

Sources Slides

Read about the hydrocarbon sources of energy in the *Secondary Energy Infobook*. Create a digital presentation file with six slides. On the first slide, make a title page with the name of the sources of energy. Then answer these questions on the remaining slides:

1. How is these sources of energy created, or formed?
2. What are the top states producing this sources of energy? Describe why these states are top producers instead of other areas of the country.
3. How do we use these sources of energy?
4. What are the advantages and disadvantages of using these sources of energy? How does it affect the environment?
5. Describe special technologies involved in locating, extracting, producing, transporting, or using these resources.

Don't have a computer? Divide a paper plate, large sheet of paper, or poster board into sections to answer the questions and display the information.
