

Complete Energy Solutions

Energy efficient, gas-to-electric conversion and electric vehicle charging solutions for your business

Start saving energy and money for your business!

SMUD understands how energy costs can affect your bottom line. That's why we offer the **Complete Energy Solutions** program: a one-stop-shop to help your business become more energy efficient and reduce your energy bills.

Why should you get started today with Complete Energy Solutions?

1. Easy to participate

We know you have a lot on your plate. Our team will manage the entire process from the moment we walk into your business, and we'll plan our work around your schedule.

2. Lower energy costs

By upgrading to more energy efficient equipment, you can save money on energy bills and reduce your operating costs.

3. Integrated financing options

We'll connect you to financing through our vetted financing partner when we provide your proposal for energy upgrades.

Reduce your energy use with incentives from SMUD

4. Generous incentives

Our incentives cover a significant portion of your project costs. Our financing partners can help you cover the rest, so you have a clear path from installation to equipment payback.

5. Improved resiliency

Cutting energy costs is one way to make your business more resilient in economic downturns. Plus, installing new energy efficient equipment leads to fewer maintenance issues.

6. One-stop shop for future energy savings planning.

Complete Energy Solutions will help you design a long-term plan for deeper energy savings down the road.

Complete Energy Solutions offers the following upgrade options to help your business save energy and money.

Water Heating

- > Reduce energy use with highly efficient heat pump water heaters that require less energy to make hot water
- > Avoid failure of old equipment
- > Improve safety by switching to an electric system that reduces CO exposure and eliminates gas tanks
- > Receive higher incentives for Go Electric projects (gas-to-electric replacements)

Induction Cooktops

- > Improve safety with induction cooktops that are flameless and shut off automatically when pots are removed
- > Reduce exposure to carbon monoxide
- > Speed up cook times with induction hobs that heat up nearly twice as fast as gas and electric coil alternatives
- > Maintain precise control and consistent temperatures

Heating Ventilation and Air Conditioning (HVAC)

- > Improve comfort and air quality
- > Reduce energy use with efficient heat pump HVAC systems
- > Receive higher incentives for Go Electric projects (gas-to-electric replacements)

Refrigeration

- > Reduce energy and maintenance costs
- > Increase efficiency and reduce wasted energy with ECM motors, strip curtains, and glass doors on open display cases
- > Avoid risk of losing valuable inventory due to temperature issues with old equipment

Smart Thermostats

- > Use electricity more efficiently
- > Schedule automatic energy-saving temperatures and control HVAC remotely based on business operation needs
- > Improve comfort by tracking temperature preferences

Electric Vehicle Charging Equipment

- > Attract new customers, support employee use of EVs, and gain a competitive edge
- > Generate revenue through charging fees and advertising

Visit smud.org/ces to learn more and sign up for your free energy assessment. We'll walk through your property, identify energy saving opportunities, and create a personalized proposal for you.

This program is brought to you by SMUD and delivered by TRC and Brighton Energy.
