

Commercial SolarShares® Historical and Prospective Product Content Label¹

Commercial SolarShares is sold by matching an estimated percentage of your electricity usage annually. The information provided only applies to the portion of your SMUD bill covered by SolarShares. In 2023, Commercial SolarShares was made up of the following new renewable resources averaged annually.

Green-e® Energy Certified New Renewables² in Commercial SolarShares

	2023 Historical		2024 Prospective	
	%	Generation Location	%	Generation Location
Solar	100%	CA	100%	CA
Total Green-e® Energy Certified New Renewables	100%	CA	100%	CA

1. Prospective figures reflect forecasted renewables. We will report the actual resource mix of the electricity you purchased annually in the form of a Historical Product Content Label. These figures reflect the power delivered to Commercial SolarShares customers in 2023 and the prospective power delivery for 2024.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

* For comparison, the current average mix of resources supplying SMUD in 2023 includes: Eligible Renewable (45.0% (Biomass & Biowaste 3.1%, Geothermal 14.7%, Eligible Hydroelectric 2.0%, Solar 10.9%, Wind 14.4%)), Coal (0.0%), Large Hydroelectric (32.6%), Natural Gas (21.9%), Nuclear (0.3%), Other (0.0%), Unspecified Sources of Power (0.1%). This resource mix was prepared in accordance with CEC energy almanac available at: [SMUD 2023 Power Content Label](#)
