

Neighborhood SolarShares® Historical and Prospective Product Content Label¹

Neighborhood SolarShares is sold by matching an estimated percentage of your usage annually. The information provided only applies to the portion of your SMUD bill covered by SolarShares. In 2022, Neighborhood SolarShares was made up of the following new renewable resources averaged annually.

Green-e® Energy Eligible New Renewables² in Neighborhood SolarShares

	2022 Historical		2023 Prospective	
	%	Generation Location	%	Generation Location
Solar	100%	CA	100%	CA
Total Green-e® Energy Certified New Renewables	100%	CA	100%	CA

1. Prospective figures reflect forecasted renewables. We will report the actual resource mix of the electricity you purchased annually in the form of a Historical Product Content Label. These figures reflect the power delivered to Neighborhood SolarShares customers in 2022 and the prospective power delivery for 2023.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

* For comparison, the current average mix of resources supplying SMUD in 2022 includes: Eligible Renewable (23.7% (Biomass & Biowaste 1.6%, Geothermal 3.8%, Eligible Hydroelectric 0.8%, Solar 2.8%, Wind 14.7%)), Coal (0%), Large Hydroelectric (25.4%), Natural Gas (45.6%), Nuclear (1.6%), Other (0.1%), Unspecified Sources of Power (3.6%). This resource mix was prepared in accordance with CEC energy almanac available at: [SMUD 2022 Power Content Label](#)

In 2022, the average home in SMUD's territory used approximately 700 kWh per month. [Source: [SMUD's 2022 5-Year Financial Summary](#)]
