed nearly 450 electric vehicle chargers and more than 400 electric vehicle circuits in low-income households or areas that serve low-income customers.

Rate Comparisons

SMUD’s rates remain significantly below those of PG&E and other large utilities throughout the State. The following table sets forth the average charges per kWh by customer class for both SMUD and PG&E. PG&E’s rates reflect their recently approved rate increase effective January 1, 2024.

AVERAGE CLASS RATES

	SMUD Rates (cents/kWh)⁽¹⁾	PG&E Rates (cents/kWh)⁽²⁾	Percent SMUD is Below PG&E⁽³⁾
Residential – Standard	18.98¢	44.67¢	57.5%
Residential – Low Income	13.28¢	28.31¢	53.1%
All Residential	18.00¢	37.78¢	52.4%
Small Commercial (Less than 20 kW)	18.33¢	44.17¢	58.5%
Small Commercial (21 to 299 kW)	16.98¢	43.80¢	61.2%
Medium Commercial (300 to 499 kW)	15.94¢	39.95¢	60.1%
Medium Commercial (500 to 999 kW)	14.93¢	34.52¢	56.7%
Large Commercial (Greater than 1,000 kW)	13.30¢	25.06¢	46.9%
Lighting – Traffic Signals	14.45¢	43.60¢	66.9%
Lighting – Street Lighting	15.73¢	56.32¢	72.1%
Agriculture	15.91¢	39.50¢	59.7%
System Average	16.70¢	36.57¢	54.3%

⁽¹⁾ Projected 2024 average prices for SMUD with rates effective January 1, 2024 and May 1, 2024.

⁽²⁾ PG&E average prices in 2024 reflect rates effective January 1, 2024, per Advice Letter 7116-E dated December 29, 2023.

⁽³⁾ The rates in the Average Class Rates table are calculated by dividing the total revenue of each class by the total usage of that class in kWh. The actual savings per customer will vary based on their electricity consumption.

[Remainder of Page Intentionally Left Blank]

The following table shows a comparison of SMUD’s charges for the average residential usage of 750 kWh per month (based on an average of summer and non-summer months) and charges of seven similar neighboring or largest utilities in the State.

STATEWIDE COMPARISON–RESIDENTIAL SERVICE

	Monthly Billing Charge 750 kWh⁽¹⁾⁽²⁾	Percent SMUD is (Below)/Above Utility
Sacramento Municipal Utility District	\$134.88	
Pacific Gas & Electric Company	\$345.42	(61.0%)
Roseville Electric Utility	\$122.20	10.4%
Turlock Irrigation District	\$123.67	9.1%
Modesto Irrigation District	\$162.66	(17.1%)
Los Angeles Dept. of Water & Power	\$185.52	(27.3%)
Southern California Edison Company	\$269.57	(50.0%)
San Diego Gas and Electric Company	\$294.74	(54.2%)

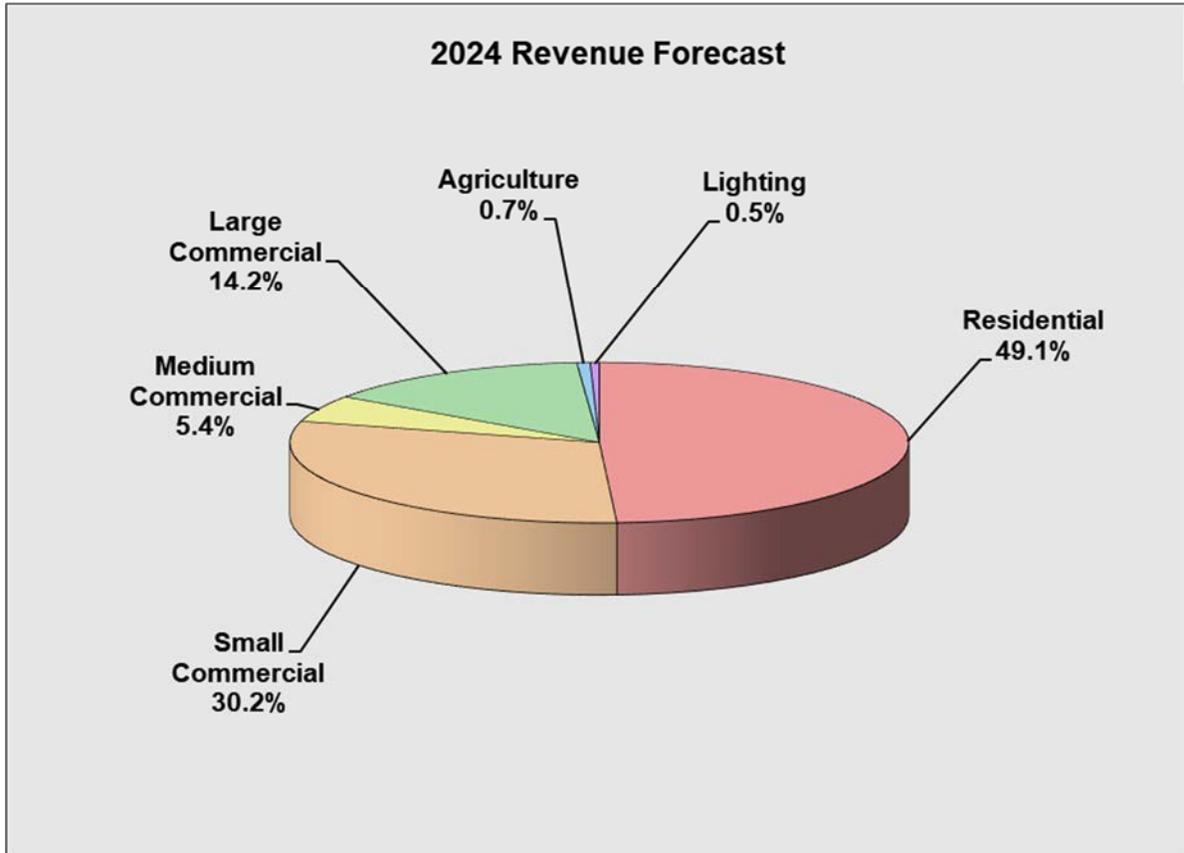

⁽¹⁾ Per individual utility’s published schedules as of January 1, 2024.

⁽²⁾ Average usage of theoretical customer using 750kWh per month.

[Remainder of Page Intentionally Left Blank]

Allocation of Revenue by Customer Class

The following chart sets forth the forecast percentage of SMUD revenues from billed sales associated with each customer class.

[Remainder of Page Intentionally Left Blank]

Customer Base; Largest Customers

A stabilizing influence on SMUD's revenues is that a substantial proportion is derived from residential customers (49.2% in 2023). Historically, revenue from commercial and industrial consumption has been more sensitive to economic fluctuation. Furthermore, SMUD has no dominant customers that account for a significant percentage of annual revenues. In 2023, no single customer contributed more than 3% of revenues. The top ten customers generated approximately 9% of revenues and the top 30 generated approximately 15% of revenues. The following table presents information on SMUD's top ten customers as of December 31, 2023.

SMUD'S LARGEST CUSTOMERS (As of December 31, 2023)

Customer Type	Annual Revenue (\$ millions)	% of Total Revenue
Government	33.67	2.10%
Government	32.04	2.00%
Government	15.28	0.95%
Technology	13.07	0.82%
Technology	11.05	0.69%
Communications	9.68	0.60%
Industrial Gases	9.28	0.58%
Government	8.27	0.52%
Retail	7.56	0.47%
Communications	7.32	0.46%
Top 10 Total	147.22	9.19%

POWER SUPPLY AND TRANSMISSION

Power Supply Resources

The following table sets forth information concerning SMUD’s power supply resources as of December 31, 2023. Capacity availability reflects expected capacities at SMUD’s load center, as well as entitlement, firm allocations and contract amounts in the month of July, which is generally SMUD’s peak month.

POWER SUPPLY RESOURCES (As of December 31, 2023)

Source:	Capacity Available (MW) ⁽¹⁾
Generating Facilities:	
Upper American River Project – Hydroelectric	701
Solano Wind Project – Wind ⁽²⁾	70
Hedge Battery ⁽²⁾	4
Sub-total:	775
Local Gas-Fired Plants:	
Cosumnes Power Plant	576
Carson Project.....	103
Procter & Gamble Project.....	166
McClellan	72
Campbell Soup Project	170
Sub-total:	1,087
Purchased Power:	
Western Area Power Administration (WAPA) ⁽³⁾ ⁽⁴⁾	395
Grady – Wind ⁽²⁾	25
Avangrid (Iberdrola) (PPM) – Wind ⁽²⁾	21
Feed-in-Tariff Photovoltaic – Solar ⁽²⁾	37
Rancho Seco Solar ⁽²⁾	69
NTUA Navajo Drew Solar ⁽²⁾	50
Great Valley – Solar ⁽²⁾	35
Wildflower Solar ⁽²⁾	4
Calpine Geysers – Geothermal	100
CalEnergy – Geothermal	26
Patua (Gradient/Vulcan) – Geothermal.....	12
Other Long-Term Contracts.....	17
ELCC Portfolio Adjustment ⁽²⁾	120
Sutter Calpine Thermal	258
Firm Contract Reserves ⁽⁴⁾	20
Committed Short-Term Purchases ⁽⁵⁾	375
Uncommitted Short-Term Purchases	29
Sub-total:	1,590
Total	3,452

- (1) Available capacity is the net capacity available to serve SMUD’s system peak load during the month of July.
(2) Capacity values for wind, solar, and storage projects shown are based on resource effective load carrying capability (“ELCC”) modeling.
(3) Total includes SMUD’s Base Resource share and WAPA Customer allocations.
(4) Assumes firm reserves of 5% are included.
(5) Committed Short-Term Purchases are primarily purchased on a year-ahead to season-ahead basis from various sources.

Note: Totals may not add due to rounding.

Power Generation Facilities

Hydroelectric. The UARP consists of three relatively large storage reservoirs (Union Valley, Loon Lake and Ice House) with an aggregate water storage capacity of approximately 400,000 acre-feet and eight small reservoirs. Project facilities also include eight tunnels with a combined length of over 26 miles and eight powerhouses containing 11 turbines. In addition to providing clean hydroelectric power and operating flexibility for SMUD, the UARP area provides habitat for fish and wildlife and a variety of recreational opportunities, including camping, fishing, boating, hiking, horseback riding, mountain biking and cross-country skiing.

The combined capacity of the UARP is approximately 685 MW at SMUD's load center in Sacramento. Under current licensing and mean water conditions, these facilities are expected to generate approximately 1,600 GWh of electric energy annually, which represents approximately 15% of SMUD's current average annual retail energy requirements. In 1957, the Federal Power Commission (predecessor agency to FERC) issued a license to SMUD for the UARP. This 50-year license was subsequently amended to add and upgrade facilities and now includes all segments of SMUD's hydroelectric facilities located on the South Fork of the American River and its tributaries upstream from the Chili Bar Project (described below). On July 23, 2014, FERC issued to SMUD a new 50-year license for the UARP.

On November 9, 2016 FERC issued an Order authorizing SMUD to construct the South Fork Powerhouse downstream of the UARP's Slab Creek Dam. Construction was substantially completed in the fall of 2020, and the new powerhouse was placed into operation on October 25, 2022, adding 1.8 MW of generation to the UARP's overall capacity.

On June 16, 2021, pursuant to Board authorization, SMUD acquired the Chili Bar Hydroelectric Project which consists of a 7 MW powerhouse, reservoir, dam and spillway, north of Placerville on the South Fork of the American River for approximately \$10.4 million (the "Chili Bar Project"). The Chili Bar Project is immediately downstream from the UARP and operates as the regulating reservoir for the UARP's largest powerhouse. Owning the UARP and the Chili Bar Project enables SMUD to operate the two projects with a holistic approach to license compliance and generation efficiency.

Solano 2 Wind Project. SMUD owns and operates an 87 MW wind project, located in Solano County, known as Solano 2. Solano 2 consist of 29 wind turbine generators ("WTGs") rated at 3 MW each. Energy from the project is collected at 21 kV and transmitted over a dedicated 3-mile overhead system to the SMUD-owned Russell substation. At the Russell facility, the energy is transformed to 230 kV and interconnected to PG&E's Birds Landing Switching Station. Energy deliveries are scheduled through the CAISO.

Solano 3 Project. In 2011 and 2012, SMUD constructed a 128 MW wind project adjacent to Solano Phase 2, known as Solano 3. The Solano 3 project consists of 31 WTGs rated at 1.8 MW and 24 WTGs rated at 3.0 MW. The project interconnects through a 34.5 kV underground collection system to the Russell substation. Like the Solano Phase 2 project, this energy is transformed to 230 kV and delivered through the CAISO.

Solano 4 Project. SMUD has developed the Solano 4 Wind Project on land with a wind easement owned by SMUD near the Solano 3 project, known as the Collinsville and Roberts properties, to install 10 WTGs rated at 4.5 MW, and to remove the Solano 1 turbines and replace them with 9 WTGs rated at 4.5 MW. SMUD has met all of the CAISO requirements and has an executed a Large Generator Interconnection Agreement ("LGIA") as of June 2021 that will allow for 90.8 MW of capacity at the point of interconnection. In April 2021, SMUD submitted an application for advisory review by the Solano County Airport Land Use Commission (the "Solano ALUC") of the Solano 4 Wind Project's consistency

with the 2015 Travis Air Force Base Land Use Compatibility Plan (the “Travis Plan”). In May 2021, the Solano ALUC purported to resolve that the Solano 4 Wind Project was inconsistent with the Travis Plan. In August 2021, the Board approved the Project Environmental Impact Report, made findings overriding the Solano ALUC’s finding of inconsistency, made findings there was no alternative to the project, and approved the Solano 4 Wind Project. In September 2021, Solano County filed a writ petition challenging SMUD’s approval of the Solano 4 Wind Project based on procedural environmental, zoning and land use grounds. The parties entered into a settlement agreement on December 14, 2022, and the suit was dismissed on January 10, 2023. The settlement agreement allows for the construction of the Solano 4 Wind Project as planned.

In addition, SMUD applied for and obtained extensions of the Federal Aviation Administration Determinations of No Hazard allowing for construction of the turbines. A contract for the construction of the Solano 4 Wind Project was awarded to Vestas Corporation and the Solano 4 Wind Project is currently under construction. The expected operation date for the Solano 4 Wind Project is May 2024. PG&E identified upgrades needed to interconnect the Solano 4 Wind Project that will not be complete before the expected Solano 4 commercial operation date. PG&E has an approved project and expects to complete the needed upgrades by May of 2025. Realization of the full capacity of the Solano 4 Wind Project may be delayed into the second quarter of 2025 due to the timeframe established for the PG&E required transmission upgrades. SMUD has developed a mitigation plan for the limited interconnection capacity for the first year of operation, in coordination with CAISO and PG&E, of using all of the existing SMUD Solano Russell substation interconnection capacity combined for the dispatch of all the Solano Wind Project. SMUD completed a combined LGIA amendment administrative process, which combines all phases of the Solano Wind Project so it may operate as one project. This was fully executed by SMUD, CAISO, and PG&E on February 27, 2023.

As of the end of 2023, all of the turbine site delivery roads and foundations for the Solano 4 Project have been completed, all of the turbine components have been delivered to the Solano 4 Project site and 10 of the Solano 4 Project turbines have been fully erected.

At the completion of the Solano 4 project, SMUD will have an installed wind capacity of 303 MW in connection with the overall Solano Wind Project, leaving 18 MW at the point of interconnection for future development.

Distributed Solar Photovoltaic. SMUD owns and operates approximately 2 MW of solar photovoltaic generating facilities. These facilities include installations at the Hedge Substation property, SMUD Headquarters, the East Campus Operations Center, and other smaller photovoltaic systems throughout the service area on parking lots.

Hedge Battery. SMUD owns and operates a 4 MW, 8 MWh, battery energy storage system located near the Hedge Substation in South Sacramento. The facility reached commercial operation in January 2023.

ESS Flow Battery. SMUD owns and operates a 0.45 MW, 3 MWh, battery energy storage system located near the Hedge Substation in South Sacramento. The facility reached test operation in September 2023, and commercial operation is planned for March 2024.

Local Gas-Fired Plants. SMUD constructed five local natural gas-fired plants in its service area: the Carson Project, the Procter & Gamble Project, the Campbell Soup Project, McClellan and the Cosumnes Power Plant (each defined below). These five plants are referred to collectively as the “Local Gas-Fired Plants.” These plants are a strategic component of SMUD’s resource mix. In addition to providing SMUD a total capacity of approximately 1,139 MW, the Local Gas-Fired Plants provide SMUD with needed

voltage support, operational and load following capability, and the reliability inherent in having power resources located close to loads. With the exception of McClellan, these plants were financed through the issuance of project revenue bonds by separate joint powers authorities (collectively, the “Authorities”). In late 2021, ownership of all of the Local Gas-Fired Plants was transferred to one of the Authorities, SFA. SMUD has entered into long-term agreements with SFA providing for the purchase by SMUD of all of the power from each of the Local Gas-Fired Plants on a take-or-pay basis. This consolidation created operational and administrative efficiencies without changing any of the functionality of the power plants. Although the Local Gas-Fired Plants are owned by SFA, SMUD has exclusive control of their dispatch and manages their operations as part of its overall power supply strategy.

Payments under the power purchase agreements are payable from the revenues of SMUD’s Electric System prior to the payment of the principal of or interest on SMUD’s Senior Bonds and Subordinated Bonds (each as defined under the caption “CAPITAL REQUIREMENTS AND OUTSTANDING INDEBTEDNESS” below), as are other maintenance and operation costs and energy payments. For further discussion of SMUD’s obligations to make these payments to SFA, see “CAPITAL REQUIREMENTS AND OUTSTANDING INDEBTEDNESS – Outstanding Indebtedness – *Joint Powers Authorities.*”

The following is a brief description of the five Local Gas-Fired Plants:

The Cosumnes Power Plant (the “Cosumnes Power Plant”). The Cosumnes Power Plant is a 612 MW natural gas-fired, combined cycle plant located in the southern portion of Sacramento County adjacent to SMUD’s decommissioned Rancho Seco Nuclear Power Plant. Commercial operation of the Cosumnes Power Plant commenced on February 24, 2006. SFA increased the net generating capacity of the facility by 81 MWs via an Advanced Gas Path (“AGP”) upgrade. The additional AGP generation was realized after hardware and software upgrades were completed on both units in March of 2019. The Cosumnes Power Plant is owned by SFA, a joint powers authority formed by SMUD and MID. The existing take-or-pay power purchase agreement between SMUD and SFA expires no earlier than when the related bonds have been paid in full (the outstanding related bonds are scheduled to mature on July 1, 2030). On June 5, 2022, the Cosumnes Power Plant was shut down due to a ground fault in the STG stator. The repair was completed in February 2023 and the plant returned to service on March 5, 2023. See “FACTORS AFFECTING THE REGION – Cosumnes Power Plant Outage”.

The Carson Cogeneration Project (the “Carson Project”). The Carson Project, a 103 MW natural-gas-fired cogeneration project consisting of separate combined cycle and peaking plants, provides steam to the Sacramento Regional County Sanitation District (“SRCSD”) wastewater treatment plant adjacent to the site. The Carson Project was originally owned by the Central Valley Financing Authority (“CVFA”), a joint powers authority formed by SMUD and the SRCSD. Construction of the Carson Project was completed and the plant began commercial operation on October 11, 1995. The CVFA bonds issued to finance the Carson Project were defeased in September 2019. In late 2021, ownership of the Carson Project was transferred to SFA. The take-or-pay power purchase agreement between SMUD and SFA relating to the Carson Project will be in effect until terminated by SMUD.

The Procter & Gamble Cogeneration Project (the “Procter & Gamble Project”). The Procter & Gamble Project, a 182 MW natural gas-fired cogeneration facility, is located in an established industrial area of Sacramento. The initial combined cycle portion of the plant began commercial operation on March 1, 1997. Construction of the peaking plant portion of the Procter & Gamble Project commenced during 2000 and the unit achieved commercial status on April 24, 2001. The Procter & Gamble Project produces steam for use in Procter & Gamble Manufacturing Company’s oleochemical manufacturing processes and electricity for sale to SMUD. The Procter & Gamble Project was originally owned by the Sacramento Cogeneration Authority (“SCA”), a joint powers authority formed by SMUD and SFA, a separate joint powers authority. The SCA bonds issued to finance the Procter & Gamble Project were defeased in

September 2019. In late 2021, ownership of the Procter & Gamble Project was transferred to SFA. The take-or-pay power purchase agreement between SMUD and SFA relating to the Procter & Gamble Project will be in effect until terminated by SMUD.

The Campbell Soup Cogeneration Project (the “Campbell Soup Project”). The Campbell Soup Project, a 170 MW natural gas-fired cogeneration project, was completed and began commercial operations on December 4, 1997. Upgrades were implemented during 2000, which increased the plant’s peaking capacity to 180 MW, well above its net demonstrated capacity of 159.8 MW. The plant is located in south Sacramento adjacent to the Capital Commerce Center (formerly the Campbell Soup Company food processing facility). The Campbell Soup Project was originally owned by the Sacramento Power Authority (“SPA”), a joint powers authority formed by SMUD and SFA. The SPA bonds issued to finance the Campbell Soup Project were redeemed in July 2015. In late 2021, ownership of the Campbell Soup Project was transferred to SFA. The take-or-pay power purchase agreement between SMUD and SFA relating to the Campbell Soup Project (the “Campbell Soup/McClellan PPA”) covers both the Campbell Soup Project and McClellan and will be in effect until terminated by SMUD. In support of the Zero Carbon Plan, SMUD is exploring replacing the Campbell Soup Project in 2026, contingent upon SMUD having sufficient other resources available and grid reliability can be maintained. See “BUSINESS STRATEGY – Sustainable Power Supply and Transmission – 2030 Zero Carbon Plan.”

The McClellan Gas Turbine (“McClellan”). McClellan is a 72 MW natural gas-fired simple cycle combustion turbine generating plant at McClellan Business Park in Sacramento. This turbine is connected to SMUD’s electric system and is operated to meet SMUD’s peak-load requirements. McClellan is aligned for remote starting and operation with both black start and fast start capabilities. SMUD constructed the McClellan unit in 1986 as a 50 MW emergency power source for the McClellan Air Force Base. In 2001, following the Air Force Base closure, McClellan was upgraded to 72 MW and converted for SMUD’s use. In May 2007, SMUD transferred ownership of McClellan to SPA for more efficient operation. SPA did not issue debt related to McClellan. In late 2021, ownership of McClellan was transferred to SFA. SFA passes all costs of operations and maintenance through to SMUD in accordance with the terms of the Campbell Soup/McClellan PPA. In exchange for paying all costs related to McClellan, SMUD receives all of the power generated thereby on a take-or-pay basis. In support of the Zero Carbon Plan, SMUD is exploring replacing McClellan in 2026, contingent upon SMUD having sufficient other resources available and grid reliability can be maintained. See “BUSINESS STRATEGY – Sustainable Power Supply and Transmission – 2030 Zero Carbon Plan.”

Fuel Supply

General. SMUD is obligated to arrange for the purchase and delivery of natural gas to the Local Gas-Fired Plants. Management of the natural gas procurement and delivery process is a key focus of SMUD’s reliability and risk policies. Although the natural gas consumption of the power plants for SMUD’s load can vary significantly depending on the season, precipitation, and the market price of power and natural gas, the plants are forecasted to need, on average in 2024, a total of approximately 91,000 Decatherms per day (“Dth/day”) with a daily peak slightly more than 171,000 Dth/day of natural gas. SMUD has implemented a comprehensive strategy to secure a reliable and diversified fuel supply through a variety of agreements for the supply, transportation, and storage of natural gas.

Supply. SMUD hedges a significant portion of its expected gas needs to meet customer power requirements. This includes gas for the Local Gas-Fired Plants and for the Sutter Energy Center. See “Power Purchase Agreements – *Sutter Energy Center*”. This is accomplished through a combination of long-term supply arrangements and an exposure reduction program. The program consists of a primary rolling three-year exposure reduction component, a fuel hedging component on a rolling three-year basis, as well as supplemental fixed calendar year components reaching out up to five calendar years. Long-term

arrangements may consist of a combination of physical commodity supply contracts, financial hedges, or options. Natural gas is purchased from a wide variety of producers and marketers at the northern and southern California borders, and from the San Juan and the Rocky Mountain supply basins. SMUD has a number of both fixed-price supply agreements and financial hedging contracts to fix gas costs ranging from one month to several years in duration. Including fixed price biogas contracts as of February 29, 2024, these contracts are forecasted to have hedged the price exposure on approximately 100%, 82% and 81% of SMUD's anticipated natural gas requirements for 2024, 2025 and 2026, respectively. While the financial effects resulting from the unhedged portions of SMUD's natural gas requirements are difficult to predict, SMUD's financial results could be materially impacted in the event of significant increases in market prices for natural gas.

SMUD has contracted with NCGA to purchase an approximate average of 8,700 Dth/day over the remaining life of a contract expiring May 31, 2027 (the "NCGA Contract"). Under the NCGA contract, SMUD pays a discounted variable price for the fuel and anticipates periodically fixing the effective price under separate hedging contracts. Until November 1, 2023 the delivery point for the NCGA Contract was the AECO hub in Alberta. Starting November 1, 2023, to increase delivery efficiencies, SMUD has exchanged the gas delivered at the AECO hub under the NCGA Contract with gas delivered at the Malin substation at the California-Oregon border. From there SMUD is using its long-term transport capacity to deliver the fuel to the Local Gas-Fired Plants.

SMUD has also contracted with NCEA to purchase an approximately 24,600 Dth/day on average, or to be converted to the approximate cash flow value in Megawatt-hours ("MWh") of electricity over the remaining life of a contract expiring on October 31, 2054. The gas will be delivered to the SMUD system via the Malin receipt point on the PG&E backbone system. SMUD is using its long-term transport capacity to deliver the fuel to the Local Gas-Fired Plants. SMUD will pay a discounted variable price for the fuel and anticipates periodically fixing the effective price under separate hedging contracts.

Renewable Natural Gas Supply. As a component of meeting SMUD's RPS goals, SMUD procures renewable natural gas and digester gas as fuels to generate renewable electricity from the Cosumnes Power Plant. Descriptions of the renewable natural gas supply agreements are provided below.

In March 2009, SMUD entered into a 15-year contract (that qualifies as renewable energy) with Shell Energy North America (US), L.P. ("Shell Energy") to purchase up to 6,000 Dth/day of renewable natural gas produced from a landfill project in Texas. SMUD began taking deliveries of this supply in April 2009. In March 2012, SMUD amended the contract with Shell Energy to increase the maximum volumes to 7,300 Dth/day and extended the term by 10 years to March 31, 2034. Currently, the delivery point is PG&E Topock and SMUD is using its long-term transport capacity to deliver it to the Cosumnes Power Plant. In 2016, SMUD entered into a 3-year contract with Shell Energy to sell back the entire volume of renewable natural gas purchased, less 500 Dth/day, to be sold into the vehicle transportation markets. Upon expiration of the initial 3-year contract for the sale of biogas to Shell Energy, SMUD extended the sell back of the entire volume of biogas twice for an additional three years with Element Markets (now Anew RNG, LLC), starting in 2020 and 2023. While SMUD sells the renewable natural gas, it does not count the renewable natural gas towards its RPS obligations.

SMUD contracted with Heartland Renewable Energy, LLC ("HRE") in December 2009 for a 20-year supply of up to 7,000 Dth/day of renewable natural gas from a digester facility in Colorado. Deliveries began in March of 2014. Currently, the delivery point is Opal, Wyoming and SMUD uses its long-term transport capacity to deliver it to the Cosumnes Power Plant. HRE has not delivered volumes from the project to SMUD since December 2016 due to litigation with Weld County, Colorado regarding odor and permit issues. EDF Renewables, the majority owner of HRE, notified SMUD in August of 2017 that it is in discussions with a short list of bidders to sell its interests in the facility. In June of 2020, the project was

purchased and SMUD's contract was assigned to the new owner, Platte River Biogas, LLC ("PRB"). SMUD and PRB reached a settlement in the third quarter of 2021 that could lead to terminating the contract.

In September 2011, SMUD and CVFA entered into a "Digester Gas Purchase and Sale Agreement" through which the Carson Project cleans nearly all of the digester gas received from Sacramento Regional County Sanitation District ("SRCSD") and sells it to SMUD for delivery to the Cosumnes Power Plant. In return, SMUD pays all of the Carson Project's costs in acquiring, cleaning and making the gas available to SMUD. The Digester Gas Purchase and Sale Agreement expires in September 2025. In late 2021, the Digester Gas Purchase and Sale Agreement, along with the Carson Project was transferred to SFA. The Carson Project is currently receiving, processing and selling up to 1,500 Dth/day with provisions for volume increases over time to 2,500 Dth/day. Digester gas, when designated for use in SMUD's power plants, is counted as renewable generation towards SMUD's RPS obligations.

In December 2011, SMUD entered into a 20-year agreement with EIF KC Landfill Gas LLC ("EIF") to purchase up to 7,050 Dth/day of renewable natural gas produced from multiple landfill projects. SMUD began taking deliveries of this supply in January 2014. Currently the delivery point is Kern River – Opal and SMUD uses its long-term transport capacity to deliver it to the Cosumnes Power Plant. Renewable natural gas, when designated for use in SMUD's power plants, is counted as renewable generation towards SMUD's RPS obligations. In April 2022, SMUD entered into a transaction to sell the renewable natural gas purchased into the vehicle transportation markets. The transaction expires in March 2025. While SMUD sells the renewable natural gas, it does not count the renewable natural gas towards its RPS obligations.

AB 2196 is a law that defines the criteria by which existing and future renewable natural gas contracts will qualify for the State RPS program. The CEC adopted a RPS Eligibility Guidebook on April 30, 2013, which includes detailed rules for implementation of AB 2196. SMUD received an updated certificate of eligibility from the CEC in July 2014 for the Cosumnes Power Plant that included the quantities of renewable natural gas from all four contracts. The CEC adopted a revised RPS Eligibility Guidebook (Ninth Edition) on April 27, 2017. This latest guidebook did not change the RPS eligibility of any of the above SMUD renewable natural gas and digester gas contracts, but did simplify reporting requirements for these contracts.

Gas Transmission

SMUD has satisfied its obligation to deliver natural gas to its power plants by constructing a natural gas pipeline, purchasing an equity interest in two PG&E backbone gas transmission lines, and contracting for capacity on a number of existing interstate natural gas transmission lines.

The Local Pipeline. SMUD constructed and owns a 20-inch, 50-mile natural gas pipeline in the greater Sacramento area (the "Local Pipeline") that transports gas to all of the Local Gas-Fired Plants except McClellan. The Local Pipeline is interconnected with PG&E's major State gas transmission lines 300 and 401. Additionally, it may be interconnected with one or more private gas gathering pipelines located in the area, a gas storage project and/or other FERC approved pipelines that may be built in the local area. In conjunction with the construction of the Cosumnes Power Plant, SMUD extended the Local Pipeline to the plant site. The 26-mile extension was completed in 2004. The extension is 24 inches in diameter and was designed to serve both the Cosumnes Power Plant and an additional second phase, if constructed.

PG&E Backbone Gas Transmission Lines 300 and 401. In 1996, SMUD purchased an equity interest in PG&E's backbone gas transmission lines 300 and 401 (referred to as the PG&E backbone). The total capacity acquired at that time was approximately 85,000 Dth/day and consisted of approximately

43,600 Dth/day of firm gas transport from the California–Oregon border at Malin, Oregon and 44,700 Dth/day from the California–Arizona border at Topock, Arizona, to SMUD’s interconnection with the PG&E backbone near Winters, California. SMUD was also entitled to a share of non-firm capacity, which was approximately 4,360 Dth/day; making the total capacity potentially available to SMUD almost 90,000 Dth/day. This purchase made SMUD a co-owner of the PG&E backbone gas transmission lines 300 and 401 and obligated SMUD to pay PG&E to operate the pipelines on its behalf subject to the terms of the purchase agreement and operating protocols. PG&E reduced operating pressures on Line 300 after PG&E suffered a natural gas explosion in San Bruno, CA in September of 2010. Operating pressures and capacity may also fluctuate due to regulatory and other changes. As of December 1, 2021, SMUD holds a total capacity of approximately 87,000 Dth/day, consisting of approximately 47,572 Dth/day of firm gas transport from the California–Oregon border at Malin, and 39,193 Dth/day of firm gas transport from the California–Arizona border at Topock, Arizona, to SMUD’s interconnection with the PG&E backbone near Winters, California.

Kern River Gas Transmission Company Long Term Agreement. SMUD has an agreement with Kern River Gas Transmission Company for 20,000 Dth/day of firm capacity through April 30, 2028. This capacity gives SMUD access to the Rocky Mountain supply basin at Opal, Wyoming, and connects to PG&E Line 300 (owned in part by SMUD) at Daggett, California.

SMUD’s diversified portfolio of gas transmission arrangements allow for the purchase of gas from a variety of suppliers and locations, and the opportunity to capitalize on regional price differentials where possible. In addition, its ownership interest in the SMUD/PG&E backbone and Local Pipeline enhances the reliability of SMUD’s gas supply.

Gas Storage

SMUD also employs gas storage as part of its overall fuel supply strategy. Gas storage is useful in helping to balance gas supply, mitigate market price volatility, and provide a reliable supply to meet peak day delivery requirements.

SMUD has a contract with Lodi Gas Storage, LLC, which began in April 2023 and expires in March 2026, for capacity in the Lodi Gas Storage project located near Acampo in northern California. The contract provides SMUD with capacity levels of 1.0 million Dth of storage inventory, 10,000 Dth/day of injection rights and 20,000 Dth/day of withdrawal capacity.

SMUD also has a second contract with Lodi Gas Storage, LLC, which began in April 2022 and expires in March 2024, for additional capacity in the Lodi Gas Storage project located near Acampo in northern California. The contract provides SMUD with capacity levels of 1.0 million Dth of storage inventory, 10,000 Dth/day of injection rights and 20,000 Dth/day of withdrawal capacity. SMUD does not plan to renew this contract upon expiration.

SMUD has a contract with Wild Goose Storage LLC, that will begin in April 2024 (but which allows for early injection (December 2023 – March 2024)) for capacity in the Wild Goose Storage project located near Gridley in northern California. The contract provides SMUD with capacity levels of 2.0 million Dth of storage inventory, ratcheted (12,500-14,000 Dth/day) volumes of injection rights and ratcheted (10,000 – 24,000 Dth/day) volumes of withdrawal capacity.

Power Purchase Agreements

SMUD has a number of power purchase agreements to help meet its power requirements. Some of these agreements are described below.

Western Area Power Administration. Effective January 1, 2005, SMUD entered into a 20-year contract with WAPA. SMUD has entered into a replacement agreement extending the term by 30 years for the period of January 1, 2025 through December 31, 2054. Power sold under this contract is generated by the Central Valley Project (“CVP”), a series of federal hydroelectric facilities in northern California operated by the United States Bureau of Reclamation. The contract provides WAPA’s CVP Base Resource customers (including SMUD) delivery of a percentage share of project generation in return for reimbursement of an equivalent share of project costs. SMUD’s CVP Base Resource share is roughly 25% of project generation and costs. This is expected to be approximately 318 MW of capacity and 661 GWh of energy in an average water year but will vary depending on precipitation. Energy available under the contract is determined by water releases required for water supply and flood control and is then shaped into higher value periods within other CVP operating constraints. More capacity and energy are typically available in spring and summer months and less in fall and winter.

SMUD also has a contract with WAPA expiring December 31, 2024, by which WAPA delivers an additional 200-300 MW per hour from projects located in the Pacific Northwest based on certain contractual parameters. In 2022, SMUD received 1,913 GWh of energy under this contract. SMUD has entered into a replacement agreement for the period January 1, 2025 through December 31, 2030.

Avangrid (formerly Iberdrola Renewables (“Iberdrola”)). SMUD has a contract with Iberdrola that provides SMUD with bundled renewable energy (energy plus RECs). The contract agreement is for 126 GWh of wind power generated in Solano County, California. The SMUD Board approved an extension of the wind contract through June 30, 2025.

Patua Project LLC. In April 2010, SMUD entered into a power purchase agreement with Patua Project LLC (“Patua”), a subsidiary of Gradient Resources, for the delivery of up to 132 MW (expected to be 120 MW nominal power output) of renewable energy from geothermal generation being developed in north central Nevada, from a Gradient Resources project known as the Patua Project. The Patua Project was to have been developed in three phases. Since 2010, the agreed upon capacity has been reduced several times. In December 2013, Phase 1 of the project, which had been reduced to 30 MW, finally achieved commercial operation. In 2014, the parties concluded negotiations on the fourth amendment to the power purchase agreement with Patua, which reduced the total capacity down to 40 MW, extended the commercial operation date of Phase 2 to January 1, 2016, and allowed Patua to add up to 13 MW of solar photovoltaics to supplement geothermal production. In addition, this amendment shifted responsibility to Patua for a portion of the long-term transmission service agreements that have been underutilized due to the project not meeting its targets. In November 2015, the Patua Project was acquired by TL Power, LLC, a wholly owned subsidiary of Cyrq Energy, Inc. (“Cyrq”). In December 2015, Cyrq terminated Phase 2. Upon termination of Phase 2, the contractual right for Cyrq to add solar photovoltaics to supplement geothermal production was reduced to 10 MW. As a result of poor performance during the first year of operation, SMUD reduced its obligation to take power from 30 MW to 25 MW. Performance continued to lag in 2015 and 2016 and SMUD further reduced its obligation to take power from 25 MW to 19 MW.

Renewable Energy Feed-In Tariff. In September 2009, SMUD’s Board authorized a feed-in tariff program for the purchase of renewable energy from local renewable energy projects connected to SMUD’s distribution system. SMUD’s Board authorized connection of up to 100 MW under the feed-in tariff which included standard payment rates and standard purchase terms for power. The feed-in tariff program became effective on January 1, 2010. Under the feed-in tariff, SMUD has executed 20-year term power purchase agreements for solar projects totaling 98.5 MW. Construction and start-up were completed on all projects between 2010 and 2012.

CalEnergy LLC. In August 2014, SMUD entered into a 22-year power purchase agreement with CalEnergy LLC for the purchase of 30 MW per year of renewable energy from its Salton Sea geothermal

facilities. As of July 1, 2017, SMUD began receiving up to 10 MW from the CalEnergy portfolio, which escalated to the full 30 MWs on May 1, 2020.

Rancho Seco Solar. In October 2015, SMUD entered into a 20-year power purchase agreement with Rancho Seco Solar LLC for the purchase of energy from a 10.88 MW solar PV project sited on SMUD's property at the closed Rancho Seco Nuclear Generating Station. Commercial operation was achieved in August of 2016. Rancho Seco Solar LLC leased the property from SMUD under a land lease agreement. The output of this project directly serves two large commercial customers that executed agreements with SMUD for retail supply of solar power.

In May 2019, SMUD entered into a 30-year power purchase agreement for an additional 160 MW solar PV project with Rancho Seco Solar II, LLC. The project is located on SMUD-owned property at the closed Rancho Seco Nuclear Generating Station, adjacent to the existing 10.88 MW solar PV project. Construction began in 2019, and the project became commercially operable in February 2021.

Grady Wind Energy. In October 2015, SMUD entered into a 25-year power purchase agreement with Grady Wind Energy LLC ("Grady") for the purchase of energy from a 200 MW wind project located in New Mexico (the "Grady Project"). The Grady Project began commercial operations on August 5, 2019. Energy from the Grady Project is delivered to CAISO. SMUD purchases 100% of the Grady Project output which includes energy, renewable energy credits, and capacity attributes.

Great Valley Solar 2, LLC. In January 2017, SMUD entered into a 20-year power purchase agreement with Great Valley Solar 2, LLC for the purchase of energy from a 60 MW solar PV project located in Fresno County, California. The project's commercial operation date was December 28, 2017.

ARP-Loyalton Cogen LLC. On September 14, 2016, Senate Bill 859 ("SB 859") was signed into law. Under SB 859, a POU must procure its proportionate share of 125 MW of renewable energy from biomass plants burning high hazard forest fuels, subject to terms of at least five years. Seven POUs (SMUD, MID, Turlock Irrigation District ("TID"), Anaheim Public Utilities, Imperial Irrigation District, Los Angeles Department of Water & Power and Riverside Public Utilities, collectively described herein as the "ARP-Loyalton POUs") jointly solicited proposals for up to 29 MW of contract capacity for renewable energy to meet the requirements of SB 859. In January 2018, SMUD entered into a five-year power purchase agreement with ARP-Loyalton Cogen LLC to fulfill 18 MW of the required 29 MW with SMUD's share being just over 23 percent (the "ARP-Loyalton PPA"). See "*Roseburg Forest Product Co.*" below for a discussion of the remaining SB 859 capacity. The contract became effective on April 1, 2018. On February 18, 2020, ARP-Loyalton Cogen LLC filed for Chapter 11 bankruptcy and stopped producing and selling energy from the biomass plant. On May 7, 2020, the bankruptcy court approved the sale of the Loyalton facility to Sierra Valley Enterprises, LLC ("SVE"). SVE initially expressed interest in bringing the facility back into service; however, the bankruptcy trustee requested repeated extension of the deadline for SVE to accept or reject the ARP-Loyalton PPA. The latest deadline was April 19, 2023, the date of expiration of the ARP-Loyalton PPA term. As SVE did not resume operations before the end of the ARP-Loyalton PPA term, the ARP-Loyalton POUs have negotiated a settlement agreement with the bankruptcy trustee (the "ARP-Loyalton Settlement Agreement"). The ARP-Loyalton Settlement Agreement, which SMUD executed and is filed with the court, defines funds from the performance security that the ARP-Loyalton POUs will keep to cover legal and administrative fees, along with a contingency amount to cover potential risk of future damages. Since the ARP-Loyalton POUs entered into a five-year agreement to procure compliant biomass and provided SVE the opportunity to accept the ARP-Loyalton PPA and restart operations, the ARP-Loyalton POUs consider their statutory obligations to have been fulfilled.

Roseburg Forest Products Co. For the remaining SB 859 biomass obligation of 11 MW, SMUD and the other ARP-Loyalton POUs have entered into a five-year power purchase agreement with Roseburg

Forest Products Co. SMUD’s share of the contract capacity is 2.5795 MW, and the plant began operating under the contract on February 26, 2021.

Sutter Energy Center. SMUD entered into an initial two-year contract (with a third-year exercisable option) with Calpine Energy Services, L.P. (“Calpine”) for the ability to schedule up to 258 MW of energy from Sutter Energy Center. The Sutter Energy Center is a natural gas-fired, combined-cycle facility located in Yuba City, California. The initial contract became effective on April 1, 2018. SMUD exercised its option to extend the contract, which expired November 1, 2020. SMUD entered into a new contract with Calpine for the same 258 MW of energy that became effective January 1, 2021, and had an original expiration date of January 1, 2024. In December 2021, SMUD extended this contract through December 31, 2026.

Drew Solar, LLC. In June 2018, SMUD entered into a 30-year power purchase agreement with Drew Solar, LLC for the purchase of energy from a 100 MW solar PV project located in Imperial County, California. The project’s scheduled commercial operation date was set to be December 31, 2021. The commercial operation date was delayed due to Force Majeure claims surrounding the COVID pandemic and supply chain constraints caused by changes in Federal regulatory requirements. The project began commercially operating on November 3, 2022.

Wildflower Solar. In October 2018, SMUD entered into a 25-year power purchase agreement with Wildflower Solar I, LLC, for the purchase of energy, capacity, and RECs from a 13 MW solar PV project located in Rio Linda, California. The project began commercially operating on December 18, 2020.

Coyote Creek (Formerly Sacramento Valley Energy Center, LLC.) In August 2021, SMUD entered into a 30-year power purchase agreement with Sacramento Valley Energy Center, LLC for the purchase of energy from a 200 MW solar PV and 100 MW four-hour Battery Energy Storage System (“BESS”) capacity project located in Sacramento County, California. The project’s commercial operation date was originally expected to be December 31, 2023, but has been delayed to 2026 due to ongoing development and permitting delays.

SloughHouse Solar, LLC. In September 2021, SMUD entered into a 30-year power purchase agreement with SloughHouse Solar, LLC for the purchase of energy from a 50 MW solar PV project located in Sacramento County, California. The project’s commercial operation date was originally expected to be December 31, 2023, but the commercial operation date has been delayed to March 31, 2025 due to ongoing development and permitting delays.

Country Acres Solar. In November 2023, SMUD entered into a 30-year power purchase agreement with Country Acres Clean Power LLC for the purchase of energy from a 344 MW solar PV project, with a 20-year term for 172 MW four-hour BESS capacity, located in Placer County, California. The project’s commercial operation date is expected to be December 15, 2026.

Geysers Power Company, LLC. In March 2021, SMUD executed a 10-year power purchase agreement with Geysers Power Company, LLC for 100 MW of energy and capacity from the Geysers geothermal energy plant located in Lake and Sonoma Counties, California. SMUD started to receive deliveries on January 1, 2023.

Transmission Service Agreements

TANC California-Oregon Transmission Project. The 340-mile COTP is one part of a three 500-kV line coordinated system known as the California-Oregon Intertie (“COI”). The COTP is allocated one-third of the 4,800 MW capability of the COI system (see related agreements below). TANC is entitled to

use 1,390 MW and is obligated to pay approximately 80% of the operating costs of the COTP. SMUD is a member of TANC and a party to Project Agreement No. 3 (“PA3”), under which it is entitled to 378 MW and obligated to pay on an unconditional take-or-pay basis about 27.5% of TANC’s COTP debt service and operations costs, subject to a “step-up” obligation of up to 25% of its entitlement share upon the unremedied default of another TANC member-participant. In 2009, SMUD entered into a long-term layoff agreement with certain members that increased SMUD’s entitlement by 35 MW. In 2014, SMUD entered into another long-term layoff agreement with certain other members that increased SMUD’s COTP entitlements by 128 MW and amended the 2009 layoff agreement that returned 13 MW to a member. In January 2024, SMUD entered into an agreement to extend the 2009 long-term layoff agreement with certain members to January 31, 2034. As of January 31, 2024, SMUD was entitled to approximately 528 MW of TANC’s transfer capability for imports and 405 MW for exports, and is obligated to pay approximately 38.6% of TANC’s COTP debt service and operations costs. SMUD’s payments under this contract, like SMUD’s payments under its other power purchase and transmission service agreements, are treated as “Maintenance and Operation Costs” or “Energy Payments” under the resolutions securing the Senior Bonds and Subordinated Bonds (each as defined under the caption “CAPITAL REQUIREMENTS AND OUTSTANDING INDEBTEDNESS” below). SMUD relies on its COTP rights to purchase power, access contingency reserves through the Western Power Pool, and obtain renewable resources to supplement its own resources to serve its load. TANC maintains its own property/casualty insurance program. TANC’s budget for COTP costs, support services and advocacy expenses is about \$45.4 million for 2023. SMUD’s obligation of the TANC budget is about \$17.4 million for 2023.

TANC Tesla-Midway Transmission Service. TANC has a long-term contract with PG&E to provide TANC with 300 MW of transmission service between PG&E’s Midway Substation and the electric systems of the TANC Members (the “Tesla-Midway Service”). SMUD’s share of the Tesla-Midway Service had been 46 MW. As part of the 2009 long-term layoff agreement, SMUD acquired an additional 2 MW of South-of Tesla Principles (“SOTP”) transmission rights for 15 years starting February, 2009 from another TANC member, bringing SMUD’s share of the Tesla-Midway Service to 48 MW.

Bonneville Power Administration. In 2009, SMUD entered into a transmission service agreement with the Bonneville Power Administration (“BPA”) for 60 MW of firm point-to-point transmission service from BPA’s Hilltop substation in northeastern California to the Malin substation at the California-Oregon border for the purpose of transmitting power under SMUD’s power purchase agreement with Gradient Resources for Phase 1 of the Patua geothermal project over BPA’s 230kV transmission lines. In early 2013, in accordance with BPA’s transmission tariff, the transmission service was split into two 30 MW services and deferred as appropriate to better fit the timing of expected commercial operation of Phase 1 and Phase 2 of the Patua Project. See “POWER SUPPLY AND TRANSMISSION – Power Purchase Agreements – Patua Project LLC.” SMUD submitted another request for the 30 MW of transmission procured for Phase 2 of the Patua Project to split the service into a 10 MW and a 20 MW service, with the 10 MW of service deferred and timed with the originally expected commercial operation date of Phase 2 of the Patua Project. With the termination of Phase 2 of the Patua Project and SMUD’s reduced obligation due to the poor performance of Phase 1 of the Patua Project, much of the transmission reserved for it will no longer be needed. BPA does not have a provision in its transmission tariff for early termination of transmission service. However, the power purchase agreement with Patua requires Patua to cover unused transmission that SMUD has procured for the Patua purchases. On January 1, 2020, SMUD’s transmission rights with BPA were reduced to 19 MW. This now aligns with SMUD’s PacifiCorp transmission rights of 19 MW described in the immediately following paragraph.

PacifiCorp. In 2009, SMUD entered into a transmission service agreement with PacifiCorp for 60 MW of firm point-to-point transmission service across PacifiCorp’s high voltage step-up transformer at the Malin substation at the California-Oregon border for the purpose of transmitting power under SMUD’s power purchase agreement with Gradient Resources for Phase 1 of the Patua Project. In early 2013, in

accordance with PacifiCorp's transmission tariff, the commencement of the 60 MW of transmission service was deferred to fit the timing of first deliveries expected from the 30 MW of Phase 1 of the Patua Project. In 2013, SMUD terminated the 60 MW of transmission service and requested two new transmission services of 30 MW each, with service start dates timed to better fit with the expected start dates of Phase 1 and Phase 2 of the Patua Project. With the reduction in expected output of the Patua Project, SMUD terminated the second 30 MW transmission agreement, and replaced it with a 10 MW transmission service agreement for Phase 2 of the Patua Project. With the termination of Phase 2 of the Patua Project, SMUD terminated the 10 MW Pacificorp transmission service agreement and as a result of the reduced obligation to take power from the Patua Project, SMUD has reduced its remaining Pacificorp transmission service from 30 MW to 19 MW.

Western Area Power Administration. SMUD does not have a direct interconnection of its power system to the COTP. To receive power deliveries that use its COTP rights, SMUD has a long-term transmission service agreement with WAPA for transmission of 342 MW of power from the COTP line (received at WAPA's Tracy or Olinda substations) to SMUD's system. In May of 2011, WAPA completed the Sacramento Voltage Support Transmission Project. Completion of this project has given SMUD an additional 165 MW of transmission service rights on WAPA's system from the COTP at the Olinda Substation to SMUD's system at the Elverta Substation.

Projected Resources

The following tables titled "Projected Requirements and Resources to Meet Load Requirements Energy Requirements and Resources" (the "Energy Table") and "Capacity Requirements and Resources Net Capacity – Megawatts" (the "Capacity Table") describe SMUD's contracted commitments and owned resources available to meet its forecasted load requirements through the year 2033. Resources are shown on an annualized basis with market purchases netted against surplus sales to arrive at a single net position for each year. Because SMUD's available resources do not exactly match its actual load requirements on an hourly basis, there are times during a year when resources available will either exceed or be insufficient to meet SMUD's needs. Expected actual capacity values are included in the tables. These values may differ from measured net demonstrated capacity values of the Local Area Gas-Fired Plants. The table below also includes the impact energy efficiency has on resource requirements as discussed below under "Demand Side Management Programs." See "BUSINESS STRATEGY" and "POWER SUPPLY AND TRANSMISSION – Power Generation Facilities – *Local Gas-Fired Plants.*"

Resources listed in both the Energy Table and the Capacity Table are listed as either renewable or non-renewable. Generally, SMUD follows the CEC guidelines for eligibility requirements. Some of SMUD's renewable resources listed include solar, wind, geothermal, small hydroelectric facilities with a capacity of 30 MW or less, and biomass (representing generation from a fuel comprised of agricultural wastes and residues, landscape and tree trimmings, wood and wood waste).

As in any forecast, assumptions are made. In both the Energy Table and the Capacity Table the WAPA and UARP forecasts assume average water conditions throughout the period. On the capacity table, WAPA and Cosumnes Power Plant renewable capacity is estimated based on the ratio of renewable energy to total WAPA or Cosumnes Power Plant energy. See "POWER SUPPLY AND TRANSMISSION – Power Generation Facilities – *Hydroelectric.*"

The Uncommitted Purchases (Sales) on the tables represent either anticipated future needs or surpluses. Future needs are met well in advance of delivery. They also include both renewable and non-renewable resources.

The Transmission Losses represent reductions in the amount of energy or capacity from the location it was purchased to the point of entering SMUD's electrical system. This amount reduces the Total Resources available to meet the Total Projected Energy Requirements of the electrical system.

Demand Side Management Programs

SMUD's demand-side management initiatives represent an integral element of its total resource portfolio, and are organized into two major components: energy efficiency and load management programs. Energy efficiency offerings include a wide variety of programs and services to customers to retrofit or upgrade existing equipment and fixtures and to install new energy efficiency measures in existing and new construction facilities. Load management allows SMUD to reduce the load on the electric system by cycling residential air conditioning, and calling upon commercial/industrial customers to curtail energy usage when energy is constrained during the summer or system emergencies. Load management programs are projected to allow SMUD to shed approximately 60 MW of peak load in an emergency on a hot day, representing about 2% of SMUD's maximum system peak demand.

The customer "smart meter" system with 2-way communication capability provides information regarding customer usage patterns, which is expected to help SMUD tailor rate designs that provide customers with both the information and ability to manage their energy usage around high energy cost periods.

(1) Based on information available as of December 31, 2023. Totals may not sum due to rounding. Capacity values for wind, solar, storage, and future variable renewable projects shown are based on resource ELCC modeling. Excludes a potential carbon sequestration power purchase agreement that SMUD is considering.

(2) The Cosumnes Power Plant is a 612 MW plant that includes capacity attributable to a biogas contract counted as renewable (see “POWER SUPPLY AND TRANSMISSION – Fuel Supply – *Renewable Natural Gas Supply*”).

(3) SMUD assumes that for all firm system purchases, the suppliers will be planning 5% reserves.

Balancing Authority Area Agreements

Background. SMUD began operating as an independent control area, later termed a Balancing Authority, on June 18, 2002 within the WECC reliability organization's region. This reduced SMUD's exposure to the costs and reliability risks of the CAISO's markets. SMUD expanded its operational footprint beyond SMUD's service territory to include WAPA's electric system, including the MID, Roseville, and Redding service areas (on January 1, 2005) and the COTP (on December 1, 2005). As described further below, SMUD ceased to be the Balancing Authority on April 30, 2011, as BANC took SMUD's place as the Balancing Authority. SMUD remains the operator of the Balancing Authority through a contract with BANC. SMUD administers the contracts with WAPA and TANC to provide specified Balancing Authority-related and other services, and is compensated by WAPA and TANC. TANC recovers such Balancing Authority services costs as a part of its annual operating budget from the COTP Participants and WAPA recovers its Balancing Authority services costs through its rates for power and transmission service. The agreement with WAPA, among other terms, establishes operating procedures and reserve obligations between the parties and terminates on December 31, 2024. BANC, SMUD and WAPA will develop successor agreements in 2024 to take effect upon expiration of the existing contract. WAPA in turn has agreements with electric systems connected to it to assure that such systems also operate reliably (i.e., MID, Roseville and Redding). As a result of the transition to BANC as the Balancing Authority, SMUD assigned or terminated its interconnection and operations agreements with other interconnecting Balancing Authority areas (i.e., CAISO, BPA and TID). BANC is now the party to these agreements as they primarily address only Balancing Authority matters required for compliance with the reliability standards issued by the North American Electric Reliability Corporation ("NERC"), such as emergency assistance arrangements. See also "OTHER FACTORS AFFECTING THE ELECTRIC UTILITY INDUSTRY – Western Energy Imbalance Market."

Reliability Standards. The Energy Policy Act of 2005 gave FERC authority to enforce reliability standards for the bulk electric system. In June 2007, these standards became mandatory for SMUD and BANC.

In 2022, SMUD and BANC underwent a combined NERC/WECC audit to evaluate compliance with applicable reliability standards. These audits occur every three years. At the conclusion of the audit, regulators determined that neither entity had any compliance violations related to the Operations and Planning or Critical Infrastructure Protection Standards. SMUD and BANC will undergo another NERC/WECC audit sometime in 2025.

Balancing Authority of Northern California. SMUD, MID, Redding and Roseville executed a Joint Exercise of Powers Agreement (the "BANC JPA Agreement") creating BANC on May 8, 2009. BANC became operational on May 1, 2011 as a Balancing Authority and replaced SMUD as the entity responsible for Balancing Authority-related reliability standards. Since that time, the Trinity Public Utilities District and the City of Shasta Lake have also become members of BANC. As provided in the BANC member agreement, liability for penalties associated with such Balancing Authority-related reliability standards are shared on a *pro rata* basis among the members of BANC. SMUD is the Balancing Authority operator under contract and performs Balancing Authority operational functions on behalf of BANC, much as it did when it was the Balancing Authority. The BANC JPA Agreement assigns cost responsibility based on member load within the BANC Balancing Authority, with SMUD representing approximately 70% of the total load.

Power Pool and Other Agreements

Western Power Pool Agreement. The Western Power Pool ("WPP") is an agreement among over 30 utilities and public agencies in the western United States to coordinate contingency reserve sharing,

referred to as the WPP Reserve Sharing Program (“RSP”). The RSP permits participants to rely on one another in the event that any participant experiences a generating resource outage. While SMUD became an RSP participant in 2009, participation is limited to Balancing Authorities, which SMUD relinquished to BANC in 2011. Under the RSP, BANC and TID (also a WPP member) share their reserve amounts and when necessary and when sufficient unused COTP rights and capacity are available, may call upon WPP reserves from the RSP member systems in the Pacific Northwest. The WPP RSP permits members to operate more efficiently by reducing the contingency reserves that they would otherwise need to have available if they could not rely on each other.

TANC-SMUD OASIS Administration Agreement. SMUD entered into an agreement with TANC to provide OASIS services (transmission sales and scheduling related services in the BANC BA of TANC members’ COTP rights) on September 29, 2005. SMUD is compensated for performing these services. TANC and SMUD entered into a letter agreement dated October 25, 2010 to clarify each party’s role for regulatory reliability standards compliance responsibilities and take into account SMUD’s increased efforts related to supporting TANC’s compliance requirements. SMUD and TANC entered into an agreement to transition this service to the Western Area Power Administration, effective on May 1, 2023. Going forward SMUD will only have a minor role in receiving payments and distributing revenues to the TANC members.

Other Interconnection Agreements

Background. SMUD’s electric system was originally purchased from PG&E in 1947. SMUD’s service area is mostly surrounded by PG&E’s and WAPA’s service areas. The SMUD and PG&E electric systems are interconnected at SMUD’s Rancho Seco and Lake 230-kV substations. SMUD and WAPA are interconnected at SMUD’s Hurley, Elverta, Natomas and Folsom 230-kV substations.

PG&E Interconnection Agreement. PG&E and SMUD executed a Replacement Interconnection Agreement (“RIA”) which became effective on January 1, 2010. The RIA provides that SMUD and PG&E operate their interconnections reliably, plan their electric systems to meet their load requirements, and avoid or mitigate impacts they cause by certain electric system modifications. The agreement has a termination date of December 31, 2024, subject to FERC approval. SMUD and other northern California utilities have similar interconnection agreements with PG&E, albeit with different expiration dates. PG&E filed a successor interconnection agreement with one of these utilities, TID, on November 1, 2023, to become effective on January 1, 2024. Many interconnection customers, including SMUD, intervened and submitted comments or protests in the FERC docket. FERC accepted the filing and TID and PG&E are now in a settlement process, pending litigation if the parties cannot resolve the disputed items. SMUD anticipates that PG&E will seek to negotiate a successor interconnection agreement with SMUD which will be informed by the TID settlement or litigation process. While some functional mechanisms in the interconnection agreement may change, SMUD expects that its successor interconnection agreement will substantially preserve the balance of burdens and benefits consistent with FERC’s standard of requiring rates and terms of service that are just and reasonable. SMUD expects this process to be completed by the current expiration date of the RIA.

PG&E Generator Interconnection Agreements. SMUD signed a LGIA with CAISO and PG&E for the Solano 3 Wind Project, effective December 16, 2008, with a 50-year term. The Solano 2 Wind Project has interconnection rights granted through a LGIA, also with the CAISO and PG&E. The agreement became effective in January 2010 and has a term of 20 years. On June 3, 2021, SMUD entered into a LGIA with the CAISO and PG&E, for the planned 90.8 MW Solano 4 Wind project with a 10-year term and automatic renewal for successive one-year terms thereafter. On February 27, 2023, SMUD completed a combined LGIA amendment administrative process which combines the Solano 2, 3 & 4 projects into one Solano Wind Project. The original agreement conditions for the individual projects are carried forward with

a new combined project maximum production limit of 320.8 MW at the point of interconnection at the Russell Substation.

Other PG&E generator interconnection agreements include a Small Generator Interconnection Agreement with PG&E for Slab Creek with a 22-year term which became effective on January 14, 2010, and a Small Generator Interconnection Agreement with PG&E for the Chili Bar Project with a 10-year term which became effective on June 2, 2021.

WAPA Interconnection Agreement and other WAPA Agreements. SMUD and WAPA executed an interconnection agreement on May 8, 2008 for a term of 40 years which establishes the terms and conditions under which the SMUD and WAPA transmission systems are interconnected and memorializes related understandings. SMUD is working with WAPA on a reconfiguration at the shared Elverta interconnection to increase reliability and accommodate new generation interconnection in the area. SMUD has other agreements with WAPA including for operation of the Sutter Energy Center generating facility, communication systems terms and fiber optic access, training and for use of WAPA labor and heavy equipment to assist SMUD's maintenance activities on an as-available basis.

[Remainder of Page Intentionally Left Blank]

SELECTED OPERATING DATA

Selected operating data of SMUD for the four years ended December 31, 2020 through 2023 are presented in the following table.

SMUD SELECTED OPERATING DATA CUSTOMERS, SALES, SOURCES OF ENERGY AND REVENUES

	Year Ended December 31,			
	2023	2022	2021	2020
Customers at End of Period:				
Residential	588,308	576,471	572,786	568,741
Commercial and industrial	70,147	69,512	69,426	68,628

SELECTED FINANCIAL DATA

SMUD Financial Information

The following table presents selected financial data of SMUD. Under generally accepted accounting principles, data with respect to SMUD's component units, such as the Authorities, is included with that of SMUD. The following presents data for SMUD only and not its component units, such as the Authorities. SMUD's audited financial statements for the years ended December 31, 2023 and December 31, 2022 are included in APPENDIX B attached to this Official Statement. The following unaudited data for SMUD (excluding its component units) is drawn from SMUD's financial records that have been subjected to the auditing procedures applied in the audits of SMUD's and its component units financial statements for the years ended December 31, 2020 through 2023.

SMUD FINANCIAL DATA⁽¹⁾

Debt Service Coverage Ratios				
Parity Debt Service Coverage Ratio...	2.58x	1.86x	2.59x	2.25x
Parity and Subordinate Debt Service Coverage Ratio	2.44x	1.78x	2.47x	2.14x

⁽¹⁾ The financial statements of SMUD comprise financial information of SMUD along with its component units, CVFA, SPA, SCA, SFA, NCGA and NCEA. This table includes only financial information of SMUD excluding its component units. Net operating revenues and expenses and Electric Utility Plant and Capitalization of CVFA, SPA, SCA, SFA, NCGA and NCEA are not included in this table, although amounts paid to or received from the Authorities by SMUD are included.

⁽²⁾ Operating Revenues reflect net transfers to (from) the Rate Stabilization Fund for each full year as follows:
2023 \$56.1 million
2022 (\$33.0) million
2021 \$20.3 million
2020 \$25.1 million

Transfers to the Rate Stabilization Fund reduce operating revenues in the year transferred; transfers from the Rate Stabilization Fund increase operating revenues. Transfers from the HGA balancing account in the Rate Stabilization Fund are automatic based on the amount of precipitation received. See “RATES AND CUSTOMER BASE – Rates and Charges” above.

⁽³⁾ Long-Term Debt includes Long-Term Debt due within one year and unamortized premiums.

⁽¹⁾ Financial information for SMUD and the SMUD JPAs (CVFA, SPA, SCA, SFA, NCGA and NCEA) include intercompany balances. The financial information reflects balances after the elimination of intercompany accounts including Authorities distributions to SMUD of \$26.8 million in 2023 and \$36.5 million in 2022.

⁽²⁾ Operating Revenues reflect net transfers to (from) the Rate Stabilization Fund as follows:
2023 \$56.1 million
2022 (\$33.0) million

Transfers to the Rate Stabilization Fund reduce operating revenues in the year transferred; transfers from the Rate Stabilization Fund increase operating revenues. Transfers from the HGA balancing account in the Rate Stabilization Fund are automatic based on the amount of precipitation received. See “RATES AND CUSTOMER BASE – Rates and Charges” above.

⁽³⁾ Long-Term Debt includes Long-Term Debt due within one year and unamortized premiums.

[Remainder of Page Intentionally Left Blank]

Management's Discussion of SMUD's Operating Results

Year Ended December 31, 2023. For the year ended December 31, 2023, SMUD reported an increase in net position of \$218.1 million as compared to an increase of \$70.7 million for 2022.

Operating revenues were \$228.5 million lower than 2022. This was primarily due to lower sales of surplus gas (\$118.3 million), transfers to the RSF (\$67.2 million), sales to customers (\$28.3 million), transfers from the RSF (\$21.9 million), and LCFS revenue (\$3.9 million), partially offset by higher sales of surplus power (\$13.6 million), AB 32 revenue (\$3.7 million), customer fees (\$1.1 million), and lower transmission revenue (\$2.3 million).

Operating expenses were \$292.8 million lower than 2022. This was primarily due to lower purchased power expenses (\$175.5 million), production operating expenses (\$146.4 million), depreciation expenses (\$22.7 million), production maintenance expenses (\$12.3 million), transmission and distribution operating expenses (\$7.2 million), partially offset by higher administrative and general expenses (\$33.4 million), transmission and distribution maintenance expenses (\$15.8 million), public good expenses (\$8.8 million), and customer service and information expenses (\$6.6 million).

Non-Operating income increased by \$55.2 million primarily due to fair market value assessment and gain on sale of land (\$33.3 million), higher interest income (\$21.7 million), higher unrealized holding gains (\$11.4 million), higher CCA revenue (\$5.7 million), partially offset by lower investment income (\$39.1 million).

Interest expense decreased \$27.9 million from 2022.

Year Ended December 31, 2022. For the year ended December 31, 2022, SMUD reported an increase in net position of \$70.7 million as compared to an increase of \$347.3 million for 2021.

Operating revenues were \$363.0 million higher than 2021. This was primarily due to higher sales to customers (\$130.7 million), sales of surplus gas (\$96.0 million), sales of surplus power (\$62.2 million), transfers to the RSF (\$28.9 million), transfers from the RSF (\$24.3 million), customer fees (\$9.5 million), AB 32 revenue (\$4.9 million) and LCFS revenue (\$2.2 million), partially offset by lower gain on sale of carbon allowance futures (\$3.7 million).

Operating expenses were \$601.2 million higher than 2021. This was primarily due to higher purchased power expenses (\$263.6 million), amortization of pension and OPEB (\$126.9 million), production operating expenses (\$125.1 million), depreciation expense (\$49.5 million), transmission and distribution maintenance expenses (\$22.1 million), production maintenance expenses (\$18.4 million), transmission and distribution operating expenses (\$8.1 million), public good expenses (\$7.4 million), and customer service and information expenses (\$4.5 million), partially offset by lower administrative and general expenses (\$27.4 million).

Non-Operating income decreased by \$19.0 million primarily due to lower grant revenue (\$39.6 million), unrealized holding losses (\$3.7 million), partially offset by higher investment income (\$19.7 million), closeout of escrow account (\$2.8 million), and loss on asset retirements (\$1.9 million).

Interest expense increased \$19.5 million from 2021.

Regulatory Assets. In accordance with Governmental Accounting Standards Board ("GASB") No. 62, "Regulated Operations," SMUD defers, as regulatory assets, certain types of expenditures. These assets are amortized and collected through future rates.

As of December 31, 2023, SMUD had a total of \$916.1 million recorded for regulatory assets. Regulatory assets associated with costs related to implementation of GASB No. 68 which requires SMUD to record a net pension liability was \$323.5 million and deferred outflows related to GASB No. 68 was \$174.6 million at December 31, 2023. Regulatory assets associated with costs related to implementation of GASB No. 75 which requires SMUD to record a net Other Post Employment Benefit (OPEB) liability was \$268.2 million and deferred outflows related to GASB No. 75 was \$39.6 million at December 31, 2023. Regulatory assets associated with Rancho Seco decommissioning costs totaled \$108.0 million at December 31, 2023. Nuclear fuel storage costs and non-radiological decommissioning costs have been collected in rates since 2009. For a complete description of these regulatory assets, see Note 8 (Regulatory Deferrals) to SMUD's financial statements.

The Board has authorized the deferral of any charges or credits that result from the change in valuation of ineffective hedges that should be reported as Investment Revenue/Expense on the Statements of Revenues, Expenses and changes in net position. The Board's resolution establishes that such charges or credits are not included in rates based on market value changes but are included in rates when the underlying transactions occur. Therefore, under GASB No. 62, "Regulated Operations," any such changes are included in the Statement of Net Position as regulatory assets or liabilities. For a complete description of these derivative financial instruments, see Note 9 (Derivative Financial Instruments) to SMUD's financial statements.

RANCHO SECO DECOMMISSIONING

Overview. The 913 MW Rancho Seco Nuclear Power Plant ("Rancho Seco") began Nuclear Regulatory Commission ("NRC") licensed operations in 1974. In June 1989, the electorate of SMUD voted against allowing SMUD to continue to operate Rancho Seco as a nuclear generating facility, and the plant was shut down. In 1991, SMUD submitted a report (the "Financial Assurance Plan") providing required financial assurance to the NRC that SMUD will have sufficient funds available to pay for the cost of decommissioning. On March 17, 1992, the NRC granted SMUD a change from an operating to a possession-only license for Rancho Seco that relieved SMUD from compliance with a number of NRC regulations applicable to operating nuclear power plants. SMUD also filed a proposed decommissioning plan with the NRC (the "Decommissioning Plan"), which was approved in March 1995.

After the decommissioning efforts began, no suitable disposal option was available to SMUD for the Class B and Class C low level radioactive waste generated during the plant decommissioning. With the used nuclear fuel stored onsite requiring oversight staff, SMUD opted to store the Class B and Class C radioactive waste in an existing interim onsite storage building until a suitable disposal option was available. In November 2007, the possession-only license for Rancho Seco was amended to update the Decommissioning Plan to terminate the possession-only license for the Class B and Class C waste in two phases. Phase I of the decommissioning was completed at the end of 2008. Following verification of the site conditions, SMUD submitted a request to the NRC to reduce the licensed facility from 2,480 acres to the interim onsite storage building and about one acre surrounding it. The request was approved by the NRC in September 2009. Phase II of decommissioning included the approximately two-acre interim storage building containing the Class B and Class C radioactive waste and surrounding area. In September 2013, SMUD entered into a contract with the operator of the low-level radioactive waste disposal facility located in Andrews, Texas. Shipment of the Class B and Class C radioactive waste for disposal was completed in November 2014. SMUD conducted additional clean-up activities and radiological surveys, which were followed by NRC confirmatory surveys. The results of these surveys demonstrated unit dose criteria well below NRC release criteria, and the NRC approved the Phase II area for unrestricted use. On September 21, 2017, SMUD formally requested the termination of the possession-only license. On August

31, 2018, the NRC officially terminated SMUD's possession-only license for the remaining Class B and Class C waste at Rancho Seco.

As part of the Decommissioning Plan, the nuclear fuel and Greater Than Class C ("GTCC") radioactive waste is being stored in a dry storage facility (the Independent Spent Fuel Storage Installation or "ISFSI") constructed by SMUD, adjacent to the former reactor facility. The NRC has separately licensed this facility. The DOE, under the Nuclear Waste Policy Act of 1982, is responsible for permanent disposal of used nuclear fuel and GTCC radioactive waste. SMUD has a contract with the DOE for the removal and disposal of this waste. The DOE was to have a waste repository operating by 1998, but has experienced significant and ongoing delays. The Nuclear Waste Policy Act designates Yucca Mountain in Nevada as the final and exclusive repository for the nation's used nuclear fuel. The DOE discontinued the Yucca Mountain license review activities in 2010, but after a court ordered the NRC to resume its review in 2013, the NRC published its final safety evaluation report in 2015. The final safety report, and the final environmental impact statement, concluded that the proposed repository would be safe and environmentally sound for one million years.

Nevertheless, seeking alternatives to Yucca Mountain, the Blue-Ribbon Commission on America's Nuclear Future delivered its final report in January 2012 with several recommendations. The DOE responded to the recommendations by issuing a report in January 2013 (Strategy for the Management and Disposal of Used Nuclear Fuel and High-Level Radioactive Waste). Key to both documents is a focus on used fuel from decommissioned sites including Rancho Seco. The DOE report accepts most of the Blue-Ribbon Commission recommendations, and contains timelines for fuel management options which proposed removing the fuel from Rancho Seco as early as 2021. However, any progress on the strategies proposed by the DOE is dependent on legislative action by Congress. With no legislative action taken to date, the 2021 projected date for fuel removal slips year-for-year. Therefore, SMUD cannot determine at this time when the DOE will fulfill its contractual obligations to remove the nuclear fuel and GTCC waste from the Rancho Seco facility. In the meantime, SMUD continues to incur costs of approximately \$6 to \$7 million per year for storage of used nuclear fuel at the ISFSI. SMUD has filed a series of successful lawsuits against the federal government for recovery of past spent fuel costs. SMUD last recovered over \$14 million in 2023. SMUD plans to continue pursuing cost recovery claims to ensure it is reimbursed for all such costs in the future. The ISFSI will be decommissioned, and its license terminated after the fuel and GTCC is removed.

Financial Assurance Plan. In accordance with the Financial Assurance Plan, SMUD established and funded an external decommissioning trust fund currently held by Computershare Corporate Trust (the "Decommissioning Trust Fund"). Pursuant to the Financial Assurance Plan, SMUD made the final deposit into the Decommissioning Trust Fund in 2008. Additional deposits are not expected but will be made if increased cost estimates or reduced fund interest earnings require it. In 2011, the NRC began requiring that SMUD demonstrate financial assurance for decommissioning the ISFSI as well as the former power facility, increasing the overall cost for decommissioning Rancho Seco. The estimated total cost for decommissioning the ISFSI was approximately \$7.1 million on December 31, 2023. The decommissioning cost estimate is required to be updated every three years. As of December 31, 2023, the balance of the Decommissioning Trust Fund was \$9.4 million, excluding unrealized gains and losses. Based on the current decommissioning cost estimate and the value of the fund, SMUD's existing Decommissioning Trust Fund provides sufficient funds to complete decommissioning and terminate the ISFSI license.

In addition to these costs, SMUD also estimates that it would cost approximately \$13.1 million to restore the site to make it available for other SMUD uses with some major structures remaining intact. Site restoration is not a legal requirement. No site restoration is currently underway.

EMPLOYEE RELATIONS

SMUD has approximately 2,334 employees, most of whom are covered by a civil service system. SMUD is a contracting member of the California Public Employees' Retirement System ("PERS"). Approximately 50% of SMUD's work-force is represented as to wages, hours and other terms and conditions of employment, by one of three recognized employee organizations, the International Brotherhood of Electrical Workers ("IBEW") Local 1245, the Organization of SMUD Employees ("OSE"), and the SMUD Public Safety Officers' Association ("PSOA"). The remaining 50% of SMUD's work-force, which includes managers, professional, administrative, supervisory, confidential and security staff, is unrepresented.

SMUD negotiated a four-year Memoranda of Understanding ("MOU") with IBEW and the OSE, effective January 1, 2022, through December 31, 2025. Both contracts contain a no-strike/no-lockout clause effective during the life of the agreements. SMUD has an MOU with PSOA effective through December 31, 2026. SMUD has experienced only one labor interruption, which occurred in January 1980 that lasted four days.

RETIREMENT BENEFITS AND POST-EMPLOYMENT MEDICAL BENEFITS

Pension Plans

SMUD participates in PERS, an agent multiple-employer public employee defined benefit pension plan. PERS provides retirement and disability benefits, annual cost-of-living adjustments, and death benefits to plan members and beneficiaries. PERS acts as a common investment and administrative agent for participating public entities within the State. Benefit provisions and all other requirements are established by State statute and SMUD policies. The pension plan provides retirement benefits, survivor benefits, and death and disability benefits based upon employees' years of credited service, age, and final compensation.

As of June 30, 2022, the last actuarial valuation date for SMUD's plan within PERS, the market value of the SMUD plan assets was \$2.32 billion. The plan is 87.8% funded on a market value of assets basis, a decrease of 12.3% compared to the June 30, 2021 funded status based on the market value of assets.

As an employer, SMUD is required to contribute a percentage of payroll each year to PERS to fund SMUD's plan based on actuarial valuations performed by PERS. PERS collects the normal cost based on a percentage of payroll and the unfunded liability portion is based on a dollar amount. SMUD also makes partial contributions required of SMUD employees on their behalf and for their account. At the PERS fiscal year ended June 30, 2023, SMUD's required employer contribution rate for normal cost was 8.9% of payroll and the unfunded liability contribution was \$22.4 million. During 2023, SMUD contributed \$37.4 million to PERS (including SMUD's contributions to cover required employee contributions), and SMUD employees paid \$18.3 million for their share of the PERS contribution.

For the fiscal years ending June 30, 2024 and June 30, 2025, SMUD is required to contribute 9.6% and 9.5% of payroll for normal costs and \$10.7 million for fiscal year ending June 30, 2025 for the unfunded liability contribution. There is no estimated employer contribution to the unfunded liability for fiscal year ending June 30, 2024. Assuming no amendments to the plan and no liability gains or losses (which can have a significant impact), PERS has projected that SMUD will be required to contribute 9.4% of payroll to the plan for normal costs and \$15.7 million for the unfunded liability for the fiscal year ending June 30, 2026, not including SMUD contributions to cover required employee contributions. The amount SMUD is required to contribute to PERS is expected to increase in the future. The actual amount of such increases

will depend on a variety of factors, including but not limited to investment returns, actuarial methods and assumptions, experience and retirement benefit adjustments.

SMUD has the option to prepay an annual lump sum payment to PERS for the unfunded accrued liability portion only (not including SMUD contributions to cover required employee contributions). SMUD made an annual lump sum prepayment of \$19.5 million, and also voluntarily made an additional payment of \$47.3 million, for the unfunded accrued liability for the fiscal year ended June 30, 2023. SMUD was not required to make an annual lump sum prepayment and, to date, has not voluntarily made additional payments for the unfunded accrued liability for the fiscal year ending June 30, 2024.

While SMUD has some ability to adjust the retirement benefits provided to its employees, PERS determines the actuarial methods and assumptions used with respect to assets administered by PERS (including the SMUD plan assets) and makes the investment decisions with respect to such assets. For a description of such actuarial methods and assumptions (including the smoothing conventions used by PERS when setting employer contribution rates) and investments, see the comprehensive annual financial report of PERS (SMUD's plan is part of the Public Employees' Retirement Fund of PERS) available on its website at www.calpers.ca.gov. SMUD cannot guarantee the accuracy of such information and neither the comprehensive annual financial report of PERS nor any other information contained on the PERS website is incorporated by reference in or part of this Official Statement. Actuarial assessments are "forward-looking" information that reflect the judgment of the fiduciaries of the pension plans, and are based upon a variety of assumptions, one or more of which may prove to be inaccurate or be changed in the future. Actuarial assessments will change with the future experience of the pension plans.

GASB issued statement No. 68 "Accounting and Financial Reporting for Pensions – An Amendment of GASB Statement No. 27" ("GASB No. 68"). The primary objective of GASB No. 68 is to improve accounting and financial reporting by state and local governments for pensions. Under GASB No. 68, SMUD is required to report the net pension asset or net pension liability (i.e., the difference between the total pension liability and the pension plan's net position or market value of assets) in its Statement of Net Position. This standard requires shorter amortization periods for recognition of non-investment gains and losses and actuarial assumption changes, as well as for recognition of investment gains and losses. GASB No. 68 separates financial reporting from funding requirements for pension plans. The net pension liability as of December 31, 2023 and December 31, 2022 is \$259.0 million and \$235.5 million, respectively.

SMUD provides its employees with two cash deferred compensation plans: one pursuant to Internal Revenue Code ("IRC") Section 401(k) (the "401(k) Plan") and one pursuant to IRC Section 457 (the "457 Plan" and collectively, the "Plans"). The Plans are contributory plans in which SMUD's employees contribute the funds. Each of SMUD's eligible full-time or permanent part-time employees may participate in either or both Plans, and amounts contributed by employees are vested immediately. Such funds are held by a trustee in trust for the employees upon retirement from SMUD service and, accordingly, are not subject to the general claims of SMUD's creditors. SMUD makes annual contributions to the 401(k) Plan on behalf of certain employees pursuant to a memorandum of understanding with both of its collective bargaining units. SMUD matches non-represented employee contributions to the 401(k) Plan up to a set amount. SMUD also makes limited discretionary contributions to non-represented employees hired after January 1, 2013, which contributions fully vest after five years. Prior to 2022, SMUD did not match employee contributions, nor make contributions on behalf of its employees to the 457 Plan. Beginning in 2022, SMUD makes annual contributions to the 457 Plan on behalf of certain employees and matches employee contributions up to a set amount pursuant to a memorandum of understanding with one of its collective bargaining units. SMUD made contributions to both Plans of \$6.9 million in 2023 and to the 401(k) Plan of \$7.0 million in 2022. Participating employees made contributions into both Plans totaling \$34.3 million in 2023 and \$32.4 million in 2022.

Other Post-Employment Benefits

SMUD provides post-employment healthcare benefits, in accordance with SMUD policy and negotiated agreements with employee representation groups in a single employer defined benefit plan, to all employees who retire from SMUD, and their dependents. SMUD also provides post-employment healthcare benefits to covered employees who are eligible for disability retirement. SMUD contributes the full cost of coverage for retirees hired before January 1, 1991, and a portion of the cost based on credited years of service for retirees hired after January 1, 1991. SMUD also contributes a portion of the costs of coverage for these retirees' dependents. Retirees are required to contribute the portion that is not paid by SMUD. The benefits, benefit levels, retiree contributions and employer contributions are governed by SMUD and can be amended by SMUD through its personnel manual and union contracts.

SMUD's post-employment health care benefits are funded through the PERS California Employers' Retiree Benefit Trust ("CERBT"), an agent multiple-employer plan. The funding of a plan occurs when the following events take place: the employer makes payments of benefits directly to or on behalf of a retiree or beneficiary; the employer makes premium payments to an insurer; or the employer irrevocably transfers assets to a trust or other third party acting in the role of trustee, where the plan assets are dedicated to the sole purpose of the payments of the plan benefits, and creditors of the government do not have access to those assets.

SMUD has elected to contribute the normal costs to the CERBT but annually receive reimbursement for cash benefit payments from the CERBT. In 2024, SMUD's contribution for the normal costs to CERBT is \$10.6 million. In 2023, SMUD made a contribution to the CERBT for normal costs in the amount of \$8.6 million. In 2022, SMUD decided to forgo making a contribution for the normal costs to the CERBT because there was a net OPEB asset at December 31, 2021. SMUD can elect to make additional contributions to the trust. During 2023 and 2022, SMUD made healthcare benefit contributions by paying actual medical costs of \$24.7 million and \$24.5 million, respectively. During 2023 and 2022, SMUD received \$24.4 million and \$23.3 million, respectively, reimbursement for cash benefit payments from the CERBT.

At June 30, 2023 and 2022, SMUD estimated that the actuarially determined accumulated post-employment benefit obligation was approximately \$403.6 and \$381.7 million, respectively. At June 30, 2023 and 2022, the plan was 92.3% and 97.9% funded, respectively.

SMUD's actuary uses PERS economic and other assumptions as the basis for the calculation of the post-employment benefit obligation. The actual accumulated post-employment benefit obligation will vary substantially if such PERS assumptions, such as interest rate and life expectancy, among others, prove to be inaccurate or different than SMUD's actual experience. Although SMUD believes that such assumptions and estimates are reasonable, no assurance can be given that any such assumptions will prove to be accurate, or that SMUD's actual accumulated post-employment benefit obligation will not materially exceed its estimates. Additional information is available in Note 15 (Other Postemployment Benefits) and "Required Supplementary Information" to SMUD's consolidated financial statements.

GASB previously issued SGAS No. 75 "Accounting and Financial Reporting for Postemployment Benefits Other than Pensions". The primary objective of GASB No. 75 is to improve accounting and financial reporting by state and local governments for post-employment benefits other than pensions ("OPEB"). Under GASB No. 75, SMUD is required to report the net OPEB asset or net OPEB liability (i.e., the difference between the total OPEB liability and the OPEB plan's net position or market value of assets) in its Statement of Net Position. This standard requires shorter amortization periods for recognition of non-investment gains and losses and actuarial assumption changes, as well as for recognition of

investment gains and losses. The net OPEB liability as of December 31, 2023 and December 31, 2022 is \$25.3 million and \$6.8 million, respectively.

CAPITAL REQUIREMENTS AND OUTSTANDING INDEBTEDNESS

Estimated Capital Requirements

SMUD has a projected capital requirement of approximately \$2.8 billion for the period 2024 through 2028 as shown in the table below. Approximately 60% of this requirement is anticipated to be funded with internally generated funds and cash on hand.

Special projects include costs relating to construction of large substations and the construction of Solano Phase 4. The Estimated Capital Requirements table below includes \$51 million for Solano Phase 4. See “POWER SUPPLY AND TRANSMISSION – Power Generation Facilities – Solano 4 Project.”

ESTIMATED CAPITAL REQUIREMENTS (Dollars in Thousands)

	Service Area and Other System Improvements Including Distribution System	Improvements to Existing Generation Plant	General Plant	Special Projects	Total Capital Requirements
2024	\$193,180	\$58,070	\$132,454	\$169,315	\$553,019
2025	250,507	72,551	171,736	82,431	577,225
2026	237,026	108,614	138,112	64,880	548,632
2027	237,026	108,614	138,112	64,880	548,632
2028	237,026	108,614	138,112	64,880	548,632

Outstanding Indebtedness

General. SMUD typically finances its capital requirements through the sale of revenue bonds, the sale of commercial paper, from draws on its Revolving Credit Facility (as defined below) and from internally generated funds. With the enactment of the 2022 Inflation Reduction Act and the 2021 Infrastructure Investment and Jobs Act, SMUD is monitoring and exploring new methods of financing, including those afforded under these two federal laws, that provide not-for-profit public power utilities with direct federal incentive payments.

SMUD’s Electric Revenue Bonds (the “Senior Bonds”) are issued pursuant to Resolution No. 6649 (the “Senior Resolution”) adopted in 1971, as amended and supplemented (the “Senior Resolution”). As of December 31, 2023, SMUD had Senior Bonds in the aggregate principal amount of \$1,783,965,000 outstanding. If the plan of finance described in the forepart of this Official Statement is implemented in whole, Senior Bonds in the aggregate principal amount of \$1,983,575,000 are expected to be outstanding under the Senior Resolution. See “PLAN OF FINANCE” in the forepart of this Official Statement. The Senior Bonds are payable solely from the Net Revenues of SMUD’s Electric System. The Senior Bonds are subordinate in right of payment to the prior payment of “Maintenance and Operation Costs” and “Energy Payments” as defined in the Senior Resolution, including payments by SMUD to TANC under PA3, payments by SMUD under power purchase agreements related to the Authorities and payments by SMUD to NCGA and NCEA under their respective gas supply contracts.

SMUD's Subordinated Electric Revenue Bonds (the "Subordinated Bonds") are issued pursuant to Resolution No. 85-11-1 of SMUD, adopted on November 7, 1985, as amended and supplemented (the "Subordinate Resolution"). As of December 31, 2023, SMUD had Subordinated Bonds in the aggregate principal amount of \$332,020,000 outstanding. The Subordinated Bonds are payable solely from the Net Subordinated Revenues of SMUD's Electric System. The Subordinated Bonds are subordinate in right of payment to the prior payment of principal of and interest on the Senior Bonds.

SMUD issues commercial paper notes (the "Notes") from time to time. As of March 21, 2024, SMUD's Notes were outstanding in the aggregate principal amount of \$150,000,000. Currently, Notes in the aggregate principal amount of \$400,000,000 may be outstanding at any one time, but SMUD reserves the right to increase or decrease the aggregate principal amount of the Notes that may be outstanding at any one time in the future. The Notes are secured by letters of credit issued by commercial banks. The Notes (and SMUD's obligations to repay drawings under the letters of credit) are payable solely from available revenues of SMUD's Electric System and are subordinate in right of payment to the prior payment of principal of, premium if any, and interest on the Senior Bonds and the Subordinated Bonds. Drawings under the letters of credit, to the extent not repaid immediately from the proceeds of commercial paper or other available SMUD funds, are repayable with interest over a period of five years. The letters of credit currently expire in August of 2025 and March of 2027. SMUD expects to pay all \$150,000,000 of the outstanding principal amount of the Notes with the proceeds of the 2024 Series M Bonds (as defined in the forepart of this Official Statement). See "PLAN OF FINANCE" in the forepart of this Official Statement.

SMUD also entered into a revolving credit agreement with a commercial bank and issued its taxable and tax-exempt revolving notes thereunder (collectively, the "Revolving Credit Facility") in February 2022. As of December 31, 2023, no principal amount was outstanding under the Revolving Credit Facility. Currently, the aggregate principal amount that can be outstanding under the Revolving Credit Facility at any one time is limited to \$100,000,000. However, SMUD reserves the right to increase or decrease the aggregate principal amount that can be outstanding at any one time under the Revolving Credit Facility in the future. SMUD's payment obligations under the Revolving Credit Facility are payable solely from available revenues of SMUD's Electric System and are subordinate in right of payment to the prior payment of principal of, premium if any, and interest on the Senior Bonds and the Subordinated Bonds. The current term of the Revolving Credit Facility expires in February 2026.

Joint Powers Authorities. SMUD has entered into long-term take-or-pay power purchase agreements with SFA relating to the Local Gas-Fired Plants. Under such agreements, SMUD has exclusive control of the dispatch of all five of the Local Gas-Fired Plants and takes all of the power produced by the Local Gas-Fired Plants. See "POWER SUPPLY AND TRANSMISSION – Power Generation Facilities – Local Gas-Fired Plants." The Authorities are each treated as component units of SMUD for accounting purposes. Only SFA has outstanding debt, which relates solely to the Cosumnes Power Plant and is payable solely from capacity payments made by SMUD under the related power purchase agreement. As of December 31, 2023, bonds issued by SFA to finance the Cosumnes Power Plant were outstanding in the aggregate principal amount of \$87,890,000. SMUD's payments under the power purchase agreements relating to the Local Gas-Fired Plants are payable from revenues of SMUD's Electric System prior to the payment of principal of and interest on the Senior Bonds and Subordinated Bonds as either "Maintenance and Operation Costs" or "Energy Payments" under the Senior Resolution and Subordinate Resolution.

SMUD and Sacramento Municipal Utility District Financing Authority formed NCGA as a joint powers authority. NCGA is treated as a component unit of SMUD for accounting purposes. NCGA issued \$757,055,000 in bonds in May 2007 for the purpose of paying Morgan Stanley Capital Group in advance for natural gas to be delivered to NCGA and then sold to SMUD pursuant to a long-term purchase contract. SMUD's obligation under the purchase contract is limited to payment for gas supplies delivered by NCGA. SMUD's payments under the purchase contract are payable from revenues of SMUD's Electric System

prior to the payment of principal and interest on the Senior Bonds and the Subordinated Bonds as either “Maintenance and Operation Costs” or “Energy Payments” under the Senior Resolution and the Subordinate Resolution. SMUD is not obligated to make any payments in respect of debt service on the NCGA bonds. As of December 31, 2023, related bonds in the aggregate principal amount of \$120,070,000 remain outstanding.

SMUD and Sacramento Municipal Utility District Financing Authority formed NCEA as a joint powers authority. NCEA is treated as a component unit of SMUD for accounting purposes. NCEA issued \$689,700,000 in bonds on April 5, 2024, for the purpose of (i) refunding prior bonds issued by NCEA, the proceeds of which were used to pay J. Aron & Company LLC in advance for natural gas or electricity to be delivered to NCEA and then sold to SMUD pursuant to a long-term purchase contract and (ii) to pay Aron Energy Prepay 33 LLC for additional natural gas or electricity to be delivered to NCEA and then sold to SMUD pursuant to the same long-term purchase contract. SMUD’s obligation under the purchase contract is limited to payment for gas or electricity supplies delivered by NCEA. SMUD’s payments under the purchase contract are payable from revenues of SMUD’s Electric System prior to the payment of principal and interest on the Senior Bonds and the Subordinated Bonds as either “Maintenance and Operation Costs” or “Energy Payments” under the Senior Resolution and the Subordinate Resolution. SMUD is not obligated to make any payments in respect of debt service on the NCEA bonds. As of the date hereof, all of the related bonds remain outstanding.

Interest Rate Swap Agreements. SMUD has two interest rate swap agreements relating to previously or currently outstanding Subordinated Bonds, as shown in the following table. For more information, see Note 9 (Derivative Financial Instruments) to SMUD’s consolidated financial statements.

Effective Date	Termination Date	SMUD Pays	SMUD Receives	Notional Amount (000’s)	Counterparty	
7/2/1997	7/1/2024	Floating	SIFMA	5.154%	\$19,570	J Aron & Company LLC
07/12/2023	08/15/2041	Fixed	0.718%	70% of 1M SOFR	132,020	Barclays Bank

The obligations of SMUD under the swap agreements are not secured by a pledge of revenues of SMUD’s electric system or any other property of SMUD. SMUD does not currently have any collateral posting requirements with respect to the interest rate swap agreements, but SMUD may be required to post collateral under certain circumstances.

Build America Bonds Subsidy Payments. SMUD’s Electric Revenue Bonds, 2009 Series V (the “2009 Series V Bonds”) and Electric Revenue Bonds, 2010 Series W (the “2010 Series W Bonds”) were issued as “Build America Bonds” under the provisions of the American Recovery and Reinvestment Act of 2009. At the time the 2009 Series V Bonds and 2010 Series W Bonds were issued, SMUD expected to receive an annual cash subsidy payment from the United States Treasury equal to 35% of the interest payable on the 2009 Series V Bonds and the 2010 Series W Bonds. However, as a result of the federal budget process, many payments from the federal government, including Build America Bonds subsidy payments, have been reduced. Absent the federal budget reductions, the aggregate annual cash subsidy payable to SMUD with respect to the 2009 Series V Bonds and the 2010 Series W Bonds would be approximately \$9.8 million. With the current federal budget reductions, SMUD has typically been receiving aggregate annual cash subsidy payments with respect to the 2009 Series V Bonds and the 2010 Series W Bonds of approximately \$9.2 million. It is possible that future federal budget actions could further reduce, or eliminate entirely, the annual cash subsidy payments with respect to Build America Bonds, including the annual cash subsidy payments payable to SMUD with respect to the 2009 Series V Bonds and

the 2010 Series W Bonds. SMUD cannot predict the likelihood of the further reduction or elimination of the Build America Bonds subsidy payments. A significant reduction or elimination of the cash subsidy payments payable to SMUD with respect to the 2009 Series V Bonds or the 2010 Series W Bonds could be material. SMUD expects to refund the 2009 Series V Bonds and the 2010 Series W Bonds with a portion of the proceeds of the 2024 Series N Bonds (as defined in the forepart of this Official Statement). See “PLAN OF FINANCE” in the forepart of this Official Statement.

[Remainder of Page Intentionally Left Blank]

Debt Service Requirements. The following table sets forth SMUD’s debt service requirements with respect to SMUD’s Senior Bonds and Subordinated Bonds.

DEBT SERVICE REQUIREMENTS⁽¹⁾

Calendar Year	Senior Bonds Debt Service⁽²⁾	Subordinated Bonds Debt Service⁽³⁾	Total Debt Service
2024	\$ 178,626,061	\$ 11,684,323	\$ 190,310,384
2025	183,358,187	11,780,665	195,138,852
2026	183,456,787	8,447,772	191,904,559
2027	183,543,537	8,947,772	192,491,309
2028	183,654,538	8,948,211	192,602,749
2029	129,578,900	8,947,332	138,526,232
2030	139,939,150	9,781,105	149,720,255
2031	142,962,401	6,447,772	149,410,172
2032	144,002,650	6,948,211	150,950,862
2033	145,117,900	6,947,332	152,065,231
2034	141,052,400	18,587,534	159,639,934
2035	143,121,550	18,159,537	161,281,087
2036	145,280,050	17,729,456	163,009,506
2037	99,689,801	25,303,354	124,993,154
2038	99,332,051	25,618,890	124,950,941
2039	95,983,550	25,935,859	121,919,409
2040	95,777,550	26,254,804	122,032,354
2041	100,623,550	26,889,177	127,512,727
2042	70,548,850	28,490,000	99,038,850
2043	70,339,650	28,490,300	98,829,950
2044	70,135,250	28,490,350	98,625,600
2045	69,926,700	28,494,550	98,421,250
2046	64,515,250	28,492,150	93,007,400
2047	64,516,000	28,492,700	93,008,700
2048	64,522,500	28,490,450	93,012,950
2049	64,518,750	28,489,800	93,008,550
2050	64,519,250	--	64,519,250
2051	39,127,500	--	39,127,500
2052	39,126,500	--	39,126,500
2053	39,128,250	--	39,128,250
2054	21,388,500	--	21,388,500
Total	\$3,277,413,562	\$501,289,405	\$3,778,702,966

(1) Does not include outstanding bonds issued by the Authorities for the Local Gas-Fired Plants. Does not include bonds issued by NCGA, NCEA or SMUD’s portion of bonds issued by TANC. Payments by SMUD which are used by the Authorities, NCGA, NCEA, and TANC to pay debt service on such bonds constitute either “Maintenance and Operation Costs” or “Energy Payments” under the Senior Resolution and the Subordinate Resolution.

(2) Includes debt service for the Senior Bonds anticipated to be issued as part of the plan of finance described in the forepart of this Official Statement and reflects the refunding of the Senior Bonds anticipated to be refunded as part of the plan of finance described in the forepart of this Official Statement. Debt service is not reduced by the amount of any subsidy that SMUD currently expects to receive in connection with the 2009 Series V Bonds and 2010 Series W Bonds.

(3) Based on an assumed interest rate of 3% per annum following (i) the initial scheduled Mandatory Purchase Date of October 15, 2030 for SMUD’s Subordinated Electric Revenue Refunding Bonds, 2023 Series D and (ii) the initial scheduled Mandatory Purchase Date of October 15, 2025 for SMUD’s Subordinated Electric Revenue Bonds, 2019 Series B.

Note: Amounts may not add due to rounding.

INSURANCE

SMUD maintains a comprehensive property/casualty insurance program designed to protect against catastrophic losses that would have an adverse effect on its financial position or operational capabilities. Insurance programs are continuously reviewed and modified when construction, operational exposures, or developments in the insurance industry so warrant. Long term relationships with a variety of insurers minimize SMUD's susceptibility to the effects of market cycles. SMUD budgets reserves to meet potential insurance deductibles and self-insured liability claims.

SMUD safeguards assets with all-risk property and boiler/machinery insurance with limits of \$800 million per occurrence for physical damage and business interruption combined. Various coverage sublimits and deductibles apply to losses arising from certain perils, such as business interruption, earthquake, or flood, respectively. Liability insurance is in effect to defend and indemnify SMUD against third party claims, including general, automobile and sudden and accidental pollution claims with policy limits of \$140 million, and wildfire coverage with policy limits of \$275 million, all of which include a variety of self-insured retentions.

Nuclear property and liability insurance policies are maintained in accordance with the NRC's requirements for decommissioned nuclear plants that maintain dry storage of spent fuel on-site. This includes \$100 million in first party property damage and decontamination, \$100 million for nuclear liability arising from accidents on-site, \$200 million for supplier's and transporter's nuclear liability, and \$300 million for nuclear worker liability. SMUD is exposed to possible retrospective assessments for nuclear property events occurring at other nuclear facilities in the United States capped at ten times SMUD's annual nuclear property premium (currently the maximum retrospective assessment is approximately \$1,000,000).

Other types of insurance include non-owned aircraft liability, workers' compensation, crime, cyber security, fidelity, fiduciary liability, directors' and officers' liability, professional errors and omissions, transportation, and builder's risk for major facilities under construction.

LEGAL PROCEEDINGS

SMUD is a party to numerous actions arising out of the conduct of its business and affairs, some of which are discussed below. SMUD believes that any losses or adverse financial results it may suffer in these current actions, to the extent not covered by insurance, would not, in the aggregate, have an adverse material impact on SMUD, its business and affairs, or results of operations, financial position or liquidity.

Environmental Litigation

SMUD was one of many potentially responsible parties that had been named in a number of actions relating to environmental claims and/or complaints. SMUD has resolved these environmental claims and/or complaints and entered into settlement agreements and/or consent orders. These settlement agreements and consent orders have statutory reopener provisions which allow regulatory agencies to seek additional funds for environmental remediation under certain limited circumstances. While SMUD believes it is unlikely that any of the prior settlements or consent orders will be reopened, the possibility exists. If any of the settlements or consent orders were to be reopened, SMUD believes that the outcome will not have a material adverse impact on SMUD's financial position, liquidity, or results of operations.

Proposition 26 Lawsuit

In October 2019, two SMUD customers jointly filed a complaint against SMUD (subsequently one of the customers removed themselves from the complaint), which stated that SMUD's Board violated

Proposition 26 (see “DEVELOPMENTS IN THE ENERGY MARKETS – State Legislation and Regulatory Proceedings – Proposition 26” for a description of Proposition 26) when on June 24, 2019, it adopted rate increases for 2020 and 2021. The plaintiff contended the rate increases did not reflect SMUD’s reasonable cost of service because they included a 9.2% scalar that SMUD applies to its TOD residential rate restructure adopted by SMUD’s Board in the 2017 rate process. SMUD viewed the lawsuit as having little merit and while SMUD anticipated the court would rule in SMUD’s favor on substantive grounds, the plaintiff in early 2024 agreed to dismiss the lawsuit with prejudice due to their failure to diligently prosecute the case. On January 16, 2024, the court approved the dismissal.

On January 19, 2024, the same plaintiff, along with a second SMUD residential customer, jointly filed a new complaint challenging the September 21, 2023, SMUD Board adoption of 2024 and 2025 rate increases. The plaintiffs make a similar claim regarding the TOD scalar as the prior lawsuit. Given the little merit behind the lawsuit, SMUD believes the court will rule in its favor. However, SMUD is unable to predict the outcome of the case or, if or to the extent SMUD ultimately is not successful in the litigation, what remedies against SMUD may be available. SMUD believes that if it is not successful in the litigation, and to the extent the outcome would have a material adverse impact on SMUD’s financial position, liquidity, or results of operations, the Board would make appropriate rate modifications based on an evidentiary record consistent with guidance from a judicial decision in the case.

Other Litigation Matters

Currently, SMUD is party to various claims, legal actions and complaints relating to its operations, including, but not limited to, property damage, personal injury, contract disputes, and employment matters. SMUD believes that the ultimate resolution of these matters will not have a material adverse effect on SMUD’s financial position, liquidity, or results of operations.

FERC Administrative Proceedings

SMUD is involved in a number of FERC administrative proceedings related to the operation of wholesale energy markets, regional transmission planning, gas transportation and NERC reliability standards. These proceedings generally fall into the following categories: (i) filings initiated by the CAISO (or other market participants) to adopt/modify the CAISO Tariff and/or establish market design and behavior rules; (ii) filings initiated by existing transmission owners (i.e., PG&E and the other IOUs) to pass-through costs to their existing wholesale transmission customers; (iii) filings initiated by FERC on market participants to establish market design and behavior rules or investigate market behavior by certain market participants; (iv) filings initiated by transmission owners under their transmission owner tariffs to establish a regional transmission planning process; (v) filings initiated by providers of firm gas transportation services under the Natural Gas Act; and (vi) filings initiated by NERC to develop reliability standards applicable to owners, users, and operators of the bulk electric system. In addition, SMUD is an active participant in other FERC administrative proceedings, including those related to reliability, variable resource integration and the changing resource mix, and transmission planning and cost allocation. SMUD believes that determinations of these FERC proceedings will not have a material adverse effect on SMUD’s financial position, liquidity or results of operations.

CPUC Administrative Proceedings

Periodically, PG&E seeks to update its gas transmission and storage (“GT&S”) revenue requirements and rate designs. These applications are litigated at the CPUC and affect SMUD through several tariff rates SMUD pays to move natural gas along PG&E’s backbone transmission lines. In the 2019 GT&S rate case (the “2019 GT&S Case”), the CPUC affirmed the application in GT&S rates of cost causation principles to prevent excessive and unreasonable costs being shifted to electric generator

backbone customers like SMUD, either through proposed changes in PG&E’s natural gas storage strategy or through cost shifts within the electric generator customer class.

PG&E filed its 2023 General Rate Case (the “GRC”) in June 2021 which includes its gas transmission and storage revenue requirements. In September 2021, PG&E filed an application for approval of its Gas Cost Allocation and Rate Design Proposals (“CARD”). The CPUC issued a decision in the GRC in November 2023 authorizing PG&E’s revenue requirements for the four-year rate period of 2023-2026. SMUD is a party to the comprehensive all-party settlement agreement submitted to the CPUC for approval in June 2023 which, if approved, would resolve all open issues in the CARD proceeding. SMUD does not believe that determinations of these CPUC proceedings will have a material adverse effect on SMUD’s financial position, liquidity or results of operations. SMUD will continue to actively participate in PG&E’s GRC and CARD proceedings to ensure that costs are fairly allocated to non-core customers, including electric generator backbone customers.

In the GRC, the CPUC directed PG&E to submit an application to revise its natural gas curtailment procedures “similar to the curtailment procedures of other large energy utilities”. SMUD will actively participate in this future proceeding.

Separately, SMUD continues to participate and monitor a proceeding at the CPUC concerning long-term gas system planning. At this point in these proceedings, SMUD does not anticipate that the ultimate resolution of such cases will have a material adverse effect on SMUD’s financial position, liquidity, or results of operation.

SMUD monitors a number of other CPUC proceedings. These proceedings generally fall into the following categories: (i) filings initiated by PG&E to adopt/modify its tariffs and/or rules; (ii) rulemakings initiated by the CPUC to establish market design and behavior rules or program rules affecting SMUD customers; and (iii) rulemakings initiated by the CPUC to establish electric and/or gas system safety design and maintenance rules. SMUD believes that determinations of these CPUC proceedings will not have a material adverse effect on SMUD’s financial position, liquidity or results of operations.

DEVELOPMENTS IN THE ENERGY SECTOR

California Electric Market

In 1996, the State partially deregulated its electric energy market and the CAISO was established in 1998. Since the CAISO’s formation, the State has experienced episodes of higher and more volatile prices for natural gas and wholesale electricity. In reaction to such conditions, SMUD made significant changes to its business strategy to mitigate the impacts of the more volatile and unpredictable energy markets. Volatility in energy prices in the State are always a potential risk due to a variety of factors which affect both the supply and demand for electricity in the western United States. These factors include, but are not limited to, the implementation of the CAISO market design changes, insufficient generation resources, the increase in intermittent renewable energy resources, natural gas price volatility, fuel costs and availability, weather and natural disasters, transmission constraints and levels of hydroelectric generation within the region. While SMUD has taken a number of steps to mitigate its exposure to price volatility associated with these factors, this price volatility under extreme conditions may contribute to greater volatility in SMUD’s net revenues from the purchase and sale of electric energy and, therefore, could materially adversely affect the financial condition and liquidity of SMUD. For a discussion of SMUD’s current resource planning activities and risk management strategies, see “BUSINESS STRATEGY” above.

Cybersecurity

Cybersecurity continues to be a top priority for SMUD. Attacks or threats directed at critical electric or energy sector operations could damage or cause the shut-down of generation, transmission or distribution assets that are essential to SMUD's ability to serve its customers, cause operational malfunctions and outages affecting SMUD's electric system, and result in costly recovery and remediation efforts. The costs of security measures or of remedying breaches could be material.

SMUD participates in sharing and receiving information about cyber security threats in real-time through the Electricity Information Sharing and Analysis Center ("E-ISAC"), the central hub for such data to actively manage risk related to potential cyber intrusion. SMUD also participates in NERC's development of mandatory, enforceable cyber security standards to address vulnerabilities in electric utility systems. SMUD also adopts voluntary measures suggested as best practices by the National Institute of Standards and Technology ("NIST") in its national framework.

SMUD's prudent response to this ever-changing threat requires constant monitoring and frequent updates to implement new regulatory requirements as they are developed. SMUD manages risk related to frequently changing regulatory requirements by participating in the development of standards at NERC and NIST and through active engagement in the cyber security policy dialogue in Congress.

Physical Security

Physical security is a critical concern for electric utilities as they seek to protect their infrastructure from a range of threats. The electric utility infrastructure is complex and consists of multiple components, such as power plants, substations, transmission and distribution lines, and other facilities. SMUD employs a dedicated physical security team that is deployed 24/7 and allows SMUD to respond to emergent events in a safe, coordinated, efficient, and cohesive manner, protecting the lives of its employees, customers, community, properties and assets. SMUD has policies, processes and procedures in place that outline the access controls and restrictions for its properties. SMUD restricts access based on need as it determines, while adhering to applicable laws, regulations and standards such as NERC Reliability Standards and NRC regulations. SMUD also maintains a Utility Security Plan adopted by the Board representing SMUD's compliance with the CPUC's Safety and Enforcement Division six-step security plan process described in CPUC Decision 19-01-018.

During times of elevated, imminent threats, safety and/or security concerns, SMUD's Security Operations team, under the direction of the Chief Financial Officer or delegate, reserves the right to deploy additional security measures, controls, and further restrict or limit access to its properties to increase its security posture.

SMUD operates a 24/7 security operations center which monitors and coordinates responses to situations reported by internal and external stakeholders, or which are detected by SMUD's security technology. The technology includes access control, video surveillance, and various types of intrusion detection solutions. The security operations center is a central hub for initial contact for physical security calls from employees of suspicious events and initiates incident responses as needed.

Federal Legislation and Regulatory Proceedings

Energy Policy Act of 2005. On August 8, 2005, the Energy Policy Act of 2005 (the "EPAct of 2005") was signed into law. The law includes a number of energy-related provisions, including among other things limited FERC jurisdiction over interstate transmission assets of municipal utilities, cooperatives and federal utilities to order these entities to provide transmission services on rates and terms

comparable to those the entities charge and provide to themselves; the grant of authority to FERC to establish and certify an electric reliability organization to develop and enforce reliability standards for users of the bulk power transmission system; and prohibitions of certain market practices including the provision of false information and related expansion of FERC civil and criminal penalty authority. So far, the most visible impact of the EAct of 2005 on SMUD has been the development of mandatory federal reliability standards.

Federal Regulation of Transmission Access. The Energy Policy Act of 1992 (the “Energy Policy Act”) made fundamental changes in the federal regulation of the electric utility industry, particularly in the area of transmission access. The Energy Policy Act provided FERC with the authority to require a transmitting utility to provide transmission services at rates, charges, terms and conditions set by FERC. The purpose of these changes, in part, was to bring about increased competition in the electric utility industry. Under the Energy Policy Act, electric utilities owned by municipalities and other public agencies which own or operate electric power transmission facilities which are used for the sale of electric energy at wholesale are “transmitting utilities” subject to the requirements of the Energy Policy Act.

Since the Energy Policy Act, FERC has adopted a series of rules to implement competitive open access to transmission facilities and regional transmission planning. Order No. 888, issued in 1996, requires the provision of open access transmission services on a nondiscriminatory basis by all “jurisdictional utilities” (which, by definition, does not include municipal entities like SMUD) by requiring all such utilities to file OATTs. Order No. 888 also requires “nonjurisdictional utilities” (which, by definition, does include SMUD) that purchase transmission services from a jurisdictional utility under an open access tariff and that owns or controls transmission facilities to provide open access service to the jurisdictional utility under terms that are comparable to the service that the nonjurisdictional utility provides itself. Section 211A of the EAct of 2005 authorizes, but does not require, FERC to order unregulated transmission utilities to provide transmission services, including rates and terms and conditions, that are comparable to those under which the unregulated transmitting utility provides transmission services to itself that are not unduly discriminatory or preferential – often referred to as the reciprocity rule.

In Order 890, issued in 2007, FERC stated that it will implement its authority under Section 211A on a case-by-case basis and retain the current reciprocity provisions.

In 2011, FERC issued Order 1000, which among other things requires public utility (jurisdictional) transmission providers to participate in a regional transmission planning process that produces a regional transmission plan and that incorporates a regional and inter-regional cost allocation methodology. Similar to Order 890, FERC states that it will implement its authority under Section 211A on a case-by-case basis. However, in Order 1000, FERC appears to expand upon the current reciprocity provisions and states that it has the authority to allocate costs to beneficiaries of services provided by specific transmission facilities even in the absence of a contractual relationship between the owner of the transmission facilities and the identified beneficiary.

SMUD, individually, and through the Large Public Power Council (“LPPC”), appealed Order 1000, but in 2014 the D.C. Circuit Court of Appeals rejected all of the arguments raised on appeal, upholding the entirety of Order 1000.

The jurisdictional members of WestConnect filed their proposed regional planning process and cost allocation methodology through a series of compliance filings at FERC. FERC accepted binding cost allocation for jurisdictional transmission providers of WestConnect and mandated that non-jurisdictional transmission providers (such as SMUD) identified as beneficiaries of a project have the ability to not accept the cost allocation. WestConnect’s Order 1000 planning process began with the 2016-2017 planning cycle.

However, in response to FERC’s WestConnect orders on compliance, El Paso Electric Company (“El Paso”), a jurisdictional transmission provider, petitioned to the Court of Appeals for the 5th Circuit. El Paso contends that FERC’s WestConnect orders violate Order 1000’s cost causation principle because WestConnect’s binding cost allocation applies only to the jurisdictional transmission providers and thus forces jurisdictional transmission providers to subsidize projects benefitting non-jurisdictional transmission providers that opt-out of projects. The non-jurisdictional transmission providers agreed on a settlement with the jurisdictional transmission providers to resolve the matters on appeal in the 5th Circuit, but FERC ultimately did not accept the settlement. On August 2, 2023, the court reversed FERC’s orders implementing Order No. 1000 for WestConnect concerning cost allocation of regional transmission projects to non-jurisdictional transmission providers. The court found that the WestConnect orders are incompatible with Order No. 1000’s application of the cost causation principle to address free ridership. There is uncertainty at this time on the future of WestConnect’s regional planning process. FERC has not yet acted on its own in light of the Fifth Circuit’s decision, and it is uncertain whether it will act while it is working on an updated transmission planning and cost allocation proposal that would change the Order 1000 process (as further discussed below regarding the April 21, 2022 Notice of Proposed Rulemaking). It is also uncertain if and/or the extent to which the jurisdictional transmission providers in WestConnect will file revisions to the regional transmission planning provisions in their OATTs. In the meantime, the WestConnect planning has continued under the existing framework and SMUD, along with the other non-jurisdictional transmission providers, continue to participate in the WestConnect process. SMUD’s long-standing objective is to comply with open access requirements necessary to achieve reciprocity, including through participation in a regional planning process while not binding itself to mandatory cost allocation. Thus, SMUD has an interest in continuing to explore options for participation in a regional transmission planning process if the WestConnect rules no longer permit SMUD to reasonably participate consistent with its business and jurisdictional interests.

SMUD is unable to predict at this time the full impact that Order 1000, or the 5th Circuit’s August decision, will have on the operations and finances of SMUD’s electric system or the WestConnect region generally. However, WestConnect has conducted multiple planning cycles under its Order 1000 planning process and has not identified any project eligible for cost allocation. SMUD will continue to take any action necessary, including withdrawing from a cost allocation determination or planning region, and engaging in FERC proceedings, to ensure that it is not required to pay for transmission costs in the absence of an agreement or service relationship.

On April 21, 2022, FERC issued a Notice of Proposed Rulemaking on Building for the Future Through Electric Regional Transmission Planning and Cost Allocation and Generator Interconnection (the “NOPR”). The NOPR seeks input on proposals that would impact the Order 1000 planning and cost allocation process. SMUD has been engaged in the proceeding, providing input and helping draft comments with trade organizations, including LPPC. FERC has not issued any subsequent order. SMUD will continue to monitor and be engaged in any developments at FERC that impact the Order 1000 process and its regional transmission planning participation.

NERC Reliability Standards. The EPAct of 2005 required FERC to certify an electric reliability organization (“ERO”) to develop mandatory and enforceable reliability standards, subject to FERC review and approval. On February 3, 2006, FERC issued Order 672, which certified NERC as the ERO. Many reliability standards have since been approved by FERC, including those aimed at protecting the bulk electric system from physical and cyber threats.

The ERO or the regional entities, such as WECC, may enforce the reliability standards, subject to FERC oversight or FERC may independently enforce reliability standards. Potential monetary sanctions include fines of up to \$1,544,521 per violation per day. Order 693 provides ERO and regional entities with

the discretion necessary to assess penalties for such violations, while also having discretion to calculate a penalty without collecting the penalty if circumstances warrant.

Anti-Market Manipulation Rules. EPCRA of 2005 gave FERC the authority to issue rules to prevent market manipulation in jurisdictional wholesale power and gas markets, and in jurisdictional transmission and transportation services. These anti-market manipulation rules apply to non-jurisdictional entities such as SMUD. Further, EPCRA of 2005 provided FERC civil penalty authority, which the Commission has stated that it will exercise carefully by assuring that its market manipulation rules are clear.

Greenhouse Gas Emissions. Since 2009, the United States Environmental Protection Agency (the “EPA”) has taken steps to regulate GHG emissions from different sources, including from the electric sector.

In 2014, EPA issued a proposed rule under section 111(d) of the Clean Air Act (“CAA”) called the Clean Power Plan (the “CPP”) that projected power sector emissions reductions of 30% below 2005 levels by 2030. The proposed CPP would have established a rate-based emissions goal for each state, providing states the responsibility to develop a State Implementation Plan (“SIP”) describing how each will meet the goal assigned by EPA using the “Best System of Emissions Reduction” (“BSER”) established by EPA. The rule was finalized in October 2015.

In November 2015, 27 states and numerous corporations challenged the CPP in court, alleging that EPA had exceeded its authority under the CAA; however, before the issue could be decided by the court, the 2016 presidential election resulted in a change of administration. The new administration quickly moved for an abeyance (or stay) of the case for as long as the agency needed to review and withdraw the CPP. The U.S. Supreme Court stayed implementation of the CPP pending disposition in the D.C. Circuit and any subsequent review by the Supreme Court. In August 2018, EPA proceeded to withdraw the CPP and the D.C. Circuit ultimately dismissed the case on September 17, 2019. EPA proposed a different rule under the same provision of the CAA, known as the Affordable Clean Energy (“ACE”) rule, which would have established a BSER that only includes measures that can be undertaken at an individual power plant, rather than the broader suite of measures envisioned under the CPP. The ACE rule was challenged in court by environmental groups and states alleging that the revised rule inadequately responds to EPA’s responsibility to protect public health and welfare. SMUD joined in this litigation along with other challengers. The D.C. Circuit vacated the ACE rule on January 19, 2021, and remanded it to the EPA for review and revision, just days before a new presidential administration took office. Several states led by West Virginia and coal industry members appealed the decision.

In June 2022, the U.S. Supreme Court issued its opinion in *West Virginia v. EPA*, striking down the CPP and foreclosing any future regulations of “significant political and economic significance” if Congress has not expressly authorized them. While the decision does not restrict EPA to only requiring measures “inside the fence line” at an individual power plant to control GHGs, it appears unlikely that the EPA will be able to require material reductions in GHGs to mitigate climate change through section 111(d) of the CAA.

Under the new presidential administration, in May 2023, the EPA issued a proposed rule under Section 111(d) of the CAA to reduce GHG emissions from existing and new power plants. The four-part proposed rule, *New Source Performance Standards for Greenhouse Gas Emissions From New, Modified, and Reconstructed Fossil Fuel-Fired Electric Generating Units; Emission Guidelines for Greenhouse Gas Emissions From Existing Fossil Fuel-Fired Electric Generating Units; and Repeal of the Affordable Clean Energy Rule*, would set forth GHG emission standards for certain subcategories of new and existing fossil fuel-fired power plants operating greater than 50% of the time and generating more than 300 MW per turbine. In the proposed rule, EPA determined the BSER is either deploying carbon capture and storage

technology to capture 90% of emissions or co-firing 96% hydrogen produced through a low-emission process (“low-GHG hydrogen”). If finalized, compliance is required by 2032. SMUD has filed comments as part of several trade groups and coalitions in response to the proposed rule. SMUD’s internal analysis shows the rule as proposed would not require changes at any of its currently-operating fossil-fueled power plants and therefore will not have a material impact on SMUD’s financial position, operations, or liquidity.

Federal Communications Commission

The 1978 Pole Attachment Act added section 224 to the Communications Act of 1934, authorizing the Federal Communications Commission (“FCC”) to regulate attachments by cable television systems or providers of telecommunications service to utility poles, ducts, conduits, and rights-of-way. Under Section 224(a)(1), public power entities are exempt from FCC pole attachment regulations, as municipally-owned poles are already subject to local decision-making processes and governance. The municipal exemption from FCC pole attachment regulations was further codified through the enactment of the Telecommunications Act of 1996. However, over the past decade, this exemption has been continuously eroded.

Various actions by the FCC have limited the exemption in support of a “uniform policy for broadband access to privately-owned physical infrastructure.” Through four orders issued between 2017 and 2018, the FCC set strict time limits for the review of pole attachment applications and preempted state and local agreements on pole attachments. In 2020, in *City of Portland v United States*, the U.S. Court of Appeals for the Ninth Circuit upheld the FCC’s Small Cell Order, which adopted new time limits for municipal utilities’ review of wireless infrastructure siting applications and preempted access fees for small cells. In November 2023, the FCC adopted its Fourth Report and Order, Declaratory Ruling, and Third Further Notice of Proposed Rulemaking that would reform pole replacement rules and facilitate the approval process for pole attachment applications, among other things. SMUD will monitor this proceeding for any potential impact to SMUD.

SMUD is unable to predict whether any new FCC rulemakings will impact the operations and finances of SMUD’s electric system.

Federal Clean Energy Legislation. SMUD actively participates in discussion at the federal level regarding legislation that would meaningfully impact SMUD’s existing GHG reduction strategies or impose new requirements for electric generators, including a proposed federal clean energy standard. In the 117th Congress, a clean electricity performance program was considered but ultimately lacked support to pass. Instead, Congress extended and expanded clean energy tax credits and created new grant and rebate programs to incentivize clean energy investments in the Inflation Reduction Act of 2022. While it is possible that a future Congress may revisit the concept of a clean energy standard or other GHG reduction regime, it is possible that the passage of the Inflation Reduction Act will diminish the likelihood of a new regulatory framework being enacted in the near future.

SMUD is unable to predict whether any new EPA rulemakings will be undertaken, and what the full impact of the reduction of fossil-based generation over time will have on the operations and finances of SMUD’s electric system or the electric utility industry generally.

State Legislation and Regulatory Proceedings

A number of bills affecting the electric utility industry have been enacted by the State Legislature. In general, these bills provide for reduced GHG emission standards and greater investment in energy efficient and environmentally friendly generation alternatives through more stringent RPS. Additionally, ongoing regulatory proceedings address the implementation of these bills as well as water flow and quality

issues related to the Sacramento – San Joaquin River Delta. The following is a brief summary of these bills and regulatory proceedings.

Greenhouse Gas Emissions. On September 27, 2006, the Governor of the State signed into law AB 32, the Global Warming Solutions Act of 2006 (“AB 32”). AB 32 requires the California Air Resources Board (“CARB”) to adopt enforceable GHG emission limits and emission reduction measures in order to reduce GHG emissions to 1990 levels by 2020. In addition, AB 32 establishes a mandatory reporting program for all IOUs, local, publicly-owned electric utilities and other load-serving entities (electric utilities providing energy to end-use customers) (“LSEs”). The AB 32 reporting program allows CARB to adopt regulations using market-based compliance mechanisms such as a “cap-and-trade” system.

On December 16, 2010, CARB approved a resolution adopting cap-and-trade regulations for the State. The regulations became effective on January 1, 2012. As adopted, the cap-and-trade program covers sources accounting for 85% of the State’s GHG emissions, the largest program of its type in the United States. In November of 2012, CARB conducted its first allowance auction and auctions now occur on a quarterly schedule.

The cap-and-trade program introduced a hard emissions cap that declines over time on the combined electric utility and large industrial sectors, covering all sources emitting more than 25,000 metric tons of carbon dioxide-equivalent greenhouse gases (“CO₂e”) per year, and was subsequently expanded to cover distributors of transportation, natural gas, and other fossil fuels. The cap-and-trade program requires covered entities to retire compliance instruments (allowances and carbon offsets) for each metric ton of CO₂e they emit. CARB has allocated free allowances to LSEs to mitigate the compliance cost burden on ratepayers. The value of allowances must be used to benefit ratepayers and achieve GHG emission reductions. The cap-and-trade program also allows covered entities to use offset credits for compliance purposes (not exceeding 8% of a regulated entity’s compliance obligation through 2020, 4% from 2021 through 2025, and 6% from 2026 through 2030). Offsets must be obtained from certified projects in sectors that are not regulated under the cap-and-trade program and are subject to other restrictions.

The State's cap-and-trade program was briefly linked to companion program in the Canadian province of Ontario during 2018 but was de-linked following a political change. In 2021, the Washington state legislature passed a cap-and-trade bill, which is expected to interact with the State’s markets. Future potential near-term links to the CARB cap-and-trade program also include the states of Oregon, which has adopted a cap-and-trade program, and New Mexico, which is considering the adoption of a cap-and-trade program.

On October 7, 2015, SB 350 was enacted, containing aggressive goals for reducing carbon emissions by 2030, including raising the proportion of renewable energy to 50%, reducing the use of petroleum fuel in cars and trucks by up to 50%, and doubling the energy efficiency of existing buildings. See “BUSINESS STRATEGY – Sustainable Power Supply and Transmission – *Renewable Energy and Climate Change*” for additional information. In addition, SB 350 established requirements for larger POUs to adopt and file with the CEC Integrated Resource Plans (“IRPs”) by April 2019 that would show planned procurement to achieve the 50% RPS and State GHG goals established by CARB. The CEC developed “guidelines” for these IRPs for POUs in 2017, updated them in 2018, and proposed additional updates in 2022. CARB established specific GHG target ranges for these IRPs in summer 2018, which were revised in 2023 following the adoption of CARB’s 2022 Scoping Plan. SMUD developed and adopted an IRP in 2018 through a comprehensive public process and filed the adopted IRP with the CEC in April 2019. SMUD adopted an updated IRP in June 2022 and filed the updated IRP with the CEC in September 2022, but the CEC has not yet completed its review of SMUD’s 2022 IRP. SMUD’s updated IRP plans for a greater than 92% reduction in GHG emissions by 2030 relative to 1990 levels, which equals approximately

250,000 metric tons of GHG emissions in 2030. See “BUSINESS STRATEGY – Sustainable Power Supply and Transmission – *Renewable Energy and Climate Change*.”

On April 29, 2015, the Governor of the State signed Executive Order B-30-15, establishing a goal for the State to reduce GHG emissions to 40% below 1990 levels by 2030. In 2016, the State Legislature passed Senate Bill 32 (“SB 32”), which codified then-Governor Brown’s goal of reducing the State’s GHG emissions to 40% below 1990 levels by 2030. In 2017, the State Legislature passed Assembly Bill 398 (“AB 398”), explicitly authorizing the continuation of the cap-and-trade program, with designated changes, through 2030. Subsequently, CARB adopted an initial set of regulatory changes extending the cap-and-trade program, including establishing utility sector allowance allocations through 2030. In 2018, CARB completed a rulemaking to implement the cap-and-trade program changes designated by AB 398. These changes include development of a hard price ceiling for the cap-and-trade program and two price-containment points below that ceiling, in an attempt to ensure stable prices in the program. CARB adopted final regulations on December 13, 2018.

In addition, any new projects constructed in the State, including power plants, that may cause a significant adverse impact on the environment must be analyzed under CEQA. Some State agencies have begun using CEQA in novel ways to require mitigation of “significant” GHG emissions caused, either directly or indirectly, by a project. Pursuant to Senate Bill 97 passed in 2007, CARB will assist the Governor’s Office of Planning and Research in setting thresholds of significance under CEQA of GHG impacts from new projects. This is an area of State law that is evolving and untested in the courts. However, there is a risk that any project proponent of an electric system infrastructure project might have to mitigate such potential impacts to a level of less than significant.

On December 3, 2012, the Superior Court issued a ruling in *Cleveland National Forest Foundation v. San Diego Association of Governments* (“SANDAG”), Case No. 2100-00101593, that sided with the State Attorney General and the other petitioners stating that SANDAG did not follow CEQA when it adopted a \$257 billion regional transportation plan in 2011. The ruling expressly invalidated the certification of the Environmental Impact Report (“EIR”) on the grounds that the EIR should have analyzed the plan’s consistency with the governor’s policy goal to reduce GHG emissions by 80% by 2050 as articulated in the 2005 Executive Order S-03-05. On November 24, 2014, the Fourth Appellate District upheld the trial court in a published decision, and SANDAG appealed to the State Supreme Court. On July 13, 2017, the Supreme Court reversed and held that SANDAG’s decision not to adopt the 2050 goal was not an abuse of discretion. Nevertheless, the Court articulated three clear principles for agencies to follow in their CEQA review of planning documents: 1) agencies must take seriously the significance of even small increases in GHG emissions; 2) they must consider science-based State policy guidance in their decision-making; and 3) they are required to use the best scientific information available to determine whether their planning decisions are consistent with the State’s goals. These principles will apply to SMUD in CEQA reviews of future projects.

On September 29, 2006, the Governor of the State signed into law Senate Bill 1368 (“SB 1368”), the GHG Emissions Performance Standard (“EPS”). SB 1368 limits long-term investments in baseload generation by the State’s utilities to power plants that meet an EPS jointly established by the CEC and the CPUC. The agencies have set the EPS at 1,100 pounds CO₂ per MWh, which is roughly half of the CO₂ emissions rate of a conventional coal-fired power plant. CEC regulations to implement the law for POU’s were approved by the Office of Administrative Law on October 16, 2007.

SMUD’s primary supply and demand-side resources need to meet customers’ electricity usage patterns over the next 10 years. Currently there is a ban in the State that prohibits the development of nuclear power plants until there is a permanent storage solution for spent fuel rods. With the effective ban on new coal power imports under SB 1368, natural gas-fired, combined cycle power plants would appear

to be the primary viable option for fossil fuel-based baseload power plant development absent the implementation of new technologies in connection with other resource options. The reliance on a single fuel source will continue to put pressure on the natural gas market in the United States. SMUD has in place a natural gas procurement plan to mitigate natural gas volatility, see “POWER SUPPLY AND TRANSMISSION – Fuel Supply” above.

On September 16, 2022, the Governor of the State signed into law SB 1020, which creates interim climate targets under which eligible renewable energy resources and zero-carbon resources must supply 90% of all retail sales of electricity to California end-use customers by December 31, 2035, and 95% by December 31, 2040. The bill also requires each State agency to ensure that zero carbon resources and eligible renewable energy resources supply 100% of electricity procured on its behalf by December 31, 2035. SMUD provides electricity to a number of State agency buildings and will work with State agencies to comply with this requirement.

On October 7, 2023, the Governor of the State signed into law AB 1305, which requires an entity that purchases or uses voluntary carbon offsets and makes claims regarding the achievement of net zero, or other similar claims, to disclose on their website specified information. Many stakeholder groups are raising questions on if this includes RECs. Clean-up legislation could follow. It is not clear at this time whether RECs are included.

Reliability. On June 30, 2022, the Governor signed the 2022-23 budget, along with a number of trailer bills, which provide implementing details on the budget line items. Included in AB 205, the energy trailer bill, are a number of reliability programs.

1. CEC Distributed Electricity Backup Assets Program to incentivize the construction of cleaner and more efficient distributed energy assets that would serve as on-call emergency supply or load reduction for the state’s electrical grid during extreme events. The CEC adopted program guidelines in October 2023 and issued the first solicitation in December 2023.
2. CEC Demand Side Grid Support Program to pay customers to reduce demand during stressed grid events. SMUD has actively engaged the CEC on the development and subsequent revision of program guidelines. The CEC is expected to revise the guidelines again for summer 2024.
3. DWR Strategic Reliability Reserve to secure resources for summer reliability or to preserve the option to extend the life of facilities that otherwise would retire, new temporary generators of more than five MW, new energy storage systems of at least 20 MW, generation facilities that use clean, zero-emission fuel technologies, or new zero-emission technologies that can be operational by December 31, 2026.

As a follow up to this legislation, the Governor signed into law AB 1373. The bill authorizes the CEC to annually assess a capacity payment on a POU within the CAISO balancing authority area during a month in which the POU fails to meet its minimum planning reserve margin. This does not include SMUD, who is within the BANC balancing authority area. SMUD is, however, required to submit to the CEC an assessment of whether it exceeded, met, or failed to meet its minimum planning reserve margin and system resource adequacy requirements. This bill also allows the DWR, for certain types of long-development projects, to act as a central procurement entity. For POUs, participation in the DWR program would be optional.

Zero-Emission Fleet Mandates. CARB has adopted the Advanced Clean Fleets (“ACF”) regulation, requiring certain medium- and heavy-duty (“MHD”) vehicle fleets to transition to zero-emission vehicles through purchase requirements or fleet composition requirements, which took effect on November

1, 2023, and applies to all publicly owned MHD fleets, larger commercially owned MHD fleets, and drayage trucks. Under the ACF Rule, public fleets like SMUD have two compliance options. The first is a zero-emission vehicle (“ZEV”) purchase requirement, under which 50% of annual MHD vehicle purchases would need to be ZEVs starting January 1, 2024, and 100% of annual MHD vehicle purchases would need to be ZEVs starting January 1, 2027. The second is an optional ZEV milestone option, under which the composition of the MHD fleet would need to meet certain ZEV percentages starting in 2025, with the entire fleet transitioned no later than 2042. The individual milestones depend on the number and category of vehicles in the fleet. Public fleets may opt into the ZEV milestone option until January 1, 2030. In 2024, SMUD plans to comply with the purchase requirement option, meaning that 50% of the MHD vehicles SMUD purchases in 2024 will be ZEVs. SMUD plans to monitor ZEV market developments and currently expects to opt into the ZEV milestone option as more ZEVs become available. The ACF Rule also accelerates a manufacturer ZEV sales requirement to 100% of all MHD truck sales by the 2036 model year.

CARB proposed the Zero-Emission Forklift regulation in November 2023. The regulation would require forklift fleets to transition spark-ignited forklifts to zero-emission technology starting in 2026. The regulation would apply to SMUD, as a forklift operator. Since SMUD has a limited number for forklifts, this regulation is not expected to have a material effect on SMUD’s financial position, liquidity, or results of operation.

Transportation and Building Electrification. In recent years, the State has identified transportation and building electrification as key strategies to reduce greenhouse gas emissions and improve air quality, and is advancing policy to support or accelerate electrification. For example, in addition to the zero-emission fleet mandates and LCFS regulation discussed herein, CARB adopted the Advanced Clean Cars II and Advanced Clean Trucks regulations to require vehicle manufacturers to increase sales of zero-emission cars and trucks, respectively. The CEC’s Building Energy Efficiency Standards are increasingly encouraging the use of electric heat pumps in new homes and certain non-residential buildings across the state. The draft 2025 Energy Standards, which are expected to be proposed by April 2024 and adopted by August 2024, would establish prescriptive heat pump requirements for both space and water heating in new homes, and may require existing homes to install a heat pump when replacing an air conditioner. The 2025 Energy Standards, if approved, would take effect on January 1, 2025. In addition, the State has also provided funding for programs to encourage clean transportation and building electrification.

Increases in transportation and building electrification will result in increased customer usage of electricity.

Renewables Portfolio Standard. Senate Bill 100 was passed by the Legislature and approved by Governor Brown on September 10, 2018. Among other requirements, the bill sets a 50% RPS target for 2026 and sets compliance period targets at 44% by December 31, 2024, 52% by December 31, 2027, and 60% by December 31, 2030. The bill also creates a statewide planning goal to meet all of the state’s retail electricity supply with a mix of RPS-eligible and zero-carbon resources by December 31, 2045.

Sacramento-San Joaquin River Bay-Delta Processes. The Sacramento-San Joaquin River Delta is an expansive inland estuary, formed at the western edge of the California Central Valley by the confluence of the Sacramento and San Joaquin rivers (“Delta”). There are two substantial Delta planning processes with the potential to affect (1) energy available for SMUD’s purchase from the Central Valley Project (“CVP”) and (2) flows within the Upper American River watershed. These processes are called the Bay-Delta Water Quality Control Plan (“Bay-Delta Plan”) and the Delta Conveyance Project.

The Bay-Delta Water Quality Control Plan is updated periodically by the State Water Resources Control Board (“SWRCB”), the last time being in 2006. The current Bay-Delta Plan update process is being implemented in four phases. The first phase considered southern Delta water quality, with a

significant focus on San Joaquin River tributaries. Phase 2, which is initially being addressed by a document under development by SWRCB staff, will address Sacramento River tributaries and various flow related issues, including the critically important one of those tributaries' contribution to Delta outflow. Phase 3 will concern changes to water rights needed to implement Phase 2. A substantial change in Delta outflow requirements could have a major impact on the timing of hydroelectric energy generation by the CVP. SMUD has a long-term agreement with WAPA to purchase some of this power (see "POWER SUPPLY AND TRANSMISSION – Power Purchase Agreements – *Western Area Power Administration*"). On July 18, 2018, the SWRCB released an updated Framework document signaling its staff's intent to propose Delta outflow requirements of 45–65% unimpaired flows for the Sacramento River tributaries (which includes the American River, the upper portions of which are where the UARP sits), though the report will analyze requirements of 35–75%. If these criteria were implemented, they could cut CVP generation by 50 to 63%. Governor Newsom has urged the SWRCB, other agencies and affected parties to execute voluntary agreements (aka the "Healthy Rivers Agreements") to address species' needs and outflow requirements. Although the negotiations have been slow, it is expected they will eventually result in a reasonable compromise. However, in September 2023 the SWRB released a Staff Report/Substitute Environmental Document in Support of Potential Updates to the Bay-Delta Plan (the "Staff Report/Substitute Environmental Document") to justify the adoption of the unimpaired flow standard as set forth in the 2018 Framework document. Numerous public entities, including SMUD, filed comments stating that, among other things, the potential updates identified in the Staff Report/Substitute Environmental Document, if adopted, would violate the Porter-Cologne Water Quality Control Act and Article X, section 2 of the California Constitution, would not improve fish and wildlife, and would not reasonably protect all beneficial uses, including water supplies for millions of Californians and hydroelectric power generation that is essential to California's resilient energy grid. Moreover, the comments filed also stated that the Staff Report/Substitute Environmental Document does not comply with CEQA because, among other things, the analysis of the proposed inflow and habitat objectives' impacts on electrical peaking generation, and more generally electrical grid reliability, is not supported by substantial evidence and fails to satisfy informational requirements. In addition, the comments maintain that the Healthy Rivers Agreements are a superior approach to achieving the goal of maximizing both environmental and other beneficial uses. If the unimpaired flow standard is adopted and the Healthy Rivers Agreements do not come to fruition, SMUD plans to fully participate in all regulatory and legal proceedings to argue for consideration and minimization of impacts to hydropower generation. SMUD will assess the potential impacts of proposed modifications to the present outflow objectives on SMUD's operations once, or if, the SWRCB makes available information with enough specificity for SMUD to conduct the relevant modeling.

In July 2022, the DWR released a Draft Environmental Impact Report ("EIR") to evaluate the potential impacts of carrying out the Delta Conveyance Project; the U.S. Army Corps of Engineers released a separate Environmental Impact Statement to evaluate the effects of the project pursuant to the National Environmental Policy Act. The Delta Conveyance Project is expected to entail construction of two intakes on the Sacramento River that will carry water to a main tunnel to the California Aqueduct for delivery south of the Delta. The Delta Conveyance Project may pose the potential to exacerbate impacts to already imperiled aquatic species, and in turn could have indirectly prompted regulatory agencies to require third parties, such as SMUD, to compensate by making changes to their operations. The Bureau of Reclamation is not a party to the Delta Conveyance Project, which should eliminate the potential for CVP power to be used to supply Delta Conveyance Project pumps. SMUD will monitor the proceedings and participate as necessary to ensure any impacts to SMUD interests are minimized, including potentially filing a challenge to the water rights DWR would need to modify in order to carry out the project.

Proposition 26. Proposition 26 was approved by the electorate on November 2, 2010 and amends Article XIII A and Article XIII C of the State Constitution. Proposition 26 imposes a two-thirds voter approval requirement for the imposition of fees and charges by the State, unless the fees and charges are expressly excluded. It also imposes a majority voter approval requirement on local governments with

respect to fees and charges for general purposes, and a two-thirds voter approval requirement with respect to fees and charges for special purposes, unless the fees and charges are expressly excluded. The initiative, according to its supporters, is intended to prevent the circumvention of tax limitations imposed by the voters pursuant to Proposition 13, approved in 1978, and other measures through the use of non-tax fees and charges. Proposition 26 expressly excludes from its scope a charge imposed for a specific local government service or product provided directly to the payor that is not provided to those not charged, and which does not exceed the reasonable cost to the local government of providing the service or product. Proposition 26 is not retroactive as applied to local governments. Although SMUD believes that the initiative was not intended to apply to fees for utility services such as those charged by SMUD and its fees and charges meet the criteria of the exclusion described above, it is possible that Proposition 26 could be interpreted to further limit fees and charges for electric utility services and/or require stricter standards for the allocation of costs among customer classes. SMUD is unable to predict at this time how Proposition 26 will be interpreted by the courts or what its ultimate impact will be. As of the date of this Official Statement, SMUD is unaware of any fees or charges relating to SMUD's service that would have to be reduced or eliminated because of Proposition 26. However, certain of SMUD's adopted rate increases have been challenged. See "LEGAL PROCEEDINGS – Proposition 26 Lawsuit."

Initiative 1935. A voter initiative entitled "The Taxpayer Protection and Government Accountability Act" ("Initiative 1935") has been determined to be eligible for the State's November 2024 statewide general election and, unless withdrawn by its proponent prior to June 27, 2024, will be certified as qualified for the ballot in such election. Were it to be approved by a majority of voters in the election, Initiative 1935 would amend Article XIII C of the State Constitution to, among other things, provide that charges (or increases in charges) imposed or extended by a local government after January 1, 2022 for services or products provided directly to the payor (including, potentially, fees and charges for electric utility services) are "taxes" subject to voter approval unless the local government can prove by clear and convincing evidence that the charge is reasonable and does not exceed the "actual cost" of providing the service or product. Initiative 1935 defines "actual cost" as "(i) the minimum amount necessary to reimburse the government for the cost of providing the service or the product to the payor and (ii) where the amount charged is not used by the government for any purpose other than reimbursing that cost." Initiative 1935 would also require that local governments impose fees and charges by ordinance (which may be subject to referendum). If adopted, Initiative 1935 would be subject to judicial interpretation. SMUD is unable to predict whether and how Initiative 1935, if approved, would be interpreted or applied, but it is possible any such interpretation or application could further limit future fees and charges or future increases in fees and charges for electric utility services, require stricter standards for the allocation of costs among customer classes and/or otherwise adversely impact SMUD and its revenues. In response to an emergency petition filed by Governor Gavin Newsom, with support from the League of California Cities and others, the California Supreme Court has unanimously agreed to decide whether the initiative should appear on the November 2024 ballot or be disqualified. A ruling is expected before June 30, 2024, which is the deadline for placing items on the November 2024 ballot.

On November 2, 2023, Assembly Constitutional Amendment No. 13 ("ACA 13") was filed with the Secretary of State and will be on the ballot for the November 2024 statewide general election. If approved by voters, ACA 13 would require any initiative constitutional amendment appearing on the ballot on or after January 1, 2024, that would increase the voter approval requirement to adopt any State or local measure to be approved by the highest voter approval requirement that the initiative measure would impose. In other words, if ACA 13 is approved by voters, its express terms appear to require Initiative 1935 to pass with a 2/3 vote, since Initiative 1935 would extend a 2/3 vote requirement to additional State and local fees and charges. If adopted, ACA 13 and its effect on the adoption of Initiative 1935, if applicable, are likely to be subject to judicial interpretation. SMUD is not able to predict whether or how ACA 13, if approved, would be interpreted or applied or whether or how ACA 13, if approved, would affect the adoption, interpretation or application of Initiative 1935, if adopted.

Wildfire Legislation. In response to catastrophic wildfires in California, legislation was adopted and signed into law requiring POU's (including SMUD), IOUs, and electrical cooperatives to construct, maintain and operate their electrical lines and equipment in a manner that will minimize the risk of catastrophic wildfire posed by electrical lines and equipment. Senate Bill 247 ("SB 247"), signed by Governor Newsom on October 2, 2019, establishes notification, audit and reporting guidelines for electrical corporations relating to vegetation management requirements in the wildfire mitigation plan. SB 247 also specifies the qualifications for electrical line clearance tree trimmers performing work to comply with the vegetation management requirements in an electrical corporation's wildfire mitigation plan and requires that qualified line clearance tree trimmers be paid no less than a specified prevailing wage rate. POU's are not required to adhere to SB 247, but the market impacts are projected to significantly increase SMUD's annual vegetation management costs.

Nonstock Security. SMUD sponsored legislation in 2019, Assembly Bill 689, which was signed into law by Governor Newsom on September 5, 2019. This bill expressly allows SMUD the ability to operate a pilot project (effective January 1, 2020, to January 1, 2025), of up to three acquisitions, to hold nonstock security in a corporation or other private entity if acquired as part of a procurement of goods or services from that entity, provided that no separate funding is expended solely for the nonstock security. This will allow SMUD to realize the financial benefits of its investments, partnerships, and intellectual property.

On September 15, 2022, the Board authorized the CEO & GM to enter into a joint collaboration agreement with ESS Tech, Inc. ("ESS"). Under that agreement SMUD would procure from ESS iron flow batteries for utility scale long-duration energy storage applications. The agreement contemplates a multi-year phased deployment of up to 200MW/2GWh of long duration energy storage by 2028. As part of that procurement, SMUD acquired nonstock security in ESS.

SMUD will be sponsoring legislation in 2024 to extend the authority granted by Assembly Bill 689 to future years.

Future Regulation

The electric industry is subject to continuing legislative and administrative reform. States and Federal entities routinely consider changes to the way in which they regulate the electric industry. Recently, both further deregulation and forms of additional regulation have been proposed for the industry, which has been highly regulated throughout its history. SMUD is unable to predict at this time the impact any such proposals will have on the operations and finances of SMUD or the electric utility industry generally.

OTHER FACTORS AFFECTING THE ELECTRIC UTILITY INDUSTRY

CAISO Market Initiatives

The CAISO routinely conducts a number of initiatives and stakeholder processes that propose certain operational and market changes that impact SMUD. SMUD does and will continue to monitor the various initiatives proposed by the CAISO and participate in its stakeholder processes to ensure that its interests are protected.

SMUD participates in the CAISO market for only a small percentage of energy needs, however, it continues to benefit from its participation in the CAISO's WEIM and is currently exploring further participation in the CAISO's proposed Extended Day Ahead Market ("EDAM") (both the WEIM and EDAM are described further below). Along with monitoring other key market initiatives at the CAISO which impact wholesale energy markets, SMUD will continue to actively participate in all processes related

to EIM and EDAM, to ensure both participation models are beneficial to SMUD’s customers. Given its success in EIM and active engagement with the CAISO and CAISO leadership, SMUD has earned a key role in the stakeholder processes related to these important and evolving markets.

Resource Adequacy Filing

In September 2005, the State Legislature enacted and the Governor signed into law Assembly Bill 380 (“AB 380”), which requires the CPUC to establish resource adequacy requirements for all LSEs within the CPUC’s jurisdiction. SMUD is not an LSE subject to the CPUC’s jurisdiction. In 2005, the CPUC issued a decision requiring jurisdictional LSEs to demonstrate that they have acquired capacity sufficient to serve their forecast retail customer load plus a minimum 15% planning reserve margin. In June 2022, the CPUC issued a decision increasing the minimum planning reserve margin to 16% for 2023 and 17% for 2024. In June 2023, the CPUC kept the minimum planning reserve margin at 17% for 2024 and extended the 17% requirement for 2025.

AB 380 also required publicly owned utilities, including SMUD, to meet the most recent resource adequacy standard as adopted by the WECC. The WECC has yet to formally adopt a resource adequacy requirement. However, consistent with current WECC practices, SMUD utilizes a minimum 15% planning reserve margin when assessing the need for future resources. For summer 2023, SMUD attained a 17% planning reserve margin and will have at least a 17% planning reserve margin for summer 2024 as well.

In 2022, the State Legislature adopted Assembly Bill 209 (2022) (“AB 209”), which requires the CEC to develop recommendations about approaches to determining an appropriate planning reserve margin for local publicly owned utilities within the CAISO balancing authority area. The CEC has initiated a proceeding and plans to publish a report with a recommended methodology in summer 2024. The report will not directly impact SMUD since SMUD is not in the CAISO; nevertheless, SMUD is monitoring the proceeding. The State Legislature also passed Assembly Bill 1373 (2023) (“AB 1373”) that requires the CEC to submit a report to the Legislature that assesses whether each local publicly owned electric utility in California (both inside and outside the CAISO) exceeded, met, or failed to meet its minimum planning reserve margin for 2023. The report must also assess whether local publicly owned utilities met the planning reserve margin for June through September 2023 established by the CPUC’s June 2022 decision (i.e., 16%). See also “DEVELOPMENTS IN THE ENERGY SECTOR – State Legislation and Regulatory Proceedings – *Reliability*.”

While SMUD believes the CEC’s report will show SMUD met both its 15% planning reserve margin and the CPUC’s 16% planning reserve margin for 2023, SMUD is unable to predict the outcome of the report, or what the Legislature intends to do with the report. To the extent the CEC or Legislature imposes a higher POU planning reserve margin for future years that includes SMUD, the ultimate impacts on SMUD’s financial results and operations are difficult to predict and are dependent on a variety of factors, such as the relative cost of procuring energy/capacity, the availability and relative cost of new technologies, and the adoption and implementation of energy efficiency and other measures by SMUD’s customers; however, such impacts could be material.

Western Energy Imbalance Market and Extended Day Ahead Market

Federal and state policymakers have long-promoted the development of organized markets in the west as a means (among other reasons) to better integrate intermittent renewable resources into the electric system, the first of which markets is the Western EIM, operated by the CAISO. The CAISO successfully launched the WEIM, a real time only imbalance market, on October 1, 2014, with PacifiCorp as the first participant. Since this time, the WEIM has grown significantly with the addition of 21 other Balancing

Authority Areas (including BANC) which together comprise roughly 80% of the load in the Western Interconnection.

To date, participation in the WEIM by SMUD has shown significant financial and operational benefits, in addition to furthering an already favorable working partnership between SMUD and the CAISO to develop solutions to integrate renewable resources in support of carbon reduction goals.

BANC's participation not only signaled the first public power participant in the EIM, but it was also implemented utilizing a unique phased approach, with SMUD (as the largest member of BANC) implementing so-called WEIM Phase 1 in 2019, while the other BANC members and WAPA (the "Phase 2 Parties") joined after further evaluation and approvals in March of 2021.

Part of the BANC Phase 2 participation included reimbursement to SMUD certain upfront infrastructure costs incurred by SMUD in Phase 1 to establish BANC as an WEIM Entity. This reimbursement to SMUD by the Phase 2 Parties has been completed.

The CAISO and WEIM participants, including SMUD and BANC, have participated in developing a design framework to extend the successful WEIM real time framework to the EDAM. Like WEIM, EDAM would broaden the access to regional resources for the reliable integration of renewable resources, only over a longer (day ahead) time horizon by allowing for a more economic and efficient optimization of regional resources by providing grid operators greater time (day ahead as opposed to real time) to commit or decommit units based on market price signals. Only participants in the WEIM will be allowed to extend their participation to EDAM. The CAISO launched a public stakeholder initiative and utilized most of 2022 developing the EDAM design. On February 1, 2023 the CAISO Board of Governors and EIM Governing Body approved the EDAM proposal, with the CAISO filing tariff amendments with FERC on August 22, 2023. FERC unanimously approved most of the filing on December 20, 2023, rejecting without prejudice just one element of the EDAM proposal related to transmission revenue recovery for market participants. The CAISO will work with first movers, PacifiCorp and BANC, and stakeholders in 2024 to refine transmission revenue recovery based on FERC's guidance and begin implementation activities, with the market expected to go-live in the first quarter of 2026. Similar to the process around WEIM participation, SMUD, along with BANC, performed cost-benefit studies that demonstrated EDAM participation will expand on the existing WEIM benefits and in August 2023, SMUD and BANC both approved participation in EDAM with an expectation to on-board in time for the first phase of EDAM participation in 2026.

Other Factors

The electric utility industry in general has been, or in the future may be, affected by a number of other factors which could impact the financial condition and competitiveness of many electric utilities and the level of utilization of generating and transmission facilities. In addition to the factors discussed above, such factors include, among others, (a) effects of compliance with rapidly changing environmental, safety, licensing, regulatory and legislative requirements other than those described above; (b) changes resulting from conservation and demand side management programs on the timing and use of electric energy; (c) changes resulting from a national energy policy; (d) effects of competition from other electric utilities (including increased competition resulting from mergers, acquisitions, and "strategic alliances" of competing electric and natural gas utilities and from competitors transmitting less expensive electricity from much greater distances over an interconnected system) and new methods of, and new facilities for, producing low cost electricity; (e) the repeal of certain federal statutes that would have the effect of increasing the competitiveness of many IOUs; (f) increased competition from independent power producers and marketers, brokers and federal power marketing agencies; (g) "self-generation" or "distributed generation" (such as solar, microturbines and fuel cells) by industrial and commercial customers and others; (h) issues relating to the ability to issue tax exempt obligations, including severe restrictions on the ability

to sell to nongovernmental entities electricity from generation projects and transmission service from transmission line projects financed with tax exempt obligations; (i) effects of inflation on the operating and maintenance costs of an electric utility and its facilities; (j) changes from projected future load requirements; (k) increases in costs and uncertain availability of capital; (l) issues relating to supply chains and the uncertain availability or increased costs of necessary materials; (m) shifts in the availability and relative costs of different fuels (including the cost of natural gas); (n) sudden and dramatic increases in the price of energy purchased on the open market that may occur in times of high peak demand in an area of the country experiencing such high peak demand, such as has occurred in the State; (o) issues relating to risk management procedures and practices with respect to, among other things, the purchase and sale of natural gas, energy and transmission capacity; (p) other legislative changes, voter initiatives, referenda and statewide propositions; (q) effects of changes in the economy; (r) effects of possible manipulation of the electric markets; (s) natural disasters or other physical calamities, including, but not limited to, earthquakes, droughts, severe weather, wildfires and floods; (t) changes to the climate, including increasing volatility in rainfall in the Western United States and a reduction in the depth and duration of the Sierra snowpack; (u) issues relating to cyber-security; and (v) outbreaks of infectious diseases or the occurrence of pandemics. Any of these factors (as well as other factors) could have an adverse effect on the financial condition of any given electric utility, including SMUD's electric utility, and likely will affect individual utilities in different ways.

SMUD is unable to predict what impact such factors will have on the business operations and financial condition of SMUD's electric system, but the impact could be significant. SMUD has taken major steps to mitigate the impacts of many of the changes. This Official Statement includes a brief discussion of certain of these factors. This discussion does not purport to be comprehensive or definitive, and these matters are subject to change subsequent to the date hereof. Extensive information on the electric utility industry is available from the legislative and regulatory bodies and other sources in the public domain, and potential purchasers of any of SMUD's Senior Bonds or Subordinated Bonds described in the forepart of this Official Statement should obtain and review such information.

Independent Auditors' Report

To the Board of Directors of
Sacramento Municipal Utility District

Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of the Sacramento Municipal Utility District, as of and for the years ended December 31, 2023 and 2022, and the related notes to the financial statements, which collectively comprise the Sacramento Municipal Utility District's basic financial statements as listed in the table of contents.

In our opinion, the accompanying financial statements referred to above present fairly, in all material respects, the financial position of the Sacramento Municipal Utility District as of December 31, 2023 and 2022, and the changes in financial position and cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States (*Government Auditing Standards*). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Sacramento Municipal Utility District and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Emphasis of Matter

As discussed in Note 3, the Sacramento Municipal Utility District adopted the provisions of GASB Statement No. 96, *Subscription-Based Information Technology Arrangements*, effective January 1, 2023. Accordingly, the accounting changes have been retroactively applied to the prior period presented. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America; and for the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Sacramento Municipal Utility District's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Sacramento Municipal Utility District's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Sacramento Municipal Utility District's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the required supplementary information, as listed in the table of contents be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated February 23, 2024 on our consideration of the Sacramento Municipal Utility District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Sacramento Municipal Utility District's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Sacramento Municipal Utility District's internal control over financial reporting and compliance.

Baker Tilly US, LLP

Sacramento Municipal Utility District Management's Discussion and Analysis - Unaudited For the Years Ended December 31, 2023 and 2022

Using this Financial Report

This annual financial report for Sacramento Municipal Utility District (SMUD) consists of management's discussion and analysis and the financial statements, including notes to financial statements. The Financial Statements consist of the Statements of Net Position, the Statements of Revenue, Expenses and Changes in Net Position and the Statements of Cash Flows.

SMUD maintains its accounting records in accordance with Generally Accepted Accounting Principles for proprietary funds as prescribed by the Governmental Accounting Standards Board (GASB). SMUD's accounting records generally follow the Uniform System of Accounts for Public Utilities and Licensees prescribed by the Federal Energy Regulatory Commission (FERC), except as it relates to accounting for contributions of utility property in aid of construction.

Overview of the Financial Statements

The following discussion and analysis of the financial performance of SMUD provides an overview of the financial activities for the years ended December 31, 2023 and 2022. This discussion and analysis should be read in conjunction with the financial statements, required supplementary information and accompanying notes, which follow this section.

The Statements of Net Position provide information about the nature and amount of resources and obligations at a specific point in time.

The Statements of Revenues, Expenses and Changes in Net Position report all SMUD's revenues and expenses for the periods shown.

The Statements of Cash Flows report the cash provided and used by operating activities, as well as other cash sources, such as investment income and debt financing, and other cash uses such as payments for debt service and capital additions.

The Notes to Financial Statements provide additional detailed information to support the financial statements.

Required Supplementary Information provides additional detailed disclosures as required by the GASB.

Organization and Nature of Operations

SMUD was formed and operates under the State of California Municipal Utility District Act (Act). The Act gives SMUD the rights and powers to fix rates and charges for commodities or services it furnishes, and to incur indebtedness and issue bonds or other obligations. As a community-owned utility, SMUD is not subject to regulation or oversight by the California Public Utilities Commission.

SMUD is responsible for the acquisition, generation, transmission, and distribution of electric power to its service area, with a population of approximately 1.5 million – most of Sacramento County and small adjoining portions of Placer and Yolo Counties. The Board of Directors (Board) determines SMUD's rates.

SMUD's vision is to be the trusted partner with its customers and the community, providing innovative solutions to ensure energy affordability and reliability, improve the environment, reduce the region's carbon footprint, and enhance the vitality of the community. SMUD's business strategy focuses on serving its customers in a progressive, forward-looking manner, addressing current regulatory and legislative issues and potential competitive forces. This includes ensuring financial stability by

establishing rates that provide acceptable cash coverage of all fixed charges, taking into consideration the impact of capital expenditures and other factors on cash flow.

2030 Zero Carbon Plan

In July 2020, the Board adopted a Climate Emergency Declaration to work toward an ambitious goal of delivering carbon neutral electricity by 2030 and indicating a strong commitment to finding additional opportunities to accelerate decarbonization in our energy supply. Building on the Board's Climate Emergency Declaration, SMUD's 2030 Clean Energy Vision calls for absolute zero carbon emission in its power supply by 2030.

In 2022, SMUD's 2030 Clean Energy Vision was translated into the 2030 Zero Carbon Plan, the flexible road map to achieve a zero-carbon power supply by 2030. The plan guides elimination of Greenhouse Gas (GHG) emissions from SMUD's power plants, development of new distributed energy resource business models, research of emerging grid-scale carbon-free technologies, and expansion of investments in proven clean technologies while ensuring all communities benefit from the plan.

COVID-19 Global Pandemic

At the start of the pandemic in March 2020, SMUD provided its electric customers with suspension of disconnections and stopped collections, late fee, and security deposit processes for all customers to support them during this difficult time. In February 2022, normal payment, late fees, and disconnection policies resumed with disconnections occurring in mid-April 2022. SMUD is working proactively with electric customers to create payment arrangements for those who need them. The effects of the pandemic have resulted in an increase in the number of past due customer accounts.

In 2022 and 2021, SMUD received \$9.9 million and \$41.4 million, respectively, in California Arrearage Payment Program (CAPP) funding that was applied to customers' bills, to support customers amid the ongoing challenges of the COVID-19 pandemic. The CAPP offers financial assistance for California energy utility customers to help reduce past due energy bill balances that increased during the COVID-19 pandemic. As of December 31, 2023 and 2022, the uncollectible reserve for account write-offs was \$26 million and \$38 million, respectively. Other financial and operational impacts to SMUD associated with COVID-19 are noted throughout this report.

Requests for Information

For more information about SMUD, visit our website at www.smud.org or contact us at customerservices@smud.org.

FINANCIAL POSITION

The following table summarizes the financial position as of December 31 (in millions).

Total Liabilities, Deferred Inflows of Resources, and Net Position	<u>\$ 7,659</u>	<u>\$ 7,485</u>	<u>\$ 7,059</u>

*See Note 3 of the financial statements for discussion on the restatement of the December 31, 2022 Statements of Net Position.

TOTAL ASSETS AND DEFERRED OUTFLOWS OF RESOURCES

2023 Compared to 2022

Total assets in 2023 increased \$104 million or 1.4% over 2022, primarily due to the following:

- An increase of \$216 million in electric utility plant - net. See Capital Program below for further information.
- A \$56 million increase in restricted and designated assets primarily due a \$65 million Hydro Rate Stabilization Fund (HRSF) transfer from revenue for an above average precipitation water year, a \$1 million Rate Stabilization Fund (RSF) transfer from revenue as a result of higher than budgeted energy deliveries from the Western Area Power Administration (Western), and, offset by \$10 million RSF net transfer to revenues for net auction proceeds received and funds spent on Assembly Bill (AB) 32 programs.
- A \$174 million decrease in current assets is primarily due to \$140 million decrease in hedging derivative instruments due to the gas hedging program and \$37 million decrease in wholesale and other receivables due to larger power and gas sales in December 2022.

Deferred outflows of resources in 2023 increased \$70 million or 26.1% from 2022, primarily due to an adjustment to our hedging derivative instruments from the gas hedging program.

2022 Compared to 2021

Total assets in 2022 increased \$301 million or 4.4% over 2021, primarily due to the following:

- An increase of \$138 million in electric utility plant – net. See Capital Program below for further information.
- A \$106 million decrease in restricted and designated assets primarily due to a \$28 million decrease in a net pension asset and a \$57 million decrease in net Other Postemployment Benefits (OPEB) asset based on the most recent actuarial results, a \$30 million RSF transfer to revenue as a result of lower than budgeted energy deliveries from the Western, and a \$25 million HRSF transfer to revenue for below average precipitation, offset by \$22 million RSF transfer from revenues for net auction proceeds received and funds spent on AB 32 programs.
- A \$180 million increase in current assets is primarily due to \$115 million increase in hedging derivative instruments due to the gas hedging program and \$44 million increase in wholesale and other receivables due to larger sales of power and gas sales in December.
- A \$89 million increase in noncurrent assets primarily due to a \$61 million increase in regulatory costs for future recovery due to recognition of those costs, a \$48 million increase in hedging derivative instruments due to the gas hedging program, offset by a \$30 million decrease in prepaid gas supply due to gas delivered.

Deferred outflows of resources in 2022 increased \$125 million or 87.4% from 2021, primarily due to increases in the unrealized pension and OPEB gains.

TOTAL LIABILITIES AND DEFERRED INFLOWS OF RESOURCES

2023 Compared to 2022

Total liabilities in 2023 increased \$10 million or 0.2% over 2022, primarily due to the following:

- A decrease of \$108 million in current liabilities due to a \$97 million decrease in purchased power payable due to high purchased power prices in December 2022 that impacted commodity costs in the prior year.
- A \$83 million increase in non-current liabilities is due to a \$25 million increase in accrued decommissioning for the future nuclear spent fuel costs at Rancho Seco and a \$42 million increase in net pension and other postemployment benefits liability based on the most recent actuarial results.

Deferred inflows of resources in 2023 decreased \$56 million or 5.7%, due to a \$191 million decrease in value to our hedging derivative instruments from the gas hedging program offset by a \$138 million increase to regulatory credits related to the HRSF, pension and OPEB deferred costs.

Net position in 2023 increased \$220 million or 9.3% over 2022 based on results of operations.

2022 Compared to 2021

Total liabilities in 2022 increased \$351 million or 9.3% over 2021, primarily due to an increase in current liabilities of \$315 million due to \$150 million issuance of commercial paper and \$106 million increase in purchased power payable due to high purchased power prices in December. Non-current liabilities increased due to a \$231 million increase in net pension liability based on the most recent actuarial results. This is offset by a decrease in long-term debt- net of \$195 million.

Net position in 2022 increased \$71 million or 3.1% over 2021 based on results of operations.

RESULTS OF OPERATIONS

The following table summarizes the operating results for the years ended December 31 (in millions).

CONDENSED STATEMENTS OF REVENUES, EXPENSES AND CHANGES IN NET POSITION

	<u>2023</u>	<u>2022 (restated)*</u>	<u>2021</u>
Operating revenues	\$ 1,931	\$ 2,147	\$ 1,790
Operating expenses	<u>(1,748)</u>	<u>(2,065)</u>	<u>(1,450)</u>
Operating income	183	82	340
Other revenues/(expenses)	136	90	108
Interest charges	<u>(99)</u>	<u>(101)</u>	<u>(109)</u>
Change in net position	220	71	339
Net position - beginning of year	<u>2,367</u>	<u>2,296</u>	<u>1,957</u>
Net position - end of year	<u>\$ 2,587</u>	<u>\$ 2,367</u>	<u>\$ 2,296</u>

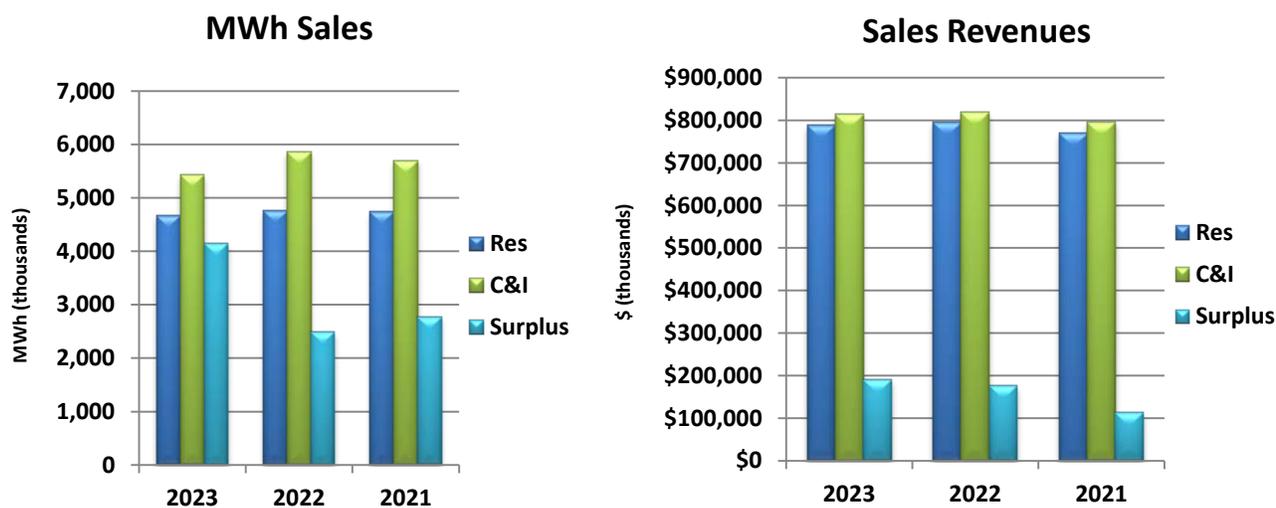

*See Note 3 of the financial statements for discussion on the restatement of the December 31, 2022 Statements of Revenues, Expenses and Changes in Net Position.

2023 Compared to 2022

OPERATING REVENUES

Total operating revenues were \$1,931 million for 2023, a decrease of \$216 million or 10.1 percent over 2022 operating revenues. The residential megawatt hour (MWh) sales decreased 1.8 percent and sales revenues decreased 0.9 percent compared to 2022, primarily due to cooler weather for the first half of the year and a milder summer in 2023. The commercial & industrial MWh sales decreased 7.3 percent and sales revenues decreased 0.6 percent compared to 2022, primarily due to loss of a large commercial customer in 2023.

The following charts show the MWh sales, and sales revenue for the past three years by surplus energy sales (Surplus), commercial, industrial, and other (C&I), and residential (Res) customers:

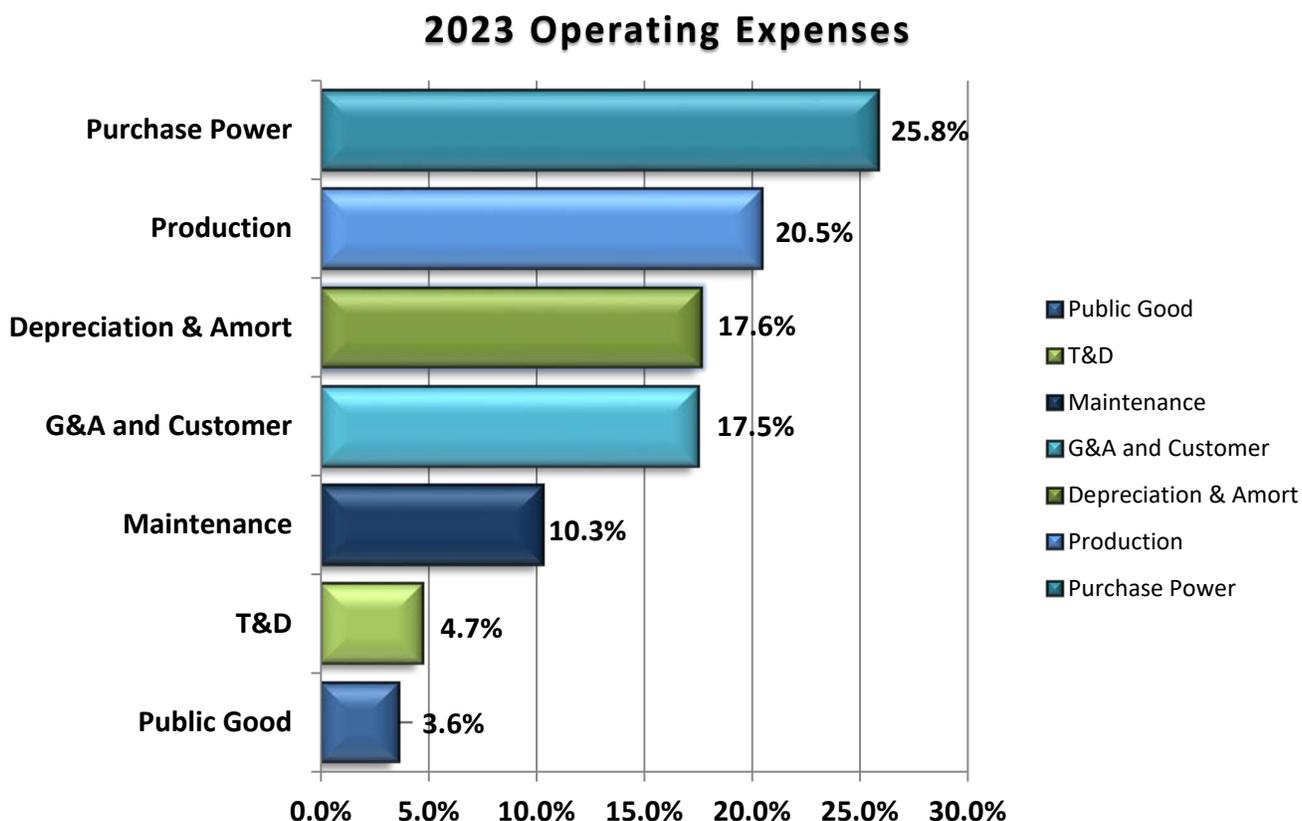

Wholesale revenues are comprised of both surplus gas and energy sales which are part of the operational strategy in managing fuel and energy costs. In 2023, energy sales were higher by \$15 million as compared to 2022 due to higher MWh sold but at lower energy prices. Surplus gas sales were lower than 2022 by \$118 million primarily due the unplanned outage of Cosumnes Power Plant (CPP) and selling at higher gas prices in 2022. CPP came back online in March 2023.

OPERATING EXPENSES

Total operating expenses were \$1,748 million for 2023, a decrease of \$317 million or 15.4 percent over 2022.

- Purchased power decreased by \$422 million or 48.3 percent primarily due to the unplanned outage of CPP in 2022 that led to an increase in procurement power in 2022. In 2023, the increased hydro generation, lower energy market prices and decreased load led to decrease in procurement of power.
- Production expense increased by \$22 million or 6.5 percent primarily due to unplanned CPP outage for majority of 2022.
- General, administrative and customer increased by \$54 million or 21.4 percent primarily due to large credit adjustments related to pension and OPEB actuarial results in the prior year.
- Maintenance increased by \$13 million or 7.5 percent primarily due to increased costs related to storm response in early 2023.

The following chart illustrates 2023 operating expenses by expense classification and percentage of the total:

OTHER REVENUES

Total other revenues (net) were \$136 million for 2023, an increase of \$46 million or 51.7 percent over 2022. The increase is due to \$33 million gain on sale of Solano land, \$13 million receipt of insurance recovery payment on CPP repairs and \$24 million higher interest earnings on investments. This is offset by a \$39 million decrease in investment revenue related to gas swaps.

2022 Compared to 2021

RESULTS OF OPERATIONS

- Total operating revenues were \$2,147 million for 2022, an increase of \$357 million or 19.9 percent over 2021 operating revenues. The residential MWh sales increased 0.3 percent and sales revenues increased 3.6 percent compared to 2021, although usage is flat, the increase is related to the shift in the customer load shape. The commercial & industrial MWh sales increased 2.7 percent and sales revenues increased 2.9 percent compared to 2021, primarily due to more commercial businesses and schools returning to in-person 2022.
- In 2022, energy sales were higher by \$62 million as compared to 2021 due to higher energy prices and energy sales. Surplus gas sales were higher than 2021 by \$96 million primarily due the unplanned outage of CPP and selling at higher gas prices in 2022.
- Total operating expenses were \$2,065 million for 2022, an increase of \$615 million or 42.4 percent over 2021.
 - Purchased power increased by \$478 million or 120.8 percent primarily due to the unplanned outage of CPP, increased load, reduced hydro, and record high heat wave in September that led to increase procurement of power.
 - Production expense decreased by \$22 million or 6.1 percent primarily due to unplanned CPP outage for majority of the year.
 - General, administrative and customer increased by \$98 million or 63.9 percent primarily due to SMUD establishing regulatory accounting in 2022 for pension and OPEB regulatory costs and/or credits to defer recognition of certain expenses related to the amortization of pension and OPEB deferred outflows and deferred inflows of resources compared to 2021 there were large credit adjustments related to pension and OPEB based on the most recent actuarial results.
 - Maintenance increased by \$30 million or 22.2 percent primarily due to increased costs related to tree trimming and JPA thermal plant maintenance.

Total other revenues (net) were \$90 million for 2022, a decrease of \$18 million or 16.9 percent over 2021. The decrease is due to receiving \$41 million in grant revenues from CAPP funding in 2021, offset by the \$20 million increase in investment revenue related to gas swaps in 2022.

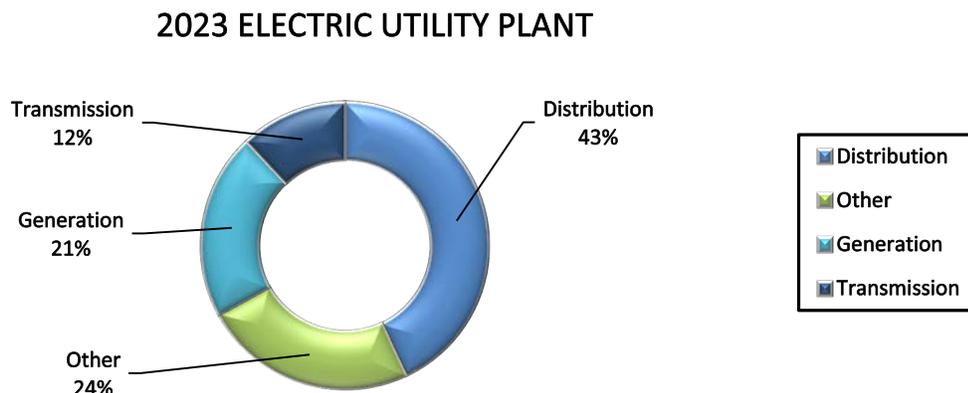

CAPITAL PROGRAM

SMUD's electric utility plant includes production, transmission and distribution, and general plant facilities. The following table summarizes the balance of the electric utility plant as of December 31 (in millions).

	<u>2023</u>	<u>2022 (restated)*</u>	<u>2021</u>
Electric Utility Plant	\$ 7,890	\$ 7,583	\$ 7,232
Accumulated Depreciation and Amortization	<u>(3,645)</u>	<u>(3,555)</u>	<u>(3,341)</u>
Electric Utility Plant - Net	<u>\$ 4,245</u>	<u>\$ 4,028</u>	<u>\$ 3,891</u>

*See Note 3 of the financial statements for discussion on the restatement of the December 31, 2022 Statements of Net Position.

The following chart shows the breakdown of 2023 Electric Utility Plant - net by major plant category:

The following chart shows the breakdown of 2023 Electric Utility Plant capitalized additions by major plant category:

Details of SMUD’s electric utility plant asset balances and activity are included in Note 4 in the Notes to Financial Statements. SMUD’s capital program includes investment in generation, transmission, distribution, buildings, vehicles, technology, and other assets critical to meeting the energy needs of our customers. Capital investments are financed with revenues from operations, bond proceeds, investment income and cash on hand.

The following table shows actual capital program expenditures for the last two years and budgeted capital expenditures for 2023 (in millions).

	Budget 2024	Actual 2023	Actual 2022
Capital Program:			
Transmission & Distribution	\$ 232	\$ 173	\$ 154
Generation	173	230	124
Other	<u>148</u>	<u>81</u>	<u>70</u>
Total	<u>\$ 553</u>	<u>\$ 483</u>	<u>\$ 348</u>

In 2023 and 2022, SMUD actual expenditures included work for Substation G, Advanced Distribution Management System, Solano Phase IV, Energy Storage System Flow Battery, Country Acres solar project land purchase, distribution line work and continued work on Upper American River Project (UARP) relicensing projects.

Major capital expenditures planned in 2024 include the Station H substation and Elverta substation rebuild, continued work for the wind farm with Solano Phase IV, the Country Acres solar project, and ongoing improvements in our UARP area as part of our hydro relicensing. Programmatic capital planned in 2024 includes cable and pole replacement programs, installing new meters, and new fleet purchases. Technology investments included in the 2024 Budget are to complete the Distributed Intel at the Grid Edge and the Outage Management System replacement.

LIQUIDITY AND CAPITAL RESOURCES

SMUD maintains a strong liquidity position by setting a minimum number of days cash on hand and managing a \$400 million commercial paper program. Our current days cash threshold is 150 days, the minimum amount of cash on hand before triggering a new debt or commercial paper issuance to replenish cash balances. As of December 31, 2023 and 2022, the days cash on hand was 170 days and 214 days, respectively. The commercial paper program allows for short-term borrowing when needed in lieu of issuing long-term debt, similar to a credit card or line of credit. As of December 31, 2023 and 2022, SMUD had \$150 million of commercial paper notes outstanding. A strong liquidity position is important in demonstrating to investors and rating agencies that SMUD can withstand various financial stresses.

In addition, SMUD targets strong financial metrics in cash flow coverage with its fixed charge ratio. The Board sets a minimum fixed charge of 1.50 times operating cash flow; however, SMUD aims for a minimum of 1.70 as a standard. On December 31, 2023, the fixed charge ratio was 2.32. This higher performance standard has proven valuable during financially challenging years of uncertainty stemming from the pandemic and higher commodity costs incurred from the CPP unplanned outage, record heat wave in September and higher commodity prices in 2022.

FINANCING ACTIVITIES

In June 2023, SMUD issued four separate revenue and revenue refunding bonds totaling \$493.1 million. The purpose of these transactions was to refund the fixed rate debt associated with 2013 Series A and B bonds, refund the fixed rate debt associated with 2019 Series A bonds and refund the outstanding commercial paper. This resulted in a \$99 million in cash flow savings through 2041.

DEBT SERVICE COVERAGE

Debt service coverage for long-term debt was 2.41 times and 1.87 times in 2023 and 2022, respectively. SMUD's bond resolutions contain various covenants that include requirements to maintain minimum debt service coverage ratios of at least 1.40 times, certain other financial ratios, stipulated minimum funding of revenue bond reserves, and various other requirements including a rate covenant to raise rates to maintain minimum debt service coverage. SMUD is in compliance with all debt covenants.

CREDIT RATINGS

SMUD proactively manages our strong financial position to maintain high credit ratings. These strong credit ratings improve access to credit markets and result in a lower cost of borrowing. Both quantitative (financial strength) and qualitative (business and operating characteristics) factors are considered by the credit rating agencies in establishing a company's credit rating. As of December 31, 2023, SMUD's bonds had an underlying rating of "AA" from Standard & Poor's, "AA" from Fitch, and "Aa3" from Moody's. Some of SMUD's bonds are insured and are rated by the rating agencies at the higher of the insurer's rating or SMUD's underlying rating. In February 2024, Moody's upgraded SMUD's rating to Aa2 from Aa3 changing SMUD's financial outlook from positive to stable.

COMPETITIVE RATES

The Board has independent authority to set SMUD's rates and charges. Changes in rates require a public hearing and formal action by the Board. SMUD has committed to our customers in keeping rates low while continuing to deliver safe, reliable, and environmentally responsible power and the products and services they value.

In 2021, the Board approved the Solar and Storage Rate, which will reduce the cost shift from Net Energy Metering and will incentivize customers to invest in solar paired with storage, providing greater benefits to SMUD and our customers. In 2021, the Board approved the 2022 and 2023 rate proposals including rate increases of 1.5% in 2022 and 2% in 2023, which is well below the estimated rate of inflation.

In 2023, the Board approved the 2024 and 2025 rate proposals including four rate increases of 2.75%, one each in January 2024, May 2024, January 2025 and May 2025, which will apply to all customer classes. Even with these increases, SMUD's rates continue to remain amongst the lowest in the state. In 2023, the average system rate was 50 percent below the average rate of the nearest investor-owned utility. This ensures the necessary revenue to meet SMUD's financial obligations, key financial metrics, and delivery of SMUD's 2030 Zero Carbon Plan.

SMUD has also developed an integrated Grant Strategy Framework, which will best position SMUD to secure sources of funding to deliver on our 2030 Zero Carbon Plan and keep our rates low. In 2023, SMUD was awarded five grants including a \$50 million from the Department of Energy (DOE) Grid Deployment's Grid Resilience and Innovative Partnerships program for SMUD's Connected Clean PowerCity application. The project will begin in 2024 and last for five years.

ENERGY RISK MANAGEMENT

SMUD's commodity costs have prices locked in for most of our expected energy requirements to ensure cost and rate stability for customers. Only a small portion of budgeted energy purchases are exposed to short-term market price fluctuations – a beneficial practice, especially during the price volatility currently reflected in California power and energy prices.

SMUD has mitigation measures in place for higher commodity costs due to reduced hydroelectric production that will lead to higher purchased power. In April 2023, \$65.4 million was transferred to the HRSF from revenue as a result of high precipitation. As of December 31, 2023, the HRSF was \$96.4 million and \$54.4 million in the RSF, net of Low Carbon Fuel Standard and Cap and Trade funds. These reserve funds help absorb higher energy costs when hydroelectric production is down and serve as a buffer against unexpected financial developments.

RESOURCE PLANNING AND GENERATION UPDATE

In March 2021, the Board adopted the 2030 Zero Carbon Plan, a flexible road map to achieving its zero carbon goal while ensuring all customers and communities that are served share in the benefits of decarbonization. While SMUD has always had an Integrated Resource Plan target to meet or exceed goals established by the State for renewable energy and the reduction of carbon emissions, the 2030 Zero Carbon Plan greatly accelerates these efforts, working toward eliminating carbon emissions from SMUD's power supply by 2030.

The Board formally approved the 2022 Integrated Resource Plan update in June 2022 and filed this update with the California Energy Commission in September. Implementation of the plan has SMUD embarking on new pathways to completely decarbonize energy supply, including eliminating GHG emissions from the thermal power plants, developing new distributed energy resource business models, researching emerging grid-scale and carbon-free technologies and expanding investments in proven clean technologies.

SMUD continued to identify new opportunities for renewable and energy storage projects, including solar, wind, geothermal and battery projects both within our service territory and throughout California. These resources contribute towards Renewables

Portfolio Standard (RPS) requirements and support our Zero Carbon Plan goals. SMUD is on track to meet the current RPS compliance period 4 (2021 to 2024).

DECOMMISSIONING

SMUD has made significant progress toward completing the Decommissioning Plan for its Rancho Seco nuclear facility, which was shut down in 1989. The plan consists of two phases that allow SMUD to terminate its possession-only license. Phase I of the decommissioning was completed at the end of 2008. Phase II consists of a storage period for the Class B and Class C radioactive waste overseen by the existing facility staff, followed by shipment of the waste for disposal, and then complete termination of the possession-only license. SMUD also established and funded an external decommissioning trust fund as part of its assurance to the Nuclear Regulatory Commission (NRC) to pay for the cost of decommissioning. Shipment of the previously stored Class B and Class C radioactive waste was completed in November 2014 to a low-level radioactive waste facility located in Andrews, Texas. The remaining Phase II decommissioning activities required for termination of the possession-only license commenced in 2015. In September 2017, SMUD formally requested the termination of the possession-only license and termination of the possession-only license was completed in 2018.

As part of the Decommissioning Plan, the nuclear fuel and Greater Than Class C (GTCC) radioactive waste is being stored in a dry storage facility constructed by SMUD and licensed separately by the NRC. The DOE, under the Nuclear Waste Policy Act of 1982, was responsible for permanent disposal of used nuclear fuel and GTCC radioactive waste and SMUD contracted with the DOE for removal and disposal of that waste. The DOE has yet to fulfill its contractual obligation to provide a permanent waste disposal site. SMUD has filed a series of successful lawsuits against the federal government for recovery of the past spent fuel costs, with recoveries to date in excess of \$123.1 million. SMUD will continue to pursue cost recovery claims until the DOE fulfills its obligation.

The total Accrued Decommissioning balance in the Statements of Net Position, including Rancho Seco and other ARO's, amounted to \$120.9 million and \$95.9 million as of December 31, 2023 and 2022, respectively.

SIGNIFICANT ACCOUNTING POLICIES

In accordance with GASB No. 62, the Board has taken regulatory actions for ratemaking that result in the deferral of expense and revenue recognition. These actions result in regulatory assets and liabilities. SMUD has regulatory assets that cover costs related to decommissioning, derivative financial instruments, debt issuance costs, pension costs, and OPEB costs. As of December 31, 2023 and 2022, total regulatory assets were \$916.1 million and \$813.6 million, respectively. SMUD also has regulatory credits that cover costs related to contributions in aid of construction, the RSF and HRSF, Energy Assistance Program Rate reserves, SB-1, grant revenues, and Transmission Agency of Northern California operations costs. As of December 31, 2023 and 2022, total regulatory credits were \$758.3 million and \$620.4 million, respectively.

	(thousands of dollars)	
Operating income	\$ 182,296	\$ 82,080
Adjustments to reconcile operating income to net cash provided by operating activities:		
Depreciation	267,963	256,439
Regulatory amortization	39,908	36,688
Other amortizations	26,488	22,909
Revenue deferred to (recognized from) regulatory credits - net	55,238	(33,016)
Other (receipts) payments - net	29,385	17,770
Changes in operating assets, deferred outflows, liabilities and deferred inflows:		
Receivables - retail customers, wholesale and other	44,472	(25,719)
Inventories, prepayments and other	(43,135)	(28,265)
Net pension and other postemployment benefits assets	-0-	85,270
Deferred outflows of resources	(16,042)	(122,706)
Payables and accruals	(115,722)	127,299
Decommissioning	(5,481)	(6,049)
Net pension liability	23,559	235,451
Net other postemployment benefits liability	18,581	6753
Deferred inflows of resources	(20,940)	(248,189)
Net cash provided by operating activities	\$ 486,570	\$ 406,715

The supplemental disclosure of noncash financing and investing activities is as follows:

	Year Ended December 31,	
	2023	2022 (restated)
	(thousands of dollars)	
Amortization of debt related (expenses) and premiums - net	\$ 23,090	\$ 34,145
Write-off unamortized premium and loss	18,711	7,576
Gain on debt extinguishment and refundings	16,837	6,677
Unrealized holding gain (loss)	5,502	(5,890)
Change in valuation of derivative financial instruments	(250,762)	163,871
Amortization of revenue for assets contributed in aid of construction	19,201	19,226
Construction expenditures included in accounts payable	52,122	55,787
Gain (Loss) on sale and retirement of assets - net	17,637	(2,036)
Write-off capital projects and preliminary surveys	(950)	(3,720)

The accompanying notes are an integral part of these financial statements.

Sacramento Municipal Utility District
Notes to Financial Statements
As of and for the Years Ended December 31, 2023 and 2022

NOTE 1. ORGANIZATION

The Sacramento Municipal Utility District (SMUD) was formed and operates under the State of California Municipal Utility District Act (Act). The Act gives SMUD the rights and powers to fix rates and charges for commodities or services it furnishes, and to incur indebtedness and issue bonds or other obligations. As a community-owned utility, SMUD is not subject to regulation or oversight by the California Public Utilities Commission.

SMUD is responsible for the acquisition, generation, transmission, and distribution of electric power to its service area, which includes most of Sacramento County and small adjoining portions of Placer and Yolo Counties. The Board of Directors (Board) determines SMUD's rates.

SMUD is exempt from payment of federal and state income taxes and, under most circumstances, real and personal property taxes. SMUD is not exempt from real and personal property taxes on assets it holds outside of its service territory. In addition, SMUD is responsible for the payment of a portion of the property taxes associated with its real property in California that lies outside of its service area.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Method of Accounting. SMUD's accounting records are maintained in accordance with Generally Accepted Accounting Principles for proprietary funds as prescribed by the Governmental Accounting Standards Board (GASB). SMUD's accounting records generally follow the Uniform System of Accounts for Public Utilities and Licensees prescribed by the Federal Energy Regulatory Commission (FERC), except as it relates to the accounting for contributions of utility property in aid of construction. SMUD's Financial Statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of the related cash flows. Electric revenues and costs that are directly related to the acquisition, generation, transmission, and distribution of electricity are reported as operating revenues and expenses. All other revenues and expenses are reported as non-operating revenues and expenses.

Use of Estimates. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (U.S.) requires management to make estimates and assumptions that affect the reported amounts of assets, deferred outflows of resources, liabilities, and deferred inflows of resources and disclosures of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The Financial Reporting Entity. These Financial Statements include SMUD and its component units. Although the component units are legally separate from SMUD, they are blended into and reported as part of SMUD because of the extent of their operational and financial relationships with SMUD. All significant inter-component transactions have been eliminated in consolidation.

Component Units. The component units include the Sacramento Municipal Utility District Financing Authority (SFA), the Northern California Gas Authority No. 1 (NCGA), and the Northern California Energy Authority (NCEA). The primary purpose of SFA is to own and operate electric utility plants that supply power to SMUD. The primary purpose of NCGA is to prepay for natural gas to sell to SMUD. The primary purpose of NCEA is to prepay for commodities in the form of natural gas and electricity to sell to SMUD. SMUD's Board comprises the Commissions that govern these entities (see Note 6).

Plant in Service. Capital assets are generally defined by SMUD as tangible assets with an initial, individual cost of more than five thousand dollars and an estimated useful life in excess of two years. The cost of additions to Plant in Service and replacement property units is capitalized. Repair and maintenance costs are charged to expense when incurred. When SMUD retires portions of its Electric Utility Plant, retirements are recorded against Accumulated Depreciation and the retired portion of Electric Utility Plant is removed from Plant in Service. The costs of removal and the related salvage value, if any, are charged or credited as appropriate to Accumulated Depreciation. SMUD generally computes depreciation on Plant in Service on a straight-line, service-life basis. The average annual composite depreciation rates for 2023 and 2022 was 3.3 percent and 3.2 percent, respectively. Depreciation is calculated using the following estimated lives:

Generation	8 to 80 years
Transmission and Distribution	7 to 50 years
Gas Pipeline	10 to 90 years
General	3 to 60 years

Investment in Joint Powers Authority (JPA). SMUD’s investment in the Transmission Agency of Northern California (TANC) is accounted for under the equity method of accounting and is reported as a component of Plant in Service. SMUD’s share of the TANC debt service costs and operations and maintenance expense, inclusive of depreciation, is included in Transmission and Distribution expense in the Statements of Revenues, Expenses and Changes in Net Position (see Note 5).

SMUD’s investment in the Balancing Authority of Northern California (BANC) is accounted for under the equity method of accounting. SMUD’s share of the BANC operations and maintenance expense is included in Transmission and Distribution expense in the Statements of Revenues, Expenses and Changes in Net Position (see Note 5).

Leases. SMUD implemented Statement of Governmental Accounting Standards (SGAS) No. 87, “*Leases*” in 2022. Leases are contracts that convey control of the right to use another entity’s nonfinancial asset as specified for a period of time in an exchange or exchange-like transaction without the transfer of ownership of the asset. The lease term is the period of time where there is a noncancellable right to use the underlying asset (see Note 4).

For lessor contracts, lease receivables and deferred inflows of resources are reported at present value using SMUD’s incremental borrowing rate on the Statements of Net Position. The amortization of the discount for lessor contracts is recorded as Lease receivable for SMUD on the Statements of Net Position with the offset to interest income in Interest and other income on the Statements of Revenue, Expenses and Change in Net Position (see Note 4).

For lessee contracts, lease assets and liabilities are reported at present value using SMUD’s incremental borrowing rate on the Statements of Net Position. The lease assets are amortized over the shorter of the lease term or the useful life of the underlying asset. The amortization of the discount for lessee contracts is recorded as Interest payable on the Statements of Net Position with the offset to Lease interest expense for SMUD on the Statements of Revenue, Expenses and Change in Net Position (see Note 4).

Subscription Assets. SMUD implemented SGAS No. 96 “*Subscription-Based Information Technology Arrangements (SBITA)*” in 2023. SBITAs provide governments with access to vendors’ information technology (IT) software and associated tangible capital assets for subscription payments without granting governments perpetual license or title to the IT software and associated tangible capital assets. The subscription term is the period of time where there is a noncancellable right to use the underlying IT assets (see Note 4).

For SBITA contracts, subscription assets and liabilities are reported at present value using SMUD’s incremental borrowing rate on the Statements of Net Position. The subscription assets are amortized over the shorter of the lease term or the useful life of the underlying IT assets. The amortization of the discount for SBITA contracts is recorded as Interest payable on the Statements of Net Position with the offset to SBITA interest expense for SMUD on the Statements of Revenue, Expenses and Change in Net Position (see Note 4).

Restricted and Designated Assets. Cash, cash equivalents, and investments, which are restricted by regulation or under terms of certain agreements for payments to third parties are included as restricted assets. Restricted assets include Revenue bond and debt service reserves, Nuclear decommissioning trust fund, and Other funds. Board actions limiting the use of such funds are included as designated assets. Designated assets include the Rate stabilization fund and Other funds. When SMUD restricts or designates funds for a specific purpose, and restricted and designated and unrestricted resources are available for use, it is SMUD's policy to use restricted and designated resources first, then unrestricted resources as they are needed.

Restricted Bond Funds. SMUD's Indenture Agreements (Indenture) requires the maintenance of minimum levels of reserves for debt service on the 1997 Series K Bonds.

Nuclear Decommissioning Trust Fund. SMUD made annual contributions to its Nuclear Decommissioning Trust Fund (Trust Fund) through 2008 to cover the cost of its primary decommissioning activities associated with the Rancho Seco facility. Primary decommissioning excludes activities associated with the spent fuel storage facility after 2008 and most non-radiological decommissioning tasks. Interest earnings on the Trust Fund assets are recorded as Interest Income and are accumulated in the Trust Fund.

Asset Retirement Obligations (ARO). SMUD records asset retirement obligations (ARO) for tangible capital assets when an obligation to decommission facilities is legally required. SMUD recognizes AROs for its Rancho Seco nuclear power plant and for the CVFA power plant facility (see Note 13). The Rancho Seco ARO is recorded as Accrued Decommissioning and the unfunded portion of the ARO is recorded as current and noncurrent Regulatory Costs for Future Recovery (see Note 8) in the Statements of Net Position. Other AROs are recorded as Accrued Decommissioning and a corresponding Deferred Asset Retirement Obligation Outflows in the Statements of Net Position.

SMUD has identified potential retirement obligations related to certain generation, distribution and transmission facilities. SMUD's non-perpetual leased land rights generally are renewed continuously because SMUD intends to utilize these facilities indefinitely. GASB No. 83, "*Asset Retirement Obligations*" requires the measurement of the ARO to be based on the probability weighting of potential outcomes. Due to the low probability that these leases will be terminated, a liability has not been recorded.

Cash and Cash Equivalents. Cash and cash equivalents include all debt instruments purchased with an original maturity of 90 days or less, deposits held at financial institutions, all investments in the Local Agency Investment Fund (LAIF), and money market funds. LAIF has an equity interest in the State of California (State) Pooled Money Investment Account (PMIA). PMIA funds are on deposit with the State's Centralized Treasury System and are managed in compliance with the California Government Code according to a statement of investment policy which sets forth permitted investment vehicles, liquidity parameters, and maximum maturity of investments.

Investments. SMUD's investments are reported at fair value in accordance with SGAS No. 72, "*Fair Value Measurement and Application*" (see Note 12). Realized and unrealized gains and losses are included in Other income (expense) - net in the Statements of Revenues, Expenses and Changes in Net Position. Premiums and discounts on zero coupon bonds are amortized using the effective interest method. Premiums and discounts on other securities are amortized using the straight-line method, which approximates the effective interest method.

Electric Operating Revenues. Electric revenues are billed on the basis of monthly cycle bills and are recorded as revenue when the electricity is delivered. SMUD records an estimate for unbilled revenues earned from the dates its retail customers were last billed to the end of the month. At December 31, 2023 and 2022, unbilled revenues were \$81.5 million and \$80.5 million, respectively.

Purchased Power Expenses. A portion of SMUD's power needs are provided through power purchase agreements (PPA). Expenses from such agreements, along with associated transmission costs paid to other utilities, are charged to Purchased Power expense in the Statements of Revenues, Expenses and Changes in Net Position in the period the power is received. The

costs or credits associated with energy swap agreements (gas and electric) or other arrangements that affect the net cost of Purchased Power are recognized in the period in which the underlying power delivery occurs. Contract termination payments and adjustments to prior billings are included in Purchased Power expense once the payments or adjustments can be reasonably estimated.

Advanced Capacity Payments. Some long-term agreements to purchase energy or capacity from other providers call for up-front payments. Such costs are generally recorded as an asset and amortized over the length of the contract in Operations - Production expense on the Statements of Revenues, Expenses and Changes in Net Position.

Credit and Market Risk. SMUD enters into forward purchase and sales commitments for physical delivery of gas and electricity with utilities and power marketers. SMUD is exposed to credit risk related to nonperformance by its wholesale counterparties under the terms of these contractual agreements. In order to limit the risk of counterparty default, SMUD has a wholesale counterparty risk policy which includes using the credit agency ratings of SMUD's counterparties and other credit services, credit enhancements for counterparties that do not meet an acceptable risk level, and the use of standardized agreements that allow for the netting of positive and negative exposures associated with a single counterparty. SMUD is also subject to similar requirements for many of its gas and power purchase agreements. SMUD uses a combination of cash and securities to satisfy its collateral requirements to counterparties.

SMUD's component units, NCGA and NCEA, entered into guaranteed investment contracts and are exposed to credit risk related to nonperformance by its investment provider. For NCGA, the investment provider provides collateral if their credit ratings fall below agreed upon levels. SMUD holds deposits by counterparties and an investment provider and records the amounts as Credit Support Collateral Obligation in the Statements of Net Position.

Collateral deposits that SMUD has with counterparties are recorded as Credit Support Collateral Deposits in the Statements of Net Position.

Accounts Receivable, Allowance for Doubtful Accounts and Energy Efficiency Loans. Accounts receivable is recorded at the invoiced amount and does not bear interest, except for accounts related to energy efficiency loans. SMUD recognizes an estimate of uncollectible accounts for its receivables related to electric service, energy efficiency loans, and other non-electric billings, based upon its historical experience with collections and current energy market conditions. For large wholesale receivable balances, SMUD determines its bad debt reserves based on the specific credit issues for each account. In the Statements of Net Position, SMUD reports its receivables net of the allowance for uncollectible as current assets, and its energy efficiency loans net of the allowance for uncollectible as noncurrent assets. Due to COVID-19, SMUD suspended disconnections for non-payment beginning in March 2020 and reinstated disconnections in April 2022. At December 31, 2023 and 2022, SMUD estimated its uncollectible retail customer accounts at \$26.1 million and \$38.0 million, respectively, based on non-payment behaviors by aging category. SMUD records bad debts for its estimated uncollectible accounts related to electric service as a reduction to the related operating revenues in the Statements of Revenues, Expenses and Changes in Net Position. SMUD records bad debts for its estimated uncollectible accounts related to energy efficiency loans and other non-electric billings in Administrative, General and Customer expense in the Statements of Revenues, Expenses and Changes in Net Position.

SMUD's receivables, allowances for uncollectible and energy efficiency loans are presented below:

	December 31,	
	2023	2022
	(thousands of dollars)	
Retail customers:		
Receivables	\$ 204,466	\$ 219,606
Less: Allowance for uncollectible	(26,052)	(38,000)
Receivables - net	\$ 178,414	\$ 181,606
Wholesale and other:		
Receivables	\$ 68,167	\$ 105,083
Less: Allowance for uncollectible	(2,742)	(2,778)
Receivables - net	\$ 65,425	\$ 102,305
Energy efficiency loans:		
Receivables	\$ 507	\$ 869
Less: Allowance for uncollectible	(123)	(137)
Energy efficiency loans - net	\$ 384	\$ 732

Regulatory Deferrals. The Board has the authority to establish the level of rates charged for all SMUD services. As a regulated entity, SMUD's financial statements are prepared in accordance with SGAS Statement No. 62, "*Codification of Accounting and Financial Reporting Guidance Contained in Pre-November 30, 1989 Financial Accounting Standards Board (FASB) and American Institute of Certified Public Accountants Pronouncements,*" which requires that the effects of the ratemaking process be recorded in the financial statements. Accordingly, certain expenses and credits, normally reflected in Change in Net Position as incurred, are recognized when included in rates and recovered from or refunded to customers. SMUD records various regulatory assets and credits to reflect ratemaking actions of the Board (see Note 8).

Materials and Supplies. Materials and supplies are stated at average cost, which approximates the first-in, first-out method.

Compensated Absences. SMUD accrues vacation leave and compensatory time when employees earn the rights to the benefits. SMUD does not record sick leave as a liability until it is taken by the employee, since there are no cash payments made for sick leave when employees terminate or retire. Compensated absences are recorded as Accrued Salaries and Compensated Absences in the Statements of Net Position. At December 31, 2023 and 2022, the total estimated liability for vacation and other compensated absences was \$44.2 million and \$43.7 million, respectively.

Public Good. Public Good expenses consist of non-capital expenditures for energy efficiency programs, low income subsidies, renewable energy resources and technologies, and research and development.

Gains/Losses on Bond Refundings. Gains and losses resulting from bond refundings are included as a component of Deferred Inflows of Resources or Deferred Outflows of Resources in the Statements of Net Position and amortized as a component of Interest on Debt in the Statements of Revenues, Expenses and Changes in Net Position over the shorter of the life of the refunded debt or the new debt using the effective interest method.

Gains/Losses on Bond Defeasances or Extinguishments. Gains and losses resulting from bond defeasances or extinguishments that were not financed with the issuance of new debt are included as a component of Interest on Debt in the Statements of Revenues, Expenses and Changes in Net Position.

Deferred Outflows of Resources. A deferred outflow of resources represents a consumption of net position that applies to a future period and will not be recognized as an outflow of resources (expense) until that future time.

Deferred Inflows of Resources. A deferred inflow of resources represents an acquisition of net position that applies to a future period and therefore will not be recognized and an inflow of resources (revenue) until that future time.

Derivative Financial Instruments. SMUD records derivative financial instruments (interest rate swap and gas price swap agreements, certain wholesale sales agreements, certain power purchase agreements and option agreements) at fair value in its Statements of Net Position. SMUD does not enter into agreements for speculative purposes. Fair value is estimated by comparing contract prices to forward market prices quoted by third party market participants and/or provided in relevant industry publications. SMUD is exposed to risk of nonperformance if the counterparties default or if the swap agreements are terminated. SMUD reports derivative financial instruments with remaining maturities of one year or less and the portion of long-term contracts with scheduled transactions over the next twelve months as current in the Statements of Net Position (see Note 9).

Interest Rate Swap Agreements. SMUD enters into interest rate swap agreements to modify the effective interest rates on outstanding debt (see Notes 9 and 10).

Gas and Electricity Price Swap and Option Agreements. SMUD uses forward contracts to hedge the impact of market volatility on gas commodity prices for its natural gas-fueled power plants and for energy prices on purchased power for SMUD's retail load (see Note 9).

Precipitation Hedge Agreements. SMUD enters into non-exchange traded precipitation hedge agreements to hedge the cost of replacement power caused by low precipitation years (Precipitation Agreements). SMUD records the intrinsic value of the Precipitation Agreements as Prepayments and Other under Current Assets in the Statements of Net Position. Settlement of the Precipitation Agreements is not performed until the end of the period covered (water year ended September 30). The intrinsic value of a Precipitation Agreement is the difference between the expected results from a monthly allocation of the cumulative rainfall amounts, in an average rainfall year, and the actual rainfall during the same period.

Insurance Programs. SMUD records liabilities for unpaid claims at their present value when they are probable in occurrence and the amount can be reasonably estimated. SMUD records a liability for unpaid claims associated with general, auto, workers' compensation, and short-term and long-term disability based upon estimates derived by SMUD's claims administrator or SMUD staff. The liability comprises the present value of the claims outstanding and includes an amount for claim events incurred but not reported based upon SMUD's experience (see Note 16).

Pollution Remediation. SGAS No. 49, "*Accounting and Financial Reporting for Pollution Remediation Obligations*," (GASB No. 49) requires that a liability be recognized for expected outlays for remediating existing pollution when certain triggering events occur. SMUD recorded a pollution remediation obligation for its North City substation, which was built on a former landfill, for the former Community Linen Rental Services Property, and for obligations for several land sites, including a few sites where it will be building a substation. At December 31, 2023 and 2022, the total pollution remediation liability was \$23.2 million and \$24.3 million, respectively, and recorded as either Current Liabilities, Customer Deposits and Other or Noncurrent Liabilities, Self Insurance and Other in the Statements of Net Position. Costs were estimated using the expected cash flow technique prescribed under GASB No. 49, including only amounts that are reasonably estimable.

Hydro License. SMUD owns and operates the Upper American River Hydroelectric Project (UARP). The original license to construct and operate the UARP was issued in 1957 by FERC. Effective July 1, 2014, SMUD received a 50-year hydro license. As part of the hydro licensing process, SMUD entered into four contracts with government agencies whereby SMUD makes annual payments to them for various services for the term of the license. At December 31, 2023 and 2022, the liability for these contract payments was \$62.7 million and \$58.5 million, respectively, and recorded as either Current Liabilities, Customer Deposits and Other or Noncurrent Liabilities, Self-Insurance and Other in the Statements of Net Position (see Note 17).

Assembly Bill 32. California Assembly Bill (AB) 32 was an effort by the State of California to set a greenhouse gas (GHG) emissions reduction goal into law, and initially was set through 2020. In 2015, the state established a 2030 goal for GHG emissions at 40 percent below 1990 levels, and in July of 2017 AB-398 was approved by the Governor. Central to these initiatives is the Cap and Trade program, which covers major sources of GHG emissions in the State including power plants. AB-398 extended Cap and Trade through 2030. The Cap and Trade program includes an enforceable emissions cap that will decline over time. The State distributes allowances, which are tradable permits, equal to the emissions allowed under the cap. Sources under the cap are required to surrender allowances and offsets equal to their emissions at the end of each compliance period. SMUD is subject to AB-32 and has participated in California Air Resources Board (CARB) administered quarterly auctions in the past. In a normal water year, SMUD expects its free allocation of allowances from the CARB to cover its compliance costs associated with electricity delivered to its retail customers. SMUD expects to recover compliance costs associated with wholesale power sales costs through its wholesale power sales revenues. SMUD continues to monitor new legislation and proposed programs that could impact AB-32 and its subsequent extensions.

In addition, the Low Carbon Fuel Standards (LCFS) was enacted through AB-32. CARB is responsible for the implementation of LCFS and has established a program for LCFS credits. The LCFS program is designed to reduce greenhouse gas emissions associated with the lifecycle of transportation fuels used in California. SMUD participates in the program and receives LCFS credits from CARB for the electricity used to power electric vehicles. The LCFS credits are sold to parties (oil companies) that have a compliance obligation. CARB requires that electricity LCFS credit sales proceeds be spent in a way to benefit current or future Electric Vehicle drivers in California, for both commercial and residential vehicles.

Net Pension Asset (NPA) or Liability (NPL). The NPA or NPL is the difference between the actuarial present value of projected pension benefit payments attributable to employees' past service and the pension plan's fiduciary net position (see Note 14).

Net Other Postemployment Benefit (OPEB) Asset (NOA) or Liability (NOL). The NOA or NOL is the difference between the actuarial present value of projected OPEB benefit payments attributable to employee's past service and the OPEB plan's fiduciary net position (see Note 15).

Net Position. SMUD classifies its net position into three components as follows:

- Net investment in capital assets – This component of net position consists of capital assets, net of accumulated depreciation, reduced by the outstanding debt balances, net of unamortized debt expenses. Deferred inflows and outflows of resources that are attributable to the acquisition, construction or improvement of those assets or related debt are also included.
- Restricted – This component of net position consists of assets with constraints placed on their use, either externally or internally. Constraints include those imposed by debt indentures (excluding amounts considered in Net investment in capital assets, above), grants or laws and regulations of other governments, or by law through constitutional provisions or enabling legislation or by the Board. These restricted assets are reduced by liabilities and deferred inflows of resources related to those assets.
- Unrestricted – This component of net position consists of net amount of the assets, deferred outflows of resources, liabilities, and deferred inflows of resources that do not meet the definition of "Net investment in capital assets" or "Restricted."

Contributions in Aid of Construction (CIAC). SMUD records CIAC from customer contributions, primarily relating to expansions to SMUD's distribution facilities, as Other income (expense) - net in the Statements of Revenues, Expenses and Changes in Net Position. Contributions of capital are valued at acquisition value. For ratemaking purposes, the Board does not recognize such revenues when received; rather, CIAC is included in revenues as such costs are amortized over the estimated useful lives of the related distribution facilities (see Note 8).

Revenues and Expenses. SMUD distinguishes operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with

SMUD's principal ongoing operations. The principal operating revenues of SMUD are charges to customers for sales and services. Operating expenses include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as Non-Operating Revenues and Expenses in the Statements of Revenues, Expenses and Changes in Net Position.

Grants. SMUD receives grant proceeds from federal and state assisted programs for its projects which include, but are not limited to, advanced and renewable technologies, electric transportation, and energy efficiency. SMUD also periodically receives grant proceeds from federal or state assistance programs as partial reimbursements for costs it has incurred as a result of natural disasters, such as storm or fire damages. When applicable, these programs may be subject to financial and compliance audits pursuant to regulatory requirements. SMUD records grant proceeds related to capital projects as a Regulatory Credit (see Note 8).

SMUD has taxable Build America Bonds in which it receives an interest subsidy from the federal government equal to 35 percent of the interest paid (see Note 10). SMUD received reduced subsidy payments in 2023 and 2022 due to budget sequestration by the federal government. SMUD recognized \$9.3 million in revenues in 2023 and 2022 for its Build America Bonds, as a component of Other income (expense) - net, in the Statements of Revenues, Expenses and Changes in Net Position.

Customer Sales and Excise Taxes. SMUD is required by various governmental authorities, including states and municipalities, to collect and remit taxes on certain customer sales. Such taxes are presented on a net basis and excluded from revenues and expenses in the Statements of Revenues, Expenses and Changes in Net Position.

Subsequent Events. Subsequent events for SMUD have been evaluated through February 23, 2024 (see Note 19).

Reclassifications. Certain amounts in the 2022 Financial Statements have been reclassified in order to conform to the 2023 presentation.

Recent Accounting Pronouncements, adopted. In March 2020, GASB issued SGAS No. 93, *“Replacement of Interbank Offered Rates”* (GASB No. 93). The objective of this statement is to address accounting and financial reporting implications that result from the replacement of an interbank offered rate (IBOR), most notably, the London Interbank Offered Rate (LIBOR), which is expected to cease to exist in its current form at the end of 2021. This statement provides exceptions for certain hedging derivative instruments to the hedge accounting termination provisions when an IBOR is replaced as the reference rate of the hedging derivative instrument's variable payment. By removing LIBOR as an appropriate benchmark interest rate for the qualitative evaluation of the effectiveness of an interest rate swap, GASB No. 93 identifies the Secured Overnight Financing Rate (SOFR) and the Effective Federal Funds Rate as appropriate benchmark interest rates to replace LIBOR. This statement is effective for SMUD in 2023. GASB No. 99 (see below) further states that the LIBOR is no longer an appropriate benchmark interest rate for a derivative instrument that hedges the interest rate risk of taxable debt when LIBOR ceases to be determined by the ICE Benchmark Administration using the methodology in place as of December 31, 2021. SMUD utilizes the 1-month LIBOR for its interest rate swap agreements. According to the ICE Benchmark Administration, the 1-month US dollar settings will be determined and published under the methodology until the end of June 2023. SMUD has fully implemented GASB 93 in 2023. SMUD has one interest rate swap agreement that became effective on July 12, 2023 that uses the benchmark interest rate Fallback SOFR (see Note 10). NCGA, a blended component unit of SMUD, modified its interest rate swap agreement to the benchmark interest rate Term SOFR effective October 1, 2023 (see Note 10).

In March 2020, GASB issued SGAS No. 94, *“Public-Private and Public-Public Partnerships and Availability Payment Arrangements”* (GASB No. 94). The primary objective of this Statement is to provide guidance for accounting and financial reporting related to public-private and public-public partnership arrangements (PPPs), PPPs that meet the definition of a service concession arrangement (SCA), and availability payment arrangements (APAs). A PPP is an arrangement in which a government (the transferor) contracts with an operator (a governmental or nongovernmental entity) to provide public services by conveying control of the right to operate or use a nonfinancial asset, such as infrastructure or other capital asset (the underlying

PPP asset), for a period of time in an exchange or exchange-like transaction. An APA is an arrangement in which a government compensates an operator for services that may include designing, constructing, financing, maintaining, or operating an underlying nonfinancial asset for a period of time in an exchange or exchange-like transaction. This statement is effective for SMUD in 2023. SMUD has reviewed its agreements and has determined it has not entered into any agreements which meet the definition of a PPP or SCA. SMUD has entered into agreements that can be considered APAs and will continue to account and financially report for them as outflows of resources, which complies with this Statement. Therefore, SMUD does not have any new reporting requirements related to GASB 94 at December 31, 2023.

In April 2022, GASB issued SGAS No. 99, “*Omnibus 2022*” (GASB No. 99). This statement addresses a variety of topics and is effective for SMUD in 2022, 2023, or 2024 depending on the requirement. The only topic effective for SMUD in 2022 and 2023 is the replacement of IBOR discussed above under GASB No. 93. SMUD chose to early adopt provisions related to leases and the implementation of GASB No. 87 “*Leases*” (GASB No. 87) that were effective in 2023. SMUD incorporated the clarifications related to leases contained in GASB No. 99 during its implementation of GASB No. 87. SMUD is currently assessing the financial impact of adopting the remaining topics in this statement that are effective in 2024.

Recent Accounting Pronouncements, not yet adopted. In June 2022, GASB issued SGAS No. 100, “*Accounting Changes and Error Corrections – an amendment of GASB Statement No. 62*” (GASB No. 100), to enhance accounting and financial reporting requirements for accounting changes and error corrections. The statement defines accounting changes and sets forth requirements for reporting changes and error corrections in the financial statements. In addition, the statement contains requirements for disclosure in notes to financial statements of information about accounting changes and error corrections. Furthermore, for periods that are earlier than those included in the financial statements, information presented in required supplementary information and supplementary information should be restated for error corrections, but not for changes in accounting principles. This statement is effective for SMUD in fiscal year 2024. SMUD is currently assessing the financial statement impact of adopting this statement.

In June 2022, GASB issued SGAS No. 101, “*Compensated Absences*” (GASB No. 101), to better meet the information needs of financial statement users by updating the recognition and measurement guidance for compensated absences. The unified recognition and measurement model in this Statement will result in a liability for compensated absences that more appropriately reflects when a government incurs an obligation. This statement is effective for SMUD in fiscal year 2024. SMUD is currently assessing the financial statement impact of adopting this statement.

In December 2023, GASB issued SGAS No. 102 “*Certain Risk Disclosures*” (GASB No. 102), to provide users of government financial statements with essential information about risks related to a government’s vulnerabilities due to certain concentrations or constraints. A *concentration* is defined as a lack of diversity related to an aspect of a significant inflow of resources or outflow of resources. A *constraint* is a limitation imposed on a government by an external party or by formal action of the government’s highest level of decision-making authority. This Statement requires a government to assess whether a concentration or constraint could cause a substantial impact if the event occurred or has begun to occur prior to the issuance of financial statements. If a government determines that the criteria for disclosure have been met, it should disclose information in notes to financial statements in sufficient detail to enable financial statements users to understand the nature of the circumstances and the government’s vulnerability to the risk of a substantial impact. This Statement is effective for SMUD in fiscal year 2025. SMUD is currently assessing the disclosure impact of adopting this statement.

NOTE 3. ACCOUNTING CHANGE

In May 2020, GASB issued SGAS No. 96, “*Subscription-Based Information Technology Arrangements*” (GASB No. 96), to provide guidance on the accounting and financial reporting for subscription-based information technology arrangements (SBITAs) for governments. The statement defines a SBITA as a contract that conveys control of the right to use another party’s information technology software, alone or in combination with tangible capital assets, as specified in the contract for a period of time in an exchange or exchange-like transaction. It establishes that a SBITA results in a right-to-use subscription asset and a corresponding subscription liability. It provides the capitalization criteria for outlays other than subscription payments, including

implementation costs of a SBITA and requires note disclosures regarding a SBITA. To the extent relevant, this standard is based on SGAS No. 87, “*Leases*”, as amended. SMUD implemented GASB No. 96 in fiscal year 2023, retroactive to the beginning of fiscal year 2022. SMUD has assessed whether its software subscriptions met the requirements of GASB No. 96. The implementation impacted the Statements of Net Position when the SBITA assets, accumulated amortization, liabilities, and accrued interest were recorded. The implementation also impacted the Statements of Revenues, Expenses and Changes in Net Position as SBITA amortization expense and interest expense were also recorded. Net position was increased by \$0.17 million for 2022 due to the restatement.

SMUD has restated amounts of the affected balances within the financial statements for the period ended December 31, 2022, as follows:

STATEMENTS OF NET POSITION

	December 31,	
	2022 (Restated)	2022
Assets		
Electric Utility Plant		
Plant in service	\$ 7,235,248	\$ 7,201,276
Less accumulated depreciation and depletion	(3,554,512)	(3,547,995)
Current Assets		
Prepayments and other	31,667	32,881
Current Liabilities		
Interest payable	49,865	49,784

Leases. SMUD engages in lease contracts for land, communication sites, buildings, and a power plant. SMUD leases land to SFA, a component unit, and as described in Note 2, all of the activities and balances of the component units are blended into and reported as part of SMUD because of the extent of their operational and financial relationships with SMUD.

Lessor. Lease agreements include land, communication sites, and a building. Lease terms range from 19 to 35 years including options to extend the lease term after completion of the initial contracted term. The likelihood that the renewal options will be exercised has been evaluated and it has been determined that Lessees will exercise the renewal options with reasonable certainty. The agreements allow for periodic increases to the lease payments. The interest rates range between 0.7 percent to 4.2 percent based on the AAA Muni Curve with the number of years to maturity that corresponds to the lease term, plus an additional credit

spread to account for a different credit rating and other factors. At December 31, 2023 and 2022, lease receivables included in current assets were \$0.6 million and \$0.8 million, respectively, and lease receivables included in noncurrent assets were \$17.4 million and \$17.8 million, respectively. As of December 31, 2023 and 2022, deferred lease inflows were \$17.4 million and \$18.2 million, respectively. SMUD recognized lease revenue of \$0.8 million and \$0.7 million in 2023 and 2022, respectively, which is reported in Street lighting and other on the Statements of Revenues, Expenses and Changes in Net Position. SMUD recognized interest income of \$0.03 million in 2023 and 2022. There were no variable lease payments received in 2023 or 2022.

Lessee. Lessee agreements include land, buildings, and a power plant. Lease terms range from 3 to 25 years including options to extend the lease term after completion of the initial contracted term. The likelihood that the renewal options will be exercised has been evaluated and it has been determined that the lease agreements will be renewed with reasonable certainty. The agreements allow for periodic increases to the lease payments. The interest rates range between 0.1 percent to 4.2 percent based on the AAA Muni Curve with the number of years to maturity that corresponds to the lease term, plus an additional credit spread to account for a different credit rating and other factors. As of December 31, 2023 and 2022, assets recorded under leases were \$7.3 million and \$84.1 million, respectively, and accumulated amortization associated with lease assets was \$1.2 million and \$52.0 million, respectively. SMUD recognized amortization expense of \$26.1 million in 2023 and \$26.0 million in 2022 which is reported as Depreciation and amortization on the Statements of Revenues, Expenses and Changes in Net Position. As of December 31, 2023 and 2022, lease obligations included in current liabilities, Customer deposits and other, were \$0.4 million and \$26.8 million, respectively, and lease obligations included in noncurrent liabilities, Self insurance and other, were \$5.9 million and \$6.3 million, respectively. There were no lease impairments in 2023 or 2022. There were no payments recorded in the current period that were not included in the measurement of the lease liability. There is one lease commitment for which the lease term begins in 2024 and it will be recorded as a lease asset and lease liability upon commencement of the lease term.

The following table summarizes the future annual lease principal and interest payments as of December 31, 2023:

	<u>Principal</u>	<u>Interest</u>	<u>Total</u>
2024	\$ 402	\$ 142	\$ 544
2025	419	136	555
2026	429	132	561
2027	438	127	565
2028	446	121	567
2029-2033 (combined)	1,540	522	2,062
2034-2038 (combined)	983	395	1,378
2039-2043 (combined)	932	240	1,172
2044-2048 (combined)	<u>751</u>	<u>64</u>	<u>815</u>
Total	<u>\$ 6,340</u>	<u>\$ 1,879</u>	<u>\$ 8,219</u>

Subscription Assets. SMUD has noncancellable subscription-based information technology arrangements (SBITAs) for the right to use information technology hardware and software. SBITA subscription terms range from 2 to 8 years including options to extend the subscription term after completion of the initial contracted term. The agreements allow for periodic increases to the subscription payments. The interest rates range between 0.25 percent to 2.65 percent based on the AAA Muni Curve with the number of years to maturity that corresponds to the subscription term, plus an additional credit spread to account for a different credit rating and other factors. As of December 31, 2023 and 2022, subscription assets recorded were \$36.9 million and \$33.9 million, respectively, and accumulated amortization associated with subscription assets was \$13.9 million and \$6.5 million, respectively. SMUD recognized SBITA amortization expense of \$7.4 million in 2023 and \$6.5 million in 2022 which is reported as Depreciation and amortization on the Statements of Revenues, Expenses and Changes in Net Position. As of December 31, 2023 and 2022, subscription obligations included in current liabilities, Customer deposits and other, were \$5.9 million and \$7.4 million, respectively, and subscription obligations included in noncurrent liabilities, Self-insurance and other, were \$15.0 million and \$18.6 million, respectively. There were no subscription asset impairments in 2023 or 2022. There were no payments recorded in the current period that were not included in the measurement of the lease liability.

The following table summarizes the future annual SBITA principal and interest payments as of December 31, 2023:

	<u>Principal</u>	<u>Interest</u>	<u>Total</u>
2024	\$ 5,905	\$ 208	\$ 6,113
2025	5,740	140	5,880
2026	4,314	80	4,394
2027	2,943	37	2,980
2028	1,928	10	1,938
2029-2033 (combined)	<u>91</u>	<u>1</u>	<u>92</u>
Total	<u>\$ 20,921</u>	<u>\$ 476</u>	<u>\$ 21,397</u>

NOTE 5. INVESTMENT IN JOINT POWERS AUTHORITY

TANC. SMUD and fourteen other California municipal utilities are members of TANC, a JPA. TANC, along with the other California municipal utilities, own and operate the California-Oregon Transmission Project (COTP), a 500-kilovolt transmission line between central California and southern Oregon. SMUD is obligated to pay approximately 39 percent of TANC’s COTP debt service and operations costs in exchange for entitlement to approximately 536 megawatts (MW) of TANC’s 1,390 MW transfer capability. Additionally, SMUD has a 48 MW share of TANC’s 300 MW firm, bi-directional transmission over Pacific Gas and Electric Company’s (PG&E) system between PG&E’s Tesla and Midway substations (SOT). The total entitlement shares for the COTP and SOT described above include the long-term agreements listed below.

In 2009, SMUD entered into a 15-year long-term layoff agreement with TANC and certain members, expiring January 31, 2024. This agreement provides for the assignment of all rights and obligations of the City of Palo Alto and the City of Roseville related to their COTP and SOT entitlements. This agreement increased SMUD’s COTP entitlement by 36 MW and SOT entitlement by 2 MW. On July 1, 2014, an amendment returned to the City of Roseville all rights and obligations related to the COTP entitlements, which decreased SMUD’s COTP entitlement by 13 MW.

Effective July 1, 2014, SMUD entered into a 25-year long-term layoff agreement with TANC and certain members that provides for the assignment of all rights and obligations of Northern California Power Agency and partial rights and obligations of the City of Santa Clara related to their COTP entitlements. This agreement increased SMUD’s COTP entitlements by 130 MW.

The long-term debt of TANC, which totals \$165.5 million (unaudited) at December 31, 2023, is collateralized by a pledge and assignment of net revenues of TANC supported by take or pay commitments of SMUD and other members. Should other members default on their obligations to TANC, SMUD would be required to make additional payments to cover a portion of such defaulted payments, up to 25 percent of its current obligation. SMUD recorded transmission expenses related to TANC of \$17.5 million and \$16.9 million in 2023 and 2022, respectively.

Summary financial information for TANC is presented below:

	December 31,	
	2023 <u>(Unaudited)</u>	2022 <u>(Unaudited)</u>
	(thousands of dollars)	
Total Assets	\$ 402,458	\$ 389,258

Copies of the TANC annual financial reports may be obtained from SMUD at P.O. Box 15830, Sacramento, California 95852 or online at www.tanc.us.

BANC. SMUD, City of Redding, City of Roseville, Modesto Irrigation District (MID), City of Shasta Lake, and Trinity Public Utilities District are members of BANC, a JPA formed in 2009. In 2011, operational control of Balancing Authority Area (BAA) operations was transferred from SMUD to BANC. BANC performs FERC approved BAA reliability functions that are managed by North American Electric Reliability Corporation (NERC), nationally, and by Western Electricity Coordinating Council functions in the west. SMUD recorded expenses related to BANC of \$4.3 million and \$3.9 million in 2023 and 2022, respectively.

Summary financial information for BANC is presented below:

	December 31,	
	2023 <u>(Audited)</u>	2022 <u>(Audited)</u>
	(thousands of dollars)

NOTE 6. COMPONENT UNITS

SFA Cosumnes Power Plant Project. SFA is a JPA formed by SMUD and MID. SFA operates the Cosumnes Power Plant Project, a 602 MW (net) natural gas-fired, combined cycle facility which began commercial operations in 2006. The revenue stream to pay the SFA bonds' debt service is provided by a "take-or-pay" power purchase agreement between SMUD and SFA. On November 1, 2021, SFA entered into Assignment and Assumption Agreements which transferred the assets and obligations, including ownership of the Carson Power Plant (Carson), Procter and Gamble Power Plant (Procter and Gamble), Campbell Power Plant (Campbell) and McClellan Power Plant (McClellan). Carson began commercial operations in 1995 and

is comprised of a 68 MW natural gas-fired combined cycle cogeneration facility and a 42 MW natural gas-fired simple cycle peaking plant. Procter and Gamble began commercial operations in 1997 and is comprised of a 145 MW natural gas-fired combined cycle plant and a 50 MW natural gas-fired simple cycle peaking plant which was subsequently added and began commercial operations in 2001. Campbell began commercial operations in 1997 and is a 183 MW natural gas-fired combined-cycle cogeneration plant consisting of a combustion turbine generator and a steam turbine generator. McClellan is a 72 MW simple cycle combustion turbine and has been operating since 1986.

NCGA. NCGA is a JPA formed by SMUD and the SFA. NCGA has a prepaid gas contract with Morgan Stanley Capital Group (MSCG) expiring in 2027, which is financed primarily by NCGA revenue bonds. SMUD has contracted with NCGA to purchase all the gas delivered by MSCG to NCGA, based on market prices. SMUD requested to have its entire daily contract quantity remarketed for each gas day of each month from November 1, 2023 until May 31, 2027. MSCG, pursuant to the Gas remarketing provisions shall purchase all of the remarketed gas for its own account. NCGA is obligated to pay the principal and interest on the bonds. Neither SMUD nor SFA is obligated to make debt service payments on the bonds. NCGA can terminate the prepaid gas contract under certain circumstances, including a failure by MSCG to meet its gas delivery obligation to NCGA or a drop in MSCG's credit rating below a specified level. If this occurs, MSCG will be required to make a termination payment to NCGA based on the unamortized prepayment proceeds received by MSCG.

NCEA. NCEA is a JPA formed by SMUD and the SFA. NCEA has a prepaid natural gas and electricity (commodity) contract with J. Aron & Company LLC (J. Aron) expiring in 2049, which is financed primarily by NCEA revenue bonds. SMUD has contracted with NCEA to purchase all the commodity delivered by J. Aron to NCEA, based on market prices. NCEA is obligated to pay the principal and interest on the bonds. Neither SMUD nor SFA is obligated to make debt service payments on the bonds. NCEA can terminate the prepaid commodity contract under certain circumstances, including a failure by J. Aron to meet its commodity delivery obligation to NCEA. If this occurs, J. Aron will be required to make a termination payment to NCEA based on the unamortized prepayment proceeds received by J. Aron.

The summarized activity of SMUD's component units for 2023 is presented below:

As described in Note 2, all of the activities and balances of the component units are blended into and reported as part of SMUD because of the extent of their operational and financial relationships with SMUD. Copies of SFA's, NCGA's and NCEA's annual financial reports may be obtained from their Executive Office at P.O. Box 15830, Sacramento, California 95852 or online at www.smud.org.

NOTE 7. CASH, CASH EQUIVALENTS, AND INVESTMENTS

Cash Equivalents and Investments. SMUD's investment policy is governed by the California State and Municipal Codes and its Indenture, which allow SMUD's investments to include: obligations which are unconditionally guaranteed by the U.S. Government or its agencies or instrumentalities; direct and general obligations of the State or any local agency within the State; bankers' acceptances; commercial paper; certificates of deposit; repurchase and reverse repurchase agreements; medium term corporate notes; LAIF; and money market funds. SMUD's investment policy includes restrictions for investments relating to maximum amounts invested as a percentage of total portfolio and with a single issuer, maximum maturities, and minimum credit ratings.

Credit Risk. This is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. To mitigate this risk, SMUD limits investments to those rated, at a minimum, "A-1" or equivalent for short-term investments and "A" or equivalent for medium-term corporate notes by a nationally recognized rating agency, with the exception of the Guaranteed Investment Contracts (GICs) held by NCEA. NCEA's GICs are rated at the credit rating of the commodity supplier, or, if not rated, the guarantor of the commodity supplier which is currently Goldman Sachs rated as "BBB+."

Custodial Credit Risk. This is the risk that, in the event of the failure of a depository financial institution or counterparty to a transaction, SMUD's deposits and investments may not be returned or SMUD will not be able to recover the value of its deposits, investments or collateral securities that are in the possession of another party. SMUD does not have a deposit or investment policy for custodial credit risk.

As of December 31, 2023 and 2022, \$7.2 million and \$9.7 million in deposits were uninsured, respectively. The bank balance is also, per a depository pledge agreement between SMUD and SMUD's bank, collateralized at 136 percent and 128 percent of the collective funds on deposit (increased by the amount of accrued but uncredited interest, reduced by deposits covered by

Federal Deposit Insurance Corporation) at December 31, 2023 and 2022, respectively. SMUD had money market funds of \$90.2 million and \$185.7 million which were uninsured at December 31, 2023 and 2022, respectively. SMUD's investments and money market funds are held in SMUD's name.

Concentration of Credit Risk. This is the risk of loss attributed to the magnitude of an entity's investment in a single issuer. SMUD places no limit on the amounts invested in any one issuer for repurchase agreements, US Treasuries, federal agency, and state and municipal securities.

The following are the concentrations of risk greater than five percent in either year:

Investment Type:	December 31,	
	2023	2022
Federal Home Loan Banks	37%	68%
Freddie Mac	14%	N/A
Commercial Paper – Microsoft Corporation	7%	N/A
Municipal Bond – State of Florida	N/A	5%
Federal Farm Credit Bank	8%	6%
Corporate Note – Toyota Motor Credit Corp	7%	5%
Corporate Note – Apple Inc	6%	N/A
Guaranteed Investment Contracts	5%	4%

Interest Rate Risk. This is the risk of loss due to the fair value of an investment declining due to interest rates rising. Though SMUD has restrictions as to the maturities of some of the investments, it does not have a formal policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates. SMUD is exposed to interest rate risk on its interest rate swaps (see Note 9).

The following schedules indicate the credit and interest rate risk at December 31, 2023 and 2022. The credit ratings listed are from Standard & Poor's (S&P) or Moody's. (N/A is defined as not applicable to the rating disclosure requirements.)

At December 31, 2023, SMUD's cash, cash equivalents, and investments consist of the following:

Description	Credit Rating	Remaining Maturities (in years)			Total Fair Value
		Less Than 1	1-5	More Than 5	
(thousands of dollars)					
Cash and Cash Equivalents:					
Cash	N/A	\$ 35,263	\$ -0-	\$ -0-	\$ 35,263

SMUD’s cash, cash equivalents, and investments are classified in the Statements of Net Position as follows:

	December 31,	
	2023	2022
	(thousands of dollars)	
Cash, Cash Equivalents, and Investments:		
Revenue bond reserve and debt service funds:		
Revenue bond reserve fund	\$ 1,027	\$ 2,004
Debt service fund	71,371	81,263
Component unit bond reserve and debt service funds	<u>43,281</u>	<u>36,118</u>
Total revenue bond reserve and debt service funds	115,679	119,385
Nuclear decommissioning trust fund	9,418	8,980
Rate stabilization fund	212,131	156,016
Component unit other restricted funds	10,097	3,015
Escrow fund	1,110	12,484
Other restricted funds	28,074	14,925
Unrestricted funds	<u>570,615</u>	<u>627,864</u>
Total cash, cash equivalents, and investments	<u>\$ 947,124</u>	<u>\$ 942,669</u>

NOTE 8. REGULATORY DEFERRALS

The Board has taken various regulatory actions that result in differences between the recognition of revenues and expenses for ratemaking purposes and their treatment under generally accepted accounting principles for non-regulated entities (see Note 2). These actions result in regulatory assets and deferred inflow of resources, which are summarized in the tables below. Changes to these balances, and their inclusion in rates, occur only at the direction of the Board.

Regulatory Assets (Costs)

Decommissioning. SMUD’s regulatory asset relating to the unfunded portion of its decommissioning liability for the Rancho Seco nuclear power plant is being collected through interest earnings on the Trust Fund. Nuclear fuel storage costs and non-radiological decommissioning costs have been collected in rates since 2009.

Derivative Financial Instruments. SMUD’s regulatory costs and/or credits relating to investment derivative instruments are intended to defer the net difference between the fair value of derivative instruments and their cost basis, if any. Investment derivative instruments are reflected in rates at contract cost and as such, the balance is charged or credited into rates as the related asset or deferred inflow of resource is utilized (see Note 9).

Debt Issuance Costs. SMUD established a regulatory asset for costs incurred in connection with the issuance of debt obligations for the component units, principally underwriter fees and legal costs. The regulatory asset is amortized over the life of the bonds for the component units’ debt issuance costs. Debt issuance costs after December 31, 2013 are expensed.

Pension. SMUD established a regulatory asset for pension costs related to the implementation of GASB No. 68 which requires SMUD to record a net pension asset or a net pension liability. The regulatory asset is being amortized over a period of 25 years starting in 2018.

OPEB. SMUD established a regulatory asset for OPEB costs related to the implementation of GASB No. 75 which requires SMUD to record a net OPEB asset or net OPEB liability. The regulatory asset will be amortized over a period of 25 years starting in 2020.

Pension/OPEB. In 2022, SMUD established regulatory accounting for pension and OPEB regulatory costs and/or credits to defer recognition of certain expenses related to the amortization of the pension and OPEB deferred outflows and deferred inflows of resources to match such costs in the appropriate accounting period for rate-making purposes.

SMUD’s total regulatory costs for future recovery are presented below:

	December 31,	
	2023	2022
	(thousands of dollars)	
Regulatory Costs:		
Decommissioning	\$ 107,977	\$ 83,882
Derivative financial instruments	1,160	1,095
Debt issuance costs	1,045	1,255
Pension – implementation costs	323,517	340,544
Pension – deferred outflows	174,576	86,574
OPEB – implementation costs	268,237	281,010
OPEB – deferred outflows	<u>39,612</u>	<u>19,198</u>
Total regulatory costs	916,124	813,558
Less: regulatory costs to be recovered within one year	<u>(63,415)</u>	<u>(49,312)</u>
Total regulatory costs for future recovery - net	<u>\$ 852,709</u>	<u>\$ 764,246</u>

Regulatory Credits

CIAC. In 2023 and 2022, SMUD added CIAC totaling \$22.0 million and \$23.9 million, respectively, to Regulatory Credits in the Statements of Net Position and recorded \$15.3 million and \$14.8 million of amortization, respectively, to Other income (expense) - net in the Statements of Revenues, Expenses and Changes in Net Position. SMUD’s regulatory credit relating to CIAC is intended to offset the revenue and expense associated with this accounting treatment. Thus, this regulatory credit is being amortized into rates over the depreciable lives of the related assets in order to offset the earnings effect of these non-exchange transactions (see Note 2).

Rate Stabilization. SMUD’s regulatory credit relating to Rate Stabilization is intended to defer the need for future rate increases when costs exceed existing rates. At the direction of the Board, amounts may be either deferred into this fund (which reduces revenues), or amounts are recognized out of this fund (which increases revenues). The Board authorizes Rate Stabilization Fund (RSF) deferrals on an event driven basis.

In 2023, \$1.3 million was deferred from revenue to the RSF as a result of higher than budgeted energy deliveries from the Western Area Power Administration. In 2022, \$30.0 million was recognized as revenue from the RSF as a result of lower than budgeted energy deliveries from the Western Area Power Administration.

SMUD participates in the carbon allowance auctions under AB-32, the Global Warming Solutions Act (see Note 2). The Board authorized deferral of AB-32 auction proceeds to match the revenue recognition with the related expenses. The difference between the auction proceeds received and the funds spent on AB-32 programs are deferred into future years. In 2023, the Board authorized transferring the difference out of the RSF and \$1.5 million was recognized from the RSF to revenue. In 2022, the Board authorized deferring the difference into the RSF and \$23.0 million was deferred from revenue to the RSF.

SMUD sells LCFS credits under AB-32, the Global Warming Solutions Act (see Note 2). In 2019, the Board authorized deferral of LCFS credit sales to match the revenue recognition with the related expenses. The difference between the LCFS credit sales and the funds spent on LCFS programs are deferred into future years. In 2023, the Board authorized transferring the difference out of the RSF and \$2.0 million was recognized from the RSF to revenue. In 2022, the Board authorized deferring the difference and \$0.7 million was deferred from revenue to the RSF.

In 2022 and 2021, the Board authorized SMUD to defer \$35.0 million each year from operating revenue to the RSF to offset future one-time specific expenses which may have a significant financial impact on SMUD. Also in 2022, the Board authorized the use of \$41.0 million of deferred operating revenue to offset future Community Impact Plan expenditures from 2022 through 2025. In 2023 and 2022, \$7.1 million and \$1.5 million was recognized from the RSF to revenue, respectively.

Hydro Rate Stabilization. The Hydro Rate Stabilization Fund (HRSF) was established through the Hydro Generation Adjustment (HGA) mechanism, which helps manage volatility in energy costs. The HGA mechanism applies a formula based on precipitation and wholesale electricity prices to calculate needed withdrawals from or deposits to the HRSF. The maximum balance of the HRSF is 6 percent of the budgeted retail revenue and the maximum annual transfer in or out of the HRSF is 4 percent of budgeted retail revenue. If the HRSF is depleted, SMUD will apply a hydro rate surcharge to customers' bills up to 4 percent. When the HRSF reaches the 6 percent cap, the Board may authorize a hydro rebate to customers or direct the funds for another purpose. In 2023, \$65.4 million was transferred from revenue to the HRSF as a result of high precipitation. In 2022, \$25.1 million, was recognized from the HRSF to revenue as a result of low precipitation.

Senate Bill 1. SMUD implemented a per kilowatt hour solar surcharge, effective January 1, 2008 in order to fund investments in solar required by Senate Bill 1 (SB-1). The difference between the surcharge revenues received and the funds spent on solar initiatives will be recognized or deferred into future years. SMUD has spent less than it collected in SB-1 revenues and has recorded a regulatory credit. Collection of the solar surcharge ended in December 2017 when total collections reached \$130.0 million. In 2023 and 2022, \$0.9 million and \$0.04 million was spent for SB-1 programs, respectively.

Sustainable Communities. In 2023, the Board authorized a \$5 million restricted donation to be deferred to offset future expenses for sustainable communities. As of December 31, 2023, none of the \$5 million had been recognized.

Grant Revenues. In 2009, SMUD was awarded several large grants under the American Recovery and Reinvestment Act, which provided significant reimbursements for capital expenditures. In 2010, the Board authorized the deferral of all grant revenue for capital expenditures as regulatory liabilities. This regulatory credit is deferred to match the depreciable lives of the related capital assets in order to offset the earnings effect of these non-exchange transactions (see Note 2).

TANC Operations Costs. SMUD's cash payments to TANC exceeded TANC's accrual-based costs and SMUD has recorded a regulatory credit.

SMUD's total regulatory credits for future revenue recognition are presented below:

	<u>December 31,</u>	
	<u>2023</u>	<u>2022</u>
	(thousands of dollars)	
Regulatory Credits:		
CIAC	\$ 304,723	\$ 298,026
Derivative Financial Instruments	-0-	2,767
Rate stabilization	115,752	125,032
Hydro rate stabilization	96,379	30,984
Senate Bill 1	2,553	3,430
Sustainable Communities	5,000	-0-
Pension – deferred inflows	124,797	68,082
OPEB – deferred inflows	54,084	32,983
Grant revenues	24,106	27,920
TANC operations costs	<u>30,912</u>	<u>31,149</u>
Total regulatory credits	<u>\$ 758,307</u>	<u>\$ 620,373</u>

NOTE 9. DERIVATIVE FINANCIAL INSTRUMENTS

To help provide stable electric rates and to meet the forecasted power needs of its retail customers reliably, SMUD enters into various physical and financial fixed price purchase contracts for electricity and natural gas. These fixed price contracts and swap agreements are intended to hedge the exposure due to highly volatile commodity prices. SMUD also enters into interest rate swap agreements to reduce interest rate risk. SMUD utilizes these derivative financial instruments to mitigate its exposure to certain market risks associated with ongoing operations. SMUD has established policies set by an executive committee for the use of derivative financial instruments for trading purposes. These contracts are evaluated pursuant to SGAS No. 53, ***“Accounting and Financial Reporting for Derivative Instruments,”*** (GASB No. 53) to determine whether they meet the definition of derivative instruments, and if so, whether they effectively hedge the expected cash flows associated with interest rate and commodity price risk exposures.

SMUD applies hedge accounting for derivative instruments that are deemed effective hedges. Under hedge accounting, the increase or (decrease) in the fair value of a hedge is reported as a Deferred Inflow or Deferred Outflow in the Statements of Net Position. Accumulated gains and losses from derivative instruments that do not meet the effectiveness tests are deferred for ratemaking purposes as regulatory assets on the Statements of Net Position (see Note 8).

SMUD executed numerous new gas and power related purchase agreements, some of which are recorded as hedging or investment derivative instruments and are therefore included in the following table. All hedging or investment derivative instruments are recorded at fair value in the Statements of Net Position (see Note 12).

The following is a summary of the fair value, changes in fair value and notional amounts of derivative instruments, grouped by trading strategy, outstanding at December 31, 2023 (amounts in thousands; gains shown as positive amounts, losses as negative):

	2023 Changes in Fair Value		Fair Value at December 31, 2023		Notional

Objectives and Terms of Hedging Derivative Instruments. The objectives and terms of SMUD’s hedging derivative instruments that were outstanding at December 31, 2023 are summarized in the table below. The table is aggregated by the trading strategy. Credit ratings of SMUD’s counterparties can be found in the table under Credit Risk. Details of SMUD’s interest rate derivative instruments can be found in Note 10.

	<u>Notional Amount Dth</u>	<u>Beginning Date</u>	<u>Ending Date</u>	<u>Minimum Price/Dth</u>	<u>Maximum Price/Dth</u>
Gas – Commodity	119,448	01/01/24	12/31/26	\$ 1.32	\$ 6.70
Electric – Commodity	489	01/01/24	09/30/24	38.75	161.00

The objectives and terms of SMUD’s hedging derivative instruments that were outstanding at December 31, 2022 are summarized in the table below. The table is aggregated by the trading strategy.

	<u>Notional Amount Dth</u>	<u>Beginning Date</u>	<u>Ending Date</u>	<u>Minimum Price/Dth</u>	<u>Maximum Price/Dth</u>
Gas – Commodity	90,267	01/01/23	12/31/25	\$ 1.18	\$ 50.38
Gas – Storage	760	01/01/23	02/28/23	1.19	20.50
Gas – Transportation	14,445	01/01/23	12/31/23	(2.86)	16.00

SMUD hedges its interest rate exposure with swaps. As of December 31, 2023, SMUD had two interest rate swaps outstanding. One swap is used to convert some of the interest expense associated with the 1997 Series K fixed rate bonds to a variable rate interest expense (see note 10). The other swap is to convert the interest expense associated with the 2023 Series C variable rate bonds to a fixed interest expense (see note 10).

SMUD hedges its power and natural gas costs so that it can offer predictable rates to its retail electric customers and support its credit rating. SMUD maintains a risk management program to control the price, credit, and operational risks arising from its power and natural gas market activities. Under the program, authorized SMUD employees assemble a portfolio of swaps, futures, and forward contracts over time with the goal of making SMUD’s purchased power and fuel budget more predictable.

The hedged risks include those related to interest rate and commodity price fluctuations associated with certain forecasted transactions, including interest rate risk on long-term debt, and forward purchases of gas and electricity to meet load.

Derivative Instruments Not Designated as Hedging Derivative Instruments

Gas and Electric Contracts. SMUD utilizes certain gas swap and electric swap agreements under GASB No. 53 not designated as hedging derivative instruments to mitigate exposure to changes in the market price of natural gas and electricity. The fair value of each agreement, excluding the actual settlements to be paid or received as of the end of the period, is recorded in the Statements of Net Position in either Current or Noncurrent Assets, Investment Derivative Instruments if in an asset position or Current or Noncurrent Liabilities, Investment Derivative Instruments if in a liability position. An offsetting amount is included in Current or Noncurrent Regulatory Costs or Regulatory Credits for future recovery in the Statements of Net Position. The actual settlement payable is recorded in Accounts Payable in the Statements of Net Position, and the actual settlement receivable is recorded in Receivables - net: Wholesale and Other in the Statements of Net Position. The payments and receipts of the actual settlement are recorded as Investment Expense in the Statements of Revenues, Expenses and Changes in Net Position.

Interest Rate Contracts. SMUD utilized certain interest rate swap agreements not designated as hedging derivative instruments under GASB No. 53 to mitigate exposure to fluctuations in interest rates. The fair value of each agreement, excluding the balance of interest to be paid or received as of the end of the period, is recorded in the Statements of Net Position in either Current or Noncurrent Assets, Investment Derivative Instruments if in an asset position or Current or Noncurrent Liabilities, Investment Derivative Instruments if in a liability position. An offsetting amount is included in Current or Noncurrent Regulatory Costs or Deferred Outflows or Inflows of Resources in the Statements of Net Position. The interest receivable is recorded in Receivables - net: Wholesale and Other in the Statements of Net Position and the accrued

interest is recorded in Interest Payable in the Statements of Net Position. The payments or receipts of the actual settlement are recorded as Investment Expense in the Statements of Revenues, Expenses and Changes in Net Position. At December 31 2023, SMUD does not possess any outstanding ineffective interest rate swaps.

The Board has deferred recognition of the effects of reporting the fair value of Investment Derivative Instruments for ratemaking purposes and maintains regulatory accounts to defer the accounting impact of these accounting adjustments (see Note 8). Fair values may have changed significantly since December 31, 2023.

Basis Risk. This is the risk that arises when a hedged item and a derivative instrument that is attempting to hedge that item are based on different indices. SMUD is exposed to basis risk when it hedges its natural gas purchases with NYMEX futures contracts, which settle based on the price at Henry Hub, Louisiana. SMUD enters into basis swaps to hedge against this risk, which converts the Henry Hub price to the various locations where SMUD purchases natural gas. SMUD is also exposed to basis risk with the Barclays interest rate swap which is based on 1 month SOFR whereas the 2023 Series C bonds are a tax-exempt variable-rate demand note with a daily rate reset.

Termination Risk. This is the risk that a derivative instrument will terminate prior to its scheduled maturity due to a contractual event. Contractual events include bankruptcy, illegality, default, credit events upon merger, and other events. One aspect of termination risk is that SMUD would lose the hedging benefit of a derivative instrument that becomes subject to a termination event. Another aspect of termination risk is that, if at the time of termination, the mark to market value of the derivative instrument was a liability to SMUD, SMUD could be required to pay that amount to the counterparty. Termination risk is associated with all of SMUD's derivative instruments up to the fair value amounts.

Counterparty Credit Risk. This is the risk of loss resulting when the counterparty is unable or unwilling to fulfill its present and future financial obligations. SMUD can be exposed to significant counterparty credit risk on all derivative instruments. SMUD seeks to minimize credit risk by transacting with creditworthy counterparties. SMUD has established and maintained strict counterparty credit guidelines. SMUD continuously monitors counterparty credit risk and utilizes numerous counterparties to diversify the exposure to potential defaults. Under certain conditions as outlined in SMUD's credit risk management policy, SMUD may require additional credit support under its trading agreements.

Some of SMUD's derivative instrument master agreements contain credit contingent provisions that enable SMUD to maintain unsecured credit as a result of positive investment quality credit ratings from each of the major credit rating agencies. If SMUD's credit rating was to be downgraded, there could be a step-down in SMUD's unsecured credit thresholds, and SMUD's counterparties would require additional collateral. If SMUD's credit rating was to decrease below investment grade, SMUD's unsecured credit thresholds would be reduced to zero, and counterparties to the derivative instruments would demand ongoing full collateralization on derivative instruments in net out of the money positions (see Note 2).

The counterparties' credit ratings at December 31, 2023 and 2022 are shown in the table below. The credit ratings listed are from S&P or Moody's.

Total	2,971,210	132,725	(289,935)	2,814,000	<u>\$ 138,195</u>
Unamortized premiums - net	<u>242,647</u>	<u>17,986</u>	<u>(50,594)</u>	<u>210,039</u>	
Total long-term debt	<u>\$ 3,213,857</u>	<u>\$ 150,711</u>	<u>\$ (340,529)</u>	<u>\$ 3,024,039</u>	

At December 31, 2023 scheduled annual principal maturities and interest are as follows:

	Principal	Interest	Total
	(thousands of dollars)		
2024	\$ 137,740	\$ 140,688	\$ 278,428
2025	149,910	131,242	281,152
2026	156,325	124,164	280,489
2027	164,930	116,697	281,627
2028	137,525	109,244	246,769
2029 – 2033 (combined)	495,365	456,201	951,566
2034 – 2038 (combined)	572,765	306,318	879,083
2039 – 2043 (combined)	433,490	197,452	630,942
2044 – 2048 (combined)	430,735	104,819	535,554
2049 – 2051 (combined)	<u>182,455</u>	<u>18,079</u>	<u>200,534</u>
Total requirements	<u>\$ 2,861,240</u>	<u>\$ 1,704,905</u>	<u>\$ 4,566,145</u>

Interest in the preceding table includes interest requirements for fixed rate debt at their stated rates, variable rate debt covered by interest rate swaps at their fixed rate, and variable rate debt not covered by interest rate swaps using the debt interest rate of 70.0 percent of 1 month SOFR plus a fixed fee. The SOFR rate is based on the rate in effect at December 31, 2023 for the issues. The 2019 Series B and 2023 Series D Put Bonds assume a 3.0 percent fixed rate coupon after mandatory remarketing.

The 2018 NCEA Put Bonds assume a 4.0 percent fixed rate coupon after mandatory remarketing. Principal in the preceding table includes known principal payments and the amortization schedule for mandatory remarketing bonds.

The following bonds have been issued and are outstanding at December 31, 2023:

<u>Date</u>	<u>Issue</u>	<u>Final Maturity</u>	<u>Interest Rate</u>	<u>Original Amount</u>	<u>Outstanding Amount</u>
(thousands of dollars)

2023 Bond Issuances. In June 2023, SMUD issued \$61.1 million of 2023 Series L Revenue Refunding Bonds. The purpose of this transaction was to refund the fixed rate debt associated with 2013 Series B bonds. Proceeds from the 2023 Series L bonds combined with swap termination receipt defeased all the outstanding Series 2013 Series B bonds. A total of \$75.7 million of bonds were defeased through a legal defeasance, and accordingly, the liability for the defeased bonds has been removed from Long-Term Debt - net in the Statements of Net Position. The refunding resulted in the recognition of a deferred accounting gain of \$5.5 million, which is being amortized over the life of the refunding issue. The 2023 Series L Refunding bonds reduced future aggregate debt service payments by \$18.1 million and resulted in a total economic gain of \$14.3 million, which is the difference between the present value of the old and new debt service payments.

In June 2023, SMUD issued \$132.0 million of 2023 Series C Subordinate Electric Revenue Refunding Bonds. The purpose of this transaction was to refund the fixed rate debt associated with 2013 Series A bonds. Proceeds from the 2023 Series C bonds defeased all the outstanding Series 2013 Series A bonds. A total of \$132.0 million of bonds were defeased through a legal defeasance, and accordingly, the liability for the defeased bonds has been removed from Long-Term Debt - net in the Statements of Net Position. The refunding resulted in the recognition of a deferred accounting gain of \$9.9 million, which is being amortized over the life of the refunding issue. As part of the issuance of 2023 Series C bonds, SMUD executed a Standby Bond Purchase Agreement for \$132.0 million with TD Bank. The 2023 Series C Refunding bonds are projected to reduce future aggregate debt service payments by \$79.9 million and resulted in a projected total economic gain of \$55.5 million, which is the difference between the present value of the old and new debt service payments.

In June 2023, SMUD issued \$100 million of 2023 Series D Subordinate Electric Revenue Refunding Bonds. The purpose of this transaction was to refund the fixed rate debt associated with 2019 Series A bonds and reimburse SMUD for capital projects in 2022. Proceeds from the 2023 Series D defeased all the outstanding Series 2019 Series A bonds. A total of \$100 million of bonds were defeased through a legal defeasance, and accordingly, the liability for the defeased bonds has been removed from Long-Term Debt - net in the Statements of Net Position. The 2023 Series D Subordinate Bonds have a mandatory put date of October 15, 2030. The refunding resulted in the recognition of a deferred accounting gain of \$0.6 million, which is being amortized over the life of the refunding issue.

In June 2023, SMUD issued \$200 million of 2023 Series K Revenue Bonds. The 2023 Series K Bonds have a fixed coupon rate 5.0 percent and amortize from 2037 to 2053. Proceeds from 2023 Series K Bonds were used to refund \$200 million of outstanding commercial paper.

2022 Bond Issuances. In June 2022, SMUD issued \$132.7 million of 2022 Series J Revenue Refunding Bonds. The purpose of this transaction was to refund the fixed rate debt associated with 2012 Series Y bonds. Proceeds from the 2022 Series J bonds combined with swap termination receipt defeased all the outstanding Series 2012 Series Y bonds. A total of \$157.8 million of bonds were defeased through a legal defeasance, and accordingly, the liability for the defeased bonds has been removed from Long-Term Debt - net in the Statements of Net Position. The refunding resulted in the recognition of a deferred accounting gain of \$6.7 million, which is being amortized over the life of the refunding issue. The 2022 refunding reduced future aggregate debt service payments by \$30.9 million and resulted in a total economic gain of \$28.6 million, which is the difference between the present value of the old and new debt service payments.

Terms of Debt Indentures. Debt indentures contain a provision that in an event of default, the holders of the majority of the debt outstanding are entitled to declare the outstanding amounts due immediately.

Interest Rate Swap Agreements. A summary of SMUD's two interest rate swap agreements as of December 31, 2023 are as follows. The credit ratings listed are from S&P.

Notional Amount (thousands)	SMUD Pays	Fixed Rate	Floating Rate	Termination Date	Counterparty Credit Rating
\$ 19,570	Variable	5.17%	SIFMA	07/01/24	BBB+
132,020	Fixed	0.7179%	70% of 1M SOFR	08/15/41	A

A summary of SMUD's four interest rate swap agreements as of December 31, 2022 are as follows:

Notional Amount (thousands)	SMUD Pays	Fixed Rate	Floating Rate	Termination Date	Counterparty Credit Rating
\$ 38,165	Variable	5.166%	SIFMA	07/01/24	BBB+
68,450	Fixed	2.894%	63% of 1 M LIBOR	08/15/28	A+
132,020	Fixed	0.7179%	70% of 1M LIBOR	08/15/41	A
75,680	Fixed	0.5543%	70% of 1M LIBOR	08/15/33	A

At December 31, 2023 and 2022, SMUD had a fixed-to-variable interest rate swap agreement with a notional amount of \$19.6 million and \$38.2 million, respectively, which is equivalent to the principal amount of SMUD's 1997 Series K Electric Revenue Bonds. Under this swap agreement, SMUD pays a variable rate equivalent to the Securities Industry and Financial

Markets Association (SIFMA) Index (3.87 percent and 3.66 percent at December 31, 2023 and 2022, respectively) and receives fixed rate payments of 5.17 percent as of December 31, 2023 and 5.166 percent as of December 31, 2022. In connection with the swap agreement, SMUD has a put option agreement, also with a notional amount of \$19.6 million and \$38.2 million as of December 31, 2023 and 2022, respectively, which gives the counterparty the right to sell to SMUD, at par, either the 1997 Series K Bonds, or a portfolio of securities sufficient to defease the 1997 Series K Bonds. SMUD receives fixed rate payments of 0.01 percent as of December 31, 2023 and December 31, 2022, in connection with the put option agreement. The exercise of the option terminates the swap at no cost to SMUD. The term of both the swap and the put is equal to the maturity of the 1997 Series K Bonds.

In September 2023, SMUD terminated the variable-to-fixed interest rate swap agreement with Morgan Stanley Capital Services at fair value. The termination of the swap resulted in SMUD receiving a one-time payment for \$0.05 million.

In June 2020, SMUD executed a variable-to-fixed interest rate swap agreement with Barclays Bank PLC with a notional amount of \$132.0 million for the purpose of fixing the effective interest rate associated with the potential refunding of the 2013 Series A Bonds. The Barclays 2013 Series A swap became effective in July 2023. Also, in June 2020, SMUD executed a variable-to-fixed interest rate swap agreement with Barclays Bank PLC with a notional amount of \$75.7 million for the purpose of fixing the effective interest rate associated with the potential refunding of the 2013 Series B Bonds. The Barclays 2013 Series B swap was terminated as part of the 2023 Series L bond refunding. The notional values of the one remaining swap is amortized over the life of their respective swap agreements. SMUD can terminate the swap agreement at any time, with payment or receipt of the fair market value of the swaps as of the date of termination. The obligations of SMUD under the swap agreements are not secured by a pledge of revenues of SMUD’s electric system or any other property of SMUD.

Component Unit Interest Rate Swap Agreements. NCGA had one interest rate swap agreement as of December 31, 2023, which is summarized as follows. The credit ratings listed are from S&P.

Notional Amount (thousands)	NCGA Pays	Fixed Rate	Floating Rate	Termination Date	Credit Support Provider Credit Rating
\$ 120,070	Fixed	4.304%	67% of 3M SOFR + .895%	07/01/27	A+

NCGA had one interest rate swap agreement as of December 31, 2022, which is summarized as follows. The credit ratings listed are from S&P.

Notional Amount (thousands)	NCGA Pays	Fixed Rate	Floating Rate	Termination Date	Credit Support Provider Credit Rating
\$ 142,935	Fixed	4.304%	67% of LIBOR + .72%	07/01/27	A+

At December 31, 2023 and 2022, NCGA had a variable-to-fixed interest rate swap agreement with a counterparty for the purpose of fixing the effective interest rate associated with the 2007 Series B Bonds. Due to LIBOR phaseout, NCGA amended the swap agreement from LIBOR to SOFR beginning October 1, 2023. NCGA pays the counterparty a fixed rate on the notional amount and receives a floating rate equal to 67 percent of the three-month SOFR (5.35 percent at December 31, 2023 and LIBOR rate of 0.10 percent at December 31, 2022) plus an interest rate spread, as specified in the swap agreement. The total notional amount of the swap at December 31, 2023 and 2022 was \$120.1 million and \$142.9 million, respectively, and was equivalent to the outstanding principal balance on the NCGA Bonds. The swap is amortized over the life of the swap agreement in a manner corresponding to the principal repayment schedule of the NCGA Bonds. Early termination of the swap would occur upon termination of the prepaid agreement for any reason. Upon early termination, the swap would have no value to either party.

Subordinated Electric Revenue Bonds. Payment of and interest on the Subordinated Electric Revenue Bonds is subordinate to the payment of the principal and interest on SMUD’s Electric Revenue Bonds.

Component Unit Bonds. The component units of SMUD have each issued bonds to finance their respective projects. The revenue stream to pay SFA bonds’ debt service is provided by a “take-or-pay” power purchase agreement and is therefore not dependent on the successful operation of the project. SMUD guarantees to make payments sufficient to pay principal and interest and all other payments required to be made under SFA’s indenture of trust. SFA is not required to repay SMUD for any amounts paid under this guarantee. The revenue stream to pay NCGA and NCEA bonds’ debt service is provided by “take-and-pay” purchase agreements. Therefore, principal and interest associated with these bonds are paid solely from the revenues and receipts collected in connection with the operation of the project. Most operating revenues earned by NCGA and NCEA are collected from SMUD in connection with the sale of gas or electricity to SMUD. The ability for NCGA and NCEA to service debt is dependent on various parties (particularly MSCG, as gas supplier for NCGA and J. Aron, as commodity supplier for NCEA) meeting their contractual obligations.

Callable Bonds. SMUD has \$620.8 million of Electric Revenue Bonds that are currently callable, \$450.0 million of which are fixed rate Build America Bonds debt, \$132.0 million of the 2023 Series C bonds, and \$38.8 million of 2016 Series D Bonds. SMUD also no bonds that become callable from 2024 through 2028. SMUD also has a four-month call period on the 2019 Series B Bonds and 2023 Series D in advance of their mandatory remarketing purchase date in 2025 and 2030, respectively.

Collateral. The principal and interest on SMUD’s bonds are payable exclusively from, and are collateralized by, a pledge of the net revenues of SMUD’s electric system. Neither the credit nor the taxing power of SMUD is pledged to the payment of the bonds and the general fund of SMUD is not liable for the payment thereof.

Covenants. SMUD’s bond resolutions contain various covenants that include requirements to maintain minimum debt service coverage ratios, certain other financial ratios, stipulated minimum funding of revenue bond reserves, and various other requirements including a rate covenant to raise rates to maintain minimum debt service coverage.

SMUD has pledged future net electric revenues, component unit net project revenues, and net gas supply prepayment revenues to repay, in electric revenue, component unit project revenue, and gas supply prepayment revenue bonds issued from 1997 through 2023. Proceeds from the bonds provided financing for various capital improvement projects, component unit capital projects, and the prepayments of a twenty-year supply of natural gas and a thirty-year supply of commodity. The bonds are payable solely from the net revenues generated by SMUD’s electrical sales, component unit project revenues, and gas supply prepayment revenues and are payable through 2053 at December 31, 2023.

GASB Statement No. 48, “*Sales and Pledges of Receivables and Future Revenues and Intra-Entity Transfers of Assets and Future Revenues,*” disclosures for pledged revenues are as follows:

	December 31,	
	2023	2022
	(thousands of dollars)	
Pledged future revenues	\$ 2,861,240	\$ 2,814,000
Principal and interest payments for the year ended	\$ 589,801	\$ 438,725
Total net revenues for the year ended	\$ 847,657	\$ 574,300
Total remaining principal and interest to be paid	\$ 4,566,145	\$ 4,383,545
Annual principal and interest payments as a percent of net revenues for the year ended	70%	76%

NOTE 11. COMMERCIAL PAPER NOTES

SMUD issues Commercial Paper Notes (Notes) to finance or reimburse capital expenditures. SMUD’s commercial paper program is \$400.0 million. At December 31, 2023 and 2022, respectively, there were \$150.0 million Notes outstanding. SMUD’s commercial paper program is backed by \$407.4 million in letter of credit agreements (LOCs) and a revolving credit agreement with three separate banks. The LOCs are calculated as the sum of the maximum principal amount of the Notes plus interest thereon at a maximum rate of ten percent per annum for a period of 90 days calculated on the basis of a year of 365 days and the actual number of days elapsed. There have not been any term advances under the LOCs or the revolving credit agreement. The LOCs and revolving credit agreement contain a provision that in an event of default, the outstanding amounts may become immediately due.

The summarized activity of SMUD’s Notes during 2023 and 2022 is presented below:

	Balance at Beginning of Year	Additions	Reductions	Balance at End of Year
	(thousands of dollars)			
December 31, 2023	\$ 150,000	\$ 200,000	\$ 200,000	\$ 150,000
December 31, 2022	\$ -0-	\$ 150,000	\$ -0-	\$ 150,000

NOTE 12. FAIR VALUE MEASUREMENT

GASB No. 72 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). SMUD utilizes market data or assumptions that market participants would use in pricing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation technique.

GASB No. 72 establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy defined by GASB No. 72 are as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 inputs are inputs other than quoted prices included in Level 1 that are observable for an asset or liability, either directly or indirectly.
- Level 3 inputs are unobservable inputs that reflect SMUD’s own assumptions about factors that market participants would use in pricing the asset or liability.

The valuation methods of the fair value measurements are as follows:

- LAIF – uses the fair value of the pool’s share price multiplied by the number of shares held. This pool can include a variety of investments such as U.S. government securities, federal agency securities, negotiable certificates of deposit, bankers’ acceptances, commercial paper, corporate bonds, bank notes, and other investments. The fair values of the securities are generally based on quoted and/or observable market prices.
- U.S. Government Agency Obligations – uses a market-based approach which considers yield, price of comparable securities, coupon rate, maturity, credit quality and dealer-provided prices.
- U.S. Treasury Obligations – uses a market approach based on institutional bond quotes. Evaluations are based on various market and industry inputs.
- Corporate Notes – uses a market-based approach. Evaluations are based on various market and industry inputs.

- Municipal Bonds – uses a market approach based on institutional bond quotes. Evaluations are based on various market and industry inputs.
- Hedging and Investment Derivative Instruments:
 - Interest rate swap agreements – uses the present value technique. The fair value of the interest rate swap agreements are calculated by discounting the expected cash flows. The cash flows and discount rates are estimated based on a 1-month SOFR forward curve from Bloomberg and assuming SIFMA is equal to 70.0 percent of 1-month SOFR.
 - Gas related agreements – uses the market approach based on monthly quoted prices from an independent external pricing service. The fair values for natural gas and electricity derivative financial instruments are calculated based on prevailing market quotes in active markets (i.e., Henry Hub and So Cal) where identical contracts are available. When external quoted market prices are not available, SMUD uses an internally developed valuation model utilizing short-term-observable inputs.

The following tables identify the level within the fair value hierarchy that SMUD’s financial assets and liabilities were accounted for on a recurring basis as of December 31, 2023 and 2022, respectively. As required by GASB No. 72, financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. SMUD’s assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the valuation of the fair value of liabilities and their placement within the fair value hierarchy levels.

Recurring Fair Value Measures

	At fair value as of December 31, 2023		
	Level 1	Level 2	Total
	(thousands of dollars)

NOTE 13. ACCRUED DECOMMISSIONING LIABILITY

Asset Retirement Obligations (ARO). SMUD recognizes AROs for its Rancho Seco nuclear power plant facility and the CVFA power plant facility. GASB No. 83 requires measurement of the ARO be based on the best estimate of the current value of outlays expected to be incurred. The best estimate should be determined using all available evidence and requires probability weighting of potential outcomes when sufficient evidence is available. This statement also requires the current value be adjusted for the effects of the general inflation or deflation and an evaluation of relevant factors that may significantly change the estimated asset retirement outlays at least annually.

Rancho Seco Nuclear Power Plant. With the completion of nuclear decommissioning of the former 913 MW nuclear power plant, and the subsequent termination of the 10 Code of Federal Regulations (CFR) 50 license by the Nuclear Regulatory Commission (NRC) effective August 31, 2018, all remaining Rancho Seco decommissioning liability relates to the Independent Spent Fuel Storage Installation (ISFSI) licensed under 10 CFR Part 72. Nuclear decommissioning is the process of safely removing nuclear facilities from service and reducing residual radioactivity to a level that permits termination of the NRC licenses and release of the property for unrestricted use. Final decommissioning of the ISFSI will occur after the spent nuclear fuel (SNF) and Greater Than Class C (GTCC) radioactive waste is removed from the site and SMUD demonstrates that the site is suitable for release in accordance with release criteria specified in 10 CFR 20, Subpart E and an approved License Termination Plan.

The Department of Energy (DOE), under the Nuclear Waste Policy Act (NWPA) of 1982 as amended, is responsible for permanent disposal of spent nuclear fuel and GTCC radioactive waste, which are currently stored in the Part 72 licensed ISFSI. SMUD has a contract with the DOE for the removal and disposal of SNF and GTCC waste. All SMUD's SNF and

GTCC waste are currently stored in sealed canisters in the ISFSI. However, the date when DOE will remove the fuel and GTCC waste is uncertain. In 2010, the DOE formally withdrew the application for licensing of Yucca Mountain as a high-level waste repository. The DOE also announced in January 2010 the creation of a Blue-Ribbon Commission to study alternatives for developing a repository for the nation's used nuclear fuel. The Commission provided a final report on alternatives in January 2012. The DOE evaluated the recommendations and published the report "Strategy for the Management and Disposal of Used Nuclear Fuel and High-Level Radioactive Waste" in January 2013.

The next phase of the process will be for Congress and the President of the United States to consider the recommendations and enact legislation to implement the recommendations. At this time, two license applications have been submitted to the NRC for the construction and operation of Consolidated Interim Storage Facility(s) that would store SNF and GTCC waste on an interim basis. One of these applications has been approved (and a license issued) and one application is currently under review by the NRC. Should the NRC license one or both facilities, Congress will have to modify the NWPA to allow for its use. In May 2018, the U.S. House of Representatives passed H.R. 3053 – the Nuclear Waste Policy Amendments Act, which was co-sponsored by Representative Doris Matsui and 109 other members of Congress. This bill includes a provision to allow a Consolidated Interim Storage Facility to store fuel from permanently shut down sites like Rancho Seco. The U.S. Senate did not act on the bill. Until legislation is passed which includes a significant step towards removal of the used nuclear fuel at the Rancho Seco facility, SMUD is committed to the safe and secure storage of its SNF and GTCC waste under its Part 72 license until DOE fulfills its obligation to dispose of this material in accordance with NWPA. In support of this commitment, SMUD submitted its ISFSI license renewal application to the NRC in March of 2018. The NRC issued Renewed Licensee No. SNM-2510 on March 9, 2020. This renewed license authorizes the continued storage of SMUD's SNF and GTCC until June 30, 2060.

The Rancho Seco decommissioning liability is based on an internal study of the remaining decommissioning costs, which consist of: 1) annual spent fuel management costs, 2) transportation of the canisters in the ISFSI and 3) termination of the Part 72 license. The largest part of the decommissioning estimate is the annual spent fuel management costs; next year's annual budget is used for the estimate. The other costs were estimated based on prior experience and studies and prepared by management representatives of the nuclear power plant facility. The costs in the estimate were in 2019 dollars. An employment cost index was used to adjust the other costs portion of the obligation for inflation in 2023. Probability weighting was assigned for two scenarios: 1) spent nuclear fuel will be removed from the site by 2028 and 2) spent nuclear fuel will be removed from the site by 2035. SMUD uses its Trust Fund (see Note 2) to demonstrate financial assurance to the NRC that there are enough funds to complete the termination of the Part 72 license; the balance of the Trust Fund at December 31, 2023 is \$9.4 million.

SFA's Carson Power Plant (Carson). SFA's ground lease agreement with the Sacramento Regional County Sanitation District for Carson requires SFA to restore the premises to its original condition upon termination of the contract. A new study to determine the current value of the asset retirement obligation was conducted by an external contractor who specializes in decommissioning studies. The expected costs and scope of work were based on the most recent cost estimate and assumes a contractor will be responsible for the work and that decommissioning would take place between 2025 and 2027. The estimated costs were in 2018 dollars. The result of this study was used to determine the new balance of the ARO and the deferred outflows at January 1, 2018, in order to account for the 2018 activity. The annual All Urban Consumer Price Index was used to adjust this obligation for inflation in 2023. The remaining useful life of Carson's assets is 2 years at December 31, 2023.

The current portion of the Accrued Decommissioning liability represents SMUD's estimate of actual expenditures for Rancho Seco in the next year, as set forth in the annual budget.

At December 31, 2023 and 2022, SMUD's Accrued Decommissioning balance in the Statements of Net Position was \$120.9 million and \$95.9 million, respectively.

NOTE 14. PENSION PLANS

Summary of Significant Accounting Policies. For purposes of measuring net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the pension plans and additions to/deductions from the fiduciary net position have been determined on the same basis as they are reported by the California Public Employees’ Retirement System (PERS) Financial Office. For this purpose, benefit payments (including refunds of employee contributions) are recognized when currently due and payable in accordance with the benefit terms. Investments are reported at fair value.

Plan Description and Benefits Provided. SMUD participates in PERS, an agent multiple-employer public employee defined benefit pension plan (PERS Plan). PERS provides retirement and disability benefits, annual cost-of-living adjustments, and death benefits to plan members and beneficiaries. PERS acts as a common investment and administrative agent for participating public entities within the State. Benefit provisions and all other requirements are established by State statute and SMUD policies. The pension plan provides retirement benefits, survivor benefits, and death and disability benefits based upon employee’s years of credited service, age, and final compensation. A full description of the pension plan regarding number of employees covered, benefit provision, assumptions (for funding, but not accounting purposes), and membership information are included in the annual actuarial valuation reports as of June 30, 2022 and June 30, 2021.

GASB No. 68 requires that the reported results must pertain to liability and asset information within certain defined timeframes. The following timeframes are used for the year ended:

PERS Plan	December 31,	
	2023	2022
Valuation date	June 30, 2022	June 30, 2021
Measurement date	June 30, 2023	June 30, 2022

Employees Covered by Benefit Terms. The following employees were covered by the benefit terms for the year ended:

PERS Plan	December 31,	
	2023	2022
Inactive employees or beneficiaries currently receiving benefit payments	3,172	3,116
Inactive employees entitled to but not yet receiving benefit payments	1,033	987
Active employees	2,174	2,168
Total employees covered by benefit terms	6,379	6,271

Contributions. Section 20814(c) of the California Public Employees’ Retirement Law requires that the employer contribution rates for all public employers be determined on an annual basis by the actuary and shall be effective on the July 1 following notice of a change in the rate. The total plan contributions are determined through PERS’ annual actuarial valuation process. The actuarially determined rate is the estimated amount necessary to finance the costs of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability. The employer is required to contribute the difference between the actuarially determined rate and the contribution rate of employees. For the PERS fiscal years ended June 30, 2023 and 2022, the average active employee contribution rate is 6.8 percent of annual pay. For the PERS fiscal year ended June 30, 2023, the employer’s contribution rate is 8.9 percent of annual payroll plus \$22.4 million for the unfunded accrued liability contribution. For the PERS fiscal year ended June 30, 2022, the employer’s contribution rate is 9.0 percent of annual payroll plus \$36.3 million for the unfunded accrued liability contribution. Employer contribution rates may change if plan contracts are amended. For the fiscal years ended June 30, 2023 and 2022, SMUD made contributions recognized by the PERS Plan in the amount of \$92.5 million and \$114.5 million, respectively.

Net Pension Asset (NPA) or Liability (NPL). SMUD’s NPA or NPL at December 31, 2023 and 2022 was measured at June 30, 2023 and 2022, respectively. The total pension liability used to calculate the NPA or NPL was determined by actuarial valuations as of June 30, 2022 and 2021 rolled forward using generally accepted actuarial procedures to the June 30, 2023 and 2022 measurement dates for the PERS Plan.

Actuarial Methods and Assumptions. The actuarial methods and assumptions used for the December 31, 2023 and December 31, 2022 total pension liabilities are as follows for the PERS Plan:

December 31, 2023:

Actuarial Cost Method	Entry age actuarial cost method
Discount Rate	6.90%
Inflation	2.3%
Salary Increases	Varies by entry age and service
Mortality Rate Table	The mortality table used was developed based on PERS’ specific data. The probabilities of mortality are based on the 2021 <i>CalPERS Experience Study and Review of Actuarial Assumptions</i> . Mortality rates incorporate full generational mortality improvement using 80% of scale MP-2020 published by the Society of Actuaries.
Post Retirement Benefit Increase	For 2023 and 2022, the lesser of contract COLA or 2.30% until Purchasing Power Protection Allowance floor on purchasing power applies, 2.30% thereafter.

December 31, 2022:

Actuarial Cost Method	Entry age actuarial cost method
Discount Rate	6.90%
Inflation	2.30%
Salary Increases	Varies by entry age and service
Mortality Rate Table	The mortality table used was developed based on PERS’ specific data. The probabilities of mortality are based on the 2021 PERS Experience Study for the period from 2001 to 2019. Pre-retirement and Post-retirement mortality rates include generational mortality improvement using the Society of Actuaries Scale 80% of scale MP-2020.
Post Retirement Benefit Increase	For 2022 and 2021, the lesser of contract COLA or 2.30% until Purchasing Power Protection Allowance floor on purchasing power applies, 2.30% thereafter.

Discount Rates. For the PERS Plan, the discount rate used to measure the total pension liability for the years ended December 31, 2023 and 2022 was 6.90 percent. For the year ended December 31, 2023, the projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current member contribution rates and that contributions from employers will be made at statutorily required rates, actuarially determined. Based on those assumptions, the PERS Plan’s fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. Using historical returns of all the funds’ asset classes, expected compound (geometric) returns were calculated over the next 20 years using a building-block approach. The expected rate of return was then adjusted to account for assumed administrative expenses of 10 Basis points.

The expected real rates of return by asset class used for December 31, 2023 are as follows:

<u>Asset Class</u>	<u>Current Target Assumed Asset Allocation</u>	<u>Real Return</u>
Global Equity – Cap-weighted	30.0%	4.54%
Global Equity – Non-Cap-weighted	12.0%	3.84%
Private Equity	13.0%	7.28%
Treasury	5.0%	0.27%
Mortgage-backed Securities	5.0%	0.50%
Investment Grade Corporates	10.0%	1.56%
High Yield	5.0%	2.27%
Emerging Market Debt	5.0%	2.48%
Private Debt	5.0%	3.57%
Real Estate	15.0%	3.21%
Leverage	(5.0)%	(0.59)%

The expected real rates of return by asset class used for December 31, 2022 are as follows:

<u>Asset Class</u>	<u>Current Target Assumed Asset Allocation</u>	<u>Real Return</u>
Global Equity – Cap-weighted	30.0%	4.54%
Global Equity – Non-Cap-weighted	12.0%	3.84%
Private Equity	13.0%	7.28%
Treasury	5.0%	0.27%
Mortgage-backed Securities	5.0%	0.50%
Investment Grade Corporates	10.0%	1.56%
High Yield	5.0%	2.27%
Emerging Market Debt	5.0%	2.48%
Private Debt	5.0%	3.57%
Real Estate	15.0%	3.21%
Leverage	(5.0)%	(0.59)%

Changes in the NPA or NPL. The following table shows the changes in NPA or NPL recognized over the year ended December 31, 2023:

	Total Pension Liability (a)	Increase (Decrease) Plan Fiduciary Net Position (b)	Net Pension (Asset) Liability (a) – (b)
		(thousands of dollars)	
Balances at January 1, 2023	\$ 2,553,780	\$ 2,318,329	\$ 235,451
Changes recognized for the measurement period:

Sensitivity of the NPA or NPL to Changes in the Discount Rate. The following presents the NPA or NPL of the Plan as of the measurement date, calculated using the current discount rate, as well as what the NPA or NPL would be if it were calculated using a discount rate that is 1 percentage-point lower or 1 percentage-point higher than the current discount rate:

PERS Plan	1% Decrease <u>(5.90%)</u>	Current Discount <u>Rate (6.90%)</u>	1% Increase <u>(7.90%)</u>
	(thousands of dollars)		
Plan's NPL (NPA), December 31, 2023	\$ 599,774	\$ 259,010	\$ (24,014)
Plan's NPL (NPA), December 31, 2022	\$ 562,974	\$ 235,451	\$ (36,397)

Pension Plan Fiduciary Net Position. Detailed information about the PERS Plan's fiduciary net position is available in the separately issued PERS Plan financial statements. This report, the audited financial statements, and other reports can be obtained at the PERS' website at www.calpers.ca.gov.

Pension Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions. For the years ended December 31, 2023 and 2022, SMUD recognized pension expense of \$44.8 million and \$20.5 million, respectively.

At December 31, 2023 and 2022, SMUD reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	<u>December 31,</u>	
	<u>2023</u>	<u>2022</u>
	(thousands of dollars)	
Deferred outflows of resources:		
Changes of assumptions	13,457	19,866
Differences between expected and actual experience	40,200	2,495
Differences between projected and actual earnings on pension plan investments	115,364	121,257
Employer's contributions to the Plan subsequent to the measurement of total pension liability	<u>13,468</u>	<u>31,860</u>
Total deferred outflows of resources	<u>\$ 182,489</u>	<u>\$ 175,478</u>
Deferred inflows of resources:		
Changes of assumptions	\$ -0-	\$ -0-
Differences between expected and actual experience	17,536	26,656
Differences between projected and actual earnings on pension plan investments	<u>-0-</u>	<u>-0-</u>
Total deferred inflows of resources	<u>\$ 17,536</u>	<u>\$ 26,656</u>

Amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be subject to regulatory accounting as follows (see Note 8):

Year ended December 31:

2024	\$	32,532
2025		25,969
2026		89,390
2027		3,594
2028		-0-
Thereafter		-0-

Other Plans. SMUD provides its employees with two cash deferred compensation plans: one pursuant to Internal Revenue Code (IRC) Section 401(k) (401(k) Plan) and one pursuant to IRC Section 457 (457 Plan) (collectively, the Plans). The Plans are contributory plans in which SMUD’s employees contribute the funds. Each of SMUD’s eligible full-time or permanent part-time employees may participate in either or both Plans, and amounts contributed are vested immediately. Such funds are held by a Trustee in trust for the employees upon retirement from SMUD service and, accordingly, are not subject to the general claims of SMUD’s creditors. SMUD is responsible for ensuring compliance with IRC requirements concerning the Plans and has the fiduciary duty of reasonable care in the selection of investment alternatives, but neither SMUD, nor its Board or officers have any liability for market variations in the Plans’ asset values. SMUD employees are responsible for determining how their funds are to be invested and pay all ongoing fees related to the Plans. The Plans are currently not subject to discrimination testing, nor the requirements of the Employee Retirement Income Security Act of 1974. SMUD employees participating in the Plans are allowed to contribute a portion of their gross income not to exceed the annual dollar limits prescribed by the IRC.

SMUD makes annual contributions to the 401(k) Plan on behalf of certain employees pursuant to a memorandum of understanding with both of its collective bargaining units. SMUD also matches non-represented employee contributions to the 401(k) Plan up to a set amount. SMUD made contributions into the 401(k) Plan of \$6.9 million in 2023 and \$7.0 million in 2022. SMUD does not match employee contributions, nor make contributions on behalf of its employees to the 457 Plan. Participating employees made contributions into both Plans totaling \$34.3 million in 2023 and \$32.4 million in 2022.

NOTE 15. OTHER POSTEMPLOYMENT BENEFITS

Summary of Significant Accounting Policies. For purposes of measuring the net OPEB asset or liability, deferred outflows of resources and deferred inflows of resources related to OPEB, and OPEB expense, information about the fiduciary net position of the OPEB plan and additions to/deductions from the OPEB plan’s fiduciary net position have been determined on the same basis as they are reported by the California Employers’ Retiree Benefit Trust (CERBT). For this purpose, SMUD recognizes benefit payments when due and payable in accordance with the benefit terms. Investments are reported at fair value.

Plan Description and Benefits Provided. SMUD is a member of CERBT. The CERBT Fund is an IRC Section 115 Trust set up for the purpose of receiving employer contributions to prefund OPEB for retirees and their beneficiaries. CERBT is an agent multiple-employer defined benefit OPEB plan (OPEB Plan) administered by PERS. The OPEB Plan provides medical, dental and long-term disability benefits for retirees and their beneficiaries, in accordance with SMUD policy and negotiated agreements with employee representation groups. The benefit, benefit levels, retiree contributions and employer contributions are governed by SMUD and can be amended by SMUD through its personnel manual and union contracts. Any changes to these benefits would be approved by SMUD’s Board and unions.

Employees Covered by Benefit Terms. The following employees were covered by the benefit terms:

	December 31,	
	2023	2022
Inactive employees or beneficiaries currently receiving benefit payments	2,367	2,349
Inactive employees entitled to but not yet receiving benefit payments	44	46
Active employees	<u>2,202</u>	<u>2,144</u>
Total employees covered by benefit terms	<u>4,613</u>	<u>4,539</u>

Contributions. OPEB contributions are elective and not required. In December 2018, SMUD split its CERBT assets across two asset strategies to better align trust assets with liabilities (Strategy 1 for active employees and retirements after June 30, 2018 and Strategy 3 for retirements before July 1, 2018). SMUD contributes the normal cost to the CERBT, and annually receives reimbursement for cash benefit payments from the CERBT. SMUD may also elect to put additional contributions into the OPEB Plan. For the OPEB Plan’s fiscal years ended June 30, 2023 and 2022, SMUD made contributions recognized by the OPEB Plan in the amounts of \$9.1 million and \$0.9 million, respectively.

Net OPEB Asset (NOA) or Liability (NOL). SMUD’s NOL at December 31, 2023 and 2022 were measured as of June 30, 2023 and 2022, respectively, and the total OPEB liability used to calculate the NOL was determined by actuarial valuations as of those dates.

Actuarial Methods and Assumptions. The actuarial methods and assumptions used for the December 31, 2023 and December 31, 2022 total OPEB liabilities are as follows:

Discount Rate	6.02% (2023). Blended discount rate based on projected benefit streams expected to be paid from each Strategy. 5.88% (2022)
General Inflation	2.50% (2023 and 2022)
Mortality, Retirement, Disability, Termination	CalPERS 2000-2019 Experience Study (2023 and 2022)
Mortality Improvement	Mortality projected fully generational with Scale MP-2021 (2023 and 2022)
Salary Increases	Aggregate – 2.75%; Merit - CalPERS 2000-2019 Experience Study (2023 and 2022)
Healthcare Cost Trend Rates	Non-Medicare: 8.50% for 2025, decreasing to an ultimate rate of 3.45% in 2076 (2023), 6.25% for 2024, decreasing to an ultimate rate of 3.75% in 2076 (2022) Medicare: 7.50% for 2025, decreasing to an ultimate rate of 3.45% in 2076 (2023), 5.45% for 2024, decreasing to an ultimate rate of 3.75% in 2076 (2022) Kaiser Medicare: 6.25% for 2025, decreasing to an ultimate rate of 3.45% in 2076 (2023), 4.45% for 2024, decreasing to an ultimate rate of 3.75% in 2076 (2022)

Discount Rates. For the OPEB Plan, the discount rate used to measure the total OPEB liability was 6.02 percent and 5.88 percent for the years ended December 31, 2023 and 2022, respectively. This rate is a blended discount rate based on projected benefit streams expected to be paid from Strategies 1 and 3. The projection of cash flows used to determine the discount rate assumed that SMUD contributes the full normal cost to the trust and only takes reimbursement from the trust of the cash benefit payments. Because the implied subsidy benefit payments have a larger present value than the payments toward the unfunded accrued liability, there should be sufficient plan assets to pay all benefits from the trust. Based on those assumptions, the OPEB Plan’s fiduciary net position was projected to be available to make all projected OPEB payments for current active and inactive employees. The long-term expected rate of return of 6.25 percent for Strategy 1 and 5.25 percent for Strategy 3 was applied to all periods of projected benefit payments to determine the total OPEB liability for the years ended December 31, 2023 and 2022, respectively.

The expected real rates of return by asset class used and presented as geometric means for December 31, 2023 are as follows:

<u>Asset Class</u>	<u>Target Allocation CERBT Strategy 1</u>	<u>Expected Real Rate of Return</u>
Global Equity	49.0%	4.56%
Fixed Income	23.0%	1.56%
TIPS	5.0%	(0.08%)
Commodities	3.0%	1.22%
REITS	20.0%	4.06%

<u>Asset Class</u>	<u>Target Allocation CERBT Strategy 3</u>	<u>Expected Real Rate of Return</u>
Global Equity	23.0%	4.56%
Fixed Income	51.0%	1.56%
TIPS	9.0%	(0.08%)
Commodities	3.0%	1.22%
REITS	14.0%	4.06%

The expected real rates of return by asset class used and presented as geometric means for December 31, 2022 are as follows:

<u>Asset Class</u>	<u>Target Allocation CERBT Strategy 1</u>	<u>Expected Real Rate of Return</u>
Global Equity	49.0%	4.56%
Long US Treasuries	5.1%	0.29%
Mortgage-Backed Securities	5.1%	0.49%

Sensitivity of the NOA or NOL to Changes in the Discount Rate. The following presents the NOA or NOL of SMUD as of the measurement date, calculated using the current discount rate, as well as what the NOA or NOL would be if it were calculated using a discount rate that is 1 percentage-point lower or 1 percentage-point higher than the current discount rate:

	<u>1% Decrease</u> <u>(5.02%)</u>	<u>Current Discount</u> <u>Rate (6.02%)</u>	<u>1% Increase</u> <u>(7.02%)</u>
		(thousands of dollars)	
NOL/(NOA), December 31, 2023	\$ 73,469	\$ 25,334	\$ (14,929)

	<u>1% Decrease</u> <u>(4.88%)</u>	<u>Current Discount</u> <u>Rate (5.88%)</u>	<u>1% Increase</u> <u>(6.88%)</u>
		(thousands of dollars)	
NOL/(NOA), December 31, 2022	\$ 52,612	\$ 6,753	\$ (31,557)

Sensitivity of the NOA or NOL to Changes in the Healthcare Cost Trend Rates. The following presents the NOA or NOL of SMUD as of the measurement date, calculated using the current healthcare cost trend rate, as well as what the NOA or NOL would be if it were calculated using a healthcare cost trend rate that is 1 percentage-point lower or 1 percentage-point higher than the current healthcare trend rate (see assumptions above for healthcare trend rate):

	<u>1% Decrease</u>	<u>Current Healthcare</u> <u>Trend Rate</u>	<u>1% Increase</u>
		(thousands of dollars)	
(NOA)/ NOL, December 31, 2023	\$ (19,159)	\$ 25,334	\$ 79,674
(NOA)/ NOL, December 31, 2022	\$ (35,780)	\$ 6,753	\$ 58,812

OPEB Plan Fiduciary Net Position. Detailed information about the OPEB Plan’s fiduciary net position is available in the separately issued OPEB Plan’s report. This report can be obtained at the PERS’ website at www.calpers.ca.gov.

OPEB Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to OPEB. For the years ended December 31, 2023 and 2022, SMUD recognized OPEB expense of \$9.1 million and \$31.6 million, respectively.

At December 31, 2023 and 2022, SMUD reported deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources:

	December 31,	
	2023	2022
	(thousands of dollars)	
Deferred outflows of resources:		
Changes of assumptions	\$ 19,382	\$ 8,919
Differences between projected and actual earnings on OPEB plan investments	31,335	32,477
Employer's contributions to the OPEB Plan subsequent to the measurement of total OPEB liability	<u>11,988</u>	<u>12,278</u>
Total deferred outflows of resources	<u>\$ 62,705</u>	<u>\$ 53,674</u>
Deferred inflows of resources:		
Changes of assumptions	\$ 8,224	\$ 11,428
Differences between expected and actual experience	29,894	38,410
Differences between projected and actual earnings on OPEB plan investments	<u>-0-</u>	<u>-0-</u>
Total deferred inflows of resources	<u>\$ 38,118</u>	<u>\$ 49,838</u>

Amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be subject to regulatory accounting as follows (see Note 8):

Year ended December 31:	
2024	\$ (1,526)
2025	(2,150)
2026	13,660
2027	653
2028	1,962
Thereafter	-0-

NOTE 16. INSURANCE PROGRAMS AND CLAIMS

SMUD is exposed to various risks of loss related to torts, theft of and destruction to assets, errors and omissions, cyber activities, natural disasters, employee injuries and illnesses, and other exposures. SMUD carries commercial insurance coverage to cover most claims in excess of specific dollar thresholds, ranging from \$5.0 thousand to \$5.0 million per claim. General liability limits are \$140.0 million, excess of a \$5.0 million self-insured retention. As of December 31, 2023, wildfire liability limits are \$275.0 million (\$212.5 million commercial insurance plus \$62.5 million self-insured retention). SMUD's property insurance coverage is based on the replacement value of the asset. There have been no significant reductions in insurance coverage. In 2023, 2022, and 2021, the insurance policies in effect have adequately covered all settlements of the claims against SMUD. No claims have exceeded the limits of property or liability insurance in any of the past three years. In 2022, SMUD filed a property claim for both equipment damage and business interruption insurance for the Cosumnes Power Plant outage. SMUD received \$13.6 million for the equipment damage claim in 2023 and a \$50.0 million advance on the business interruption portion of that claim in 2022. The equipment damage portion of the claim has been settled, and business interruption was partially settled and is anticipated to be fully settled in 2024.

The claims liability is included as a component of Self Insurance and Other in the Statements of Net Position.

SMUD's total claims liability, comprising claims received and claims incurred but not reported, at December 31, 2023, 2022 and 2021 is presented below:

	<u>2023</u>	<u>2022</u>	<u>2021</u>
	(thousands of dollars)		
Workers' compensation claims	\$ 6,926	\$ 7,554	\$ 8,666
General and auto claims	3,474	3,178	3,596
Short and long-term disability claims	<u>68</u>	<u>58</u>	<u>47</u>
Claims liability	<u>\$ 10,468</u>	<u>\$ 10,790</u>	<u>\$ 12,309</u>

Changes in SMUD's total claims liability during 2023, 2022 and 2021 are presented below:

	<u>2023</u>	<u>2022</u>	<u>2021</u>
	(thousands of dollars)		
Claims liability, beginning of year	\$ 10,790	\$ 12,309	\$ 13,024
Add: provision for claims, current year	2,635	1,556	1,450
(Decrease) increase in provision for claims in prior years	1,752	1,826	(122)
Less: payments on claims attributable to current and prior years	<u>(4,709)</u>	<u>(4,901)</u>	<u>(2,043)</u>
Claims liability, end of year	<u>\$ 10,468</u>	<u>\$ 10,790</u>	<u>\$ 12,309</u>

NOTE 17. COMMITMENTS

Electric Power and Gas Supply Purchase Agreements. SMUD has numerous power purchase agreements with other power producers to purchase capacity, transmission, and associated energy to supply a portion of its load requirements. SMUD has minimum take-or-pay commitments for energy on some contracts. SMUD has numerous long-term natural gas supply, gas transportation and gas storage agreements with Canadian and U.S. companies to supply a portion of the consumption needs of SMUD's natural gas-fired power plants.

At December 31, 2023, the approximate minimum obligations for the "take-or-pay" contracts over the next five years are as follows:

	<u>Electric</u>	<u>Gas</u>
	(thousands of dollars)	
2024	\$ 40,409	\$ 9,985
2025	32,283	9,610
2026	38,409	8,191
2027	104,279	7,731
2028	104,926	7,839

At December 31, 2023, the approximate minimum obligations for the remaining contracts, assuming the energy or gas is delivered over the next five years, are as follows:

	<u>Electric</u>	<u>Gas</u>
	(thousands of dollars)	
2024	\$ 284,064	\$ 118,258
2025	292,563	95,330
2026	297,241	98,606
2027	221,482	95,014
2028	222,918	91,503

Contractual Commitments beyond 2028 - Electricity. Several of SMUD’s purchase power and transmission contracts extend beyond the five-year summary presented above. These contracts expire between 2029 and 2057 and provide for power under various terms and conditions. SMUD estimates its annual minimum commitments under the take-or-pay contracts ranges between \$105.8 million in 2029 and \$2.8 million in 2057. SMUD estimates its annual minimum commitments under the remaining contracts, assuming the energy is delivered, ranges between \$223.7 million in 2029 and \$8.3 million in 2053. The Base Resource contract enables SMUD to receive a percentage of the amount of energy made available by Western, after meeting Central Valley Project use requirements, in any given year at a percent share of their revenue requirement; and SMUD has contracted for additional base resource power with no commitment until called upon. SMUD’s largest purchase power source (in volume) is the Country Acres contract, where SMUD has contracted ownership of 344MW’s of Solar PV generation and 172 MW’s battery energy storage capacity. The Country Acres contract expires on December 31, 2057.

Contractual Commitments beyond 2028 - Gas. Several of SMUD’s natural gas supply, gas transportation and gas storage contracts extend beyond the five-year summary presented above. These contracts expire between 2029 and 2049 and provide for transportation and storage under various terms and conditions. SMUD estimates its annual minimum commitments under the take-or-pay contracts ranges between \$7.9 million in 2029 and \$1.1 million in 2049. SMUD estimates its annual minimum commitments under the remaining contracts, assuming the gas is delivered, ranges between \$89.7 million in 2029 and \$10.1 million in 2049.

Electric Power Price Swap Agreements. SMUD has entered into multiple variable to fixed rate swap with a notional amount totaling 242,950 megawatt hours (MWh) for the purpose of fixing the rate on SMUD’s electric power purchases. This electric power price swap agreement results in SMUD paying fixed rates ranging from \$38.75 to \$161 per MWh. The swap agreements expire between January and October 2024.

Gas Price Swap Agreements. SMUD has entered into numerous variable to fixed rate swaps with notional amounts totaling 123,527,500 Dths for the purpose of fixing the rate on SMUD’s natural gas purchases for its gas-fueled power plants and gas indexed electric contracts. These gas price swap agreements result in SMUD paying fixed rates ranging from \$2.210 to \$6.431 per Dth. The swap agreements expire periodically from January 2024 through December 2026.

Gas Transport Capacity Agreements. SMUD has multiple long-term natural gas transport capacity agreements with U.S. companies to transport natural gas to SMUD’s natural gas-fired power plants from the supply basins in the North to the California-Oregon border and from supply basins in the southwest and Rocky Mountains to the Southern California border. These gas transport capacity agreements provide for the delivery of gas into SMUD-owned pipeline capacity within California. The gas transport capacity agreements provide SMUD with 48,199 Dth per day (Dth/d) of natural gas pipeline capacity from the North and 39,710 Dth/d from the Southwest or Rocky Mountain Basins through at least 2028.

Gas Storage Agreements. SMUD also has an agreement for the storage of up to 2.0 million Dth of natural gas at regional facilities through March 2029.

Hydro License Agreements. SMUD has a hydro license for a term of 50 years effective July 1, 2014 (see Note 2). SMUD entered into four contracts with government agencies whereby SMUD makes annual payments to them for various services for

the term of the license. Each contract is adjusted annually by an inflation index. The present value of the sum of the annual payments is \$62.7 million at December 31, 2023.

Construction Contracts. SMUD has entered into various construction contracts for the construction of a new substation, control building, and improvements to the Union Valley bike trail in the UARP. As of December 31, 2023, the not-to-exceed price for these contracts totaled \$235.8 million. The remaining contract obligations for these contracts as of December 31, 2023 was \$48.9 million.

NOTE 18. CLAIMS AND CONTINGENCIES

FERC Administrative Proceedings. SMUD is involved in a number of FERC administrative proceedings related to the operation of wholesale energy markets, transmission matters, gas transportation, and the development of NERC reliability standards. While these proceedings are complex and numerous, they generally fall into the following categories: (i) filings initiated by the California Independent System Operator Corporation (CAISO) (or other market participants) to adopt/modify the CAISO Tariff and/or establish market design and behavior rules; (ii) filings initiated by existing transmission owners (i.e., PG&E and the other Investor Owned Utilities) to pass through costs to their existing wholesale transmission customers; (iii) filings initiated by FERC on market participants to establish market design and behavior rules or to complain about or investigate market behavior by certain market participants; (iv) filings initiated by transmission owners under their transmission owner tariffs for the purpose of establishing a regional transmission planning process and interconnection agreements; (v) filings initiated by providers of firm gas transportation services under the Natural Gas Act; and (vi) filings initiated by NERC to develop reliability standards applicable to owners, users, and operators of the bulk electric system. In addition, SMUD is an active participant in other FERC administrative proceedings, including those related to reliability and cybersecurity standards, variable resource integration, and transmission planning and cost allocation. SMUD's management believes that the ultimate resolution of these matters will not have a material adverse effect on SMUD's financial position, liquidity or results of operations.

CPUC Administrative Proceedings. SMUD monitors a number of CPUC proceedings. These proceedings generally fall into the following categories: (i) filings initiated by PG&E to adopt/modify its tariffs and/or rules; (ii) rulemakings initiated by the CPUC to establish market design and behavior rules or program rules affecting SMUD customers; and (iii) rulemakings initiated by the CPUC to establish electric and/or gas system safety design and maintenance rules. SMUD believes that determinations of these CPUC proceedings will not have a material adverse effect on SMUD's financial position, liquidity or results of operations.

Environmental Matters. SMUD was one of many potentially responsible parties that had been named in a number of actions relating to environmental claims and/or complaints. SMUD has resolved these environmental claims and/or complaints and entered into settlement agreements and/or consent orders. These settlement agreements and consent orders have statutory reopener provisions which allow regulatory agencies to seek additional funds for environmental remediation under certain limited circumstances. While SMUD believes it is unlikely that any of the prior settlements or consent orders will be reopened, the possibility exists. If any of the settlements or consent orders were to be reopened, SMUD management does not believe that the outcome will have a material adverse effect on SMUD's financial position, liquidity or results of operations.

Proposition 26 Lawsuit. In October 2019, two SMUD customers filed a complaint alleging SMUD's immediately prior rate increase was unconstitutional. In January 2024, the lawsuit was dismissed with prejudice due to their failure to diligently prosecute the case, though they have since filed another, similar complaint, which challenges SMUD's rate increases for 2024 and 2025. SMUD considers the lawsuit to be wholly without merit.

Other Matters. Currently, SMUD is party to various claims, legal actions and complaints relating to its operations, including but not limited to: property damage and personal injury, contract disputes, torts, and employment matters. SMUD's management believes that the ultimate resolution of these matters will not have a material adverse effect on SMUD's financial position, liquidity or results of operations.

NOTE 19. SUBSEQUENT EVENTS

SMUD evaluated subsequent events through February 23, 2024, the date that the financial statements were available to be issued, for events requiring recording or disclosure in the financial statements.

**Required Supplementary Information – Unaudited
For the Years Ended December 31, 2023 and 2022**

**Schedule of Changes in Net Pension Liability and Related Ratios
During the Measurement Period - PERS Plan**

	December 31,									
	2023	2022	2021	2020	2019	2018	2017	2016	2015	2014
	(thousands of dollars)									
Total pension liability:										
Service cost	\$ 42,960	\$ 41,885	\$ 38,900	\$ 38,901	\$ 38,061	\$ 36,029	\$ 35,040	\$ 29,044	\$ 27,991	\$ 28,170

Notes to Schedule:

Changes of Benefit Terms: The figures above generally include any liability impact that may have resulted from voluntary benefit changes that occurred on or before the Measurement Date. However, offers of Two Years Additional Service Credit (a.k.a. Golden Handshakes) that occurred after the Valuation Date are not included in the figures above, unless the liability impact is deemed to be material by the plan actuary.

In 2022, SB 1168 increased the standard retiree lump sum death benefit from \$500 to \$2,000 for any death occurring on or after July 1, 2023. The impact, if any, is included in the changes of benefit terms.

Changes in Assumptions: There were no assumption changes in 2023. Effective with the June 30, 2021 valuation date (June 30, 2022 measurement date), the accounting discount rate was reduced from 7.15% to 6.90%. In determining the long-term expected rate of return, CalPERS took into account long-term market return expectations as well as the expected pension fund cash flows. In addition, demographic assumptions and the price inflation assumption were changed in accordance with the 2021 CalPERS Experience Study and Review of Actuarial Assumptions. The accounting discount rate was 7.15% for measurement dates June 30, 2017 through June 30, 2021, 7.65% for measurement dates June 30, 2015 through June 30, 2016, and 7.50% for measurement date June 30, 2014.

Schedule of Plan Contributions for Pension – PERS Plan

	2023	2022	2021	2020	December 31,		2016	2015	2014	
					2019	2018				
						(thousands of dollars)

Contributions in relation to the actuarially determined contribution	<u>(92,504)</u>	<u>(114,476)</u>	<u>(229,440)</u>	<u>(98,344)</u>	<u>(69,119)</u>	<u>(90,142)</u>	<u>(32,389)</u>	<u>(27,645)</u>	<u>(22,499)</u>	<u>(21,511)</u>
Contribution excess	<u>\$ (47,333)</u>	<u>\$ (69,877)</u>	<u>\$ (175,125)</u>	<u>\$ (46,068)</u>	<u>\$ (20,000)</u>	<u>\$ (50,000)</u>	<u>\$ -0-</u>	<u>\$ -0-</u>	<u>\$ -0-</u>	<u>\$ -0-</u>
Covered payroll	\$ 265,184	\$ 256,965	\$ 257,613	\$ 254,756	\$ 247,759	\$ 235,902	\$ 223,685	\$ 207,119	\$ 197,481	\$ 191,439
Contributions as a percentage of covered payroll	34.9%	44.5%	89.1%	38.6%	27.9%	38.2%	14.5%	13.4%	11.4%	11.2%

Notes to Schedule

The actuarial methods and assumptions used to set the actuarially determined contributions for the year ended December 31, 2023 was derived from the June 30, 2020 funding valuation report.

Actuarial cost method	Entry age Actuarial Cost Method
Amortization method/period	For details, see June 30, 2020 Funding Valuation Report
Asset valuation method	Fair value of assets. For details, see June 30, 2020 Funding Valuation Report
Inflation	2.50%
Salary increases	Varies by entry age and service
Payroll growth	2.75%
Investment rate of return	7.00% Net of pension plan investment and administrative expenses; includes inflation
Retirement age	The probabilities of retirement are based on the 2017 CalPERS Experience Study for the period from 1997 to 2015
Mortality	The probabilities of mortality are based on the 2017 CalPERS Experience Study for the period from 1997 to 2015. Pre-retirement and post-retirement mortality rates include 15 years of projected mortality improvement using 90% of Scale MP-2016 published by the Society of Actuaries.

In 2021, the investment rate of return was changed from 7.25% to 7.00%. In 2020, the investment rate of return was 7.25%. Prior to 2020, the probabilities of mortality are based on the 2014 PERS Experience Study for the period from 1997 to 2011. Pre-retirement and post-retirement mortality rates include 20 years of projected mortality improvement using Scale BB published by the Society of Actuaries. Prior to 2017, the retirement age and mortality assumptions were based on the 2010 PERS Experience Study for the period from 1997 to 2007. In addition, the mortality assumption for pre-retirement and post-retirement rates included 5 years of projected mortality improvement using Scale AA published by the Society of Actuaries.

Schedule of Changes in Net OPEB Asset or Liability and Related Ratios During the Measurement Period

OPEB. The schedule of changes in NOA or NOL and related ratios is presented above for the years for which SMUD has available data. SMUD will add to this schedule each year and when it reaches 10 years it will contain the last 10 years data which will then be updated each year going forward.

	December 31,						
	2023	2022	2021	2020	2019	2018	2017
	(thousands of dollars)						
Total OPEB liability:							
Service cost	\$ 8,303	\$ 8,744	\$ 8,426	\$ 8,903	\$ 8,946	\$ 9,263	\$ 8,993
Interest on total OPEB liability	22,126	22,728	25,008	26,653	26,766	29,656	28,676

Plan fiduciary net position as a percentage of the total OPEB liability	93.6%	98.2%	114.7%	100.2%	92.3%	94.5%	77.2%
Covered payroll	\$ 345,500	\$ 301,746	\$ 289,014	\$ 287,001	\$ 282,993	\$ 269,753	\$ 252,211
Net OPEB (asset) or liability as a percentage of covered payroll	7.3%	2.2%	-19.9%	-0.3%	11.4%	8.2%	40.0%

Notes to Schedule

Benefit Changes: There were no changes to benefits.

Changes in Assumptions: In 2023, the healthcare trends were updated. In 2022, the long-term rate of return for Strategy 3 was updated based on newer target asset allocation, the discount rate was updated based on crossover test, the demographic assumptions were updated to CalPERS 2000-2019 Experience Study, and the mortality improvement scale was updated to Scale MP-2021. In 2021, the discount rate was updated due to weighting of Strategy 1 and Strategy 3 and updated capital market assumptions, the mortality improvement scale was updated to Scale MP-2020, the inflation rate was changed to 2.5% and the implied subsidy was removed for Medicare Advantage Plans. In 2020, the discount rate reflected the split of assets between Strategy 1 and Strategy 3, the mortality improvement scale was updated to Scale MP-2019, and the Kaiser Medicare trend rates were updated.

Schedule of Plan Contributions for OPEB

OPEB Plan. The schedule of OPEB contributions is presented below for the years for which SMUD has available data. SMUD will add to this schedule each year and when it reaches 10 years it will contain the last 10 years data which will then be updated each year going forward.

	2023	2022	2021	December 31,		2018	2017
				2020	2019		
				(thousands of dollars)			
Actuarially determined contribution	\$ 8,566	\$ 5,425	\$ 8,661	\$ 12,201	\$ 10,710	\$ 15,366	\$ 16,472
Contributions in relation to the actuarially determined contribution	(8,806)	(1,157)	(853)	(13,233)	(13,155)	(35,128)	(116,181)
Contribution deficiency (excess)	<u>\$ (240)</u>	<u>\$ 4,268</u>	<u>\$ 7,808</u>	<u>\$ (1,032)</u>	<u>\$ (2,445)</u>	<u>\$ (19,762)</u>	<u>\$ (99,709)</u>
Covered payroll	\$ 342,236	\$ 318,094	\$ 285,425	\$ 289,552	\$ 286,835	\$ 277,193	\$ 260,210
Contributions as a percentage of covered payroll	2.6%	0.4%	0.3%	4.6%	4.6%	12.7%	44.6%

Notes to Schedule

The actuarial methods and assumptions used to set the actuarially determined contributions for the year ended December 31, 2023 were derived from the June 30, 2023 funding valuation report.

Actuarial cost method	Entry age normal
Amortization method	Level percent of pay
Amortization period	23-year fixed period for 2023
Asset valuation method	Market value of assets
Discount rate	6.25% for all actives and retirements after 6/30/2018, 5.25% for all retirements before 6/30/2018
Inflation	2.50%
Medical trend	Non-Medicare: 6.5% for 2024, decreasing to an ultimate rate of 3.75% in 2076 Medicare (Non-Kaiser): 5.45% for 2024, decreasing to an ultimate rate of 3.75% in 2076 Medicare (Kaiser): 4.45% for 2024, decreasing to an ultimate rate of 3.75% in 2076
Mortality	CalPERS 2000-2019 experience study
Mortality improvement	Post-retirement mortality projected fully generational with Scale MP-21

In 2023, the amortization period was for a 23-year fixed period. Mortality assumption used PERS 2000-2019 experience study. The mortality improvement projected fully generational with Scale MP-21. In 2022, the amortization period was for a 24-year fixed period. Mortality assumption used PERS 1997-2015 experience study. The mortality improvement projected fully generational with Scale MP-20. In 2021, the amortization period was for a 25-year fixed period. Mortality assumption used PERS 1997-2015 experience study. The mortality improvement projected fully generational with Scale MP-19. In 2020, the amortization period was for a 26-year fixed period. Mortality assumption used PERS 1997-2015 experience study. The mortality improvement projected fully generational with Scale MP-18. In 2019, the amortization period was for a 27-year fixed period. Mortality assumption used PERS 1997-2015 experience study. The mortality improvement projected fully generational with Scale MP-17. In 2018, the amortization period was for a 28-year fixed period. Mortality assumption used PERS 1997-2011 experience study. The mortality improvement projected fully generational with Scale MP-16. In 2017, the amortization period was for a 29-year fixed period. The inflation rate was 3.0% and the discount rate was 7.25%. The mortality projected fully generational with Scale MP-14, modified to converge in 2022.

APPENDIX C

BOOK-ENTRY SYSTEM

The information in this Appendix regarding DTC has been provided by DTC, and SMUD takes no responsibility for the accuracy or completeness thereof. SMUD cannot and does not give any assurances that DTC, DTC Participants or Indirect Participants will distribute the Beneficial Owners either (a) payments of interest or principal with respect to the 2024 Series M Bonds or (b) certificates representing ownership interest in or other confirmation of ownership interest in the 2024 Series M Bonds, or that they will so do on a timely basis or that DTC, DTC Participants or DTC Indirect Participants will act in the manner described in this Official Statement.

The Depository Trust Company (“DTC”) New York, NY, will act as securities depository for the 2024 Series M Bonds. The 2024 Series M Bonds will be issued as fully registered securities registered in the name of Cede & Co. (DTC’s partnership nominee) or such other name as may be requested by an authorized representative of DTC. One fully registered Bond certificate will be issued for each maturity of the 2024 Series M Bonds, each in the aggregate principal amount of such maturity, and will be deposited with DTC.

DTC, the world’s largest depository, is a limited-purpose trust company organized under the New York Banking Law, a “banking organization” within the meaning of the New York Banking Law, a member of the Federal Reserve System, a “clearing corporation” within the meaning of the New York Uniform Commercial Code, and a “clearing agency” registered pursuant to the provisions of Section 17A of the Securities Exchange Act of 1934, as amended. DTC holds and provides asset servicing for over 3.5 million issues of U.S. and non-U.S. equity issues, corporate and municipal debt issues and money market instruments from over 100 countries that DTC’s participants (“Direct Participants”) deposit with DTC. DTC also facilitates the post-trade settlement among Direct Participants of sales and other securities transactions in deposited securities through electronic computerized book-entry transfers and pledges between Direct Participants’ accounts. This eliminates the need for physical movement of securities certificates. Direct Participants include both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations. DTC is a wholly owned subsidiary of The Depository Trust & Clearing Corporation (“DTCC”). DTCC is the holding company for DTC, National Securities Clearing Corporation and Fixed Income Clearing Corporation all of which are registered clearing agencies. DTCC is owned by the users of its regulated subsidiaries. Access to the DTC system is also available to others, such as both U.S. and non-U.S. securities brokers and dealers, banks, trust companies and clearing corporations that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly (“Indirect Participants”). DTC has a Standard & Poor’s rating of AA+. The DTC rules applicable to its Participants are on file with the Securities and Exchange Commission. More information about DTC can be found at www.dtcc.com.

Purchases of the 2024 Series M Bonds under the DTC system must be made by or through Direct Participants, which will receive a credit for the 2024 Series M Bonds on DTC’s records. The ownership interest of each actual purchaser of each 2024 Series M Bond (“Beneficial Owner”) is in turn to be recorded on the Direct and Indirect Participants’ records. Beneficial Owners will not receive written confirmation from DTC of their purchase. Beneficial Owners are, however, expected to receive written confirmations providing details of the transaction, as well as periodic statements of their holdings, from the Direct or Indirect Participant through which the Beneficial Owner entered into the transaction. Transfers of ownership interests in the 2024 Series M Bonds are to be accomplished by entries made on the books of Direct and Indirect Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their beneficial ownership interests in the 2024 Series M Bonds, except in the event that use of the book-entry system for the 2024 Series M Bonds is discontinued.

To facilitate subsequent transfers, all 2024 Series M Bonds deposited by Direct Participants with DTC are registered in the name of DTC's partnership nominee, Cede & Co. or such other name as may be requested by an authorized representative of DTC. The deposit of the 2024 Series M Bonds with DTC and their registration in the name of Cede & Co. or such other DTC nominee do not effect any change in beneficial ownership. DTC has no knowledge of the actual Beneficial Owners of the 2024 Series M Bonds; DTC's records reflect only the identity of the Direct Participants to whose accounts such 2024 Series M Bonds are credited, which may or may not be the Beneficial Owners. The Direct and Indirect Participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications by DTC to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to Beneficial Owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time. Beneficial Owners of the 2024 Series M Bonds may wish to take certain steps to augment the transmission to them of notices of significant events with respect to the 2024 Series M Bonds, such as redemptions, tenders, defaults, and proposed amendments to the bond documents. For example, Beneficial Owners of the 2024 Series M Bonds may wish to ascertain that the nominee holding the 2024 Series M Bonds for their benefit has agreed to obtain and transmit notices to Beneficial Owners.

Redemption notices shall be sent to DTC. If less than all of a maturity of the 2024 Series M Bonds is being redeemed, DTC's practice is to determine by lot the amount of the interest of each Direct Participant in the 2024 Series M Bonds of such maturity to be redeemed.

Neither DTC nor Cede & Co. (nor any other DTC nominee) will consent or vote with respect to the 2024 Series M Bonds unless authorized by a Direct Participant in accordance with DTC's MMI Procedures. Under its usual procedures, DTC mails an Omnibus Proxy to SMUD as soon as possible after the record date. The Omnibus Proxy assigns Cede & Co.'s consenting or voting rights to those Direct Participants to whose accounts the 2024 Series M Bonds are credited on the record date (identified in a listing attached to the Omnibus Proxy).

Principal, premium, redemption proceeds and interest payments on the 2024 Series M Bonds will be made to Cede & Co. or such other nominee as may be requested by an authorized representative of DTC. DTC's practice is to credit Direct Participants' accounts, upon DTC's receipt of funds and corresponding detail information from SMUD or the Trustee, on a payment date in accordance with their respective holdings shown on DTC's records. Payments by Participants to Beneficial Owners will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers in bearer form or registered in "street name," and will be the responsibility of such Participants and not of DTC, its nominee, the Trustee or SMUD, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment of principal, premium, redemption proceeds and interest to Cede & Co. (or such other nominee as may be requested by an authorized representative of DTC) is the responsibility of the Trustee. Disbursement of such payments to Direct Participants will be the responsibility of DTC, and disbursement of such payments to the Beneficial Owners will be the responsibility of the Direct and Indirect Participants.

DTC may discontinue providing its services as depository with respect to the 2024 Series M Bonds at any time by giving reasonable notice to SMUD or the Trustee. Under such circumstances, in the event that a successor depository is not obtained, bond certificates are required to be printed and delivered.

SMUD may decide to discontinue use of the system of book-entry-only transfers through DTC (or a successor securities depository). In that event, bond certificates for such 2024 Series M Bonds will be printed and delivered to DTC.

Neither SMUD or the Trustee will have any responsibility or obligation to Participants, to Indirect Participants or to any Beneficial Owner with respect to (i) the accuracy of any records maintained by DTC, any Participant, or any Indirect Participant; (ii) the payment by DTC or any Participant or Indirect Participant of any amount with respect to the principal of or premium, if any, or interest on the 2024 Series M Bonds; (iii) any notice which is permitted or required to be given to Holders under the Resolution; (iv) the selection by DTC, any Participant or any Indirect Participant of any person to receive payment in the event of a partial redemption of 2024 Series M Bonds; (v) any consent given or other action taken by DTC as Bondholder; or (vi) any other procedures or obligations of DTC, Participants or Indirect Participants under the book-entry system.

APPENDIX D

SUMMARY OF CERTAIN PROVISIONS OF THE RESOLUTION

The following is a summary of certain provisions of the Resolution. Other provisions of the Resolution are described under the captions “THE 2024 SERIES M BONDS” and “SECURITY FOR THE BONDS.” This summary is not to be considered a full statement of the terms of the Resolution and accordingly is qualified by reference thereto and is subject to the full text thereof. Capitalized terms not otherwise defined in this Official Statement shall have the meanings ascribed thereto in the Resolution.

Between July 1997 and August 2003, SMUD received consents to amend the Resolution from the owners of the requisite percentage of Outstanding Bonds. Pursuant to the authority granted by such consents, SMUD amended the Resolution in October 2003 by adopting the Forty-Eighth Supplemental Resolution and the Forty-Ninth Supplemental Resolution. The following summary of the Resolution reflects such amendments.

The purchasers of the 2024 Series M Bonds, by virtue of their purchase of the 2024 Series M Bonds, will consent to certain amendments to the Resolution (the “Proposed Amendments”). Such amendments are described in *bold italic* font in the forepart of this Official Statement under “SECURITY FOR THE BONDS – Rates and Charges” and “—Limitations on Additional Obligations Payable from Revenues” and in this summary of the Resolution under the captions “Certain Definitions” and “Reserve Fund for Certain Bonds.” The written consents to the Proposed Amendments of the holders and registered owners of at least 60% of the Bonds outstanding have been filed with SMUD or the Trustee, as required by the Resolution. However, while certain Bonds remain outstanding SMUD must also obtain the written consents of certain bond insurers to implement the Proposed Amendments. SMUD expects to implement the Proposed Amendments when the written consents of such bond insurers are obtained or when the Bonds insured by such bond insurers are no longer outstanding. The final maturity date of the insured Bonds is July 1, 2024.

Certain Definitions

“Assumed Interest Payments” means for any fiscal year or period interest which would accrue during such fiscal year or period on an amount equal to the then unamortized balance of the remaining sum of Assumed Principal Payments at the Assumed Interest Rate.

“Assumed Interest Rate” for any Parity Bond means an interest rate equal to the “Bond Buyer Revenue Bond Index” most recently published in The Bond Buyer prior to the date of issuance of the Parity Bond to which the Assumed Interest Rate is applicable.

“Assumed Principal Payments” means for any fiscal year or period the sum of all amortized portions of each Excluded Principal Payment which fall within such fiscal year or period after the Excluded Principal Payments have been amortized (for purposes of this definition) equally over the years (pro rata in the case of a partial year) in the period commencing on the date of issuance of the Parity Bonds to which such Excluded Principal Payment relates and ending on the date which is 30 years from such date of issuance. Notwithstanding the foregoing, if Parity Bonds determined by SMUD to be an Excluded Principal Payment are refinanced with Parity Bonds determined by SMUD to be another Excluded Principal Payment, (1) Assumed Principal Payments with respect to the refinancing Parity Bonds shall not include any amount of principal which has previously been assumed amortized with respect to the refinanced Parity Bonds and (2) the period over which the refinancing Parity Bonds shall be assumed to be amortized shall be the period commencing on the date of issuance of the refinancing Parity Bonds and ending on the date which is 30 years from the date of issuance of the refinanced Parity Bonds.

“Electric System” means the entire electric system of SMUD, together with all additions, betterments, extensions and improvements.

“Energy Payments” means, when used with respect to the Electric System, all actual costs incurred, or charges made therefor, by SMUD in any particular fiscal year or period to which said term is applicable for purchased power (including power purchased from any special district included within the boundaries of SMUD), electric and thermal energy and capacity under contracts providing for payments by SMUD for electric or thermal energy or capacity whether or not such energy or capacity is delivered or capable of being delivered or otherwise made available to or received by or for the account of SMUD.

“Excluded Principal Payments” means each payment of principal on Parity Bonds which the Board of Directors of SMUD determines (on a date not later than the date of issuance of such Parity Bonds) that SMUD intends to refinance at or prior to the maturity date(s) of such Parity Bonds or otherwise to pay with moneys which are not Revenues. No such determination shall affect the security for such Parity Bonds or the obligation of SMUD to pay such payments from Revenues.

“Financial Products Agreement” means an interest rate swap, cap, collar, option, floor, forward or other hedging agreement, arrangement or security, however denominated, entered into by SMUD with a Qualified Provider not for investment purposes but with respect to specific Parity Bonds for the purpose of (1) reducing or otherwise managing SMUD’s risk of interest rate changes or (2) effectively converting SMUD’s interest rate exposure, in whole or in part, from a fixed rate exposure to a variable rate exposure, or from a variable rate exposure to a fixed rate exposure.

“Financial Product Payments” means payments periodically required to be paid to a counterparty by SMUD pursuant to a Financial Products Agreement.

“Financial Product Receipts” means amounts periodically required to be paid to SMUD by a counterparty pursuant to a Financial Products Agreement.

“Maintenance and Operation Costs” means all actual maintenance and operation costs incurred by SMUD (including purchased power and fuel costs) or charges therefor made in conformity with generally accepted accounting principles, exclusive in all cases of depreciation, or obsolescence charges or reserves therefor, amortization of intangibles or other entries of a similar nature, interest charges and charges for the payment of principal of SMUD debt.

“Net Revenues” for any fiscal period means the sum of (a) the Revenues for such fiscal period plus (b) the amounts, if any, withdrawn by SMUD from the Rate Stabilization Fund for treatment as Revenues for such fiscal period, less the sum of (c) all Maintenance and Operation Costs for such fiscal period, (d) all Energy Payments for such fiscal period not included in Maintenance and Operation Costs for such fiscal period, and (e) the amounts, if any, withdrawn by SMUD from Revenues for such fiscal period for deposit in the Rate Stabilization Fund pursuant to the Resolution.

“Parity Bonds” includes the Bonds and all revenue bonds issued on a parity with the Bonds as provided or permitted in the Resolution. No Parity Bonds (other than the Bonds) are currently outstanding.

“Qualified Provider” means any financial institution or insurance company which is a party to a Financial Products Agreement if the unsecured long-term debt obligations of such financial institution or insurance company (or of the parent or a subsidiary of such financial institution or insurance company if such parent or subsidiary unconditionally guarantees the performance of such financial institution or insurance company under such Financial Products Agreement and the Trustee receives an opinion of counsel to the effect that such guarantee is a valid and binding agreement of such parent or subsidiary), or obligations secured or supported by a letter of credit, contract, guarantee, agreement, insurance policy or surety bond issued by such financial institution or insurance company (or such guarantor parent or subsidiary), are rated in one of the two highest rating categories of a national rating agency (without regard to any gradation or such rating category) at the time of the execution and delivery of the Financial Products Agreement.

“Rate Stabilization Fund” means the fund by that name established in the Resolution. From time to time, after provision for debt service, SMUD may deposit in the Rate Stabilization Fund from remaining Revenues such amounts as SMUD shall determine, provided that deposits may be made until (but not after) the date 120 days after the end of such fiscal year. SMUD may withdraw amounts from the Rate Stabilization Fund only for inclusion in Revenues for any fiscal year, such withdrawals to be made until (but not after) 120 days after the end of such fiscal year. All interest or other earnings on deposits in the Rate Stabilization Fund shall be withdrawn therefrom and accounted for as Revenues. Notwithstanding the foregoing, no deposit of Revenues to the Rate Stabilization Fund may be made to the extent such Revenues were included in an engineer’s certificate submitted in connection with the issuance of additional revenue bonds payable from Revenues and withdrawal of the Revenues to be deposited in the Rate Stabilization Fund from the Revenues employed in rendering said engineer’s certificate would have caused noncompliance with the provisions of the Resolution restricting issuance of additional obligations or securities payable from Revenues or to the extent any withdrawal of amounts from remaining Revenues for the Rate Stabilization Fund for any fiscal year would have reduced the debt service ratio referred to in this Appendix under the caption “Reserve Fund for Certain Bonds” to or below 1.40.

“Revenues” means all charges received for, and all other income and receipts derived by SMUD from the operation of the Electric System, or arising from the Electric System (consisting primarily of income derived from the sale or use of electric energy generated, transmitted or distributed by facilities of the Electric System, but also including receipts from the sale of property pertaining to the Electric System or incidental to the operation of the Electric System or from services performed by SMUD in connection with the Electric System and revenues derived from certain wholesale, but not retail, sales of water), but exclusive in every case of any moneys derived from the levy or collection of taxes upon any taxable property in SMUD.

“Subsidy” means any subsidy, reimbursement or other payment from the federal government of the United States of America under the American Recovery and Reinvestment Act of 2009 (or any similar legislation or regulation of the federal government of the United States of America or any other governmental entity or any extension of any of such legislation or regulation).

Reserve Fund for Certain Bonds

The Electric Revenue Bond Reserve Fund (the “Reserve Fund”) is created under the Resolution. The Reserve Fund secures all Bonds issued prior to January 1, 2004 that are currently outstanding (and not otherwise deemed to be paid and discharged under the Resolution) and may secure additional Bonds issued in the future. However, the Reserve Fund does not secure and will not be available to pay debt service on the 2024 Series M Bonds.

After the close of each fiscal year, SMUD shall determine the ratio (herein called the “debt service ratio”) of (1) the Net Revenues during said fiscal year to (2) the maximum annual debt service during the period of three fiscal years next following said fiscal year on all Bonds and Parity Bonds then outstanding. For this purpose, the term “maximum annual debt service” shall mean the sum of (i) the interest falling due on serial bonds and term bonds, (ii) the principal amount of serial bonds falling due by their terms, and (iii) the amount of minimum sinking fund payments required, as computed for the year in which such sum shall be a maximum. Interest during construction which has been funded and provided for shall not be included in “minimum annual debt service” for the purpose of the above calculation.

So long as the debt service ratio shall exceed 1.40, the amount required to be maintained in the Reserve Fund shall be an amount such that the amount in the combined reserve funds of all Parity Bonds then outstanding will at no time be less than the current annual interest requirements on all then outstanding Parity Bonds, except only bonds (if any) for which payment has been provided in advance. If the debt service ratio in any fiscal year shall fall below 1.40, the Treasurer shall set aside in the Reserve Fund or in any other reserve fund or funds established for any one or more issues of the Parity Bonds (on or before the first day of each month of the next succeeding fiscal year) from the first available Net Revenues an amount not less than 15% of the sum of the current monthly interest requirements of all Parity Bonds then outstanding until the next year in which the debt service ratio shall exceed 1.40 or until the aggregate amount in the combined reserve funds established for all of the Parity Bonds (including the Reserve Fund) is equal to the maximum annual debt service on all of the Parity Bonds then outstanding, whichever shall first occur.

For purposes of the above calculation, the interest rates of Bonds which bear a variable rate of interest or a rate subject to periodic adjustment or to being fixed at some date after issuance shall be, if such Bonds bear a rate or rates of interest for a known period or periods of time, such interest rate or rates for such period or periods, and thereafter, for the portion of the calculation period not covered by such known period or periods, the interest rate shall be the greater of the numerical maximum rate that such Bonds may vary or be adjusted to and the numerical maximum rate (if any) that the interest rate for such Bonds may be fixed to, in both cases as set forth in the supplemental resolution authorizing such Bonds, or if such rate or rates have been increased in accordance with such supplemental resolution at such increased rate or rates.

Any amount in the Reserve Fund at any time in excess of the balance required to be then maintained therein shall be released to SMUD for any SMUD use.

SMUD shall not be required, notwithstanding anything herein contained, to maintain in the combined reserve funds appertaining to all Parity Bonds of SMUD, an aggregate amount in excess of the maximum annual debt service requirements in any subsequent fiscal year on all of the then outstanding Parity Bonds.

Any moneys at any time in any of said reserve funds shall be held by the Treasurer in trust for the benefit of the holder or holders from time to time of the Bonds and the coupons appertaining thereto entitled to be paid therewith, and SMUD shall not have any beneficial right or interest in any such moneys.

Notwithstanding the foregoing, a Supplemental Resolution adopted after the Forty-Eighth Supplemental Resolution may provide that a Series of Bonds issued pursuant to such Supplemental Resolution shall not be secured by the Reserve Fund. In such event, (i) payments of the principal of and interest on such Bonds shall be excluded from all calculations made in respect of the amount to be maintained in the Reserve Fund and (ii) amounts on deposit in the Reserve Fund shall not be applied to the payment of the principal of or interest on such Bonds, even if no other moneys are available therefor.

The 2024 Series M Bonds are not secured by the Reserve Fund.

In lieu of maintaining and depositing moneys in the Reserve Fund, SMUD may maintain and deposit in the Reserve Fund, for the sole benefit of the holders of Parity Bonds, a letter of credit (1) which is issued by a bank with a credit rating at the time of deposit of such letter of credit into the Reserve Fund within one of the top two rating categories (without regard to any refinement or graduation of such rating category by numerical modifier or otherwise) of Moody's Investors Service ("Moody's") and Standard & Poor's Rating Group, a division of The McGraw-Hill Companies, Inc. ("S&P"), (2) the repayment obligation with respect to which is not secured by a lien on assets of SMUD senior to any lien which secures the Bondholders and (3) which has a term of at least 364 days from the date of issuance thereof. If the credit rating of the bank issuing such letter of credit falls below such top two rating categories, SMUD shall within twelve months of such downgrading either (a) substitute a new letter of credit satisfying the requirements of this paragraph, (b) fund the Reserve Fund through the deposit of cash or an irrevocable surety bond policy satisfying the requirements of the immediately succeeding paragraph or (c) fund the Reserve Fund through a combination of (a) and (b). At least 120 days prior to the expiration date of a letter of credit on deposit in the Reserve Fund, SMUD shall either (a) substitute a new letter of credit satisfying the requirements of this paragraph, (b) fund the Reserve Fund through the deposit of cash or an irrevocable surety bond policy satisfying the requirements of the immediately succeeding paragraph or (c) fund the Reserve Fund through a combination of (a) and (b). Any such letter of credit shall permit SMUD to draw amounts thereunder for deposit in the Reserve Fund which, together with any moneys on deposit in, or surety bond policy available to fund, the Reserve Fund, are not less than the balance required to then be maintained in the Reserve Fund (the "Reserve Fund Requirement") and which may be applied to any purpose for which moneys in the Reserve Fund may be applied. SMUD shall make a drawing on such letter of credit and deposit the moneys obtained from drawing in the Reserve Fund (a) whenever moneys are required for the purposes for which Reserve Fund moneys may be applied, and (b) prior to any expiration or termination thereof; provided, however, that no such drawing need be made if other moneys or an irrevocable surety bond are available in the Reserve Fund in the amount of the Reserve Fund Requirement.

In lieu of maintaining and depositing moneys in the Reserve Fund, SMUD also may maintain and deposit in the Reserve Fund, for the sole benefit of the holders of the Bonds, an irrevocable surety bond policy (1) which is issued by a bond insurance company with a claims-paying ability rating at the time of deposit of such surety bond policy into the Reserve Fund within one of the top two rating categories (without regard to any refinement or graduation of such rating category by numerical modifier or otherwise) from Moody's and S&P, (2) the repayment obligation with respect to which is not secured by a lien on assets of SMUD senior to any lien which secures the Bondholders and (3) has a term of at least 364 days from the date of issuance thereof. If the credit rating of the bond insurance company issuing such surety bond policy falls below such top two rating categories, SMUD shall, within twelve months of such downgrading, either (a) substitute a new surety bond policy satisfying the requirements of this paragraph, (b) fund the Reserve Fund through the deposit of cash or a letter of credit satisfying the requirements of the immediately preceding paragraph or (c) fund the Reserve Fund through a combination of (a) and (b). At least 120 days prior to the expiration date of a surety bond policy on deposit in the Reserve Fund, SMUD shall either (a) substitute a new surety bond policy satisfying the requirements of this paragraph, (b) fund the Reserve Fund through the deposit of cash or a letter of credit satisfying the requirements of the immediately preceding paragraph or (c) fund the Reserve Fund through a combination of (a) and (b). Any such surety bond policy shall permit SMUD to obtain amounts thereunder for deposit in the Reserve Fund which, together with any moneys on deposit in, or letter of credit available to fund, the Reserve Fund, are not less than the Reserve Fund Requirement and which may be applied to any purpose for which moneys in the Reserve Fund may be applied. SMUD shall make a drawing on such surety bond policy and deposit the proceeds derived from such drawing in the Reserve Fund (a) whenever moneys are required for the purposes for which Reserve Fund moneys may be applied, and (b) prior to

any expiration or termination thereof; provided, however, that no such drawing need be made if other moneys or a letter of credit are available in the Reserve Fund in the amount of the Reserve Fund Requirement.

Notwithstanding anything to the contrary in the prior two paragraphs, if at any time that there is on deposit in the Reserve Fund a combination of cash, a letter of credit and/or a surety bond as contemplated above, SMUD shall draw first on such cash to the extent required and available, then on (1) such surety bond and letter of credit on a pro rata basis (if both a surety bond and letter of credit are available) to the extent required and available, or (2) such surety bond or letter of credit (if either a surety bond or letter of credit, but not both, is available) to the extent required and available.

For purposes of calculating the “debt service ratio” and, unless otherwise specified in a Supplemental Resolution providing for the issuance of a series of Parity Bonds, the amount required to be maintained in the Reserve Fund as described above: (1) any calculation of principal of and interest on Parity Bonds for any period of time shall be reduced by the amount of any Subsidy that SMUD receives or expects to receive during such period of time relating to or in connection with such Parity Bonds; and (2) to the extent the calculation of principal of and interest on Parity Bonds is reduced by the Subsidy as provided in clause (1) of this paragraph, any calculation of Net Revenues for any period of time shall be reduced by the amount of any Subsidy received or expected to be received by SMUD with respect to or in connection with such Parity Bonds during such period of time.

Additional Covenants

The Resolution contains the following additional covenants, among others:

1. That the Electric System will be maintained in good repair, working order and condition at all times, and will be continuously operated in an efficient and economical manner.
2. That no electric energy shall be supplied free by SMUD, and a reasonable wholesale charge will be made for water distributed at any cost to SMUD and such charge will be deemed Revenues; but SMUD may supply without charge water furnished to it without distribution cost, and any moneys received from any retail sales of water will not be deemed Revenues.
3. That all taxes and governmental charges and other lawful claims which might become a lien on the Electric System or the Revenues or impair the security of the Bonds will be paid and discharged when due.
4. That SMUD will comply with all lawful orders of any governmental agency or authority having jurisdiction in the premises (except while the validity or application thereof is being contested in good faith) and with all necessary permits and licenses issued by the NRC.
5. That no lease or agreement will be entered into, or sale or other disposition of essential property made, that would impair the operation of the Electric System or the rights of Bondholders with respect to the Revenues; provided, however, that notwithstanding the foregoing or any other provision of the Master Resolution, SMUD may sell or otherwise dispose of its accounts receivable and customer loan balances due to SMUD provided that SMUD delivers to the Trustee:
 - (a) a Certificate of SMUD to the effect that the amount derived by SMUD from the sale or other disposition of such accounts receivable or loan balances is a result of the sale or other disposition of such accounts receivable or loan balances upon fair and reasonable terms no

less favorable to SMUD than the terms of a comparable arm's-length transaction treated as a sale and not a loan under generally accepted accounting principles; and

(b) a written statement or report of an independent certified public accountant to the effect that, based on the audited financial statements of SMUD for the most recent fiscal year for which audited financial statements are available and after giving effect to such transaction by reducing Revenues for such fiscal year by the difference between the face amount of such accounts receivable or loan balances and the amount derived by SMUD from the sale or other disposition of such accounts receivable or loan balances, the debt service ratio computed pursuant to the Master Resolution would not have been reduced to less than 1.40:1.0.

6. That proper records and accounts will be maintained of all transactions relating to the Electric System and the Revenues (open to inspection by the Trustee and the holders of not less than 10 percent in principal amount of the Bonds), to be audited annually by an independent certified public accountant within 90 days after close of the fiscal year, and copies of such financial statements supplied to Bondholders on request.

7. That insurance adequate in amounts and as to risks covered will be maintained against such risks as are usually insurable in connection with similar electric systems, and in addition public liability and property damage insurance in amounts not less than \$1,000,000 per accident and adequate fidelity bonds on all officers and employees of SMUD handling or responsible for SMUD funds, subject in each case to the condition that such insurance is obtainable at reasonable rates and upon reasonable terms and conditions. See APPENDIX A – “INFORMATION REGARDING SACRAMENTO MUNICIPAL UTILITY DISTRICT – INSURANCE” attached to this Official Statement for a description of SMUD’s insurance.

8. That the net proceeds realized by SMUD in the event all or any part of the Electric System is taken by eminent domain proceedings will be applied to the redemption or retirement of all Bonds and Parity Bonds if sufficient therefor, and, if not, then pro rata to the redemption or retirement of Bonds and Parity Bonds or to new facilities if the additional Revenues to be derived therefrom will sufficiently offset the loss of Revenues resulting from such eminent domain so that the ability of SMUD to meet its obligations will not be substantially impaired.

9. That SMUD will at all times use its best efforts to maintain the powers, functions and duties now reposed in it pursuant to law.

10. That SMUD will establish and at all times maintain and collect rates and charges for the sale or use of its electric energy sufficient to permit SMUD to purchase power or issue and sell Bonds or Parity Bonds to finance additions, betterments, extensions and improvements to the Electric System as may be reasonably necessary to satisfy its then projected electric demand upon its Electric System, and that unless the Board determines that SMUD will be able to satisfy such demand through the purchase of electric energy, SMUD will proceed with all reasonable diligence to issue and sell such Bonds or Parity Bonds.

11. That SMUD will not create, or permit the creation of, any mortgage or lien upon the Electric System or any property essential to the proper operation of the Electric System or to the maintenance of the Revenues. SMUD will not create, or permit the creation of, any pledge, lien, charge or encumbrance upon the Revenues except only as provided in the Master Resolution; provided that, notwithstanding the foregoing or any other provision of the Master Resolution, SMUD may create a pledge, lien, charge or encumbrance upon its accounts receivable and customer loan balances due to SMUD (which pledge, lien, charge or encumbrance shall be prior to any pledge, lien, charge or

encumbrance created or made pursuant to the Master Resolution, including without limitation the pledge of Revenues made pursuant to the Master Resolution) to secure indebtedness with a term of one year or less provided that the principal amount of such indebtedness does not exceed 50% of the aggregate face amount of the accounts receivable and customer loan balances due to SMUD as shown on SMUD's most recent audited financial statements.

Amendment of the Resolution

The Resolution and the rights and obligations of SMUD and of the holders of the Bonds may be modified or amended at any time pursuant to the affirmative vote at a meeting of Bondholders, or with the written consent without a meeting, of the holders of 60 percent in aggregate principal amount of the Bonds then outstanding, provided that no such modification or amendment shall (i) extend the fixed maturity of any Bond, or reduce the principal amount thereof, or reduce the rate or extend the time of payment of interest thereon or reduce any premium payable upon the redemption thereof, without the consent of the holder of each Bond so affected, or (ii) reduce the aforesaid percentage of Bonds required for consent to an amendment or modification, without the consent of the holders of all the Bonds then outstanding. Modifications or amendments may be made, without the consent of any Bondholders, to add covenants of SMUD or to surrender rights reserved by SMUD in the Resolution, to cure ambiguities or defective or inconsistent provisions or in regard to questions arising under the Resolution without adversely affecting the interests of the Bondholders, or to provide for the issuance of a series of Bonds, subject to the provisions contained in the Resolution with respect thereto.

Events of Default and Remedies of Bondholders

The Resolution declares each of the following to be an event of default:

- (a) Failure to pay the principal of and premium on any Bond when due and payable;
- (b) Failure to pay any installment of interest on any Bond when due and payable, if such default continues for a period of 30 days;
- (c) Default by SMUD in the observance of any of the covenants, agreements or conditions on its part in the Resolution or in the Bonds, if such default continues for a period of 60 days after written notice thereof (specifying such default and requiring the same to be remedied) has been given to SMUD by the Trustee, or to SMUD and the Trustee by the holders of not less than 25 percent in aggregate principal amount of the Bonds at the time outstanding; and
- (d) If, under the provisions of any law for the relief or aid of debtors, any court of competent jurisdiction shall assume custody or control of SMUD or of the whole or any substantial part of its property, and such custody or control shall not be terminated or stayed within 60 days.

In the event of default, the Trustee or the holders of not less than a majority in aggregate principal amount of the outstanding Bonds may, upon written notice to SMUD, declare the principal of all outstanding Bonds, and the interest accrued thereon, to be due and payable immediately. The Trustee is appointed as trustee to represent Bondholders and may take such action as may seem appropriate to it, and, upon the written request of the holders of 25 percent in aggregate principal amount of the outstanding Bonds, and upon being furnished with indemnity satisfactory to it, will take such action on behalf of Bondholders as is specified in such written request. Each Bondholder is entitled to proceed to protect and enforce the rights vested in such holder by the Resolution by such appropriate judicial proceedings as such holder deems most effectual.

The rights of Bondholders are limited and restricted to the use and application of Revenues as provided in the Resolution and do not extend to the levy of any attachment or execution upon or forfeiture of any of the properties of SMUD or to any moneys derived by SMUD from the levy or collection of taxes.

In addition to the limitations on remedies contained in the Resolution, the rights and remedies provided by the Bonds and the Resolution, as well as the enforcement by SMUD of contracts with customers of the Electric System, may be limited by and are subject to bankruptcy, insolvency, reorganization and other laws affecting the enforcement of creditors' rights.

Refunding of 2024 Series M Bonds

If Refunding Bonds are issued for the purpose of refunding 2024 Series M Bonds, then SMUD is authorized to apply proceeds of the sale of such Refunding Bonds to the payment of the purchase price of direct noncallable obligations of the United States of America ("Treasury Obligations") to be held by the Trustee to insure the payment or retirement at or before maturity of all or a portion of the outstanding 2024 Series M Bonds. Upon deposit with the Trustee, in trust, of money or Treasury Obligations (including, but not limited to, direct obligations of the United States of America issued in book-entry form on the books of the Department of the Treasury of the United States of America), or any combination thereof, sufficient, together with the interest to accrue on any such Treasury Obligations, to pay or redeem all or a portion of 2024 Series M Bonds then outstanding at or before their maturity date, all liability of SMUD in respect of such 2024 Series M Bonds shall cease, determine and be completely discharged, and the holders thereof shall thereafter be entitled only to payment by SMUD out of the money and Treasury Obligations deposited with the Trustee for their payment. If the liability of SMUD shall cease and determine with respect to all or a portion of the 2024 Series M Bonds, then said 2024 Series M Bonds shall not be considered to be outstanding Bonds for any purpose of the Resolution.

Discharge of Resolution

The Resolution may be discharged by depositing with the Trustee in trust, moneys or Federal Securities or general obligation bonds of the State of California, in such amount as the Trustee shall determine will, together with the interest to accrue thereon, be fully sufficient to pay and discharge the indebtedness on all Bonds at or before their respective maturity dates.

Investment of Funds

Moneys in any fund established by the Resolution may be invested in bonds, notes, certificates of indebtedness, bills, bankers acceptances or other securities in which funds of SMUD may be legally invested as provided by the law in effect at the time of such investment. Currently this investment authority includes, among other things, the Local Agency Investment Fund which is administered by the Treasurer of the State of California for the investment of funds belonging to local agencies in the State of California.

APPENDIX E

PROPOSED FORM OF LEGAL OPINION FOR 2024 SERIES M BONDS

[Closing Date]

Sacramento Municipal Utility District
Sacramento, California

Sacramento Municipal Utility District
Electric Revenue Bonds, 2024 Series M
(Final Opinion)

Ladies and Gentlemen:

We have acted as bond counsel to the Sacramento Municipal Utility District (“SMUD”) in connection with the issuance of \$250,000,000 aggregate principal amount of Sacramento Municipal Utility District Electric Revenue Bonds, 2024 Series M (the “2024 Series M Bonds”), issued pursuant to Resolution No. 6649 of the Board of Directors of SMUD, adopted January 7, 1971 (the “Master Resolution”), as supplemented and amended by later resolutions of said Board of Directors (as so supplemented and amended, the “Resolution”), including Resolution No. 24-03-06, adopted March 21, 2024 (the “Sixty-Seventh Supplemental Resolution”). Capitalized terms not otherwise defined herein shall have the meanings ascribed thereto in the Resolution.

In such connection, we have reviewed the Resolution; the Tax Certificate, dated the date hereof (the “Tax Certificate”), executed by SMUD; opinions of counsel to SMUD and the Trustee; certificates of SMUD, the Trustee and others; and such other documents, opinions and matters to the extent we deemed necessary to render the opinions set forth herein.

The opinions expressed herein are based on an analysis of existing laws, regulations, rulings and court decisions and cover certain matters not directly addressed by such authorities. Such opinions may be affected by actions taken or omitted or events occurring after original delivery of the 2024 Series M Bonds on the date hereof. We have not undertaken to determine, or to inform any person, whether any such actions are taken or omitted or events do occur or any other matters come to our attention after original delivery of the 2024 Series M Bonds on the date hereof. Accordingly, this letter speaks only as of its date and is not intended to, and may not, be relied upon or otherwise used in connection with any such actions, events or matters. Our engagement with respect to the 2024 Series M Bonds has concluded with their issuance, and we disclaim any obligation to update this letter. We have assumed the genuineness of all documents and signatures provided to us and the due and legal execution and delivery thereof by, and validity against, any parties other than SMUD. We have assumed, without undertaking to verify, the accuracy of the factual matters represented, warranted or certified in the documents, and of the legal conclusions contained in the opinions, referred to in the second paragraph hereof. Furthermore, we have assumed compliance with all covenants and agreements contained in the Resolution and the Tax Certificate, including (without limitation) covenants and agreements compliance with which is necessary to assure that future actions, omissions or events will not cause interest on the 2024 Series M Bonds to be included in gross income for federal income tax purposes.

We call attention to the fact that the rights and obligations under the 2024 Series M Bonds, the Resolution and the Tax Certificate and their enforceability may be subject to bankruptcy, insolvency, receivership, reorganization, arrangement, fraudulent conveyance, moratorium and other laws relating to or affecting creditors' rights, to the application of equitable principles, to the exercise of judicial discretion in appropriate cases and to the limitations on legal remedies against governmental entities such as SMUD in the State of California. We express no opinion with respect to any indemnification, contribution, liquidated damages, penalty (including any remedy deemed to constitute a penalty), right of set-off, arbitration, judicial reference, choice of law, choice of forum, choice of venue, non-exclusivity of remedies, waiver or severability provisions contained in the foregoing documents, nor do we express any opinion with respect to the state or quality of title to or interest in any of the property described in or as subject to the lien of the Resolution or the accuracy or sufficiency of the description contained therein of, or the remedies available to enforce liens on, any such property. Our services did not include financial or other non-legal advice. Finally, we undertake no responsibility for the accuracy, completeness or fairness of the Official Statement, dated April 9, 2024, or other offering material relating to the 2024 Series M Bonds and express no opinion or view with respect thereto.

Based on and subject to the foregoing, and in reliance thereon, as of the date hereof, we are of the following opinions:

1. The 2024 Series M Bonds constitute the valid and binding limited obligations of SMUD.
2. The Resolution, including the Sixty-Seventh Supplemental Resolution, has been duly adopted by, and constitutes the valid and binding obligation of, SMUD. The Resolution creates a valid pledge, to secure the payment of the principal of and interest on the 2024 Series M Bonds, of the Net Revenues, subject to the provisions of the Resolution permitting the application thereof for the purposes and on the terms and conditions set forth in the Resolution.
3. Interest on the 2024 Series M Bonds is excluded from gross income for federal income tax purposes under Section 103 of the Internal Revenue Code of 1986 and is exempt from State of California personal income taxes. Interest on the 2024 Series M Bonds is not a specific preference item for purposes of the federal individual alternative minimum tax. We observe that interest on the 2024 Series M Bonds included in adjusted financial statement income of certain corporations is not excluded from the federal corporate alternative minimum tax. We express no opinion regarding other tax consequences related to the ownership or disposition of, or the amount, accrual or receipt of interest on, the 2024 Series M Bonds.

Faithfully yours,

ORRICK, HERRINGTON & SUTCLIFFE LLP

per

APPENDIX F

FORM OF CONTINUING DISCLOSURE AGREEMENT

This Continuing Disclosure Agreement (the “Disclosure Agreement”) is executed and delivered by the Sacramento Municipal Utility District (the “Issuer”) and U.S. Bank Trust Company, National Association, in its capacity as Dissemination Agent (the “Dissemination Agent”) in connection with the issuance of \$250,000,000 aggregate principal amount of Sacramento Municipal Utility District Electric Revenue Bonds, 2024 Series M (the “2024 Series M Bonds”). The 2024 Series M Bonds are being issued pursuant to the Issuer’s Resolution No. 6649, adopted on January 7, 1971, as amended and supplemented by supplemental resolutions, including Resolution No. 24-03-06, adopted on March 21, 2024 (the “Resolution”). Pursuant to Section 146.11 of the Resolution, the Issuer and the Dissemination Agent covenant and agree as follows:

SECTION 1. Purpose of the Disclosure Agreement. This Disclosure Agreement is being executed and delivered by the Issuer and the Dissemination Agent for the benefit of the Holders and Beneficial Owners of the 2024 Series M Bonds and in order to assist the Participating Underwriters in complying with S.E.C. Rule 15c2-12(b)(5).

SECTION 2. Definitions. In addition to the definitions set forth in the Resolution, which apply to any capitalized term used in this Disclosure Agreement unless otherwise defined in this Section 2, the following capitalized terms shall have the following meanings:

“Annual Report” shall mean any Annual Report provided by the Issuer pursuant to, and as described in, Sections 3 and 4 of this Disclosure Agreement.

“Beneficial Owner” shall mean any person which has or shares the power, directly or indirectly, to make investment decisions concerning ownership of any 2024 Series M Bonds (including persons holding Bonds through nominees, depositories or other intermediaries).

“Disclosure Representative” shall mean the Treasurer of the Issuer or his or her designee, or such other officer or employee as the Issuer shall designate in writing to the Trustee from time to time.

“Dissemination Agent” shall mean U.S. Bank Trust Company, National Association, acting in its capacity as Dissemination Agent hereunder, or any successor Dissemination Agent designated in writing by the Issuer and which has filed with the Trustee a written acceptance of such designation.

“EMMA” shall mean the MSRB’s Electronic Municipal Market Access system.

“Financial Obligation” shall mean, for purposes of the Listed Events set out in Section 5(a)(15) and Section 5(a)(16), a (i) debt obligation; (ii) derivative instrument entered into in connection with, or pledged as security or a source of payment for, an existing or planned debt obligation; or (iii) guarantee of (i) or (ii). The term “Financial Obligation” shall not include municipal securities (as defined in the Securities Exchange Act of 1934, as amended) as to which a final official statement (as defined in the Rule) has been provided to the MSRB consistent with the Rule.

“Listed Events” shall mean any of the events listed in Section 5(a) of this Disclosure Agreement.

“MSRB” shall mean the Municipal Securities Rulemaking Board.

“Participating Underwriters” shall mean any of the original underwriters of the 2024 Series M Bonds required to comply with the Rule in connection with offering of the 2024 Series M Bonds.

“Repository” shall mean the MSRB through EMMA or any other entity or system designated or authorized by the Securities and Exchange Commission to receive reports pursuant to the Rule.

“Rule” shall mean Rule 15c2-12(b)(5) adopted by the Securities and Exchange Commission under the Securities Exchange Act of 1934, as the same may be amended from time to time.

“State” shall mean the State of California.

SECTION 3. Provision of Annual Reports.

(a) The Issuer shall, or shall cause the Dissemination Agent to, not later than one hundred eighty (180) days after the end of the Issuer’s fiscal year (presently December 31), commencing with the report for the 2024 Fiscal Year, provide to each Repository an Annual Report which is consistent with the requirements of Section 4 of this Disclosure Agreement. The Annual Report may be submitted as a single document or as separate documents comprising a package, and may include by reference other information as provided in Section 4 of this Disclosure Agreement; provided that the audited financial statements of the Issuer may be submitted separately from the balance of the Annual Report and later than the date required above for the filing of the Annual Report if they are not available by that date. If the fiscal year changes for the Issuer, the Issuer shall give notice of such change in the same manner as for a Listed Event under Section 5 hereof.

(b) Not later than fifteen (15) Business Days prior to the dates specified in subsection (a) for providing the Annual Report to each Repository, the Issuer shall provide its respective Annual Report to the Dissemination Agent. If by such date, the Dissemination Agent has not received a copy of the Annual Report from the Issuer, the Dissemination Agent shall contact the Issuer to determine if the Issuer is in compliance with the first sentence of this subsection (b).

(c) If the Dissemination Agent is unable to verify that an Annual Report of the Issuer has been provided to each Repository by the date required in subsection (a), the Dissemination Agent shall send a notice to each Repository and the MSRB (if the MSRB is not a Repository) in substantially the form attached as Exhibit A.

(d) The Dissemination Agent shall:

(1) determine each year prior to the date for providing the Annual Report the name and address of each Repository and then-applicable rules and procedures for filing the Annual Report with each Repository, if any; and

(2) file a report with the Issuer certifying that the Annual Report has been provided pursuant to this Disclosure Agreement, stating the date it was provided and listing each Repository to which it was provided.

SECTION 4. Content of Annual Reports.

(a) The Issuer’s Annual Report shall contain or include by reference the following:

(1) The audited financial statements of the Issuer for the prior fiscal year, prepared in accordance with generally accepted accounting principles as promulgated to apply to governmental entities from time to time by the Governmental Accounting Standards Board and where not in conflict with the Financial Accounting Standards Board (“FASB”) pronouncements or accounting principles prescribed by FASB. If the Issuer’s audited financial statements are not available by the time the Annual Report is required to be filed pursuant to Section 3(a), the

Annual Report shall contain unaudited financial statements, and the audited financial statements shall be filed in the same manner as the Annual Report when they become available.

(2) An update of the following types of information contained in Appendix A to the official statement, dated April 9, 2024 and related to the 2024 Series M Bonds:

(i) The table entitled “Power Supply Resources.”

(ii) The table entitled “Projected Requirements and Resources to Meet Load Requirements.”

(iii) The table entitled “Average Class Rates” (to the extent such table relates to rates and revenues of the Issuer).

(iv) The table entitled “Selected Operating Data.”

(v) The table entitled “Unconsolidated Financial Data.”

(vi) The balance in the Decommissioning Trust Fund, the current estimate of decommissioning costs, the decommissioning costs to date, and the annual contribution level to the Decommissioning Trust Fund, all relating to the Rancho Seco Nuclear Power Plant.

(vii) The table entitled “Estimated Capital Requirements.”

(b) Any or all of the items listed above may be included by specific reference to other documents, including official statements of debt issues of the Issuer or public entities related thereto, which have been submitted to each Repository or the Securities and Exchange Commission. If the document included by reference is a final official statement, it must be available from the MSRB. The Issuer shall clearly identify each such other document so included by reference.

SECTION 5. Reporting of Listed Events.

(a) Pursuant to the provisions of this Section 5, the Issuer shall give, or cause to be given, notice of the occurrence of any of the following events with respect to the 2024 Series M Bonds not later than ten (10) business days after the occurrence of the event:

(1) principal and interest payment delinquencies;

(2) non-payment related defaults, if material;

(3) unscheduled draws on any applicable debt service reserves reflecting financial difficulties;

(4) unscheduled draws on credit enhancement reflecting financial difficulties;

(5) substitution of credit or liquidity providers, or their failure to perform;

(6) adverse tax opinions, the issuance by the Internal Revenue Service of proposed or final determinations of taxability, Notices of Proposed Issue (IRS Form 5701 TEB) or other material notices or determinations with respect to the tax status of the 2024 Series M Bonds or other material events adversely affecting the tax status of the 2024 Series M Bonds;

- (7) modifications to rights of Bondholders, if material;
- (8) bond calls, if material, and tender offers;
- (9) defeasances;
- (10) release, substitution or sale of property securing repayment of the 2024 Series M Bonds, if material;
- (11) rating changes;
- (12) bankruptcy, insolvency, receivership or similar event of the Issuer;
- (13) the consummation of a merger, consolidation, or acquisition involving the Issuer or the sale of all or substantially all of the assets of the Issuer, other than in the ordinary course of business, the entry into a definitive agreement to undertake such an action or the termination of a definitive agreement relating to any such actions, other than pursuant to its terms, if material;
- (14) appointment of a successor or additional trustee or the change of name of the Trustee, if material;
- (15) incurrence of a Financial Obligation of the Issuer, if material, or agreement to covenants, events of default, remedies, priority rights, or other similar terms of a Financial Obligation of the Issuer, any of which affect Bondholders, if material; and
- (16) default, event of acceleration, termination event, modification of terms, or other similar events under the terms of a Financial Obligation of the Issuer, any of which reflect financial difficulties.

(b) For the purpose of the event identified in Section 5(a)(12), the event is considered to occur when any of the following occur: the appointment of a receiver, fiscal agent or similar officer for the Issuer in a proceeding under the U.S. Bankruptcy Code or in any other proceeding under state or federal law in which a court or governmental authority has assumed jurisdiction over substantially all of the assets or business of the Issuer, or if such jurisdiction has been assumed by leaving the existing governmental body and officials or officers in possession but subject to the supervision and orders of a court or governmental authority, or the entry of an order confirming a plan of reorganization, arrangement or liquidation by a court or governmental authority having supervision or jurisdiction over substantially all of the assets or business of the Issuer.

(c) Whenever the Issuer obtains knowledge of the occurrence of a Listed Event, the Issuer shall as soon as possible determine if such event is required to be reported pursuant to this Section 5.

(d) If the Issuer has determined that such event is required to be reported pursuant to this Section 5, the Issuer shall promptly notify the Dissemination Agent in writing. Such notice shall instruct the Dissemination Agent to report the occurrence pursuant to subsection (e).

(e) If the Dissemination Agent has been instructed by the Issuer to report the occurrence of a Listed Event, the Dissemination Agent shall file a notice of such occurrence with the MSRB (if the MSRB is not a Repository) and each Repository.

SECTION 6. Termination of Reporting Obligation. The obligations of the Issuer and the Dissemination Agent under this Disclosure Agreement shall terminate upon the legal defeasance, prior redemption or payment in full of all of the 2024 Series M Bonds. If such termination occurs prior to the final maturity of the 2024 Series M Bonds, the Issuer shall give notice of such termination in the same manner as for a Listed Event under Section 5.

SECTION 7. Dissemination Agent; Filings.

(a) The Issuer may, from time to time, appoint or engage a Dissemination Agent to assist it in carrying out its obligations under this Disclosure Agreement, and may discharge any such Dissemination Agent, with or without appointing a successor Dissemination Agent. The Dissemination Agent shall not be responsible in any manner for the content of any notice or report prepared by the Issuer pursuant to this Disclosure Agreement. If at any time there is not any other designated Dissemination Agent, the Issuer shall be the Dissemination Agent. The initial Dissemination Agent shall be U.S. Bank Trust Company, National Association.

(b) Unless and until one or more different or additional Repositories are designated or authorized by the Securities and Exchange Commission, all filings with a Repository which are required by this Disclosure Agreement shall be filed with the MSRB through EMMA and shall be in an electronic format and accompanied by such identifying information as prescribed by the MSRB in accordance with the Rule.

SECTION 8. Amendment; Waiver. Notwithstanding any other provision of this Disclosure Agreement, the Issuer and the Dissemination Agent may amend this Disclosure Agreement, and any provision of this Disclosure Agreement may be waived, provided that the following conditions are satisfied:

(a) If the amendment or waiver relates to the provisions of Sections 3(a), 4, or 5(a), it may only be made in connection with a change in circumstances that arises from a change in legal requirements, change in law, or change in the identity, nature or status of an obligated person with respect to the 2024 Series M Bonds, or the type of business conducted;

(b) The undertaking, as amended or taking into account such waiver, would, in the opinion of nationally recognized bond counsel, have complied with the requirements of the Rule at the time of the original issuance of the 2024 Series M Bonds, after taking into account any amendments or interpretations of the Rule, as well as any change in circumstances; and

(c) The amendment or waiver either (1) is approved by the Holders of 60% of the 2024 Series M Bonds, or (2) does not, in the opinion of nationally recognized bond counsel, materially impair the interests of the Holders or Beneficial Owners of the 2024 Series M Bonds.

In the event of any amendment or waiver of a provision of this Disclosure Agreement, the Issuer shall describe such amendment in its next respective Annual Report, and shall include, as applicable, a narrative explanation of the reason for the amendment or waiver and its impact on the type (or, in the case of a change of accounting principles from those described in Section 4(a)(1), on the presentation) of financial information or operating data being presented by the Issuer. In addition, if the amendment relates to the accounting principles to be followed in preparing financial statements, (1) notice of such change shall be given in the same manner as for a Listed Event under Section 5, and (2) the Annual Report for the year in which the change is made should present a comparison (in narrative form and also, if feasible, in quantitative form) between the financial statements as prepared on the basis of the new accounting principles and those prepared on the basis of the former accounting principles.

SECTION 9. Additional Information. Nothing in this Disclosure Agreement shall be deemed to prevent the Issuer from disseminating any other information, using the means of dissemination set forth in this Disclosure Agreement or any other means of communication, or including any other information in any Annual Report or notice of occurrence of a Listed Event, in addition to that which is required by this Disclosure Agreement. If the Issuer chooses to include any information in any Annual Report or notice of occurrence of a Listed Event in addition to that which is specifically required by this Disclosure Agreement, the Issuer shall have no obligation under this Disclosure Agreement to update such information or include it in any future Annual Report or notice of occurrence of a Listed Event.

SECTION 10. Default. In the event of a failure of the Issuer or the Trustee to comply with any provision of this Disclosure Agreement, the Trustee shall, at the request of any Participating Underwriters or the Holders of at least 25% aggregate principal amount of Outstanding Bonds and upon being indemnified to its satisfaction from and against any costs, liability, expenses and fees of the Trustee, including, without limitation fees and expenses of its attorneys, or any Holder or Beneficial Owner of the 2024 Series M Bonds may take such actions as may be necessary and appropriate, including seeking mandate or specific performance by court order, to cause the Issuer or the Dissemination Agent, as the case may be, to comply with its obligations under this Disclosure Agreement. A default under this Disclosure Agreement shall not be deemed an Event of Default under the Resolution, and the sole remedy under this Disclosure Agreement in the event of any failure of the Issuer or the Dissemination Agent to comply with this Disclosure Agreement shall be an action to compel performance.

SECTION 11. Duties, Immunities and Liabilities of Dissemination Agent. The Dissemination Agent shall have only such duties as are specifically set forth in this Disclosure Agreement, and the Issuer agrees to indemnify and save the Dissemination Agent, its officers, directors, employees and agents, harmless against any loss, expense and liabilities which it may incur arising out of or in the exercise or performance of its powers and duties hereunder, including the costs and expenses (including attorneys' fees) of defending against any claim of liability, but excluding liabilities due to the Dissemination Agent's negligence or willful misconduct. The Dissemination Agent shall have only such duties as are specifically set forth in this Disclosure Agreement and no implied duties for obligation shall be read into this Disclosure Agreement against the Dissemination Agent. The Dissemination Agent has no power to enforce nonperformance on the part of the Issuer. The Dissemination Agent shall be paid compensation by the Issuer for its services provided hereunder in accordance with its schedule of fees provided to the Issuer and all expenses, legal fees and costs of the Dissemination Agent made or incurred by the Dissemination Agent in the performance of its duties hereunder. The obligations of the Issuer under this Section shall survive resignation or removal of the Dissemination Agent and payment of the 2024 Series M Bonds.

SECTION 12. Notices. Any notices or communications to or among any of the parties to this Disclosure Agreement may be given as follows:

To the Issuer:	Sacramento Municipal Utility District 6201 S Street, MS B405 Sacramento, California 95817 Attention: Treasurer Telephone: (916) 732-6509 Fax: (916) 732-5835

Global Corporate Trust
One California Street, Suite 1000
San Francisco, California 94111
Telephone: (415) 677-3699
Fax: (415) 677-3769

The Issuer, the Dissemination Agent and the Trustee may, by giving written notice hereunder to the other person listed above, designate a different address or telephone number(s) to which subsequent notices or communications should be sent. Unless specifically otherwise required by the context of this Disclosure Agreement, a party may give notice by any form of electronic transmission capable of producing a written record. Each such party shall file with the Trustee and Dissemination Agent information appropriate to receiving such form of electronic transmission.

SECTION 13. Beneficiaries. This Disclosure Agreement shall inure solely to the benefit of the Issuer, the Dissemination Agent, the Participating Underwriters and Holders and Beneficial Owners from time to time of the 2024 Series M Bonds, and shall create no rights in any other person or entity.

SECTION 14. Counterparts. This Disclosure Agreement may be executed in several counterparts, each of which shall be an original and all of which shall constitute but one and the same instrument.

SECOND PARTY OPINION

[THIS PAGE INTENTIONALLY LEFT BLANK]

Second Party Opinion

Issuer:	Sacramento Municipal Utility District
Issue Description:	Electric Revenue Bonds, 2024 Series M (Green Bonds) Electric Revenue Refunding Bonds, 2024 Series N-1 (Green Bonds)
Project:	Electric System Improvements
Green Standard:	ICMA Green Bond Principles
Green Categories:	Renewable Energy Green Buildings
Keywords:	Renewables, transmission and distribution, electrification, hydropower, automated metering infrastructure, net zero, carbon-free, decarbonized grid, climate resilience, solar, geothermal, LEED Platinum, California
Par:	\$627,450,000
Evaluation Date:	March 22, 2024

GREEN BONDS DESIGNATION

Kestrel, an Approved Verifier accredited by the Climate Bonds Initiative, conducted an independent external review of the Sacramento Municipal Utility District Electric Revenue Bonds, 2024 Series M (Green Bonds) (the “2024 Series M Bonds”) and Electric Revenue Refunding Bonds, 2024 Series N-1 (Green Bonds) (the “2024 Series N-1 Bonds”) and together, the “2024 Series MN Bonds”) to evaluate conformance with the Green Bond Principles (June 2021 with June 2022 Appendix 1) established by the International Capital Market Association. Our team for this engagement included analysts with experience in sustainability and environmental science.

This Second Party Opinion reflects our review of the uses and allocation of proceeds, oversight, and conformance of the 2024 Series MN Bonds with the Green Bond Principles. In our opinion, the 2024 Series MN Bonds are highly impactful, net zero aligned, conform with the four core components of the Green Bond Principles, and qualify for Green Bonds designation.

ABOUT THE ISSUER

The Sacramento Municipal Utility District (“SMUD”) is a community-owned, not-for-profit electric utility in Sacramento, California. SMUD has served Sacramento for over 75 years, is the sixth-largest community owned electric utility in the US, and provides electricity to a service area of 1.5 million people.¹

¹ “Company information,” SMUD, accessed March 14, 2024, <https://www.smud.org/en/Corporate/About-us/Company-Information>.

Approximately 15% on average of SMUD’s annual retail energy requirements is met by the Upper American River Project, an approximately 685-megawatt hydroelectric system in the Sierra Nevada mountains west of Lake Tahoe. The system consists of eight small reservoirs and three relatively large storage reservoirs (Union Valley, Loon Lake and Ice House). Project facilities also include eight tunnels with a combined length of over 26 miles and eight powerhouses containing 11 turbines. In addition to carbon-free energy generated through the Upper American River Project, SMUD also has gas-fired power plants, ownership interests in approximately 2 MW of solar photovoltaic generating facilities and over 200 MW of wind-powered generating facilities, and 4.45 MW of battery storage facilities.

As the first California utility to receive more than 20% of its energy from renewable sources, SMUD has established renewable energy and carbon emission reduction goals that are ahead of and more aggressive than California state mandates. As of 2022, SMUD sourced approximately 50% of energy from clean energy sources.² In April 2021, the SMUD Board of Directors approved the Zero Carbon Plan, a roadmap to eliminate³ SMUD continues to meet and exceed decarbonization targets included in its Zero Carbon Plan, adding 1,000 MW of renewable energy sources between 2010-2023, with an additional 1,500 MW of renewables in various stages of planning and development as of 2024.⁴

Other significant sustainability objectives laid out in SMUD strategic planning documents include:

- Expand regional transportation and electrification of buildings;
- Test emerging technologies such as vehicle-to-grid technology, carbon capture and storage, clean alternative fuels, long duration energy storage, and “virtual power plants” intended to aggregate distributed energy resources to improve resilience of the grid; and
- Support equitable access to electrification projects, including through investments in and outreach to under-resourced and low-income communities.

Within its service area, SMUD provides financial incentives, loans, energy audits and education, to facilitate advancements in building electrification, energy efficiency, and renewable energy. One of SMUD’s most successful energy efficiency programs is Sacramento Shade, a free program that has delivered more than 600,000 shade trees to local homes and businesses since 1990.

Customer incentive programs to promote renewable energy resources have allowed over 50,000 residential and commercial customers, or approximately 8% of SMUD’s customer base, to invest in solar installations and over 1,500 to invest in battery storage. These assets constitute roughly 360 MW of solar and 10 MW of storage, and represent meaningful progress toward goals in the Zero Carbon Plan. SMUD also maintains a voluntary Greenergy® program, which provides customers with the option to receive electricity from 100% renewable resources.

ALIGNMENT TO GREEN STANDARDS⁵

Use of Proceeds

The 2024 Series MN Bonds finance and refinance improvements to generation, transmission and distribution infrastructure. The projects improve efficiency and reliability of the electric system and support SMUD's initiatives to decarbonize the electrical grid. The improvements are eligible projects as defined by the Green Bond Principles in the project categories of *Renewable Energy* and *Green Buildings*.

Overview of Capital Improvement Projects

The financed and refinanced projects directly support SMUD's ambitious roadmap to eliminate carbon emissions from electricity production by 2030. All projects, including substations, transformers, cable and pole replacements, generation projects, and other infrastructure upgrades, are designed to support the rapid transformation of the electrical grid necessary to meet decarbonization targets. The 2024 Series M Bonds provide new money and repay commercial paper notes. The 2024 Series N-1 Bonds refund 2009 Series V Bonds and 2010 Series W Bonds. An overview of allocation of proceeds is provided in Appendix B. New money and refunded capital projects are diverse and fall under the following general categories:

- **Generation Facilities:** Capital projects to support the Upper American River Project, consisting of 11 reservoirs and 8 hydroelectric generation facilities, including dam safety compliance activities;
- **Transmission and Distribution Infrastructure:** Replacing aging equipment, such as transformers, switchgear, cables, and poles; construction and upgrades to substations, including replacement of substation assets such as circuit breakers, transformers, and switchgear; design and installation of meters, the downtown network system, and telecommunication systems for relaying critical substation information;
- **Grid Modernization and Control Systems:** Upgrades to energy control facilities, automated metering infrastructure projects such as extension of fiber-optic cable, grid motorized switches and line sensor upgrades, improvements to distributed energy management systems, and replacement of telephone landline infrastructure;
- **Facilities Projects:** Construction and renovation of SMUD facilities, including operations centers, office buildings, and work yards; software upgrades; and recreational facility improvements.

Several capital improvements have significant environmental benefits and are highlighted below.

Hydroelectric Generation: The 2024 Series MN Bonds finance projects that modernize and extend the useful life of hydropower generation facilities at the Upper American River Project ("UARP"), which constitute over 650-MW of SMUD's carbon-free energy mix. The 2024 Series M Bonds finance projects such as modernization of generator controls at Jaybird Powerhouse, an approximately 160-MW hydroelectric plant, and fire protection at Loon Lake Powerhouse, the uppermost UARP major storage reservoir. Projects also include assessment and upgrades to the hydrological and meteorological (hydromet) system, which monitors water level and flow of reservoirs for the hydropower plants.

⁵ Green Bonds are any type of debt instrument where the proceeds will be exclusively applied to finance or refinance eligible Green Projects which are aligned with the four core components of ICMA Green Bond Principles.

Hydropower is a clean alternative to fossil fuel power generation and thus supports climate change mitigation. Although some hydropower systems have been associated with negative environmental impacts, SMUD ensures that the system mitigates risks to surrounding natural lands and wildlife through monitoring and implementation of habitat conservation plans.

Substation and Transmission System Upgrades: The 2024 Series M Bonds finance projects including construction of Substation H to support reliability and load growth, and the Elverta Substation Expansion project which will improve system reliability and redundancy, as well as enable connection of over 800 MW of renewable resources. Grid infrastructure is critical to support anticipated load growth due to electrification of building and transportation sectors.

Automated Metering Infrastructure (“AMI”): The 2024 Series N-1 Bonds refund bonds that financed a portion of the SmartSacramento Project, a systemwide deployment of AMI, including 617,000 smart meters throughout the entire service territory, and implementation of a software platform for automated demand-response management. SmartSacramento projects also included deployment of automation on certain SMUD distribution circuits and substations, advanced energy management control systems, and electric and hybrid electric vehicle charging stations.

AMI facilitates real-time data on customer energy consumption, which reduces operational costs, improves reliability, and enables demand response management, as well as energy efficiency and clean energy incentive programs. AMI is a cornerstone of a smart, modernized grid.

East Campus Operations Center: The 2024 Series N-1 Bonds refund bonds that financed construction of the East Campus Operations Center in Sacramento, California. The project was completed in 2013 and achieved LEED Platinum and is Zero Net Energy. The facility consolidated operational functions to a single campus and includes fuel, maintenance, and equipment repair shops, open storage space, a warehouse, office space, and fleet parking. The facility includes six buildings with a total of 351,000 square feet, and has many advanced sustainability features, including a thermal energy storage system, ground source heat pump, water side economizers at each building, and 1.1 MW of solar canopies over parking.

Grid Transformation: Electrification and Renewables

Electrification of vehicles and buildings and addition of intermittent renewables to the resource mix create new demands on transmission and distribution infrastructure. Upgrades to this infrastructure are vital to the transition to a carbon-free grid by 2030. According to the National Renewable Energy Laboratory, transmission capacity needs nationwide are between two and three times the capacity installed in 2022 and require between 1,400 and 10,100 miles of new high-capacity lines per year. Investment needed for the entire US power system is estimated at \$330 billion to \$740 billion, a significant portion of which is transmission and distribution infrastructure.⁶

Infrastructure financed by the 2024 Series MN Bonds aligns with long-term strategic plans to improve flexibility and accommodate this shift to distributed (residential) and utility-scale renewables and storage. It is also designed for major shifts in demand expected as a result of large-scale electrification that is also necessary to meet emission reduction targets.

⁶ Paul Denholm et al., “Examining Supply-Side Options to Achieve 100% Clean Electricity by 2035,” National Renewable Energy Laboratory, 2022, <https://www.nrel.gov/docs/fy22osti/81644.pdf>.

Net Zero Alignment

The 2024 Series MN Bonds enable decarbonization of the power sector and advance SMUD's goal to be 100% carbon-free by 2030. SMUD's goals exceed statewide renewable portfolio standard targets of 60% renewables by 2030 and 100% carbon-free by 2045. Electricity production is the third highest source of greenhouse gas emissions in California and providing renewable and carbon-free energy through local utilities is critical to reducing these emissions. The bond-financed projects exemplify SMUD's commitment to address climate change and lead with ambitious emission reduction targets.

Advancing the Just Transition to a Decarbonized Economy

The 2024 Series MN Bonds also finance activities which align with the just transition, characterized by the equitable inclusion and accommodation of all individuals, with a special focus on disadvantaged groups who may be directly or indirectly affected by the structural changes necessary for the transition to a low-carbon economy. As utilities rapidly transition to clean and renewable energy resources and overhaul infrastructure to accommodate the new resource mix, communities are at risk of being left behind in the transition.

SMUD is facilitating a just transition by prioritizing equity in resource planning, addressing disparities in under-resourced communities, and by involving diverse stakeholders and communities in the net zero vision. SMUD developed a Sustainable Communities Resource Priorities Map to identify priority communities for investment, and co-developed a Community Impact Plan with local community-based organizations which focuses on serving hard-to-reach customers. SMUD has also established metrics for energy efficiency improvements in low-income households, which it tracks on a monthly basis.

Process for Project Evaluation and Selection

The 2024 Series MN Bonds advance (i) California statewide GHG emission reduction goals, (ii) SMUD's adopted Integrated Resource Plan, and (iii) decarbonization targets set out in the 2030 Zero Carbon Plan. The 2024 Series MN Bonds also align with SMUD's Environmental Sustainability Roadmap.

SMUD has an adopted Integrated Resource Plan ("IRP") that is the primary planning document for long term priorities and strategies. As required by state law, the IRP must be certified by the California Public Utilities Commission every two years. The IRP includes information about how SMUD will meet statewide requirements for reducing greenhouse gas emissions while ensuring grid reliability and competitive rates. The 2019 IRP informed the development of the 2030 Zero Carbon Plan, both of which established the need for and prioritization of these bond-financed projects.

Management of Proceeds

Proceeds from the 2024 Series M Bonds finance new capital needs, repay commercial paper notes that financed prior and in-progress capital improvements, and pay costs of issuance. Prior to repayment of the commercial paper balance, a portion of the 2024 Series M Bond proceeds may be held in temporary and conservative short-term investments. The remaining new money portion of the 2024 Series M Bond proceeds may be used immediately at closing.

The 2024 Series N-1 Bonds refund the Electric Revenue Bonds, 2009 Series V and Electric Revenue Bonds, 2010 Series W and pay costs of issuance. A portion of the proceeds will be used immediately at closing to defease the 2009 Series V Bonds, and the remaining proceeds are expected to be held in escrow, invested

in conservative short-term investments, and subsequently used to redeem the 2010 Series W Bonds on May 15, 2024. Treasury & Risk Management is responsible for overseeing the allocation of proceeds.

Reporting

SMUD provides multiple forms of ongoing financial disclosures and reporting on progress toward decarbonization goals. Reports include annual disclosure of emissions from energy delivered on the grid, annual utility-wide reports, continuing financial disclosures, and an update report from Kestrel pertaining to the Green Bonds.

- As required by the California Energy Commission Power Source Disclosure Program, SMUD annually provides a power content label report that includes greenhouse gas emission data from all energy sources used for retail sales. These disclosures are made available on the California Energy Commission website: energy.ca.gov/programs-and-topics/programs/power-source-disclosure-program.
- As required by the California Energy Commission, SMUD submits annual reports that describe the status of progress toward the Renewable Portfolio Standard Plan.
- SMUD produces annual reports that highlight key impacts and progress toward decarbonization and customer service goals. These reports are made available on the SMUD website: smud.org/en/Corporate/About-us/Company-Information/Reports-and-Statements.
- SMUD will submit continuing financial disclosures to the Municipal Securities Rulemaking Board (“MSRB”) as long as the 2024 Series MN Bonds are outstanding, as well as reports in the event of material developments. This reporting will be done annually on the Electronic Municipal Market Access (“EMMA”) system.
- Kestrel will also provide one update report on the Bonds within 12-24 months of issuance. This report is expected to be produced after all proceeds have been spent and will include confirmation of continued alignment with the Green Bond Principles and relevant updates on financed projects including allocation of proceeds.

ALIGNMENT WITH UN SDGs

The 2024 Series MN Bonds support and advance the vision of the United Nations Sustainable Development Goals (“UN SDGs”), including:

Affordable and Clean Energy (Targets 7.1, 7.2)
Providing customers with reliable and clean energy; and transmission infrastructure directly connected to renewable generation facilities and necessary for delivering clean energy to customers

Industry, Innovation and Infrastructure (Targets 9.1, 9.4)
Construction and retrofit of infrastructure to reduce wildfire risk and improve resilience; Installation of infrastructure to increase flexibility of the grid in alignment with large-scale electrification and deployment of renewables

Sustainable Cities and Communities (Target 11.6)
Comprehensive upgrades to grid infrastructure to maintain service reliability with electrification of buildings and vehicles

Climate Action (Target 13.2)

Adoption of and continued implementation of projects to reach long-term climate action targets

Full text of the Targets for these Goals is available in Appendix A, with additional information available on the United Nations website: un.org/sustainabledevelopment

CONCLUSION

Based on our independent external review, the Sacramento Municipal Utility District Electric Revenue Bonds, 2024 Series M (Green Bonds) and the Electric Revenue Refunding Bonds, 2024 Series N-1 (Green Bonds) are highly impactful, net zero aligned, conform, in all material respects, with the Green Bond Principles (2021) and are in complete alignment with two eligible project categories: *Green Buildings* and *Renewable Energy*. The 2024 Series MN Bonds advance SMUD’s ambitious decarbonization goals.

About

Kestrel Sustainability Intelligence™ for municipal markets helps set the market standard for sustainable finance. We do this through verification and our comprehensive Analysis and Scores.

Kestrel is a leading provider of external reviews for green, social and sustainability bond transactions. We are qualified to evaluate corporate and municipal bonds in all asset classes worldwide for conformance with international green and social bond standards.

Disclaimer

This Opinion aims to explain how and why the discussed financing meets the ICMA Green Bond Principles based on the information that was provided by SMUD or made publicly available by SMUD and relied upon by Kestrel only during the time of this engagement (March 2024), and only for purposes of providing this Opinion.

We have relied on information obtained from sources believed to be reliable, and assumed the information to be accurate and complete. However, Kestrel can make no warranty, express or implied, nor can we guarantee the accuracy, comprehensive nature, merchantability, or fitness for a particular purpose of the information we were provided or obtained.

By providing this Opinion, Kestrel is neither addressing nor certifying the credit risk, liquidity risk, market value risk or price volatility of the projects financed by the Green Bonds. It was beyond Kestrel's scope of work to review for regulatory compliance, and no surveys or site visits were conducted by us. Furthermore, we are not responsible for surveillance, monitoring, or implementation of the project, or use of proceeds.

The Opinion delivered by Kestrel is for informational purposes only, is current as of the date of issuance, and does not address financial performance of the Green Bonds or the effectiveness of allocation of its proceeds. This Opinion does not make any assessment of the creditworthiness of SMUD, nor its ability to pay principal and interest when due. This Opinion does not address the suitability of a Bond as an investment, and contains no offer, solicitation, endorsement of the Bonds nor any recommendation to buy, sell or hold the Bonds. Kestrel accepts no liability for direct, indirect, special, punitive, consequential or any other damages (including lost profits), for any consequences when third parties use this Opinion either to make investment decisions or to undertake any other business transactions.

This Opinion may not be altered without the written consent of Kestrel. Kestrel reserves the right to revoke or withdraw this Opinion at any time. Kestrel certifies that there is no affiliation, involvement, financial or non-financial interest in SMUD or the projects discussed. We are 100% independent. Language in the offering disclosure supersedes any language included in this Second Party Opinion.

Use of the United Nations Sustainable Development Goal (SDG) logo and icons does not imply United Nations endorsement of the products, services, or bond-financed activities. The logo and icons are not being used for promotion or financial gain. Rather, use of the logo and icons is primarily illustrative, to communicate SDG-related activities.

Appendix A.

UN SDG TARGET DEFINITIONS

Target 7.1

By 2030, ensure universal access to affordable, reliable and modern energy services

Target 7.2

By 2030, increase the share of renewable energy in the global energy mix

Target 9.1

Develop quality, reliable, sustainable and resilient infrastructure, including regional and transborder infrastructure, to support economic development and human well-being, with a focus on affordable and equitable access for all

Target 9.4

By 2030, upgrade infrastructure and retrofit industries to make them sustainable, with increased resource-use efficiency and greater adoption of clean and environmentally sound technologies and industrial processes, with all countries taking action in accordance with their respective capabilities

Target 11.6

By 2030, reduce the adverse per capita environmental impact of cities, including paying special attention to air quality and municipal and other waste management

Target 13.2

Integrate climate change measures into national policies, strategies and planning

Appendix B.

CAPITAL IMPROVEMENTS

Table 1. Use of proceeds from new money, repaid commercial paper, and refunded 2009 Series V and 2010 Series W Bonds.

Category	Amount*
Distribution System	\$381,021,672
Transmission System	\$68,373,816
UARP Licensing	\$31,299,102
Generation Plant Improvements	\$41,788,836
Automated Metering Infrastructure	\$52,962,370
Corporate Yard	\$17,682,124
Facilities Improvement	\$51,842,786
ERP/Systems Development	\$47,386,174
Customer Metering Services	\$10,515,284
Telecom Projects	\$5,317,000
Energy Control System Improvements	\$5,186,863
Vehicles	\$4,459,000
Headquarters Projects	\$1,982,563
Customer Service Improvements	\$1,244,000
Furniture and Equipment	\$158,337

*Includes major project categories and shorter-lived assets with smaller spending amounts. Provided for general information purposes only.
